

Settlement and Protection Profiling

Camp 13 Ukhia, Cox's Bazar, Bangladesh December and April 2018 trend comparison

Nov / Dec 2018

Female

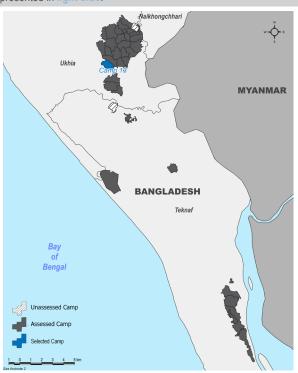

Background and methodology

This profile provides a multi-sector overview of conditions in the Rohingya sites in Cox's Bazar District, Bangladesh to offer insights on the evolving protection needs of refugees living in the camps. Data for the findings was collected in 33 camps from 25 November - 17 December, 2018 for the fourth round of Settlement and Protection Profiling (SPP) funded by UNHCR and implemented by REACH. Key indicators provide contextual and operational findings at the household level. Findings are compared to those of SPP Round 3 which took place from 7-27 March and 15-20 April, 2018¹. Translators Without Borders supported with translating the form into Rohingya.

Primary data was collected through household surveys randomly sampled from shelters located within 33 settlement boundaries. Results of this assessment are generalizable with 95% confidence level and 10% margin of error at the camp level. This factsheet presents an analysis of data collected in Camp 13, where 102 households were surveyed.

The Round 3 form was translated into Bangla then verbally translated into Rohingya by enumerators, while the Round 4 form was translated directly into Rohingya. It is therefore possible that potential differences in communicating questions between Round 3 and 4 may affect comparisons where relevant. Data collection began one week after an attempted repatriation to Myanmar, thus some eligible households chose not to participate out of fear of sharing detailed information. This fear may have created a bias towards those respondents who were willing to participate in this assessment. The non-response rate was 5%.

November/December 2018 data is presented in dark blue, and March/April 2018 data is presented in light blue.

Key Camp Information

Camp Management Agency RRRC

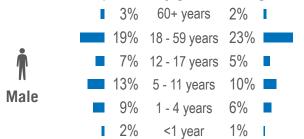

Site Management Support Agency IOM / World Vision

Population (individuals)³41,056Population (families)³9,618Camp Area0.75 km²

Population density 54,468 individuals/km²

†y**†** Demographics

Household composition by gender and age

53% of individuals are under 18

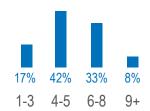

76% of individuals are women and children

Period of arrival³

92% of households arrived 25 August 2017 or later

Household size

Number of individuals per household:

There is an average of **5.4** individuals reported per household

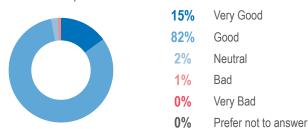

Persons with Specific Needs (PWSN)

% of families with Persons with Specific Needs (PWSN), by need³

		\ // /	
Separated children	3%	Unaccompanied children	1%
Older person at risk	4%	Person with disability	3%
Older person at risk and children	2%	Single male parent with infants	1%
Serious medical condition	4%	Single female parent	15%
Families with PWSN	29%		

Protection

% of households reporting their perception of the current security situation in the camp⁴:

- 1. UNHCR, Bangladesh: UNHCR Camp Settlement and Protection Profiling Round 3, Apr 2018. http://bit.ly/2LRI49D 2.The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations
- 3. RRRC/UNHCR population data and key demographical indicators (15 Nov 2018 dataset)
- 4. Round 4 data only. This indicator was not present in SPP Round 3

Settlement and Protection Profiling - Camp 13

December and April 2018 trend comparison

Top five interventions reported as needing to change or improve in order to improve the sense of safety and security in the camps⁵:

Dec 2018				Apr 2018
92%	Improved roads/paths	0	Site improvement	53%
54%	Better camp management	2	Warning systems	37%
47%	Advice from UN/NGOs	3	More police / military	26%
26%	Disaster warning systems	4	Documentation	22%
25%	Street signs	6	Fencing	15%

Top 3 main risks reported to be faced by adult men and women in the camp^{5,6,7}:

	Men 🛉		♦ Women	
50%	Kidnapping	•	Human trafficking	48%
34%	Human trafficking	2	Kidnapping	48%
32%	Natural disasters	3	Risk of sexual assault	43%

Food Security

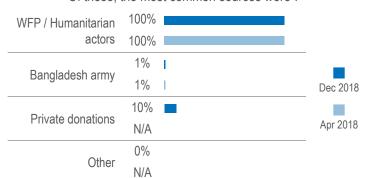

Food assistance

Dec 2018 Apr 2018

of households reported accessing food

97% assistance in the 30 days prior to data collection.

Of these, the most common sources were⁸:

^{5.} Respondents could give up to three answers

Consumption-based coping strategies

Top 3 most commonly reported consumption-based coping strategies8:

Dec 2018				Apr 2018
Borrow food	79%	0	61%	Borrow food
Eat less preferred food	70%	2	2%	Eat less preferred food
Limit portion size	38%	3	2%	Reduce number of meals

Infant nutrition

Dec 2018		Apr 2018
91%	of households with children under 5 reported receiving a supplementary feeding ration for children under 5 in the 30 days prior to data collection	71%
14%	of households reported receiving a breast-milk substitute donation since arriving in Bangladesh ⁹	9%

Water Sanitation and Hygiene

Water treatment

Dec 2018		Apr 2018
78%	of households reported treating water	18%
51%	of households reported using chlorination tablets (Aquatabs)	0%

Water sources

Dec 2018

% of households reporting their main source of drinking water:

Tuboughl/barabala 1009/

Apr 2018

91%	lubewell/borehole	100%	
0%	Piped water	0%	
0%	Tanker truck	0%	
0%	Rainwater	0%	
0%	Surface water	N/A	
0%	Protected dugwell	N/A	
0%	Unprotected dugwell	N/A	
0%	Protected spring	N/A	
9%	Water tank	N/A	
0%	Cart w small drum	N/A	

Hygiene practices

, 9.0	o presented	
Dec 2018		Apr 2018
45 %	of households reported having access to soap	55 %
80%	of households reported using public latrines as the usual facility for defecation	84%

^{7.} These results are based on the respondent's subjective perception of risks in the camp, and not the actual number of security incidents

^{6.} Round 4 data only. This indicator was not present in SPP Round 3

^{8.} Respondents could select multiple options

^{9.} In April data collection, this was asked to every household. In December data collection, this was asked only to households reporting children under 5 in the household.
