

South Sudan - Food Security and Livelihoods (FSL)

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

February 2023

Overview

The continuation of conflict since December 2013 has created a complex humanitarian crisis in South Sudan; restricting humanitarian access and hindering the flow of information required by aid partners to deliver humanitarian assistance to populations in need. To address information gaps faced by the humanitarian response in South Sudan, REACH employs its Area of Knowledge (AoK) methodology to collect relevant information in hard-to-reach areas to inform humanitarian planning and interventions outside formal settlement sites.

Using the AoK methodology, REACH remotely monitors needs and access to services in the

Greater Upper Nile, Greater Equatoria and Greater Bahr el Ghazal regions. AoK data is collected monthly, through multi-sector interviews with the following typology of key informants (KIs):

- Newly arrived internally displaced persons (IDPs) who have left a hard-to-reach settlement in the last month
- Persons who have been in contact with someone living in a hard-to-reach settlement, or have visited one in the last month (traders, migrants, family members, etc.)
- Persons who remain in a hard-to-reach settlement, contacted through the phone

Selected KIs are purposively sampled and have knowledge from within the last month about a specific settlement in South Sudan, with data collected at the settlement level. About half of settlements assessed have more than one KI reporting on the settlement. In these cases, data is aggregated¹ at the settlement level according to a weighting mechanism, which can be found in the [Terms of Reference \(ToRs\)](#).

All percentages presented in this factsheet, unless otherwise specified, represent the proportion of settlements assessed with that specific response.

The findings presented in this factsheet are indicative of the broad food security and livelihood trends in

assessed settlements in February 2023, and are not statistically generalisable.

