

Introduction

While an estimated 2.1 million people live in displacement sites in Somalia¹, existing information on exact locations and site level vulnerabilities is sparse, and existing assessments have been ad-hoc and unharmonised, resulting in low comparability and verification.

The Detailed Site Assessment (DSA) was triggered in coordination with the Camp Coordination and Camp Management (CCCM) Cluster in order to provide the humanitarian community with up-to-date information on location of internally displaced persons (IDP) sites, the conditions and capacity of the sites and the humanitarian needs of the residents.

Target locations for assessment were selected based on needs identified by the CCCM Cluster

and accessibility for data collection.

A grid pattern approach² was applied during data collection to ensure that all IDP sites in the target area were identified. In each site, two key informant (KI) interviews were conducted: one with the site manager or community leader and one with a women's representative to ensure the perspectives of different groups were captured³. KI responses were aggregated to give one response per question per site.

This factsheet presents a summary of Barwaaqo Site profile along with the needs and priorities of IDPs residing in the site. As the data is captured through KIs, findings should be considered indicative only.

Date assessed: **Sep - 2017**

Location map

Assessed IDP sites in Gaalkacyo North

Coordinates: Lat. 6.789, Long. 47.4

1.United Nations High Commissioner for Refugees (UNHCR): Protection & Return Monitoring Network (PRMN), September 2017

2.For each target location, the area was divided into 1km² grids. Enumerator teams then visited each grid to verify whether an IDP site was present. By visiting all grids, teams were able to determine the total number of sites in each location.

3.Where KI responses were significantly divergent, these were verified with the respective KIs with a higher reliability accorded to the response provided by the site manager or community leader.

Site Information

Settlement type	Spontaneous site
Estimated number of individuals	816
Estimated number of households	272
Site capacity reached	Yes
Responsible management agency	No management
Date when most site residents arrived	Jan-17
Site owner	Local authority

Protection

Number of vulnerable households:	
Female-headed households	70
Child-headed households	0
Elderly individuals ⁴	216
Unaccompanied children	0
Individuals with a physical disability	100
Presence of shared community space	No
Presence of separate space for women/girls	No
Presence of child friendly space	No
Public lighting in the site	No
Type of landownership	Formal
Risk of eviction in next three months	Yes

WASH

Access to potable water	Yes
Number of latrines in the site:	
Latrines (mixed)	0
Latrines (male)	0
Latrines (female)	0
Access to handwashing facilities	No

Shelter and Non-Food Items (NFI)

Most common shelter types in the site⁵:	
1. Buul	
2. N/A	
3. N/A	
Electricity available in the site	No
Access to a NFI market	No
Average walking time to the nearest NFI market	N/A
Perceived safe access to NFI market	N/A

Displacement

Estimated number of households per displacement group:	
IDPs	272
Host community/ non-displaced	0
IDP households arrived in the past 3 months	50
Most common areas of origin:	
First area of origin	Woqooyi Galbeed
Second area of origin	Mudug
Third area of origin	Nugaal

Food Security

Primary source of food	Household production
Food distributions	None
Access to a food market	No

Health and Nutrition

Most common health issue(s) reported in the site:	
1. Malaria	
2. N/A	
3. N/A	
Access to healthcare services	No
Average walking time to the nearest health service	N/A
Women give birth in the site	Yes
Access to nutrition services	No
Average walking time to the nearest nutrition service	N/A
Access to nutrition services:	No

Education

Education services available	No
Average walking time to the nearest school	N/A

and accessibility for data collection.

A grid pattern approach² was applied during data collection to ensure that all IDP sites in the target area were identified. In each site, two key informant (KI) interviews were conducted: one with the site manager or community leader and one with a women's representative to ensure the perspectives of different groups were captured³. KI responses were aggregated to give one response per question per site.

This factsheet presents a summary of Liibaan 1 Site profile along with the needs and priorities of IDPs residing in the site. As the data is captured through KIs, findings should be considered indicative only.

