

Ar-Raqqa governorate, Syria October 2019

Summary

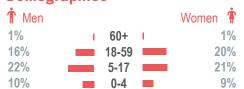

This profile provides an overview of conditions in Mahmoudliy settlement. Primary data was collected through household surveys between 26 and 29 September, prior to military escalation in northeast Syria starting on 9 October. Households were randomly sampled to a 95% confidence level and 10% margin of error, based on population figures provided by camp management. In some cases, further additional information from camp managers has been used to support findings.

Mahmoudily camp is new and opened in July 2019. It was being used to relocate IDPs from Twahina informal settlement which was in the process of being consolidated. At the time of data collection, the camp was managed by an INGO, and administered by an INGO.

Camp Overview

Number of individuals:6,1221Number of households:1,0841Number of shelters:1,6701First arrivals:July 2019Camp area:0.72 km²

On average, households in the camp had been displaced 4 times before arriving to this camp and 5% of households in the camp had been displaced longer than one year.

100% of households were planning to stay in the camp.

It was unknown whether households received any information on returning to their area of origin from the camp management / administration.

PROTECTION

Protection issues

76% of households in the camp reported being aware of safety and security issues in the camp, during the two weeks prior to data collection.

The most commonly reported issues were:

- Refusal to host certain groups of people (77%)
- Disputes between residents (59%)
- Movement restrictions (41%)

4% of households reported at least one member suffering from **psychosocial distress**. ⁴ **13%** of households with children aged 3-17 reported that at least one child had exhibited **changes in behaviour** ⁵ in the two weeks prior to data collection.

Freedom of movement

27% of households who needed to leave the camp temporarily for **medical emergencies** in the two weeks prior to data collection reported that they had been able to do so.

Households reporting that they were able to leave for nonemergency purposes in the two weeks prior to data collection:

Yes 36% No 64%

Most commonly reported barriers:

- Site departure conditions needs approval (91%)
- Transport available but too expensive (27%)

Gender-based violence

Households reporting the presence of gender-based protection issues within the camp (in the two weeks prior to data collection):

Yes 53% No 47%

Most commonly reported issues:

- Early marriage (women below 16 years old) (82%)
- Restrictions on women and girls accessing services (18%)

Child protection

Households reporting the presence of child protection issues within the camp (in the two weeks prior to data collection):

Yes **76%** No **24%**

Most commonly reported issues:

- Child labour (91%)
- Early marriage (below 16 years old) (68%)

Documentation

50% of households reported that all married individuals in the household are in possession of their **marriage certificate**. The main reason why married individuals were not in possession of their marriage certificate was **certificate services were**

37% of children under five years old reportedly have **birth** registration documentation.

Vulnerable groups

Proportion of total assessed population in vulnerable groups:6

Children at risk ⁷	1.1%	People with psychosocial needs	0.7%
Elderly at risk ⁷	17%	Single parents/caregivers	1.9%
Persons with disabilities	1.7%	Pregnant/lactating women ⁷	26.1%
Chronically ill persons	2.6%	In female-headed households	13.4%

4. As reported by households themselves. Assessed symptoms included: persistent headaches, sleeplessness, and more aggressive behaviour than normal towards children or other household members.

5. As reported by households themselves. Changes in sleeping patterns, interactions with pages, artificiances, or interact in other daily activities.

5. As reported by households themselves. Changes in sleeping patterns, interactions with peers, attentiveness, or interest in other daily activities.
6. Self-reported by households and not verified through medical records. Children at risk are persons under 18 who are parents, separated from their immediate family, or not attending school, and persons under 16

who are married or working. Elderly people at risk are persons over the age of 65 who cannot take care of themselves or who are solely responsible for children under 18 or others who cannot take care of themselves.

7. Percentage is the proportion of the population subset who are reported as vulnerable.

EDUCATION

At the time of data collection, there were 4 educational facilities in the camp.

6-11, 12-14, 15-17 Age groups: Service providers: LNGOs, INGOs Curricula on offer: Self-taught/UNICEF

Certification available: No data³

Availability of WASH facilities in educational facilities

Gender-segregated latrines: In all schools Handwashing facilities: In some schools Safe drinking water: In some schools

Attendance

†	18%	Girls	Age	Boys	35%	Ť
0%	0%		3-5		0%	0%
0%	41%		6-11		60%	0%
0%	10%		12-14		37%	0%
0%	0%		15-17		6%	0%

Inside camp Outside camp

The proportion of children aged 6-11 who attended school was 51% at the time of data collection.

