

# Informal Site and Settlement Profiles

## Al-Hasakeh Governorate, Syria

### November 2020

## Background

The past year has seen significant change in Al-Hasakeh Governorate. In October 2019, military operations in the area around the Turkish border led to a change in control of an area of approximately 4,000 km<sup>2</sup>, encompassing Ras al-Ain, Suluk and Tell Abiad. As a result, approximately 70,000 people remain displaced, and two camps for internally displaced persons (IDPs) were closed.<sup>1</sup> Toward the end of 2020, clashes and shelling have resumed.<sup>2</sup> Additionally, there is reportedly intermittent disruption to water and electricity supplies in Al-Hasakeh governorate.<sup>3</sup>

Meanwhile, economic conditions have deteriorated across Syria, and the prices of basic goods are increasing. This is partly due to the instability and decline of the Syrian Pound (SYP) against the US Dollar (USD) as well as the escalation of conflict in northwest Syria in early 2020.<sup>3</sup>

From March 2020, measures to restrict the spread of COVID-19 have been in place in northeast Syria (NES), including a curfew, movement restrictions, closure of schools and non-essential businesses, and a ban on public gatherings. Those living in collective shelters are highlighted as a particular concern by the UN due to a limited ability to observe social distancing.<sup>4</sup> Although infection remains widespread, the rate of transmission has slowed somewhat, particularly in areas where a full lockdown was in force.<sup>5</sup> At the time of data collection in late-November, 7,256 confirmed COVID-19 cases and 214 deaths had been registered in NES.<sup>5</sup> For key findings on COVID-19, please see page 4. As of December 2020, Serekaniye camp has a designated Camp Management agency who started activities.<sup>6</sup> IDPs in collective centres are in the process of being relocated to Serekaniye camp.<sup>6</sup>

6. SSWG (December 2020). [Sites & Settlements Working Group Monthly Update - Northeast Syria November 2020](#).

7. Informal settlements are defined as "a spontaneous grouping of tents or other housing units (5+ HHs). Settlements are usually without the presence of a dedicated Camp Administration and do not have static Camp Management, though mobile camp management activities may cover the settlement". Collective centres (CCs) are defined as "a settlement (5+ HHs) hosted in existing public infrastructure not originally designed as a shelter such as a school or community center. CCs do not have a static Camp Management or Camp Administration, though mobile Camp Management or local civil councils may be present." (SSWG, January 2021 Update).

## Methodology

REACH's informal settlement profiling in NES consists of key informant (KI) interviews with community members who have knowledge of settlements. A minimum of two KIs were sought for each of the sites, focusing on each KI's sector-specific knowledge. All selected informal settlements and collective centres were verified by the NES Sites and Settlements Working Group (SSWG).<sup>7</sup>

Data collection took place between 19-30 November 2020 through remote (phone) interviews. In total, 47 settlements were assessed in Al-Hasakeh governorate. The assessment was carried out at the settlement level. Due to the KI methodology used, findings are not statistically representative and should therefore only be considered indicative of the situation in assessed settlements and not the communities they are in or near.

This Al-Hasakeh assessment follows previous assessments of informal settlements in NES in [June 2020](#) and [Feb/April 2020](#). A corresponding assessment was carried out in Menbij sub-district and in Ar-Raqqa and Deir-ez-Zor governorates in November 2020. This set of profiles can be found [here](#).

