*Note: Data, designations and boundaries contained on this map are not warranted to be error-free and do not imply acceptance by the REACH partners, associates, donors mentioned on this map.*

*Note on methodology: this map uses a population density grid to calculate the approximate number of individuals living more than 250 meters from a water point. Each cell represents roughly one square kilometer. Results are not representative and are meant to provide a starting point in identifying neighborhoods that lack adequate water infrastructure.*
