

Humanitarian Situation Overview in Syria (HSOS) September 2019

Priority Need: Shelter - September 2019

Humanitarian Purposes Only
Production date : 07/11/2019

Data source: REACH - Humanitarian Situation Overview of Syria (HSOS)

Priority need questions were 'select up to three' so the percentages across all maps add up to more than 100%.

Priority needs reported are the perceived top 3 priority needs as reported by KIIs within assessed communities and are not necessarily representative of actual priorities.

Annexes detailing the priorities reported by each assessed community are available on request.

Humanitarian Situation Overview in Syria (HSOS) September 2019

SHELTER AND NFI IN NORTHWEST SYRIA (NWS)

5,929 SYP Regional average monthly reported rent price in SYP across assessed communities.¹

468/1,051 Communities reported IDPs being hosted without a tenancy arrangement.

Most commonly reported shelter type for PCP households:⁶

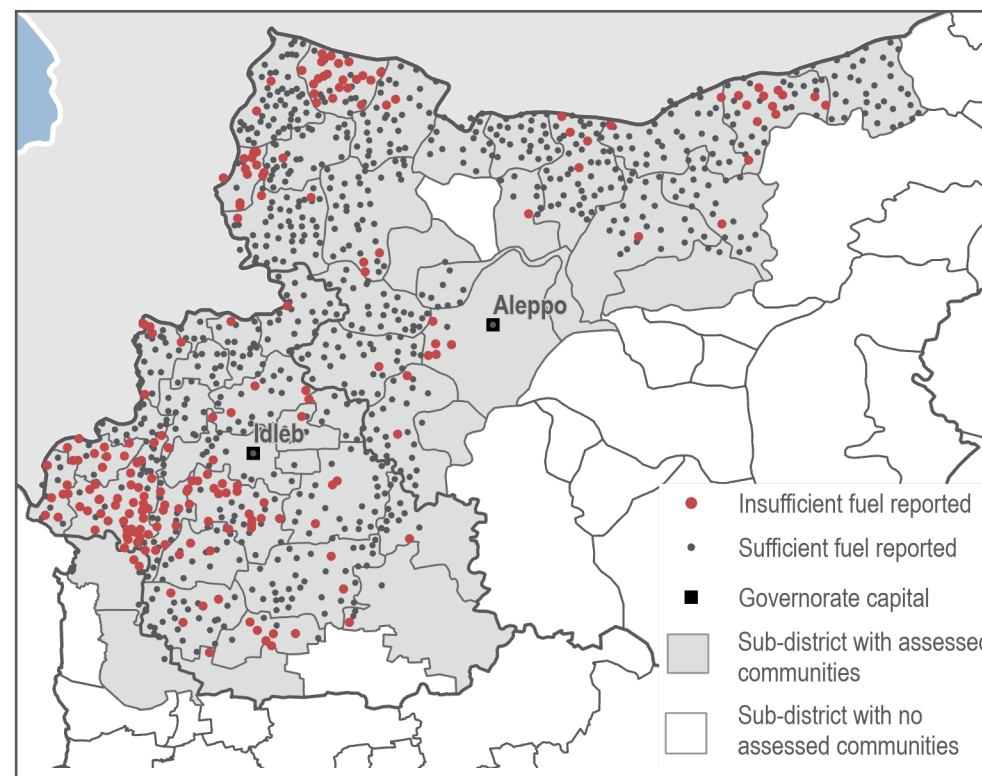

Most commonly reported shelter type for IDP households:⁶

Reported fuel prices (in SYP):^{1,3}

Fuel type (1L):	Regional average price in September 2019:	One month change:	Six month change:
GoS petrol	510	+2%	+21%
GoS diesel	475	+4%	+19%
Manually refined petrol	346	+15%	+15%
Manually refined diesel	290	+8%	+16%
Cooking fuel	8,375	+12%	+12%

Communities that reported insufficient amounts of fuel to meet household needs:⁷

853 communities reported no lack of fuel. Most common strategies to cope with lack of fuel in the remaining **198** assessed communities:^{2,4,5}

Cutting trees to burn	76%
Burning productive assets	47%
Burning furniture not in use	43%
Burning plastics	34%
Burning clothes	21%

Primary source of electricity reported:²

METHODOLOGY

HSOS data collection is conducted through an enumerator network in accessible locations throughout Idleb, northwestern Aleppo and northern Hama governorates. REACH enumerators are based inside Syria and interview Key Informants (KIs) directly in the community about which they are reporting. Where access and security constraints render direct data collection unfeasible, some KI interviews are conducted remotely by REACH field teams. KIs are asked to report at the community level. This factsheet presents information gathered in 1,051 communities. Data was collected during the month of October 2019, and refers to the situation in September 2019.

KIs generally included local council members, Syrian NGO workers, medical professionals, teachers, shop owners and farmers, among others, and are chosen based on their community-level or sector-specific knowledge. In cases where KIs disagree on a certain piece of information, enumerators triangulate the data with secondary sources or select the response provided by the KI with the more relevant sector-specific background. For each question asked, confidence levels are assigned based on the KI's area of expertise and knowledge of the sector-specific situation. The confidence levels associated with each question are presented in the [final dataset](#). The full confidence matrix used to assign confidence levels is available upon request.

Findings are triangulated through secondary sources, including news monitoring and humanitarian reports. Where necessary, follow-up is conducted with enumerators and participants. Findings are indicative rather than representative, and should not be generalised across the region.

ENDNOTES

¹According to an exchange rate of 1 USD = 570 SYP (see [Syria Market Monitoring Dataset September 2019](#)).

² By percentage of communities reporting. ³ 18 items comprise the Survival Minimum Expenditure Basket (SMEB), which represents the minimum culturally adjusted items required to support a 6-person household for a month. SMEB items: Bread, bulgur, chicken, eggs, fresh vegetables, ghee/vegetable oil, red lentils, rice, salt, sugar, tomato paste, bathing soap, laundry/dish soap, sanitary pads, toothpaste, cooking fuel, water trucking, smartphone data, float (other costs).

⁴ Assessed using select multiple questions. ⁵ Not all surveys have answers for every question, in these scenarios the KI or participant will input no answer. When the dataset has no answer for a particular question the reported number of assessed communities will not add up to the total number of communities assessed and percentages will be calculated based on submitted responses. ⁶ Based on KI perception of sufficiency.

About REACH

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT). For more information please visit our website: www.reach-initiative.org. You can contact us directly at: geneva@reach-initiative.org and follow us on Twitter @ [REACH info](#).
