

Camp Profile: Menbij East New

Aleppo governorate, Syria
April-May 2019

This factsheet is part of a series on camps and informal sites in northeast Syria. For more information and the data collection methodology, access the full report here: <http://bit.ly/2JP1WIR>

Overview

Number of individuals: 2,497¹
Number of households: 450¹
Number of shelters: 525
First arrivals: June 2017
Average length of stay: 19 months
Camp area: 0.09 km²
Management agency: Local authorities
Administration agency: Local authorities

Background

Menbij East Old is one of two large camps in the countryside outside Menbij City. Although residents continue to only receive vouchers for food, food consumption scores appear to have improved significantly and 80% of households now fall within the 'acceptable' range.

Camp Map

Sectoral Minimum Standards

		Current round			Previous round (Dec 2018)	
		Target	Result	Achievement	Result	Change
Shelter	Average number of individuals per shelter	max 4.6	6.3	●	5.8	▲
	Average covered area per person	min 3.5m ²	4.8m ²	●	4.6m ²	▲
	Average camp area per person	min 35m ²	35m ²	●	20m ²	▲
Health	% of 0-5 year olds who have received polio vaccinations	100%	69%	●	53%	▲
	Presence of health services within the camp	Yes	Yes	●	Yes	▶
Protection	% of households reported having lost some form of documentation	0%	3%	●	61%	▼
Food	% of households receiving assistance in 30 days prior to assessment	100%	99%	●	100%	▼
	% of households with acceptable food consumption score (FCS) ²	100%	80%	●	28%	▲
Education	% of children aged 6-11 accessing education services	100%	58%	●	69%	▼
	% of children aged 12-17 accessing education services	100%	25%	●	20%	▲
WASH	Persons per latrine	max. 20	27	●	42	▼
	Persons per shower	max. 20	125	●	No showers	▲
	Frequency of solid waste disposal	min. twice weekly	Daily	●	Daily	▶

Targets based on Sphere and humanitarian minimum standards specific to northeast Syria. ● Minimum standard reached ● More than 50% minimum standard reached ● Less than 50% of minimum standard reached

1. Numbers of individuals, households, and shelters reported by camp management.

2. FCS measures households' current status of food consumption based on the number of days per week a household is able to eat items from nine standard food groups weighted for their nutritional value.

DEMOGRAPHICS AND MOVEMENT

Demographics

Top three household origins:

Country	Governorate	Sub-district	Percentage
Syria	Aleppo	Maskana	39%
Syria	Aleppo	Dayr Hafir	34%
Syria	Aleppo	Al-Khafsa	11%

Movements in the two weeks prior to the assessment:

Households planning to leave the camp:

EDUCATION

At the time of data collection, there was **1** educational facility in the camp.³

Age groups:	No data
Service providers:	No data
Curricula on offer:	No data
Certification available:	No data

Attendance⁴

The proportion of children aged 6-11 who attended school decreased from **69%** in December 2018 to **58%** at the time of data collection.

Barriers to education: of the **44%** of households with children aged 3-17 who reported that none of them went to school, **86%** reported that they faced barriers to education. The most commonly reported barriers were:

- Child does not want to attend (19%)
- Education is not considered important (14%)

Available WASH facilities³

Facility	None	In some schools	In all schools
Gender-segregated latrines	✓		
Handwashing facilities	✓		
Safe drinking water	✓		

4. As reported by key informants from camp management or camp administration authorities.
 3. Percentages of children attending school at least four days a week. These findings are indicative only as they are based on a subset of the total sample.

INFORMATION AND ACCOUNTABILITY

Sources of information

Top three reported sources of information about distributions:⁵

Information needs

Top three reported information needs:⁶

Service mapping

Have services in the camp been mapped? **✗** Is service mapping data available to all actors in the camp? **✗**

Complaints

Only **17%** of households who had made a complaint in the three months prior to data collection reported that action was taken as a result.

5. Households could select as many options as applied.
 6. Households could select up to three options from a list.

SHELTER

89% of inhabited shelters were household-sized tents.

Average number of people per shelter: **6.3**
Average household size: **6.6** individuals

Tent status⁷

Tent is new	49%
Minor wear and tear	28%
Tent is in poor condition	14%
Tent is worn/torn	9%

Shelter adequacy

72% of households reported that they faced shelter adequacy issues.

Top three most commonly reported shelter adequacy issues:⁶

Lack of privacy	44%
Shelter is in poor condition	34%
Safety	31%

Top three most commonly reported shelter item needs:⁶

New/additional tents	72%
Shading material	67%
Tarpaulins	53%

Fire safety

Households reporting the presence of fire fighting systems that could be used to protect them:

Yes - fire extinguishers	86%
Yes - other	0%
Not sure	7%
No	7%

78% of respondents with access to a fire fighting system reported being familiar with **how to use it**.