## Assessment Overview

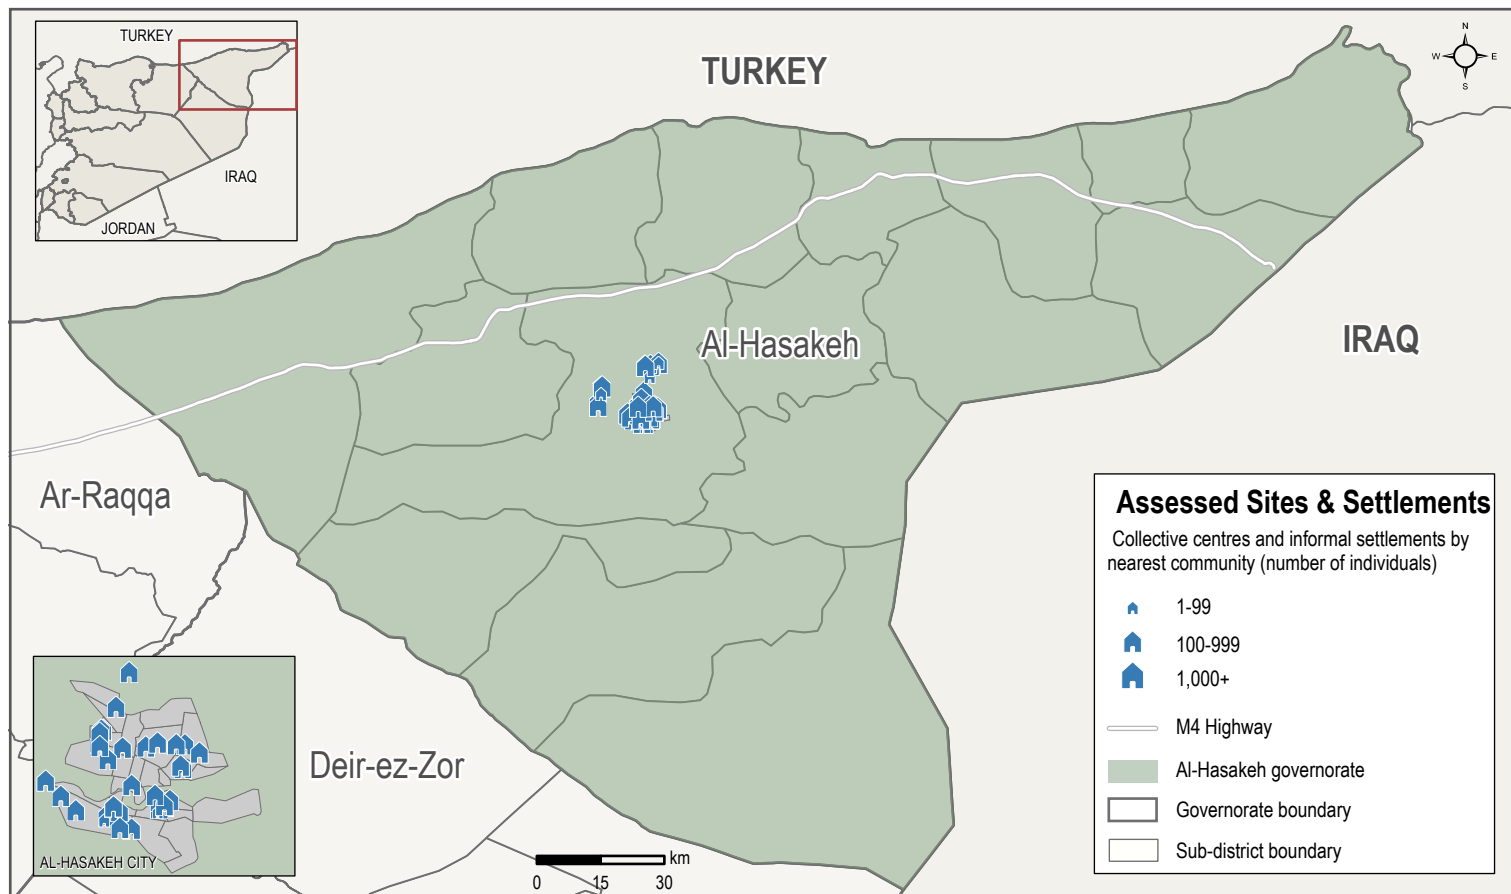

### Coverage

Assessed settlements:	47
Population in assessed settlements:	31,417
Collective centres:	47
Settlements vacated since data collection:	6

### Settlement Typology

School building:	45
Other building:	2

## Locations of Assessed Settlements

# Informal Site and Settlement Profiles

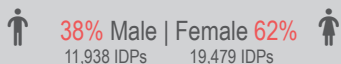

Al-Hasakeh, Syria

November 2020

## Overall Key Findings per Sector

### Assessed Settlements Overview:\*

### Estimated IDPs (Individuals)\*:

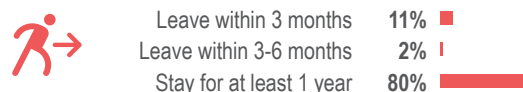

\*based on KI estimates

## MOVEMENT

Main area of origin:

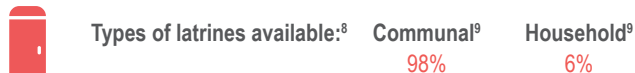

Proportion of assessed settlements by households' reported movement intentions:

KIs reported that the main factors influencing the intention to leave were access to income and employment opportunities (15% of assessed settlements), cost of living (13%) and access to food (11%).

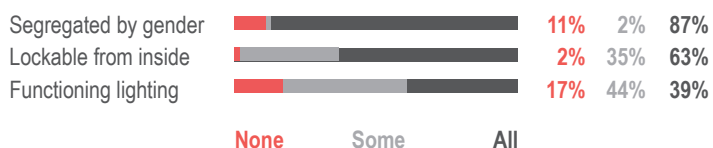

## WATER, SANITATION AND HYGIENE (WASH)

### Sanitation

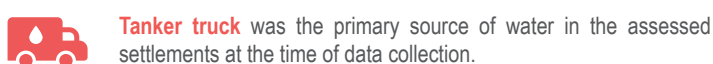

In 0% of assessed settlements, KIs reported that no communal latrines were available in the settlement. In 19% of assessed settlements, KIs reported that households were practicing **open defecation** within or outside their settlement as an alternative to latrines.

