## Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

February 2018

### Overview

The continuation of conflict since December 2013 has created a complex humanitarian crisis in the country, restricting humanitarian access and hindering the flow of information required by aid partners to deliver humanitarian assistance to populations in need. To address information gaps facing the humanitarian response in South Sudan, REACH employs its Area of Knowledge (AoK) methodology to collect relevant information in hard-to-reach areas to inform humanitarian planning and interventions outside formal settlement sites.

Using the AoK methodology, REACH remotely monitors needs and access to services in the Greater

Upper Nile, Greater Equatoria and Greater Bahr el Ghazal regions. AoK data is collected monthly and through multi-sector interviews with the following typology of Key Informants (KIs):

- KIs who are newly arrived internally displaced persons (IDPs) who have left a hard-to-reach settlement in the last month
- KIs who have had contact with someone living or have been in a hard-to-reach settlement in the last month (traders, migrants, family members, etc.)
- KIs who are remaining in hard-to-reach settlements, contacted through phone

Selected KIs are purposively sampled and have knowledge from within the last month about a specific settlement in South Sudan, with data collected at the settlement level. About half of settlements assessed have more than one KI reporting on the settlement. In these cases, data presented at the settlement level is the modal (most frequent) response for KIs reporting on that settlement. If there is an even number of 'yes/no' responses, data is aggregated as 'no consensus'.

All percentages presented in this factsheet, unless otherwise specified, represent the proportion of settlements assessed with that specific response.

The findings presented in this factsheet are indicative of the broad food security and livelihood trends in assessed settlements in February 2018, and are not statistically generalisable.

