Adamawa and Yobe, Northeast Nigeria

April-June 2022

INTRODUCTION

The continuation of conflict in Northeast Nigeria has created a complex humanitarian crisis, rendering sections of Yobe and Adamawa states as hard to reach. To address information gaps facing the humanitarian response and inform humanitarian actors on the demographics of households in hard-to-reach areas of Northeast Nigeria, as well as to identify their needs, access to services, and movement intentions, REACH has been conducting monthly assessments of hard-to-reach areas in Northeast Nigeria since November 2018.¹

Proportion of settlements assessed, April - June 2022.

- # of key informant interviews: 1562
- # of assessed settlements: 882
- # of assessed LGAs: 14
- # of assessed LGAs with sufficient coverage²: 10

Number of assessed settlements per LGA

STATE	LGA	# of assessed settlements
	Madagali	63
	Maiha	77
ADAMAWA	Michika	156
	Mubi North	70
	Mubi South	66
	Geidam	95
	Gujba	77
YOBE	Gulani	61
	Tarmua	111
	Yunusari	106

METHODOLOGY

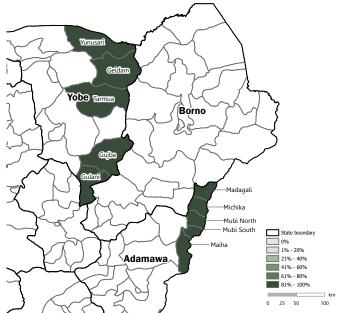

Using the Area of Knowledge (AoK) methodology, REACH remotely monitors the situation in hard-to-reach areas through monthly multi-sector interviews in accessible Local Government Area (LGA) capitals with key informants (KIs) who are either (1) newly arrived internally displaced persons (IDPs) who have left a hard-to-reach settlement in the last month or (2) KIs who have had contact with someone living or having been in a hard-to-reach settlement in the last month (traders, migrants, family members, etc.).

If not stated otherwise, the recall period for each question is set to one month prior to the last information the KI has had from the hard-to-reach area. Selected KIs are purposively sampled and are interviewed on settlement-wide circumstances in hard-to-reach areas, rather than their individual experiences. Responses from KIs reporting on the same settlement are then aggregated to the settlement level. The most common response provided by the greatest number of KIs is reported for each settlement. When no most common response could be identified, the response is considered as 'no consensus'. While included in the calculations, the percentage of settlements for which no consensus was reached is not displayed in the results below.

Results presented in this factsheet, unless otherwise specified, represent the proportion of settlements assessed within an LGA. Findings are only reported on LGAs where at least 5% of populated settlements and at least 5 settlements in the respective LGA have been assessed. The findings presented are indicative of broader trends in assessed settlements in April, May, & June 2022, and are not statistically generalisable.³ Due to precautions related to the COVID-19 outbreak, data was collected remotely through phone interviews with assistance from local stakeholders. Data collection took place from 11th April 2022 to 30th June 2022.

Original population

Proportion of assessed settlements where the presence of non-displaced populations was reported:

³ Due to changes in migration patterns, the specific settlements assessed within each LGA vary each month. Changes in results reported in this factsheet, compared to previous factsheets, may therefore be due to variations in the assessed settlements instead of changes over time.

¹ REACH H2R sectoral factsheets from November 2020 to April 2022.

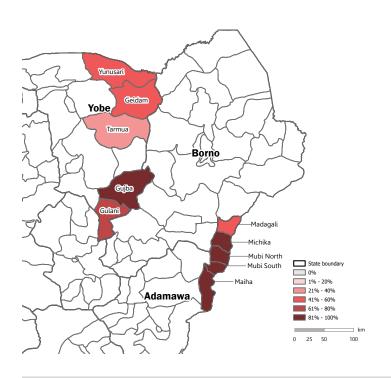

² The most recent dataset on <u>grid3.gov.ng/datasets</u> has been used as the reference for settlement names and locations, and adjusted to account for deserted villages based on information shared by OCHA.

Adamawa and Yobe, Northeast Nigeria

April-June 2022

IDP presence

Proportion of assessed settlements where the presence of internally displaced persons (IDPs) was reported:

Original population

Estimated proportions of original population remaining in the settlement, by % of assessed settlements:

Less than half	41%	
Around half	38%	
More than half	10%	
All	0%	

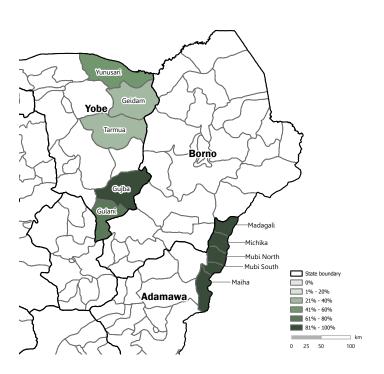

The presence of non-displaced persons was reported in 99% of assessed settlements

In those settlements, the most reported main reasons why people remained in the settlement were:

People do not want to leave	38%	
Lack of money	19%	
People are too weak to leave	10%	
People cannot leave livelihood	8%	
Don't want to leave falimy members	4%	

Returnee presence

Proportion of assessed settlements where the presence of returnees were reported:

Presence of returnees was reported in 73% of assessed settlements.

In those settlements, the most reported main reasons why people had returned to the settlement were:

Harvest	27%	
To visit family members	12%	
Permanent return	6%	
Unfavourable conditions led to return	4%	

In 22% of those assessed settlements where returnee presence had been reported (73%), KIs reported that most returnees had arrived in the month prior to data collection.

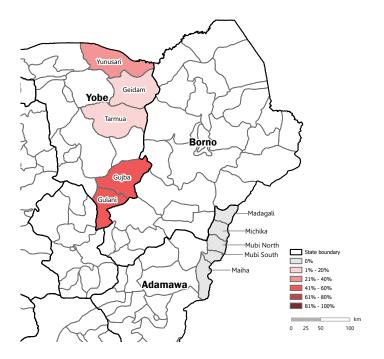

Adamawa and Yobe, Northeast Nigeria

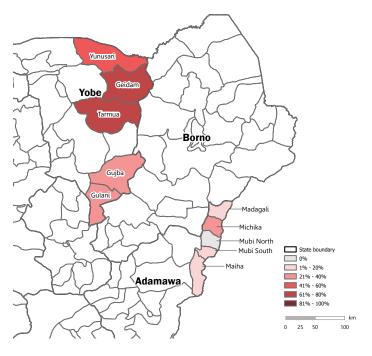

April-June 2022

Means of communication

Proportion of assessed settlements where a functioning radio signal was reportedly unavailable:

Proportion of assessed settlements where a functioning mobile network was reportedly unavailable:

Access to information

Top five LGAs with the highest proportion of assessed settlements where it was reported that people experienced difficulties accessing information on the availability of humanitarian assistance:

Tarmua	77%	
Gujba	71%	
Gulani	69%	
Yunusari	68%	
Geidam	43%	

Information barriers

In 43% of assessed settlements, people reportedly faced difficulties accessing information on humanitarian assistance.

In those settlements, the most reported main difficulties were:

No mobile phone	47%	
No radio	22%	
No electricity	17%	
Insecurity	2%	
No credit	1%	

Information sources

Reported main channels of information used by community members, by % of assessed settlements

In person	65%	
Radio	14%	
Phone	7%	
Conversations during commercial transport	3%	

Reported information channels most trusted among community members, by % of assessed settlements

In person	75%	
Radio	10%	
Phone call	3%	1