Assessment Coverage

2185 Key informants interviewed

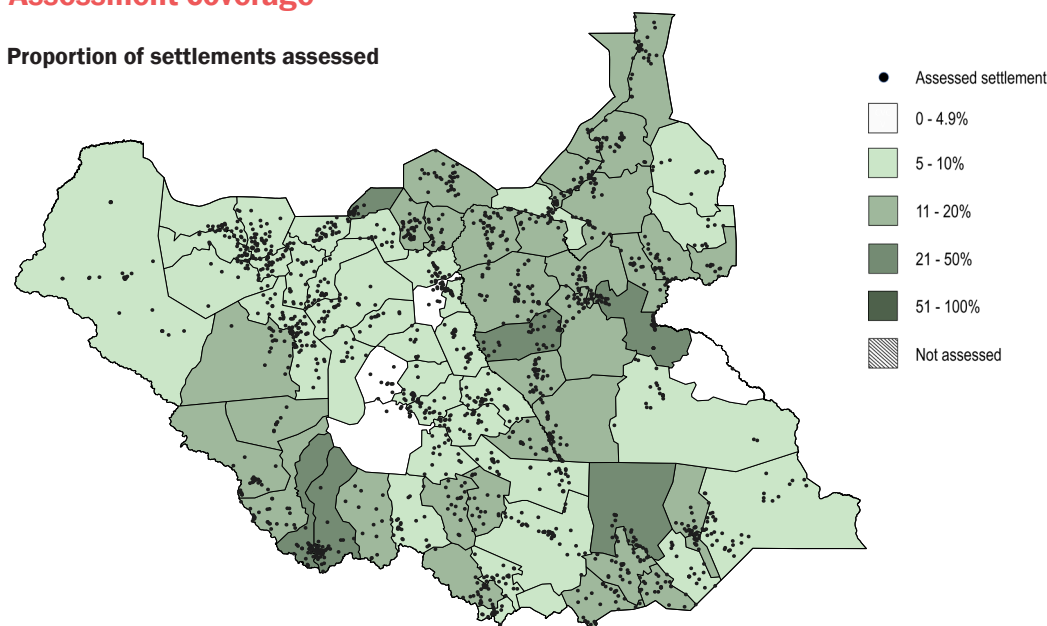

1910 Settlements assessed

78 Counties assessed

74 Counties with 5% or more coverage²

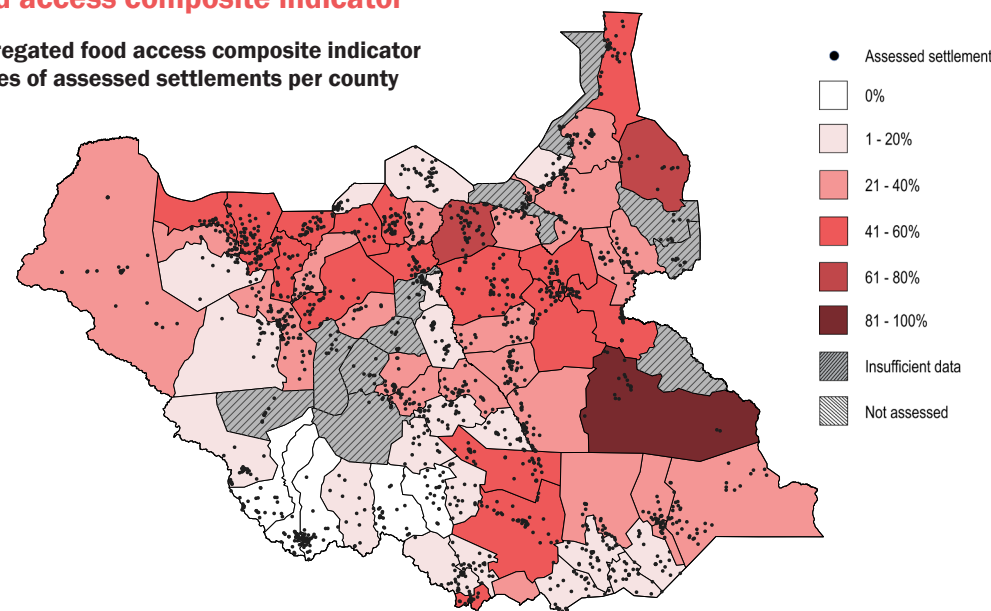

Assessment coverage

Proportion of settlements assessed

Food access composite indicator

Aggregated food access composite indicator scores of assessed settlements per county

¹ During cleaning and aggregation counties which do not reach a consensus or report "don't know" are recoded as NA thus lowering subset sizes.

Additionally, unless otherwise specified all questions have a recall period of 30 days prior to data collection.

² Data is only represented for counties in which at least 5% of settlements have been assessed. The most recent OCHA Common Operational Dataset (COD) released in March 2019 has been used as the reference for settlement names and locations.

This food access composite indicator aims at measuring both levels of adequate access to food as well as severity of perceived hunger and application of severe consumption-based coping strategies. The composite was created by averaging the 'yes' responses on the following indicators; with all indicators considered to have the same weight:

- Most people do not have access to sufficient food
- Skipping days to cope with a lack of food or money to buy food
- Perceived hunger from inadequate food access: severe or "worst it can be"
- Wild foods known to be making people sick consumed all the time

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

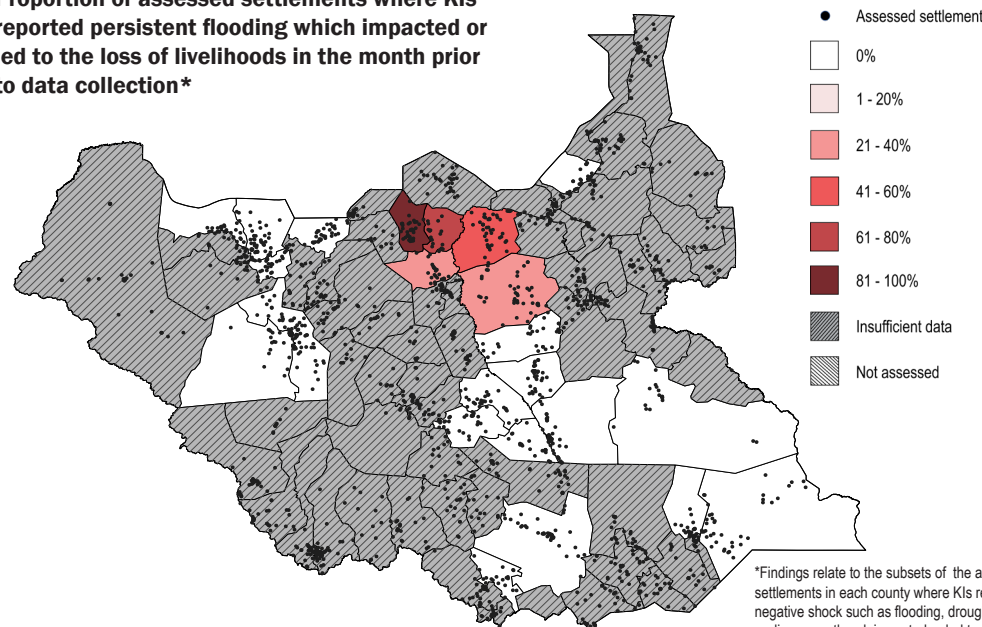

February 2023

Shocks

Proportion of assessed settlements where KIs reported that a negative shock such as flooding, drought, conflict, or disease outbreak impacted or led to the loss of livelihoods in the month prior to data collection