### Assessment Coverage

**1,458** Key Informants interviewed

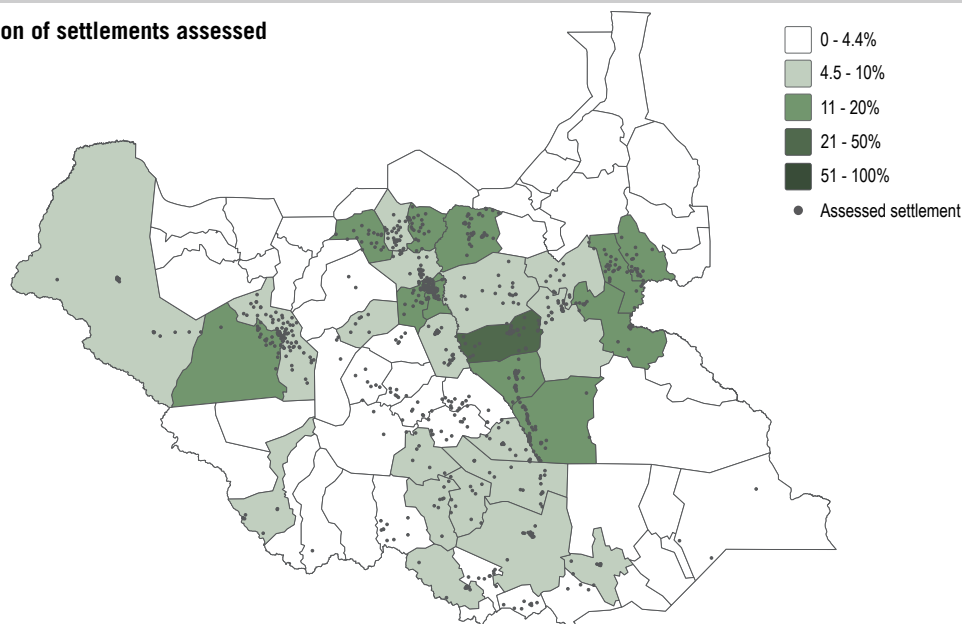

**848** Settlements assessed

**45** Counties assessed

**30** Counties with 4.5% or more coverage<sup>1</sup>

### Assessment coverage

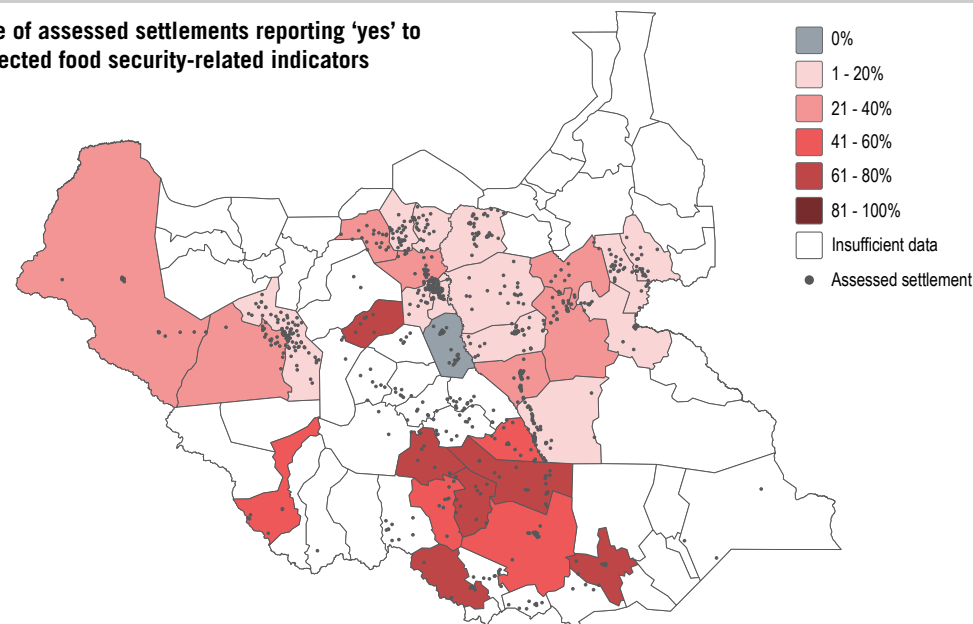

#### Proportion of settlements assessed

<sup>1</sup> Data is only represented for counties in which at least 5% of settlements have been assessed. The most recent OCHA Common Operational Dataset (COD) released in February 2016 has been used as the reference for settlement names and locations.

### Food access composite indicator

#### Average of assessed settlements reporting 'yes' to five selected food security-related indicators

This simple food access composite aims to measure both levels of adequate access to food as well as severity of perceived hunger and application of severe consumption-based coping strategies. The composite was created by averaging the 'yes' responses of settlements reporting on the following indicators, with all indicators considered to have the same weight:

- Inadequate access to food
- Consuming one or fewer meals per day
- Skipping days to cope with a lack of food or money to buy food
- Perceived hunger from inadequate food access: severe or worst it can be
- Wild foods known to be making people sick consumed all the time

## Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

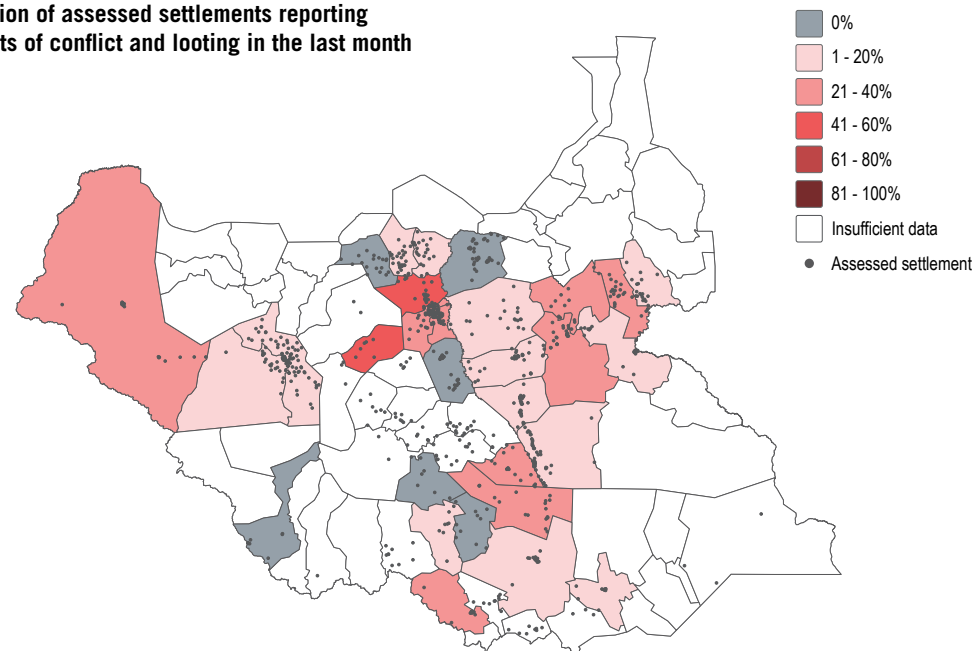

February 2018

### Shocks

Proportion of assessed settlements reporting conflict as having a large impact on the ability to access adequate food