Date assessed: Sep - 2017

Location map

Assessed IDP sites in Gaalkacyo North

Coordinates: Lat. 6.8, Long. 47.403

1.United Nations High Commissioner for Refugees (UNHCR): Protection & Return Monitoring Network (PRMN), September 2017

2.For each target location, the area was divided into 1km² grids. Enumerator teams then visited each grid to verify whether an IDP site was present. By visiting all grids, teams were able to determine the total number of sites in each location.

3.Where KI responses were significantly divergent, these were verified with the respective KIs with a higher reliability accorded to the response provided by the site manager or community leader.

Site Information

Settlement type	Spontaneous site
Estimated number of individuals	360
Estimated number of households	160
Site capacity reached	Yes
Responsible management agency	Local authority
Date when most site residents arrived	Jan-17
Site owner	Local authority

Protection

Number of vulnerable households:	
Female-headed households	160
Child-headed households	0
Elderly individuals ⁴	30
Unaccompanied children	0
Individuals with a physical disability	4
Presence of shared community space	No
Presence of separate space for women/girls	No
Presence of child friendly space	No
Public lighting in the site	No
Type of landownership	Formal
Risk of eviction in next three months	No

WASH

Access to potable water	No
Number of latrines in the site:	
Latrines (mixed)	0
Latrines (male)	0
Latrines (female)	0
Access to handwashing facilities	No

Shelter and Non-Food Items (NFI)

Most common shelter types in the site⁵:	
1. Buul	
2. Tent	
3. N/A	
Electricity available in the site	No
Access to a NFI market	No
Average walking time to the nearest NFI market	N/A
Perceived safe access to NFI market	N/A

Displacement

Estimated number of households per displacement group:	
IDPs	160
Host community/ non-displaced	0
IDP households arrived in the past 3 months	160
Most common areas of origin:	
First area of origin	Woqooyi Galbeed
Second area of origin	Sool
Third area of origin	Galgaduud

Coordinates: Lat. 6.809, Long. 47.4

1.United Nations High Commissioner for Refugees (UNHCR): Protection & Return Monitoring Network (PRMN), September 2017

2.For each target location, the area was divided into 1km² grids. Enumerator teams then visited each grid to verify whether an IDP site was present. By visiting all grids, teams were able to determine the total number of sites in each location.

3.Where KI responses were significantly divergent, these were verified with the respective KIs with a higher reliability accorded to the response provided by the site manager or community leader.

Site Information

Settlement type	Spontaneous site
Estimated number of individuals	1071
Estimated number of households	130
Site capacity reached	Yes
Responsible management agency	Local NGO
Date when most site residents arrived	Jan-17
Site owner	Local authority

Protection

Number of vulnerable households:

Female-headed households	100
Child-headed households	0
Elderly individuals ⁴	70
Unaccompanied children	14
Individuals with a physical disability	35
Presence of shared community space	No
Presence of separate space for women/girls	No
Presence of child friendly space	No
Public lighting in the site	No
Type of landownership	Formal
Risk of eviction in next three months	No

WASH

Access to potable water	Yes
Number of latrines in the site:	
Latrines (mixed)	10
Latrines (male)	0
Latrines (female)	0
Access to handwashing facilities	No

Shelter and Non-Food Items (NFI)

Most common shelter types in the site⁵:

1. Buul	
2. N/A	
3. N/A	
Electricity available in the site	No
Access to a NFI market	No
Average walking time to the nearest NFI market	N/A
Perceived safe access to NFI market	N/A

Displacement

Estimated number of households per displacement group:

IDPs	130
Host community/ non-displaced	0
IDP households arrived in the past 3 months	50

Most common areas of origin:

First area of origin	Banadir
Second area of origin	Lower Shabelle
Third area of origin	Mudug

Food Security

Primary source of food	Market purchase
Food distributions	None
Access to a food market	No

Health and Nutrition

Most common health issue(s) reported in the site:

1. AWD / Cholera
2. Malaria
3. N/A

Access to healthcare services	No
Average walking time to the nearest health service	N/A
Women give birth in the site	Yes
Access to nutrition services	No
Average walking time to the nearest nutrition service	N/A

Access to nutrition services: No

Education

Education services available	No
Average walking time to the nearest school	N/A

Education facilities available to residents in the site⁵:

1. N/A
2. N/A

5.Key informants could select multiple responses.