Proportion of assessed settlements where KIs reported persistent flooding which impacted or led to the loss of livelihoods in the month prior to data collection*

*Findings relate to the subsets of the amount of settlements in each county where KIs reported a negative shock such as flooding, drought, conflict, or disease outbreak impacted or led to the loss of livelihoods in the month prior to data collection

Shocks: IDPs*

Counties with assessed settlements where KIs reported the presence of IDPs or returnees as having a negative impact on the ability to access adequate food

Pibor (n=13) 100%

Shocks: conflict food access*

Top five counties with the highest proportion of assessed settlements where KIs reported conflict or insecurity as the main reason some people in the settlement were unable to access adequate food

Pibor (n=18) 100%

Yei (n=11) 36%

Kajo-keji (n=16) 25%

Duk (n=10) 20%

Morobo (n=17) 17%

Shocks: hunger*

Top five counties with the highest proportion of assessed settlements where KIs reported hunger was "worst it can be"

Kapoeat East (n=40) 100%

Pibor (n=19) 100%

Mayendit (n=16) 100%

Fangak (n=46) 100%

Kajo-keji (n=100) 100%

Shocks: conflict impact*

Top five counties with the highest proportion of assessed settlements where KIs reported conflict as the primary reason most people's ability to engage in livelihood activities has decreased in the month prior to data collection

Fashoda (n=22) 91%

Pibor (n=18) 78%

Twic (n=14) 50%

Duk (n=15) 20%

Lainya (n=11) 18%

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reported the arrival of IDPs within the last month. There were no other counties which met the observations threshold for reporting.

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reported most people were not able to access adequate food.

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reported most people were not able to access enough food. In assessed settlements in Kapoeta North, KIs also reported 100% that hunger was "the worst it can be".

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reported that people's ability to engage livelihood activities had decreased in the month prior to data collection.