Communal latrine characteristics, by % of assessed settlements:

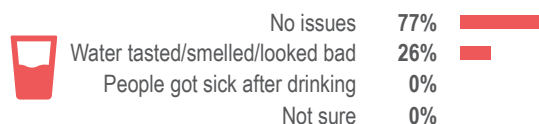

Of the communal showers in the assessed settlements, in 77% of assessed settlements KIs reported showers being **gender-segregated**, in 77% KIs reported showers having **locks** and in 41% KIs reported showers having **lighting**.

### Water

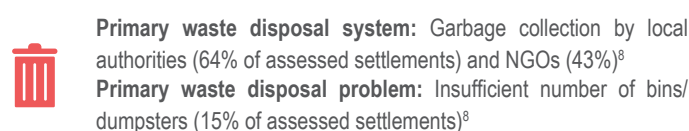

Drinking water issues, by % of assessed settlements:<sup>8</sup>

In 15% of assessed settlements, KIs reported that at least one resident in the settlement suffered from diarrhoea in the two weeks prior to data collection. In 72% of assessed settlements, KIs reported that everyone in their settlement had sufficient water to meet their daily needs in the two weeks prior to data collection.

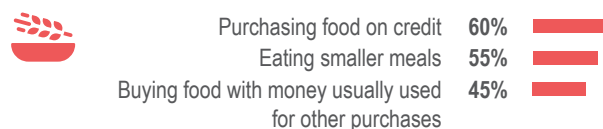

### Waste disposal

## FOOD SECURITY

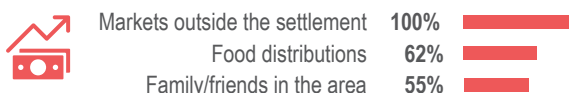

### Food security

Top three reported food-related coping strategies by % of assessed settlements:<sup>8</sup>

### Food distributions

Most commonly reported sources of food by % of assessed settlements:<sup>8</sup>

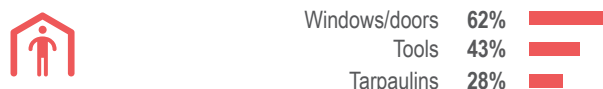

KIs reported that **ghee/vegetable oil (62% of assessed settlements)** and **sugar (57%)** were the main food items needed by residents that are currently not available through assistance or markets.<sup>8</sup>

## SHELTER AND NON-FOOD ITEMS (NFIs)

### Shelter adequacy

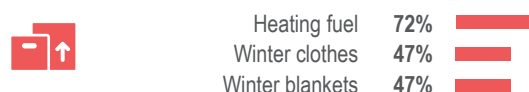

KIs estimated that a **lack of heating (81% of assessed settlements)** and a **lack of insulation from the cold (55%)** were the main shelter adequacy issues in their settlement.<sup>8</sup>

Top three most commonly reported shelter item needs by % of assessed settlements:<sup>8</sup>

### NFI needs

Top three reported anticipated NFI needs by % of assessed settlements for the next three months:<sup>8</sup>

8. Questions where KIs had multiple answer options (total may be >100%).

9. Communal latrines and showers are shared by more than one household. Household latrines and showers are used only by one household. This may be an informal designation that is not officially enforced.

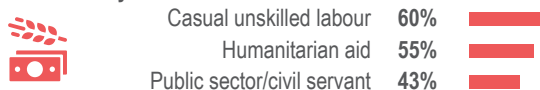

## LIVELIHOODS

### Household income

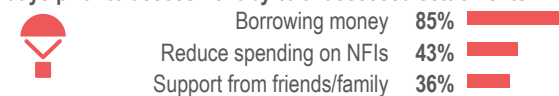

KIs estimated that **85%** of households had access to income sources. However, in only **10%** of assessed settlements, KIs reported that **most residents have a stable income**.

**Top three reported primary income sources in the 30 days prior to data collection by % of assessed settlements:**<sup>8</sup>

### Coping strategies

**Top three reported livelihoods-related coping strategies over the last 30 days prior to assessment by % of assessed settlements:**<sup>8</sup>

In **2%** of assessed settlements, KIs reported cash/voucher distributions in their settlement over the last 30 days prior to the assessment.

## PROTECTION

### Freedom of movement

In 100% of assessed settlements, KIs reported that all residents were able to **leave the assessed settlement for an emergency** at the time of data collection. In 100% of assessed settlements, KIs reported that all residents could leave without disclosing the medical reason and could leave for non-emergency reasons.

