# **Bor Town - Port and Road Monitoring**

Bor South County, Jonglei State, South Sudan

#### **CONTEXT AND METHODOLOGY**

Bor Town is located in Bor South County, situated along the River Nile approximately 190 kilometers north of Juba, and is the capital of Jonglei State. Bor Town was among the epicentres of fighting that broke out in 2013, resulting in the widespread displacement of civilians, which persists to the present. Thousands of civilians remain displaced at protection of civilian sites (PoCs) in Bor Town, in camps across the Nile in Awerial County, and in other sites across South Sudan. Bor Town is also a major transport hub. The Juba-Bor Road and the River Nile both serve as key transit and trade ateries between Juba and Bor, and to other rural areas of Greater Upper Nile.1

To inform humanitarian actors operating in the area, REACH monitors the main bus station and boat port in Bor Town, in order to gather information on departing and arriving households. Data that is collected daily is synthesised into a monthly factsheet to provide an overview of wider movement trends, including push and pull factors, movement intentions, and household demographics.2

The information presented in this factsheet was collected between May 2 and 31, 2022 through face-to-face interviews. In total, 129 departing households (1,051 individuals) and 59 arriving households (380 individuals), that were passing through these two sites were interviewed.<sup>3</sup> Data collection took place Monday to Friday between 8:00 am and 4:30 pm, and thus arrivals or departures that took place outside of these hours were not recorded. As a consequence, the data presented in this factsheet is not representative, but rather indicative of trends

### ARRIVALS TO BOR TOWN

#### **Demographics**

Age and sex of inbound household members:

The average reported size of inbound households was 6.4 individuals. and **54%** of respondents reported travelling as partial families.<sup>3</sup>

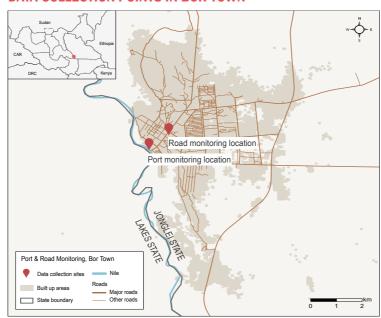

# **Vulnerability and Security**

#### End Notes:

- . "County Profile: Bor South, Jonglei State," Conflict Sensitivity Resource Facility, available online here: https://www.csrf-southsudan.org/county\_profile/bor-south/
- 2. These are indicative trends; REACH does not record all arrivals and departures.
- 3. "Partial" means that not all members were travelling with the interviewed household.
- 4. Percentages do not add up to 100 because respondents were able to select more than one choice.
- 5. Key informants refer to transportation focal points (driver, or another focal point), who give details on the number of individuals, the number of households travelling, as well as other information about the journey. In total, 53 key informants were interviewed, including 27 inbound key informants, and 26 oubound key informants. This methodology is used if the number of households travelling exceeds three and therefore cannot all be interviewed. For more details, please access the Port and Road Monitoring Terms of Reference here.
- 6. Reported presence of services or opportunities is indicative of respondents' perceptions and does not ecessarily reflect improved availability or access.
- '. 10% of inbound households also reported land-related issues as a primary reason for movement.
- 8.8% of inbound households also reported land related issues as a secondary reason for movement.
