

Introduction

While an estimated 2.1 million people live in displacement sites in Somalia<sup>1</sup>, existing information on exact locations and site level vulnerabilities is sparse, and existing assessments have been ad-hoc and unharmonised, resulting in low comparability and verification.

The Detailed Site Assessment (DSA) was triggered in coordination with the Camp Coordination and Camp Management (CCCM) Cluster in order to provide the humanitarian community with up-to-date information on location of internally displaced persons (IDP) sites, the conditions and capacity of the sites and the humanitarian needs of the residents.

Target locations for assessment were selected based on needs identified by the CCCM Cluster

and accessibility for data collection.

A grid pattern approach<sup>2</sup> was applied during data collection to ensure that all IDP sites in the target area were identified. In each site, two key informant (KI) interviews were conducted: one with the site manager or community leader and one with a women's representative to ensure the perspectives of different groups were captured<sup>3</sup>. KI responses were aggregated to give one response per question per site.

This factsheet presents a summary of Daryeel Site profile along with the needs and priorities of IDPs residing in the site. As the data is captured through KIs, findings should be considered indicative only.

Date assessed: **Sep - 2017**

Location map

Assessed IDP sites in Cadaado

Coordinates: Lat. 6.133, Long. 46.642

1.United Nations High Commissioner for Refugees (UNHCR): Protection & Return Monitoring Network (PRMN), September 2017

2.For each target location, the area was divided into 1km<sup>2</sup> grids. Enumerator teams then visited each grid to verify whether an IDP site was present. By visiting all grids, teams were able to determine the total number of sites in each location.

3.Where KI responses were significantly divergent, these were verified with the respective KIs with a higher reliability accorded to the response provided by the site manager or community leader.

## Site Information

Settlement type	Spontaneous site
Estimated number of individuals	3258
Estimated number of households	543
Site capacity reached	Yes
Responsible management agency	Local authority
Date when most site residents arrived	Apr-16
Site owner	Private

## Protection

<b>Number of vulnerable households:</b>	
Female-headed households	150
Child-headed households	0
Elderly individuals <sup>4</sup>	490
Unaccompanied children	0
Individuals with a physical disability	50
Presence of shared community space	No
Presence of separate space for women/girls	No
Presence of child friendly space	No
Public lighting in the site	No
Type of landownership	Informal
Risk of eviction in next three months	No

## WASH

Access to potable water	Yes
<b>Number of latrines in the site:</b>	
Latrines (mixed)	8
Latrines (male)	0
Latrines (female)	8
Access to handwashing facilities	Yes

## Shelter and Non-Food Items (NFI)

<b>Most common shelter types in the site<sup>5</sup>:</b>	
1. Buul	
2. Tent	
3. N/A	
Electricity available in the site	No
Access to a NFI market	No
Average walking time to the nearest NFI market	N/A
Perceived safe access to NFI market	N/A

## Displacement

<b>Estimated number of households per displacement group:</b>	
IDPs	543
Host community/ non-displaced	0
IDP households arrived in the past 3 months	97
<b>Most common areas of origin:</b>	
First area of origin	Galgaduud
Second area of origin	Mudug
Third area of origin	Banadir

## Food Security

Primary source of food	Market purchase
Food distributions	None
Access to a food market	No

## Health and Nutrition

<b>Most common health issue(s) reported in the site:</b>	
1. AWD / Cholera	
2. Malaria	
3. Diphtheria	
Access to healthcare services	No
Average walking time to the nearest health service	N/A
Women give birth in the site	Yes
Access to nutrition services	Yes
Average walking time to the nearest nutrition service	10 minutes