**Proportion of assessed settlements with KIs reporting on whether residents experienced barriers when leaving the assessed settlement in the two weeks prior to data collection:**

**Of assessed settlements where barriers reported, most commonly reported barriers:**<sup>8</sup>

- Transportation too expensive (21%)
- COVID-19 movement restrictions (9%)
- Insufficient transportation (4%)

### Elderly and persons with disabilities

At the time of data collection, in **4%** of assessed settlements, KIs reported interventions targeting **elderly populations** and in **4%** KIs reported interventions for **persons with disabilities** in their settlements.

### Protection issues

In **50%** of assessed settlements, KIs reported safety and security issues in the camp during the two weeks prior to the assessment.

**Of assessed settlements where security issues were reported, most commonly reported security issues:**<sup>8</sup>

- Danger from snakes, scorpions, mice (78%)
- Disputes between residents (40%)

### Documentation

In **11%** of assessed settlements, KIs reported that **everyone in their settlement is without** their national identification, passport, family booklet and/or individual/family civil record.

In **75%** of assessed settlements, KIs reported that **births are registered** in their settlement.

KIs reported that boys (32% of assessed settlements) and men (13%) face particular challenges in accessing documentation.

### Child protection

**Proportion of assessed settlements with KIs reporting the presence of child protection issues (in the two weeks prior to data collection):**

**Of assessed settlements with child protection issues reported, most commonly reported child protection issues:**<sup>8</sup>

- Child labour (38%)
- Early marriage (below age 18) (13%)

**Of assessed settlements with child protection issues reported, most commonly reported types of child labor by gender:**<sup>8</sup>

#### Boys (38% of assessed settlements)

- Selling goods (78%)
- Factory work (44%)
- Transporting people/goods (33%)

#### Girls (26%)

- Domestic labour (50%)
- Factory work (28%)
- Selling goods (11%)

In **26%** of assessed settlements, KIs reported that they were aware of **child labour** occurring among **children under the age of 11**, most commonly reporting selling goods (50% of assessed settlements) and domestic labour (15%).

In **2%** of assessed settlements, KIs reported that there are no accessible **child-friendly spaces**.

### Gender-based violence

In **0%** of assessed settlements, KIs reported that their settlements have an accessible designated space for women and girls.

**Proportion of settlements with KIs reporting the presence of gender-based concerns within the settlement (in the two weeks prior to data collection):**

**Of assessed settlements with gender-based protection concerns reported, the most commonly reported concerns were:**<sup>8</sup>

- Early marriage (below age 18) (11%)
- Forced marriage (adult women) (4%)

### Social cohesion

In **98%** of assessed settlements, KIs reported that the social relationship between different community groups in their area was neutral or positive.

## EDUCATION

In **75%** of assessed settlements, KIs reported that children in their settlement are receiving education, while in **60%** of settlements, KIs reported **barriers to education**. Of settlements where barriers to education were reported, the most commonly reported barriers were:<sup>8</sup>

- Fear of spread of disease (23%)
- Child has to work (17%)

In **53%** of assessed settlements, KIs reported that families in their settlement have been impacted by the closures of schools due to COVID-19, most commonly reporting (KIs could select multiple answer options):<sup>8</sup>

- Decrease in children's interest in learning (49%)
- Decrease in children's ability to learn (34%)
- No alternative learning available (at home or remotely) (23%)

## HEALTH

In **100%** of assessed settlements, KIs reported that their settlement has at least one health facility that is accessible for residents.

In **19%** of assessed settlements, KIs reported that sufficient medicine was available for free for people with chronic disease. In **53%** of assessed settlements, KIs reported that sufficient medicine was available to buy for people with chronic disease.

## Key Findings - COVID-19 Vulnerability

The findings on this page highlight settlements' vulnerability to COVID-19. The elderly are much more vulnerable to COVID-19, with a significantly higher fatality rate among over-60s, while access to health facilities indicates the availability of professional care for those infected.<sup>10</sup>

Information provided by KIs suggests that IDP populations in assessed settlements are generally aware of the virus and are receiving information about the pandemic. In 2% of assessed settlements, residents reportedly had difficulties in understanding the information that was provided.

Many KIs reported that local authorities and settlement residents are taking steps to limit possible exposure to the disease, and that social distancing has been promoted as a prevention measure. The data suggests that, in practice, social distancing is difficult to implement; use of communal latrines and bathing facilities indicate potentially crowded living conditions. In 38% of assessed settlements, it was reported that only a few residents were engaging in social distancing.

Handwashing with soap is an effective way to kill the virus and limit its spread,<sup>10</sup> but in 49% of assessed settlements, people reportedly did not have access to handwashing facilities, while 34% cited available soap was too expensive.