Proportion of assessed settlements reporting incidents of conflict and looting in the last month

### Shocks: IDPs

Top five assessed counties reporting presence of newly arrived IDPs as having a large impact on ability to access adequate food

Mundri East	90%	
Mundri West	88%	
Mvolo	86%	
Juba	79%	
Ezo	71%	

### Shocks: health

Top five assessed counties reporting perceived health problems as having a large impact on ability to access adequate food

Mvolo	100%	
Mundri East	90%	
Mundri West	88%	
Ezo	86%	
Yei	83%	

### Shocks: cereal prices

Top five assessed counties reporting increase in cereal prices as having a large impact on ability to access adequate food

Yei	75%	
Juba	63%	
Mvolo	57%	
Panyijar	56%	
Twic East	50%	

### Shocks: livestock

Top five assessed counties reporting livestock disease outbreak as having a large impact on ability to access adequate food

Ezo	57%	
Mvolo	57%	
Mundri East	50%	
Mundri West	50%	
Tonj East	50%

South Sudan Displacement Crisis

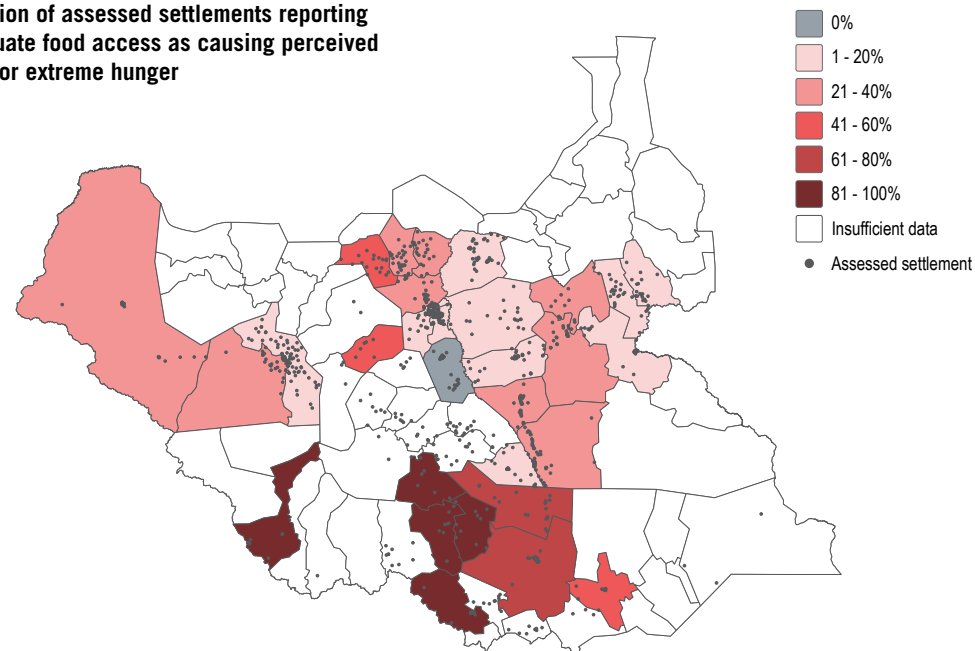

February 2018

## Food access

Proportion of assessed settlements reporting inadequate access to food

Proportion of assessed settlements reporting inadequate food access as causing perceived severe or extreme hunger

## Wild foods: frequency

Top five assessed counties reporting consumption of wild foods all of the time

Tonj East	50%	<div></div>
Torit	50%	<div></div>
Ayod	38%	<div></div>
Terekeka	32%	<div></div>
Mundri East	30%	<div></div>

## Wild foods: nutrition

Top five assessed counties reporting consumption of wild foods that are known to make people sick

Mvolo	100%	<div></div>
Panyijjar	89%	<div></div>
Mundri East	80%	<div></div>
Mundri West	75%	<div></div>
Leer	74%	<div></div>

## Meal frequency

Top five assessed counties reporting consuming on average one meal per day or less

Mundri West	100%	<div></div>
Mvolo	100%	<div></div>
Tonj East	100%	<div></div>
Torit	100%	<div></div>
Yei	92%	<div></div>