Camp management reported that actors in the camp **have not** provided residents with **information on fire safety** in the past three months.

NON-FOOD ITEMS (NFIs)

NFI needs

Top three anticipated NFI needs for the next three months:⁶

Rechargeable fan	69%
Cool box	60%
Shading material	36%

All of the three most named NFI needs were **seasonal items**. Other summer-specific needs included ice (9% of households) and jerry cans (2% of households).

Sources of light

Top three sources of light inside shelters:⁵

Camp generator	49%
Solar panels	39%
Rechargeable flashlight	19%

Winter response

Top three challenges faced by households during the last winter:⁵

Water leaking into shelter	61%
Shelter damage (bad weather)	49%
Lack of sufficient fuel	39%

Winter items received, by % of households:

82%	Heater
76%	Blankets
72%	Cash/voucher assistance
71%	Winter clothes/shoes
64%	Shelter reinforcement material
59%	Fuel
9%	None

39% of households reported that one of their primary winter-related issues was a lack of fuel. 39% of all households reported that they had **bought extra fuel** in order to cope with the cold winter weather.

Heater and fuel issues faced by households:⁵

Bad smell	60%
Smoke leaking into shelter	46%
Irritation of eyes	36%

7. Enumerators were asked to observe the state of the tent and select one of the options.

PROTECTION

72% of households reported that **personal safety and security issues** had occurred within the camp in the two weeks prior to the assessment.
Most commonly reported issues:

- Presence of rodents (55%)
- Serious threat from scorpions, snakes, or similar (24%)

Gender

Households reporting the presence of gender-based protection issues within the camp (in the two weeks prior to data collection):

In the two weeks prior to data collection, **women in 22%** and **men in 15%** of households had reportedly exhibited **signs of psychosocial distress**.⁸
10% of households reported that at least one woman or girl had attended a **women's space**⁹ in the 30 days prior to data collection.

	None	In some spaces	In all spaces
Latrines	No data	No data	No data
Handwashing facilities		✓	

Freedom of movement

100% of households who needed to leave the camp temporarily for **medical emergencies** in the two weeks prior to data collection reported that they had been able to do so.

Households reporting that they were able to leave for non-emergency purposes in the two weeks prior to data collection:

Child protection

Households reporting the presence of child protection issues within the camp (in the two weeks prior to data collection):

8% of households with children aged 3-17 reported that at least one child had exhibited **changes in behaviour**¹⁰ in the previous two weeks.

59% of households with children aged 3-17 reported that at least one child had attended a **Child Friendly Space**⁹ (CFS) in the 30 days prior to data collection.

	None	In some CFSs	In all CFSs
Gender-segregated latrines		✓	
Handwashing facilities		✓	

Documentation

3% of individuals in the camp are reportedly in possession of their key **identification papers**.¹¹

77% of children under five years old reportedly have **birth registration documentation**.

Vulnerable groups

Proportion of total assessed population in vulnerable groups:¹²

Children at risk	0.4%	Elderly at risk	0.5%
Chronically ill persons	1.8%	Persons with psychosocial needs	0.2%
Persons with disabilities	1.8%	Single parents/caregivers	2.0%

HEALTH

Number of healthcare facilities: 1
Service providers: NGO
Types of facilities: NGO clinic

Access to treatment for one or more household members:

Of the households who required treatment in the 30 days prior to the assessment, **41%** reported that they had faced **barriers to accessing medical care**. The most commonly reported barriers were the **high cost of care** (34%) and the **(perceived) low quality of care** (9%).

8. As reported by households themselves. Assessed symptoms included: persistent headaches, sleeplessness, and more aggressive behaviour than normal towards children or towards other household members.
 9. Women's spaces and Child Friendly Spaces are designated spaces in the camp, run by humanitarian actors, where activities for these demographics are hosted.
 10. Changes in sleeping patterns, interactions with peers, attentiveness, or interest in daily or other activities.
 11. Key identification documents include: national IDs, passports, family booklets, and individual or family civil records. An individual who has lost one of these documents is not considered to be in possession of them.
 12. Self-reported by households and not verified through medical records. Children at risk are persons under 18 who are parents, separated from their immediate family, or not attending school, and persons under 16 who are married or working. Elderly people at risk are persons over the age of 65 who cannot take care of themselves or who are solely responsible for children under 18 or others who cannot take care of themselves.

