

Introduction

This multi-sector needs assessment is part of a monthly data collection exercise which aims to gather information about needs and the humanitarian situation inside Syria. The factsheets present information collected in March 2016, referring to the situation in February 2016.

These factsheets present information at the community/village level for each sub-district in Dar'a governorate. In Dar'a City (within Dar'a sub-district), neighbourhood level data has been collected so information is presented at this level*. Selected key indicators for the following sectors are included in the factsheets: displacement, shelter, NFIs, health, food security, WASH, education. The factsheets do not cover the entire range of indicators gathered in the questionnaire.

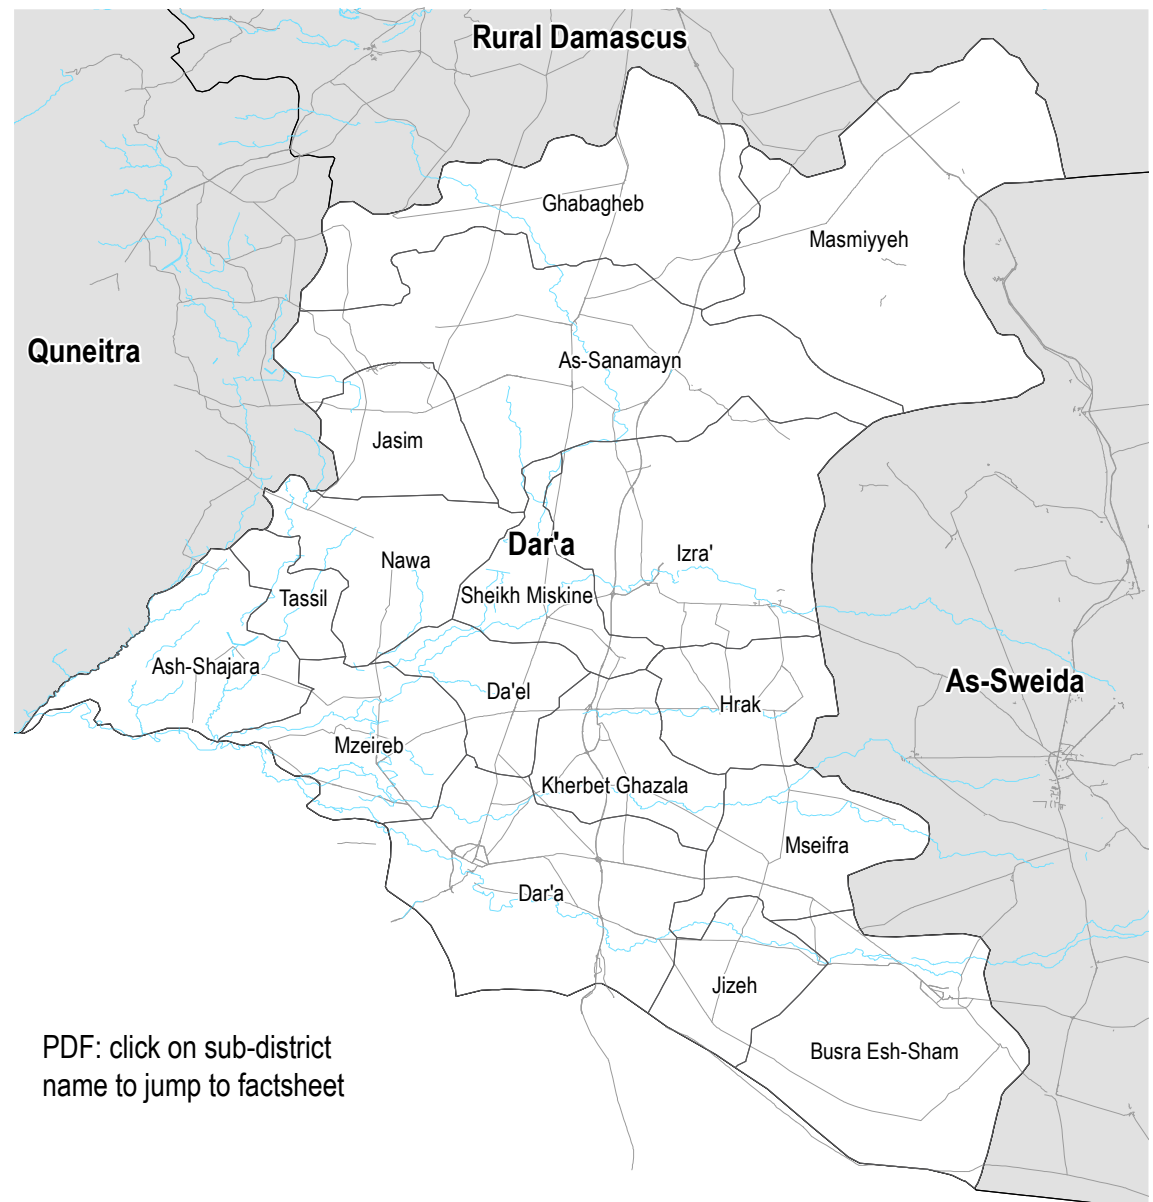

For full visualisation of all indicators collected, please see the SIMAWG Needs Identification Dynamic Reporting Tool, available here: <http://www.reach-info.org/syr/simawg/>

Methodology and limitations

These findings are based on data collected remotely (in Jordan, Lebanon, Kurdistan Region of Iraq and Turkey) from Key Informants residing in their community of origin in Syria.

Information was collected from Key Informants in 79 communities in all 17 sub-districts of Dar'a governorate. For each question asked, confidence levels are assigned based on the Key Informant's area of expertise and knowledge of the sector-specific situation.

For a full description of the methodology, please see the Terms of Reference, available on the [REACH Resource Centre here](#) (link).