10. European Centre for Disease Prevention and Control (December 2020). Prevention and control of COVID-19. Accessed on <https://ecdc.europa.eu>

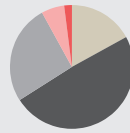

Notes on figures: Percentages represent the % of assessed settlements in which KIs reported a given behaviour or issue.

### Reported proportion of residents who are aware of COVID-19

Everyone 62%

About half 15%  
A few 4%  
Nobody 9%

### Reported issues with soap for residents within assessed settlements\*

No problems 57%  
Soap is too expensive 34%  
Poor quality of soap 9%

\*Questions where KIs had multiple answer options (total may be >100%).

\*\*Question applies to subset of KIs that reported difficulties in understanding information about COVID-19.

\*\*\*Question applies to subset of KIs that reported issues with social distancing.

### SITE OVERVIEW

Estimated IDP population: **255**

Population breakdown:

- 40% male and 60% female
- 45% children (under 18)
- 40% adult (18-59)
- 15% elderly (60+)

### COVID-19

% of population aware of COVID-19: Everyone (around 100%)

% of population that think it is an important issue: Most (around 75%)

Reported issues understanding the information: No

Community protection measures: Wear masks when going outside; Covering nose and mouth when coughing or sneezing; Stay at home as much as possible; Wash hands more regularly

Local authority protection measures within settlement: Distribution of hygiene materials (soap, disinfectant, masks, etc.); Close non-essential services and businesses

% of population aware of social distancing: Most (around 75%)

% of population engaging in social distancing: About half (around 50%)

Social distancing issues: Living conditions do not allow for social distancing

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
- Population intending to move in 6 months: 0
- Top intended destination: NA

#### CCCM

- Distributions in the month before data collection: Yes (Hygiene items; Food; COVID-19 NFI items)
- Overall priority needs: Civil documentation; Clothing; Food
- Information needs: How to access assistance; Sponsorship programs; How to find job opportunities
- % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
- Common means to receive information about COVID-19: Internet; Government officials; NGOs or charities

#### WASH

- Primary drinking water source for IDPs: Tanker truck
- Water access: More than half of the population has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: Everyone (around 100%)
- % of population with enough soap: Everyone (around 100%) (No problems accessing soap)
- Latrines: Communal latrine
- Alternatives to latrines in use: None
- Bathing facilities: Communal showers/bathing places; Bathing inside shelter
- Garbage disposal method: Garbage collection (local authorities)
- Garbage disposal issues: No challenges

#### Healthcare

- No. of health facilities accessible to IDPs: 3
- Sufficient access to medical supplies for chronic illness: No

#### Shelter/ NFIs

- Adequacy issues with shelter(s): Lack of insulation from cold; Shelters are too small/not enough space for entire household; Lack of heating
- Shelter needs: None
- Household needs per KIs: Heating fuel; Winter heaters; Winter blankets

#### Food/ Livelihoods

- Main food source: Food distributions; From family and friends in the area; From local markets outside the settlement
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction); Gifts/in-kind assistance from household/friends; Humanitarian aid)
- Reported livelihood coping strategies: Borrowing money; Accessing previous income source

#### Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: No
- Early marriage reported: No

### SITE OVERVIEW

Estimated IDP population: **125**

Population breakdown:

- 40% male and 60% female
- 50% children (under 18)
- 45% adult (18-59)
- 5% elderly (60+)

### COVID-19

% of population aware of COVID-19: Everyone (around 100%)

% of population that think it is an important issue: Everyone (around 100%)

Reported issues understanding the information: No

Community protection measures: Wear masks when going outside; Use disinfectant/steriliser more (e.g. alcohol, bleach, chlorine); Wash hands more regularly

Local authority protection measures within settlement: Distribution of hygiene materials (soap, disinfectant, masks, etc.)

% of population aware of social distancing: Most (around 75%)

% of population engaging in social distancing: Most (around 75%)

Social distancing issues: No problems related to social distancing

#### Movement

- Primary area of origin: Al-Hasakeh, Al-Hasakeh
- Population intending to move in 6 months: 0
- Top intended destination: NA

#### CCCM

- Distributions in the month before data collection: No
- Overall priority needs: Winterization kits; Medical care; Education for children
- Information needs: How to access assistance; How to find job opportunities
- % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
- Common means to receive information about COVID-19: Internet; Friends/family; Television

#### WASH

- Primary drinking water source for IDPs: Tanker truck; Piped connection to house (or neighbour's)
- Water access: Everyone/nearly everyone has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: Everyone (around 100%)
- % of population with enough soap: Everyone (around 100%) (No problems accessing soap)
- Latrines: Communal latrine
- Alternatives to latrines in use: None
- Bathing facilities: Communal showers/bathing places
- Garbage disposal method: Garbage collection (local authorities)
- Garbage disposal issues: Complete lack of garbage removal; Insufficient number of bins/dumpsters

