Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

January 2017

Overview

Conflict in Unity State broke out in late December 2013, only days after the current conflict began in Juba. Since then, the state has been one of the worst affected by the conflict, and currently hosts the highest reported numbers of internally displaced persons (IDPs) in the country. Many areas in Unity are largely inaccessible to humanitarian actors due to insecurity and logistical constraints. As a result, only limited information is available on the humanitarian situation outside major displacement sites.

In order to fill such information gaps and facilitate humanitarian planning, in late 2015, REACH piloted its Area of Origin (AoO) methodology, which takes a territory-based approach that may cover several bomas,

to collect data in hard-to-reach areas of Unity State. The pilot began in Bentiu PoC in December 2015, and was expanded to Nyal in June 2016 in order to interview new arrivals as they were displaced from recent fighting. Data is also collected from PoCs in Juba and from sites in Jonglei State.

In December 2016, REACH refined the methodology moving from the AoO to the Area of Knowledge (AoK) methodology, an approach collecting information at the settlement level. The most recent OCHA Common Operational Dataset (COD) released in February 2016 has been used as the reference for settlement names and locations.

Through AoK, REACH collects data from a network of Key Informants (KIs) who have sector specific knowledge and gain the information from regularly traveling to and from the settlement, direct or indirect contact with people in the settlement, or recent displacement.

Data collected is aggregated to the settlement level and all percentiles presented in this factsheet, unless otherwise specified, represent percent of settlements within Unity with that specific reponse.

Although current AoK coverage is still limited and its findings not statistically significant, it provides an indicative understanding of the needs and current humanitarian situation in assessed areas of Unity State.

Assessment coverage

886 Key Informants assessed

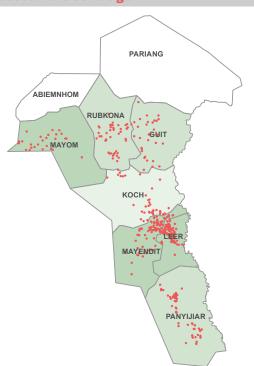

378 Settlements assessed

Contact with Area of Knowledge

62% KIs reported to have visited the AoK within the last month.

KIs reported to be in contact with someone living in the AoK within the last month.

Education availability

Reported available education services in the assessed settlements:5

None	76%
Primary	24%
Pre-primary	20%
ALP ⁶	4%
Vocational	1%
Secondary	1%

Education attendance and availability

Top two reported reasons why children are not attending school in the assessed settlements:

1	Insecurity	46%	
2	High fees	44%	

Top two reported reasons why education services are not available in the assessed settlements:

1	Facilities destroyed by conflict	38%	
2	Was never available	22%	

School attendance

Reported proportion of 6-17 year girls and 6-17 year boys attending school in assessed settlements:

⁵Kev informants could choose more than one answer

Protection

Women

Reported primary protection concerns for women in the assessed settlements:

1	Sexual violence	66%
2	Killing/injury other community	16%
3	Domestic violence	5%
4	Looting	4%
5	Killing/injury same community	3%

Men

Reported primary protection concerns for men in the assessed settlements:

1	Killing/injury other community	57%
2	Forced recruitment	19%
3	Killing/injury same community	15%
4	Cattle raiding	5%
5	Looting	3%

Children

Reported primary protection concerns for children in the assessed settlements:

g/injury other nunity	57%	1	Abduction	28%
ed recruitment	19%	2	Killing/injury other community	18%
g/injury same nunity	15%	3	Family separation	17%
e raiding	5%	4	Domestic violence	10%
ng	3%	5	Forced recruitment	10%

Community relations

Reported relationships between IDPs, returnees⁷ and local community in the assessed settlements:

Very Good	61%
Good	34%
Neutral	2%
Poor	1%
Very poor	0%
No answer	2%

Land disputes

Reported presence of disputes over land ownership in the assessed settlements:

⁶Local community displaced and returned home, reported in 34% of assessed settlements

12% Yes

About REACH

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms. For more information, you can write to our in-country office: south.sudan@reach-initiative.org or to our global office: geneva@reach-initiative.org.

Visit www.reach-initiative.org and follow us @REACH_info.
