Multi-Sector Needs Assessment - July 2018 Nayapara RC, Teknaf, Cox's Bazar, Bangladesh

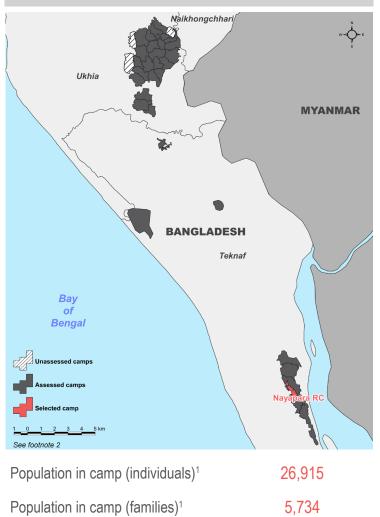

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landsides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Nayapara RC where 94 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found <u>here</u>³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

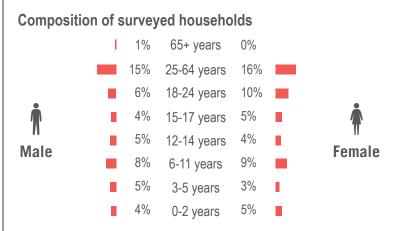

44% of respondents were female

52% of refugees are under age 18

M Demographics

96% of households with at least one child under 18 years old

59% of households with at least one child under 5 years old

22% of heads of households were female

48% of households with pregnant or lactating women

45% of households with at least one person with a disability or chronic illness

1. As defined by UNHCR in the population data and key demographical indicators (15 July dataset)

2. The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations
