Camp 8W, Ukhiya, Cox's Bazar, Bangladesh

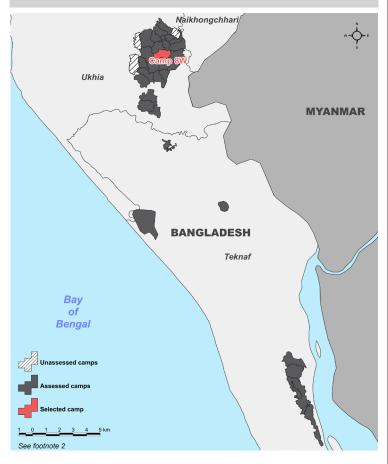

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landsides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 8W where 96 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found here3. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Population in camp (individuals)¹

32,875

Population in camp (families)¹

7,563

35.4 Average age of respondent

Protection

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)4,5

	40%	Kidnapping	0	Natural disaster	33%		
Boys	40%	Natural disaster	2	Kidnapping	31%	Girls	
	22%	Detention	3	Sexual violence	16%		

% of households reporting first port of call for assistance in dealing with safety or security issues^{4,6}

Mahji	90%	
Local government	7%	
None	5%	

% of women reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection⁷

12-17 years	7%
18+ vears	18%

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection8

1% of all households with children under 18 reporting at least one child involved in hazardous labour in the 30 days prior to data collection⁹

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe^{4,10}

	Men 🕴		Womer	1
72%	No area unsafe	0	No area unsafe	55%
15%	Distribution points	2	Latrines	32%
13%	Firewood collection sites	3	Bathing areas	29%
	Boys 🛉		Girls	
56%	Boys No area unsafe	0	Girls No area unsafe	47%
56% 19%	, n	1 2	"	47% 25%

68% of households reported the presence of groups or committees in their area working to protect their rights and protect them from harm

% of households reporting different relationships with Bangladeshi host community and refugee neighbours in the same block

- 4. Respondents could select multiple options
- 5. Three most common safety concerns for boys and girls are shown
- 6. Three most common first ports of call for assistance are shown
- 7. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported
- 8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported
- 9. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using
- 10. Three most common areas where men, women, boys and girls do not feel safe are shown

Camp 8W, Ukhiya, Cox's Bazar, Bangladesh

Health

82% of households with children under 5 reported all children under 5 having an immunization card

98% of households with children under 5 reported all children under 5 sleeping under a mosquito net the night prior to data collection

% of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection⁴

NGO clinic	79%	
Pharmacy	33%	
Private clinic	4%	I .

% of households reporting challenges in accessing NGO run clinics since arriving in the camp^{4,11}

No challenge	45%	
Clinic too far	24%	
Crowded	20%	
Supplies unavailable	13%	
Treatment unavailable	6%	

% of households with children under 5 reported receiving a breast milk substitute, infant formula or baby bottles through donation in the 30 days prior to data collection⁴

Formula / Breast milk substitute	2%
Bottles	0%

Food Security

100% of households reported possession of a ration card

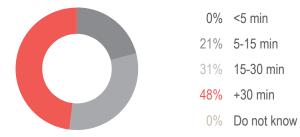

% of households reporting receiving food assistance in the 30 days prior to data collection⁴

ICRC / WFP	99%	
Bangladesh army	8%	
Other	0%	

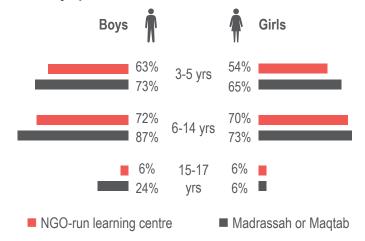

98% of households reported access to a market to buy food

% of households reporting travel time on foot to food markets

Education

% of children reported to be attending learning centres in the 7 days prior to data collection^{4,8}

Shelter & Non-Food Items

43% of households reported sharing their shelter with other households

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

4%	Roof damaged	0%	Wall damaged
4%	Roof destroyed	5%	Wall destroyed

^{4.} Respondents could select multiple options

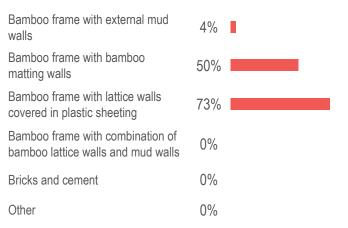

^{8.} Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

^{11.} Five most common health care access challenges are shown

Camp 8W, Ukhiya, Cox's Bazar, Bangladesh

% of households reporting using different materials for the frame and walls of the household shelter⁴

% of households reporting using different materials for the roof of the household shelter⁴