Introduction

While an estimated 2.1 million people live in displacement sites in Somalia¹, existing information on exact locations and site level vulnerabilities is sparse, and existing assessments have been ad-hoc and unharmonised, resulting in low comparability and verification.

The Detailed Site Assessment (DSA) was triggered in coordination with the Camp Coordination and Camp Management (CCCM) Cluster in order to provide the humanitarian community with up-to-date information on location of internally displaced persons (IDP) sites, the conditions and capacity of the sites and the humanitarian needs of the residents.

Target locations for assessment were selected based on needs identified by the CCCM Cluster

and accessibility for data collection.

A grid pattern approach² was applied during data collection to ensure that all IDP sites in the target area were identified. In each site, two key informant (KI) interviews were conducted: one with the site manager or community leader and one with a women's representative to ensure the perspectives of different groups were captured³. KI responses were aggregated to give one response per question per site.

This factsheet presents a summary of Mustaqbal 2 B Site profile along with the needs and priorities of IDPs residing in the site. As the data is captured through KIs, findings should be considered indicative only.

5.Key informants could select multiple responses.

Introduction

While an estimated 2.1 million people live in displacement sites in Somalia¹, existing information on exact locations and site level vulnerabilities is sparse, and existing assessments have been ad-hoc and unharmonised, resulting in low comparability and verification.

The Detailed Site Assessment (DSA) was triggered in coordination with the Camp Coordination and Camp Management (CCCM) Cluster in order to provide the humanitarian community with up-to-date information on location of internally displaced persons (IDP) sites, the conditions and capacity of the sites and the humanitarian needs of the residents.

Target locations for assessment were selected based on needs identified by the CCCM Cluster

and accessibility for data collection.

A grid pattern approach² was applied during data collection to ensure that all IDP sites in the target area were identified. In each site, two key informant (KI) interviews were conducted: one with the site manager or community leader and one with a women's representative to ensure the perspectives of different groups were captured³. KI responses were aggregated to give one response per question per site.

This factsheet presents a summary of Camp Ciise1 Site profile along with the needs and priorities of IDPs residing in the site. As the data is captured through KIs, findings should be considered indicative only.