## Food coping: skipping days

Top five assessed counties reporting entire days without eating as a coping strategy

Yei	58%	<div></div>
Torit	50%	<div></div>
Mvolo	43%	<div></div>
Terekeka	42%	<div></div>
Awerial	40%	<div></div>

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

February 2018

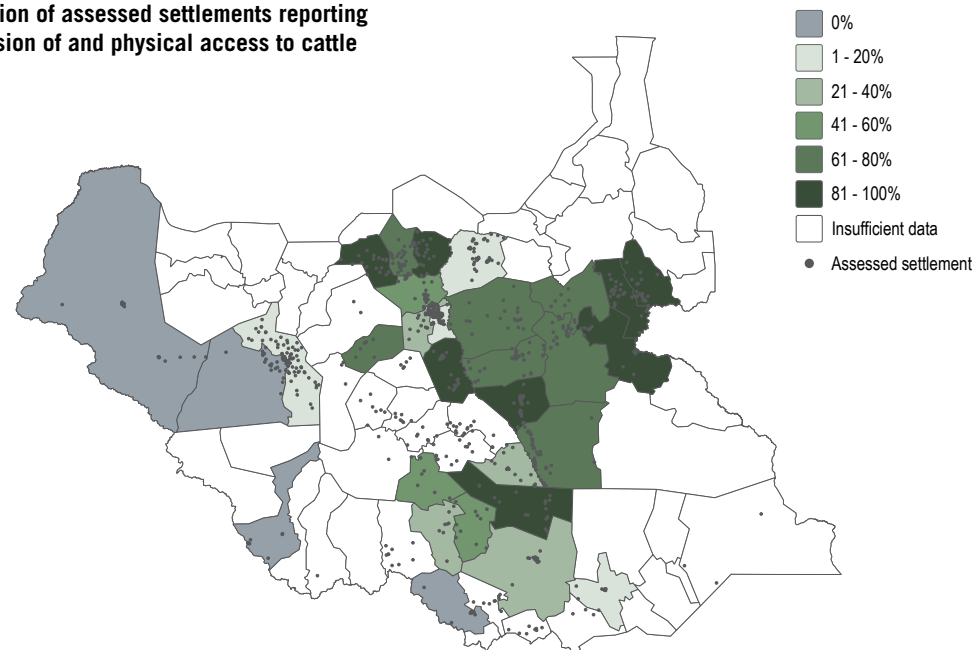

## Livelihoods: cultivation

Proportion of assessed settlements reporting cultivation as their primary food source

## Livelihoods: livestock

Proportion of assessed settlements reporting possession of and physical access to cattle