#### Healthcare

- No. of health facilities accessible to IDPs: 1
- Sufficient access to medical supplies for chronic illness: No

#### Shelter/ NFIs

- Adequacy issues with shelter(s): Shelters are too small/not enough space for entire household; Lack of heating
- Shelter needs: Rope
- Household needs per KIs: Heating fuel; Winter heaters; Winter blankets

#### Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the settlement
- Access to food market(s): Yes
- Access to income: No
- Reported livelihood coping strategies: Selling assistance items received; Borrowing money

#### Education/ Protection

- Access to education: Secondary school; Primary school
- Child labour reported: No
- Early marriage reported: Yes

\*site has been vacated as of January 2021

#### SITE OVERVIEW

Estimated IDP population: 280

Population breakdown:

- 35% male and 65% female
- 35% children (under 18)
- 45% adult (18-59)
- 20% elderly (60+)

#### COVID-19

% of population aware of COVID-19: Everyone (around 100%)

% of population that think it is an important issue: Everyone (around 100%)

Reported issues understanding the information: No

Community protection measures: Wear masks when going outside; Stay at home as much as possible; Wash hands more regularly; Avoid touching face

Local authority protection measures within settlement: Distribution of hygiene materials (soap, disinfectant, masks, etc.); Close non-essential services and businesses

% of population aware of social distancing: Most (around 75%)

% of population engaging in social distancing: About half (around 50%)

Social distancing issues: Living conditions do not allow for social distancing

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
- Population intending to move in 6 months: 0
- Top intended destination: NA

#### CCCM

- Distributions in the month before data collection: Yes (Food; Hygiene items; COVID-19 NFI items)
- Overall priority needs: Food; Electricity; Shelter support
- Information needs: How to access assistance; How to find job opportunities; Sponsorship programs
- % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
- Common means to receive information about COVID-19: Internet; Friends/family; Government officials

#### WASH

- Primary drinking water source for IDPs: Tanker truck
- Water access: More than half of the population has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: Nobody (around 0%)
- % of population with enough soap: Everyone (around 100%) (Some people don't like the quality of the soap)
- Latrines: Communal latrine
- Alternatives to latrines in use: Open defecation within the camp
- Bathing facilities: Bathing inside shelter
- Garbage disposal method: Garbage collection (local authorities)
- Garbage disposal issues: No challenges

#### Healthcare

- No. of health facilities accessible to IDPs: 3
- Sufficient access to medical supplies for chronic illness: No

#### Shelter/ NFI

- Adequacy issues with shelter(s): Lack of insulation from cold; Lack of heating; Shelters are too small/not enough space for entire household
- Shelter needs: Windows/doors; Plastic sheeting
- Household needs per KIs: Heating fuel; Winter heaters; Winter blankets

#### Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the settlement; From family and friends in the area
- Access to food market(s): Yes
- Access to income: Yes (Humanitarian aid; Casual unskilled labour (construction); Unskilled agricultural labour)
- Reported livelihood coping strategies: Spending savings; Accessing previous income source; Borrowing money; Reducing spending on non-food expenditures such as health or education

#### Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: No
- Early marriage reported: No

#### SITE OVERVIEW

Estimated IDP population: 198

Population breakdown:

- 40% male and 60% female
- 50% children (under 18)
- 45% adult (18-59)
- 5% elderly (60+)

#### COVID-19

% of population aware of COVID-19: Everyone (around 100%)

% of population that think it is an important issue: Everyone (around 100%)

Reported issues understanding the information: No

Community protection measures: Covering nose and mouth when coughing or sneezing; Use disinfectant/steriliser more (e.g. alcohol, bleach, chlorine); Wash hands more regularly; Wear masks when going outside; Avoid touching other people (handshake, etc.)

Local authority protection measures within settlement: No measures

% of population aware of social distancing: Most (around 75%)

% of population engaging in social distancing: Most (around 75%)

Social distancing issues: No problems related to social distancing

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
- Population intending to move in 6 months: 60
- Top intended destination: NA

#### CCCM

- Distributions in the month before data collection: No
- Overall priority needs: Food; Medical care; Winterization kits
- Information needs: How to access assistance; How to find job opportunities; How to access health facilities
- % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
- Common means to receive information about COVID-19: Friends/family; Internet; NGOs or charities

#### WASH

- Primary drinking water source for IDPs: Tanker truck
- Water access: Everyone/nearly everyone has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: A few (around 25%)
- % of population with enough soap: Nobody (around 0%) (No problems accessing soap)
- Latrines: Communal latrine
- Alternatives to latrines in use: None
- Bathing facilities: Bathing inside shelter
- Garbage disposal method: Garbage collection (local authorities)
- Garbage disposal issues: Insufficient number of bins/dumpsters

