

Methodology:
The 2026 MSNA assessed humanitarian needs through 4,896 household interviews conducted on 9th to 25th June 2026 among refugee, host and affected populations in selected areas of Kenya, including Dadaab, Kakuma, Kalobeyei and five counties. Education and healthcare findings apply only to relevant households. Safety indicators are household-level; results are indicative and not directly comparable across indicators.

Note:
Safety-related barriers are reported for all assessed households and should not be interpreted as being related to school attendance.