Barriers to education: of the 60% of households with children aged 3-17 who reported that none of them went to school, 100% reported that they faced barriers to education. The most commonly reported barriers were:

- No space in school / unable to register (41%)
- No education for children of a certain age (38%)
- No education available/lack of learning space (14%)

WATER, SANITATION AND HYGIENE (WASH)

Water

Public tap/standpipe was the primary source of water in the camp at the time of data collection. However, no data was available on the drinking water supplier or whether water was treated prior to distribution.

1% of households reported they spent at least two consecutive days without access to drinking water in the two weeks prior to data collection.

100% of households reported using a public tap/standpipe to access drinking water.

Drinking water issues in the two weeks prior to data collection, by % of households reporting:

No issues 89% Water tasted/smelled/looked bad People got sick after drinking 4%

6% of households reported that they treated their drinking water.

Households using negative strategies to cope with a lack of water in the two weeks prior to data collection:

Most commonly reported strategies:

- Rely on drinking water stored previously (82%)
- Reduce drinking water consumption (18%)

30% of individuals reported having suffered from diarrhoea in the two weeks prior to data collection, with 14% suffering from respiratory illnesses and 25% from skin diseases.8

Waste disposal

Primary waste disposal system: Communal garbage bin Disposal location: Official landfill

Sewage system: Sewage network

100% of households reported that solid waste was collected more than once per week.

Sanitation

Number of latrines in camp: 591 (May 2019: NA)

Communal¹⁰ Household¹⁰

Households using latrines:

100%

0% of households reported practicing open defecation as main practice.

11% of households reported that some members could not access latrines, with boys (0-17) being most frequent (7% of households).

Communal latrine characteristics, by % of households reporting:11

Segregated by gender Lockable from inside 4% 95% Functioning lighting 20% 23% 57% Privacy wall None Some

Communal latrine cleanliness, by % of households reporting:11

Very clean 17% Mostly clean Somewhat unclean 25% Very unclean

Number of showers in camp: 8 (May 2019: NA)

Communal¹⁰ Household¹⁰ 0%

Households using showers⁷

Households without access to showers predominantly reported bathing inside their shelters (100%).

Households that were able to access all assessed hygiene items:9

Yes 71% No

The most commonly inaccessible items included washing powder and bars of soap. Hygiene items were most commonly inaccessible because households could not afford to buy them.

11 Excluding households who selected not sure

^{8.} In the two weeks prior to data collection, self-verified by household and not verified through medical records.

9. The assessed hygiene items included: soap, sanitary pads, disposable diapers, washing powder, jerry cans/buckets, toothbrushes (for adults and children), toothpaste (for adults and children), shampoo (for adults and babies), cleaning liquid (for house), detergent for dishes, plastic garbage bags, washing lines, nail clippers, combs, and towels.

10. Communal latrines and showers are shared by more than one household. Household latrines and showers are used only by one household. This may be an informal designation that is not officially enforced.

ਝ HEALTH

Number of healthcare facilities: 3

Service providers: LNGOs, INGOs, UN agencies

Types of facilities: NGO clinics

Households with members in the following categories:6

Person with serious injury

3% 3%

Person with chronic illness Pregnant or lactating woman

36%

Access to treatment for one or more household members in the 30 days prior to data collection:

Of the households who required treatment in the 30 days prior to data collection, 80% reported that they had faced barriers accessing medical care. The most commonly reported barriers were lack of medicine (62%) and cost of care/medicine being too high (58%).

Households reporting that a member had given birth since living in the camp:

Yes 21% No 79% Where women delivered:

- At a health facility (86%)
- At home with non-professional assistance (9%)

46% Did not require treatment Of all households in the camp.. 14% Did not seek treatment 33% Received treatment inside the camp 54% Required treatment 86% Sought treatment 65% Received treatment outside the camp

FOOD SECURITY

Consumption

Percentage of households at each food consumption score level:2

Acceptable 46% Borderline 43% Poor

The percentage of households with an acceptable food consumption score was 46% in September 2019.