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

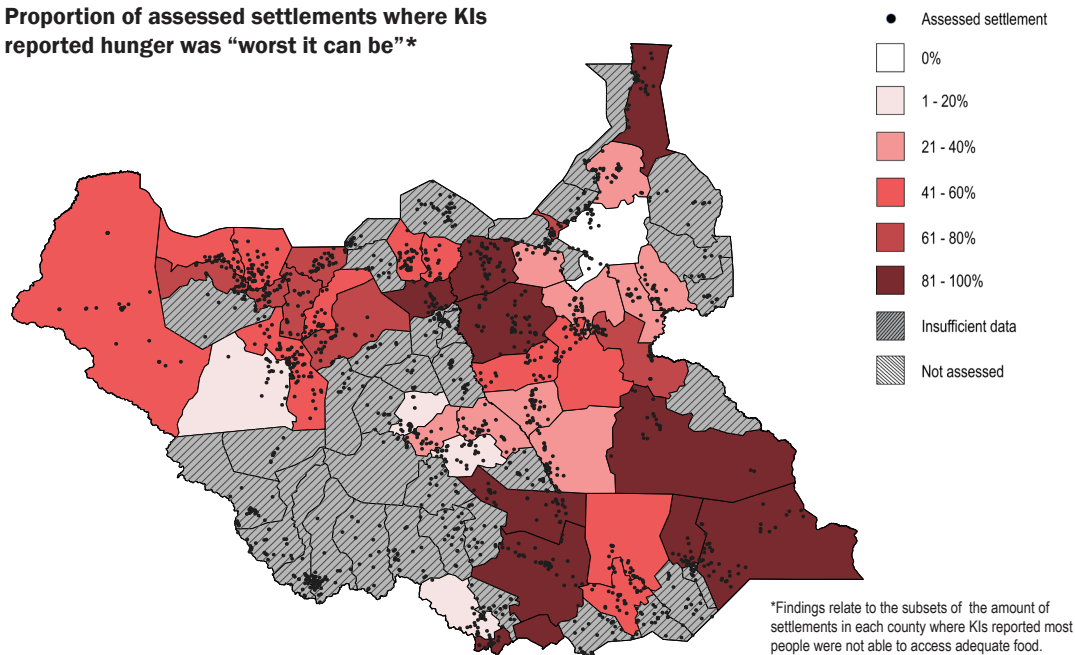

February 2023

Food access

Proportion of assessed settlements where KIs reported that most people were unable to access adequate food in the month prior to data collection

Proportion of assessed settlements where KIs reported hunger was “worst it can be”*

Food sources

Top five most commonly reported sources of food in the settlement, by proportion of assessed settlements

Inadequate access to food

Top five counties with the highest proportion of assessed settlements where KIs reported most people were unable to access enough food

In assessed settlements in Aweil North, Nyirol, Ayod and Fangak, KIs also reported 100% that most people were unable to access enough food

Food coping: wild foods

Top five counties with the highest proportion of assessed settlements where KIs reported consumption of wild foods that are known to make people sick

Food coping: skipping days*

Top five counties with the highest proportion of assessed settlements where KIs reported that people go entire days without eating as a coping strategy

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reported most people were not able to access enough food.

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

February 2023

Livelihoods: negative shocks

Top five counties with the highest proportion of assessed settlements where KIs reported a negative event which led to the loss of livelihoods, in the month prior to data collection

Livelihoods: coping

Top five most commonly reported livelihood coping strategies used in the month prior to data collection to mitigate a negative event which led to the loss of livelihoods, by proportion of assessed settlements

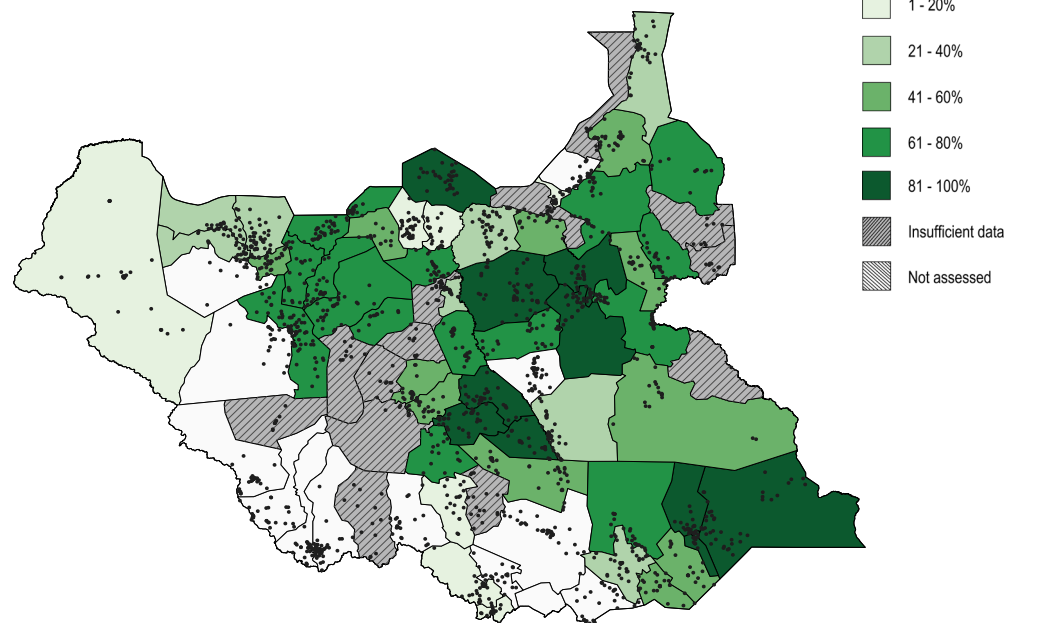

Livelihoods: casual labour

Top five counties with the highest proportion of assessed settlements where KIs reported that casual labour is a common livelihood activity in the settlement

Livelihoods: livestock

Proportion of assessed settlements where KIs reported that most people in the community possessed, and had physical access to cattle in the month prior to data collection