WATER, SANITATION AND HYGIENE (WASH)

Water

Water trucking was the primary source of water in the camp at the time of data collection.

Drinking water was supplied by an INGO, UN agency, and was reportedly **treated** prior to distribution.

Drinking water:

100% of households used a public tap/standpipe

Household water:¹³

100% of households used a public tap/standpipe

Drinking water issues, by % of households reporting:

No issues	51%
Water tasted/smelled/looked bad	47%
People got sick after drinking	20%
Not sure	0%

16% of households reported that they treated their drinking water.

Households using negative strategies to cope with a lack of water in the two weeks prior to data collection:

Most commonly reported strategies:

- Rely on drinking water stored previously (12%)
- Modifying hygiene practices (11%)

Hygiene

Primary waste disposal system: collection
Disposal location: a dumping site outside Menbij
Sewage system: 12 septic tanks, desludged daily

95% of households reported that solid waste was collected more than once per week.

6% of individuals in the camp had suffered from **diarrhoea** in the two weeks prior to data collection.¹⁴

2% had suffered from **respiratory illness**;
3% had suffered from **skin disease**.

Households that were able to access all assessed hygiene items:¹⁵

- The most commonly inaccessible items included **washing powder** and **shampoo (adults)**.
- Hygiene items were most commonly inaccessible because households **could not afford to buy them**.

Sanitation

Number of latrines in camp: 91

Households using latrines: Communal¹⁶ 100% Household¹⁶ 0%

0% of households reported practicing **open defecation**.

Communal latrine characteristics, by % of households reporting:¹⁷

Communal latrine cleanliness, by % of households reporting:¹⁷

Very clean	12%
Mostly clean	37%
Somewhat unclean	44%
Very unclean	7%

82% of households reported that all members could access latrines.

Groups that could not always access latrines included:

- People with disabilities (12% of households)
- Elderly people 65 Years old or more (1% of households)

Number of showers in camp: 20

Households using showers: Communal¹⁶ 0% Household¹⁶ 0%

Showers in Menbij East New were reportedly under construction at the time of data collection. All households reported **bathing inside their shelters**.

13. Household water is water used for household purposes such as washing and cooking.

14. In the two weeks prior to the assessment; self-reported by households and not verified through medical records.

15. The assessed hygiene items included: soap, sanitary pads, disposable diapers, washing powder, jerry cans/buckets, toothbrushes (for adults and children), toothpaste (for adults and children), shampoo (for adults and babies), cleaning liquid (for the house), detergent for dishes, plastic garbage bags, washing lines, nail clippers, combs, and towels.

16. Communal latrines and showers are shared by more than one household. Household latrines and showers are used by only one household. This may be an informal designation that is not officially enforced.

17. Excluding households who selected 'Not sure'.

FOOD SECURITY

Consumption

Percentage of households at each food consumption score level:²

The percentage of households with an acceptable food consumption score has increased from **28%** in December 2018 to **80%** in April 2019.

However, **61%** of households still reported using food-related coping strategies in the week before data collection.

Top three reported food-related coping strategies:¹⁸

Market access

100% of households reported that they were able to access markets inside the camp to buy food. However, **51%** of these households reportedly **did not have enough funds** to buy all the items they needed.

Most commonly reported main sources of food:⁵

78% of households reported that they had **bought food on credit** in the 30 days prior to data collection; on average these households owed **29,955 SYP** (56 USD)¹⁹

Distributions

Type of food assistance received,²⁰ by % of households reporting:

0% of households who had not received a food basket, cash, or vouchers in the 30 days prior to data collection, had received at least one of these distributions in the preceding **three months**.

Top three food items households would like to receive more of:⁶

About REACH Initiative

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).

LIVELIHOODS

87% of households reported having at least one financial livelihood source in the month prior to data collection.

Average monthly household income: **46,368 SYP** (87 USD)¹⁹

Households with members earning an income: **69%**

Top three reported primary income sources:⁵

0% of households reported that they had received **cash assistance** in the month prior to data collection.

Coping strategies

Top three reported livelihoods-related coping strategies:⁵

18. Households were asked to report the number of days they employed each coping strategy, but this graph only includes the overall frequency with which a coping strategy was reported (i.e. by what percentage of households).

19. The effective exchange rate for northeast Syria was reported to be 536 Syrian pounds to the dollar in April 2019. (REACH Initiative, Market Monitoring Exercise Snapshot: 8-15 April 2019)

20. In the 30 days before the interview.

21. This includes both standard food baskets and ready-to-eat rations since it is not always clear to households what the difference is.