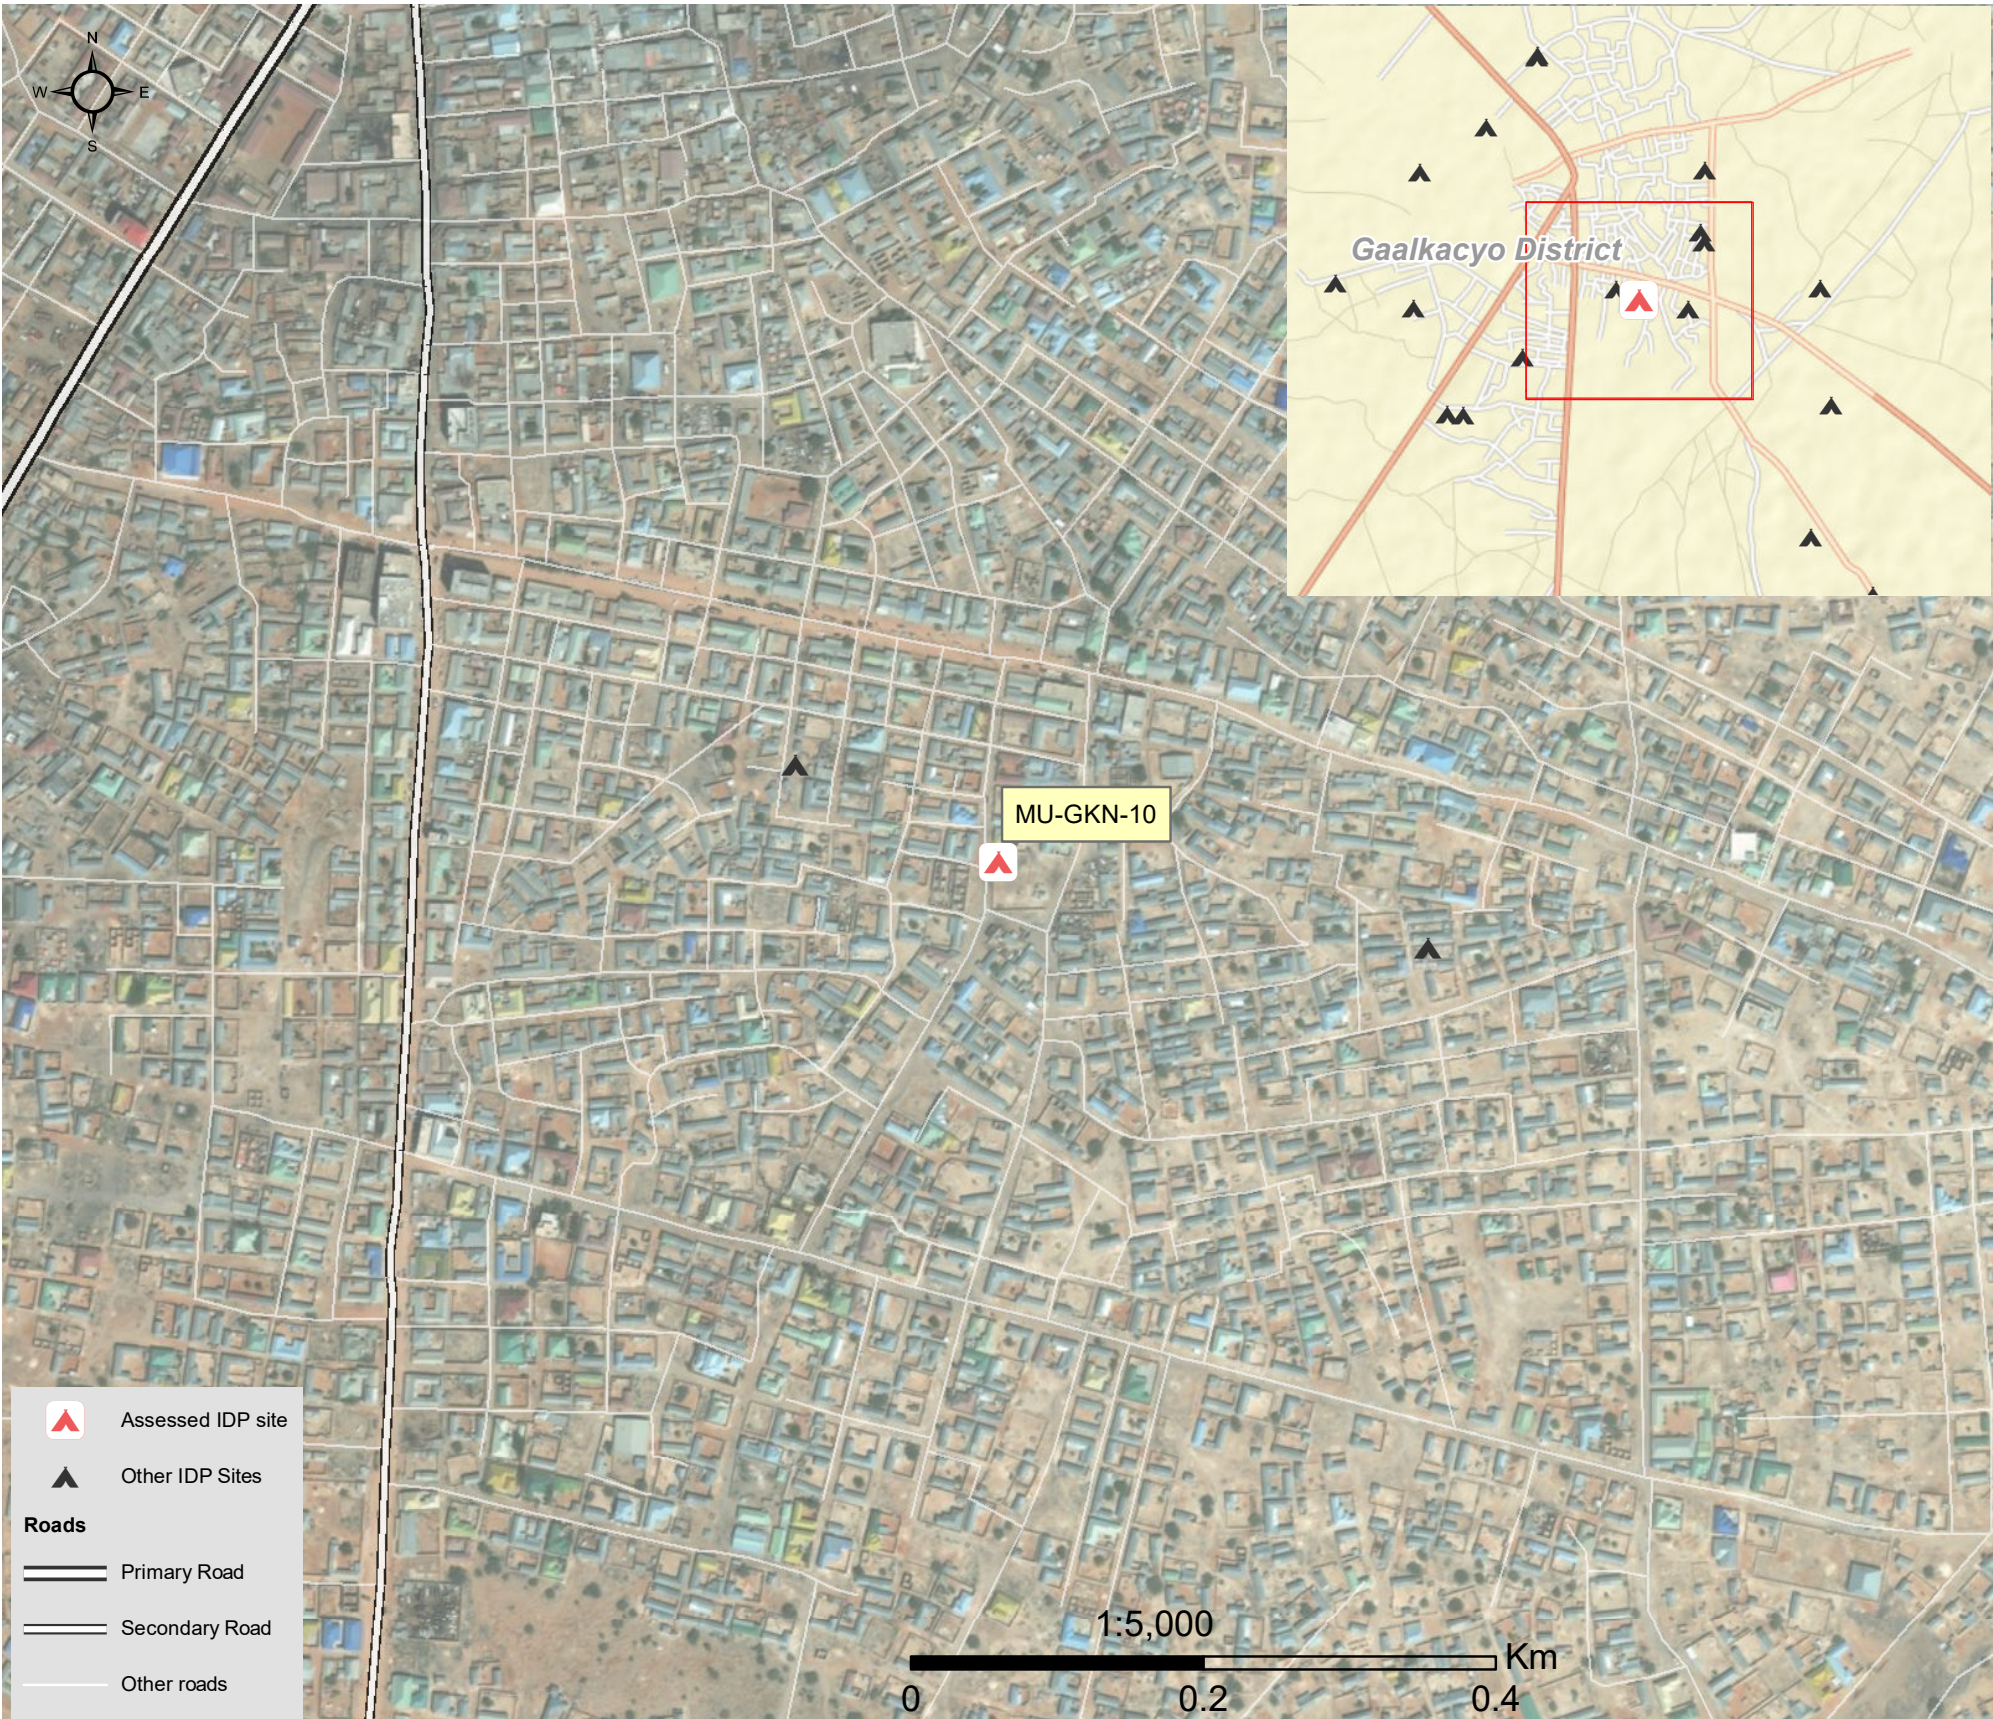

Date assessed: **Sep - 2017**

4.More than 60 years old.

5.Key informants could select multiple responses.

Introduction

While an estimated 2.1 million people live in displacement sites in Somalia¹, existing information on exact locations and site level vulnerabilities is sparse, and existing assessments have been ad-hoc and unharmonised, resulting in low comparability and verification.

The Detailed Site Assessment (DSA) was triggered in coordination with the Camp Coordination and Camp Management (CCCM) Cluster in order to provide the humanitarian community with up-to-date information on location of internally displaced persons (IDP) sites, the conditions and capacity of the sites and the humanitarian needs of the residents.

Target locations for assessment were selected based on needs identified by the CCCM Cluster

and accessibility for data collection.