South Sudan Displacement Crisis

February 2023

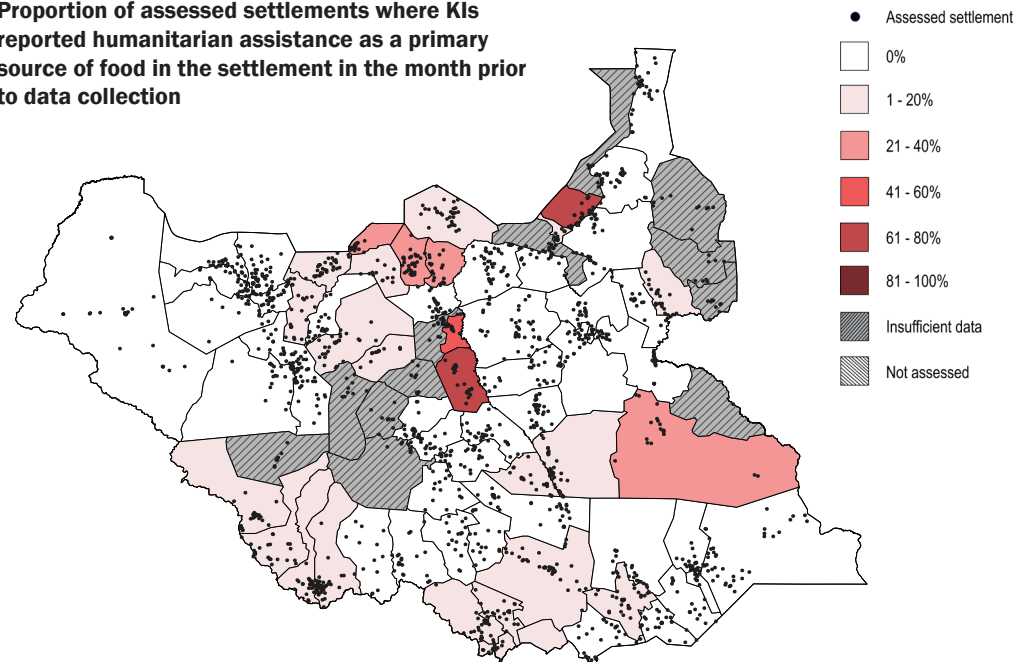

Markets

Proportion of assessed settlements where KIs reported physical access to a functioning market in the month prior to data collection

Food source: humanitarian aid

Proportion of assessed settlements where KIs reported humanitarian assistance as a primary source of food in the month prior to data collection

Food source: purchasing

Top five counties with the highest proportion of assessed settlements where KIs reported purchasing as a primary source of food in the settlement

| | | |
|---------------|------|-------------|
| Twic East | 100% | <div></div> |
| Mundri West | 100% | <div></div> |
| Morobo | 100% | <div></div> |
| Baliet | 100% | <div></div> |
| Rumbek Center | 100% | <div></div> |

Food source: livestock

Top five counties with the highest proportion of assessed settlements where KIs reported livestock as a primary source of food in the settlement

| | | |
|------------|-----|-------------|
| Nyiröl | 96% | <div></div> |
| Yirol East | 96% | <div></div> |
| Uror | 91% | <div></div> |
| Yirol West | 90% | <div></div> |
| Pariang | 84% | <div></div> |

Food source: humanitarian aid

Top five counties with the highest proportion of assessed settlements where KIs reported humanitarian assistance as a primary source of food in the settlement

| | | |
|-----------|-----|-------------|
| Fashoda | 68% | <div></div> |
| Panyijjar | 62% | <div></div> |
| Leer | 50% | <div></div> |
| Mayendit | 47% | <div></div> |
| Guit | 30% | <div></div> |

Livestock disease*

Top five counties with the highest proportion of assessed settlements where KIs reported that there has been a disease outbreak that resulted in cattle dying in the month prior to data collection

| | | |
|---------------------|-----|-------------|
| Fangak (n=12) | 92% | <div></div> |
| Awerial (n=18) | 89% | <div></div> |
| Gogrial West (n=13) | 85% | <div></div> |
| Tonj North (n=18) | 78% | <div></div> |
| Yirol West (n=22) | 77% | <div></div> |

In assessed settlements in Kako-keki, Kapoeata South and Maridi KIs also reported 100% that purchasing as a primary source of food.

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reporting people in the settlement possess cattle.