## Agricultural inputs

Top five counties reporting inadequate access to agricultural inputs

## Land for cultivation

Top five counties reporting access restrictions to land for cultivation

## Food source: livestock

Top five counties reporting livestock as their primary food source

## Livestock disease

Top five counties reporting a livestock disease outbreak

## Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

February 2018

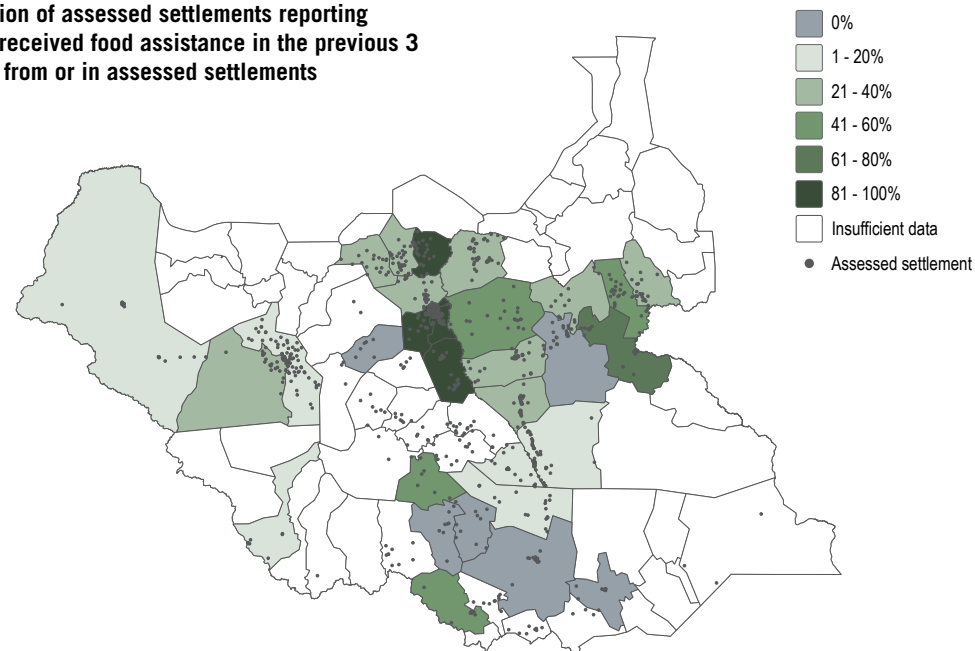

### Markets

Proportion of assessed settlements reporting physical access to a functioning market

### Humanitarian assistance

Proportion of assessed settlements reporting having received food assistance in the previous 3 months from or in assessed settlements

### Food source: purchasing

Top five assessed counties reporting purchase as primary food source

### Livelihood: casual labour

Top five assessed counties reporting casual labour as a livelihood activity

### Food source: humanitarian

Top five assessed counties reporting humanitarian assistance as primary food source in assessed settlements

### Humanitarian distribution

Top five assessed counties reporting expecting a distribution of humanitarian assistance that did not occur within the past month

## Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

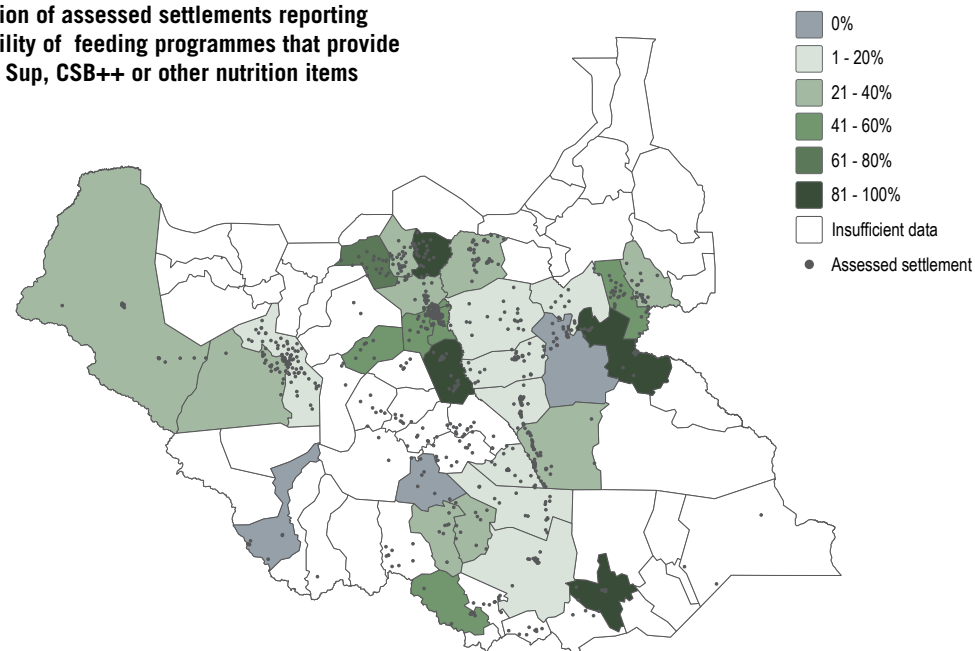

February 2018

### Perceived causes of death, health and nutrition

Proportion of assessed settlements reporting malnutrition / hunger as their primary perceived cause of death

Proportion of assessed settlements reporting availability of feeding programmes that provide Plumpy Sup, CSB++ or other nutrition items

### Mortality increase

Top five assessed counties reporting a higher perceived number of deaths than normal in the last month

Akobo	65%
Nyirol	62%
Awerial	60%
Ezo	57%
Mayendit	53%

### Health: malnutrition

Top five assessed counties reporting perceived hunger / malnutrition as main health problem

Akobo	17%
Raja	17%
Bor South	8%
Wau	6%
Fangak	6%

### Health: cholera

Top five assessed counties reporting cholera / diarrhoea as their main health problem

Juba	58%
Torit	50%
Terekeka	42%
Panyijar	31%
Akobo	30%

### Health services

Top five assessed counties reporting no physical access to health services

Uror	100%
Ezo	86%
Rubkona	74%
Koch	48%
Fangak	47%