96% of households reported using food-related coping strategies in the week before data collection.

Top three reported food-related coping strategies:13

Borrowing food Eating smaller meals 50% Eating fewer meals 40%

Distributions

Type of food assistance received¹⁵, by % of households reporting:

Bread Food basket(s) Cash/vouchers for food 8% ■

or vouchers in the 30 days prior to data collection, had received at least one of these distributions in the preceding three months.

9% of the 12% households who had not received a food basket, cash,

Top three food items households would like to receive more of:16

Sugar 89% Ghee/vegetable oil Rice

Most commonly reported main sources of food:13

Food distributions 100% Markets in the camp 81% Markets outside the camp

Market access

68% of households reported that they were able to access markets inside the camp to buy food. However, 86% of these households reportedly did not have enough funds to buy all the items they needed.

LIVELIHOODS

Livelihood Sources

54% of households reported having at least one financial livelihood source in the month prior to data collection.

Average monthly household income: 42,964 SYP (66 USD)14 Households with members earning an income: 79%

Top three reported primary income sources in the 30 days prior to data collection:16

Employment inside the camp 46% Cash for work Borrowed from family or friends 24%

Coping strategies

Top three reported livelihoods-related coping strategies:16

Borrowed money 84% Sold assistance items received Support from friends and relatives 20%

61% of households reported that they had bought goods on credit in the 30 days prior to data collection; on average these households owed **30,990 SYP** (48 USD)¹³

- 12. Households were asked to report the number of days they employed each coping strategy, graph only shows the overall frequency with which a coping strategy was reported.
- Households could select as many options as applied.

 The effective exchange rate for Northeast Stria was reported to be 650 Syrian Pounds to the dollar in September 2019 (REACH Initiative, Market Monitoring Exercise Snapshot 21 October 2019).
- In the 30 days before data collection. 16. Households could select up to three options

★ SHELTER AND NON-FOOD ITEMS (NFIs)

Shelter

99% of inhabited shelters were family-sized tents.

Average number of people per shelter: 3.7

Average number of shelters per household: 1.5

Average household size: 5.7 individuals

Tent status¹⁷

Tent is new	90%
Minor wear and tear	10%
Tent is in poor condition	0%
Tent is worn/torn	0%

Sources of light

Top three sources of light inside shelters:13

Light powered by solar panels	58 %	
Rechargeable flashlight/lamp	25%	
Flashlight/lamp with disposable	22%	
batteries		

NFI needs

Top three anticipated NFI needs for the next three months:16

Winter blankets	52 %	
Plastic sheeting	52 %	
Heating fuel	39%	

Shelter adequacy

99% of households reported that they faced shelter adequacy issues.

Top three most commonly reported shelter adequacy issues:16

Lack of privacy	77%	
No electricity	40%	
Safety (fall hazards, etc.)	33%	

Top three most commonly reported shelter item needs:16

Plastic sheeting	47%		
Tarpaulins	45%		
New/additional tents	3%	1	

8% of respondents reported they had access to a kitchen space.

Fire safety

Households reporting the presence of fire fighting systems that could be used to protect them:

re extinguishers 85% Yes - other 0%	
Not sure 1% No 14%	
INO 1470	

40% of respondents with access to a fire fighting system reported being familiar with **how to use it**. Camp management reported that actors in the camp **had** provided residents with **information on fire safety** in the three months prior to data collection.

® INFORMATION AND ACCOUNTABILITY

Camp management and committees

27% of households reported that they did not know the camp management, with **23%** saying that they were not sure.

Committees reported by households to be present in camp:

91% Camp management

50% Youth committee

94% Women's committee

93% Maintenance committee

64% WASH committee

93% Distribution committee

Information Needs

Top three reported sources of information about distributions:13

Top three reported information needs:16

How to find job opportunities 79%
How to access assistance 31%
Sponsorship programmes 25%

Complaints

Only 10% of households who had made a complaint in the three months prior to data collection reported that action was taken as a result:

Of all households in the camp... 77% Did not know where to complain a complaint

23% Had a complaint

73% Knew where to make a complaint

90% Did not make a complaint

10% Made a complaint

10% action was taken

90% No action was taken

About REACH Initiative

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).

17. Enumerators were asked to observe the state of the tent and select one of the options