#### Healthcare

- No. of health facilities accessible to IDPs: 1
- Sufficient access to medical supplies for chronic illness: No

#### Shelter/ NFI

- Adequacy issues with shelter(s): Shelters are too small/not enough space for entire household; Insufficient number of shelters for the population; Unable to lock home securely; Issues with household sanitation facilities/latrines; Lack of heating; Lack of electricity
- Shelter needs: Windows/doors; Rope
- Household needs per KIs: Heating fuel; Winter heaters; Winter blankets

#### Food/ Livelihoods

- Main food source: From local markets outside the settlement; From family and friends in the area
- Access to food market(s): Yes
- Access to income: No
- Reported livelihood coping strategies: Borrowing money

#### Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: Yes
- Early marriage reported: No

### COVID-19

% of population aware of COVID-19: Everyone (around 100%)  
 % of population that think it is an important issue: Everyone (around 100%)  
 Reported issues understanding the information: No  
 Community protection measures: Stay at home as much as possible; Wash hands more regularly; Use disinfectant/steriliser more (e.g. alcohol, bleach, chlorine); Covering nose and mouth when coughing or sneezing; Wear masks when going outside  
 Local authority protection measures within settlement: Asking people to stay at home; Distribution of hygiene materials (soap, disinfectant, masks, etc.)  
 % of population aware of social distancing: Most (around 75%)  
 % of population engaging in social distancing: Most (around 75%)  
 Social distancing issues: No problems related to social distancing

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
- Population intending to move in 6 months: 0
- Top intended destination: NA

#### CCCM

- Distributions in the month before data collection: Yes (Food)
- Overall priority needs: Employment; Food; Medical care
- Information needs: How to find job opportunities; How to access assistance
- % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
- Common means to receive information about COVID-19: Internet; NGOs or charities; Television

#### WASH

- Primary drinking water source for IDPs: Tanker truck; Public tap/standpipe
- Water access: Everyone/nearly everyone has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: Most (around 75%)
- % of population with enough soap: Most (around 75%) (No problems accessing soap)
- Latrines: Communal latrine
- Alternatives to latrines in use: None
- Bathing facilities: Communal showers/bathing places
- Garbage disposal method: Garbage collection (local authorities)
- Garbage disposal issues: No challenges

#### Healthcare

- No. of health facilities accessible to IDPs: 6
- Sufficient access to medical supplies for chronic illness: Yes

#### Shelter/ NFIs

- Adequacy issues with shelter(s): None
- Shelter needs: None
- Household needs per KIs: Heating fuel; Winter heaters; Winter blankets

#### Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the settlement
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction); Public sector/civil servant (teacher, postal service, public administration); Humanitarian aid)
- Reported livelihood coping strategies: Borrowing money; Reducing spending on non-food expenditures such as health or education; Selling assistance items received; Spending savings

#### Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: Yes
- Early marriage reported: No

# Informal Site and Settlement Profiles

Al-Hasakeh Governorate, Syria

November 2020

Al-Hasakeh sub-district: Abo Obeda Al Garah

SSWG code: SS00\_4406

## SITE OVERVIEW

Estimated IDP population: 240

Population breakdown:

- 45% male and 55% female
- 50% children (under 18)
- 45% adult (18-59)
- 5% elderly (60+)

## COVID-19

% of population aware of COVID-19: Everyone (around 100%)  
 % of population that think it is an important issue: Most (around 75%)

Population breakdown:

- 40% male and 60% female
- 50% children (under 18)
- 40% adult (18-59)
- 10% elderly (60+)

#### COVID-19

% of population aware of COVID-19: Most (around 75%)

% of population that think it is an important issue: Nobody (around 0%)

Reported issues understanding the information: No

Community protection measures: Nothing

Local authority protection measures within settlement: No measures

% of population aware of social distancing: Nobody (around 0%)

% of population engaging in social distancing: Nobody (around 0%)

Social distancing issues: Community members are unsure of the reasons why to social distance

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
- Population intending to move in 6 months: 100
- Top intended destination: Al-Hasakeh

#### CCCM

- Distributions in the month before data collection: No
- Overall priority needs: Employment; Food; Shelter support
- Information needs: How to access assistance; How to find job opportunities; Information about returning to area of origin
- % of population who have received information on COVID-19 & protection measures: Most (around 75%)
- Common means to receive information about COVID-19: Government officials; Community leaders; NGOs or charities; Radio; Television; Internet

#### WASH

- Primary drinking water source for IDPs: Tanker truck
- Water access: Everyone/nearly everyone has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: Nobody (around 0%)
- % of population with enough soap: About half (around 50%) (Soap is too expensive)
- Latrines: Household latrine; Communal latrine
- Alternatives to latrines in use: None
- Bathing facilities: Bathing inside shelter; Communal showers/bathing places
- Garbage disposal method: Garbage collection (local authorities)
- Garbage disposal issues: No challenges