A grid pattern approach² was applied during data collection to ensure that all IDP sites in the target area were identified. In each site, two key informant (KI) interviews were conducted: one with the site manager or community leader and one with a women's representative to ensure the perspectives of different groups were captured³. KI responses were aggregated to give one response per question per site.

This factsheet presents a summary of Kulmiye Bali Abaar Site profile along with the needs and priorities of IDPs residing in the site. As the data is captured through KIs, findings should be considered indicative only.

Date assessed: **Sep - 2017**

Location map

Assessed IDP sites in Gaalkacyo North

Coordinates: Lat. 6.859, Long. 47.442

1.United Nations High Commissioner for Refugees (UNHCR): Protection & Return Monitoring Network (PRMN), September 2017

2.For each target location, the area was divided into 1km² grids. Enumerator teams then visited each grid to verify whether an IDP site was present. By visiting all grids, teams were able to determine the total number of sites in each location.

3.Where KI responses were significantly divergent, these were verified with the respective KIs with a higher reliability accorded to the response provided by the site manager or community leader.

Site Information

Settlement type	Spontaneous site
Estimated number of individuals	910
Estimated number of households	182
Site capacity reached	Yes
Responsible management agency	Local authority
Date when most site residents arrived	Jan-16
Site owner	None

Protection

Number of vulnerable households:	
Female-headed households	0
Child-headed households	4
Elderly individuals ⁴	110
Unaccompanied children	10
Individuals with a physical disability	9
Presence of shared community space	No
Presence of separate space for women/girls	No
Presence of child friendly space	No
Public lighting in the site	No
Type of landownership	N/A
Risk of eviction in next three months	Yes

WASH

Access to potable water	Yes
Number of latrines in the site:	
Latrines (mixed)	20
Latrines (male)	0
Latrines (female)	0
Access to handwashing facilities	No

Shelter and Non-Food Items (NFIs)