#### Healthcare

- No. of health facilities accessible to IDPs: 1
- Sufficient access to medical supplies for chronic illness: No

#### Shelter/ NFI

- Adequacy issues with shelter(s): Insufficient number of shelters for the population; Shelters are too small/ not enough space for entire household; Structures are not sturdy and break/fall over easily; Many are heavily damaged/unsuitable; Lack of insulation from cold; Leaking during rain; Lack of privacy inside shelter (no partitions, no doors); Unable to lock home securely; Lack of electricity; Lack of heating
- Shelter needs: New tents; Additional tents; Tools
- Household needs per KIs: Heating fuel; Winter heaters; Winter blankets

#### Food/ Livelihoods

- Main food source: From local markets outside the settlement
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction); Public sector/civil servant (teacher, postal service, public administration))
- Reported livelihood coping strategies: Borrowing money; Reducing spending on non-food expenditures such as health or education

#### Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: No
- Early marriage reported: No

\*site has been vacated as of January 2021

### SITE OVERVIEW

Estimated IDP population: **115**

Population breakdown:

- 40% male and 60% female
- 47% children (under 18)
- 50% adult (18-59)
- 3% elderly (60+)

### COVID-19

% of population aware of COVID-19: Most (around 75%)

% of population that think it is an important issue: Most (around 75%)

Reported issues understanding the information: No

Community protection measures: Stay at home as much as possible; Wash hands more regularly; Use disinfectant/steriliser more (e.g. alcohol, bleach, chlorine); Avoid touching face; Covering nose and mouth when coughing or sneezing; Wear masks when going outside; Avoid touching other people (handshake, etc.)

Local authority protection measures within settlement: Enforce curfew; Prevention messages; Distribution of hygiene materials (soap, disinfectant, masks, etc.)

% of population aware of social distancing: About half (around 50%)

% of population engaging in social distancing: A few (around 25%)

Social distancing issues: Living conditions do not allow for social distancing

### SITE OVERVIEW

Estimated IDP population: 235

Population breakdown:

- 35% male and 65% female
- 60% children (under 18)
- 35% adult (18-59)
- 5% elderly (60+)

### COVID-19

% of population aware of COVID-19: Everyone (around 100%)

% of population that think it is an important issue: About half (around 50%)

Reported issues understanding the information: No

Community protection measures: Wash hands more regularly; Avoid touching face; Covering nose and mouth when coughing or sneezing; Wear masks when going outside

Local authority protection measures within settlement: Distribution of hygiene materials (soap, disinfectant, masks, etc.); Prevention messages

% of population aware of social distancing: About half (around 50%)

% of population engaging in social distancing: A few (around 25%)

Social distancing issues: Living conditions do not allow for social distancing

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
- Population intending to move in 6 months: 0
- Top intended destination: NA

#### CCCM

- Distributions in the month before data collection: Yes (Drinking Water; Food; Hygiene items)
- Overall priority needs: Employment; Food; Medical care
- Information needs: How to find job opportunities; Sponsorship programs
- % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
- Common means to receive information about COVID-19: NGOs or charities; Internet; Posters/flyers in the street

#### WASH

- Primary drinking water source for IDPs: Tanker truck
- Water access: Everyone/nearly everyone has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: Most (around 75%)
- % of population with enough soap: Everyone (around 100%) (No problems accessing soap)
- Latrines: Communal latrine
- Alternatives to latrines in use: None
- Bathing facilities: Bathing inside shelter
- Garbage disposal method: Garbage collection (local authorities)
- Garbage disposal issues: No challenges

#### Healthcare

- No. of health facilities accessible to IDPs: 3
- Sufficient access to medical supplies for chronic illness: Yes

#### Shelter/ NFI

- Adequacy issues with shelter(s): Lack of electricity; Lack of lighting; Lack of heating; Insufficient number of shelters for the population; Lack of privacy inside shelter (no partitions, no doors)
- Shelter needs: Windows/doors
- Household needs per KIs: Bedding items (sheets, pillows); Heating fuel; Disposable diapers

#### Food/ Livelihoods

- Main food source: Food distributions; From local markets outside the settlement;
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction); Humanitarian aid; Pension from government)
- Reported livelihood coping strategies: Reducing spending on non-food expenditures such as health or education; Selling assistance items received; Borrowing money

#### Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: Yes
- Early marriage reported: No

### SITE OVERVIEW

Estimated IDP population: 250

Population breakdown:

- 50% male and 50% female
- 40% children (under 18)
- 40% adult (18-59)
- 20% elderly (60+)

### COVID-19

% of population aware of COVID-19: Everyone (around 100%)

% of population that think it is an important issue: Everyone (around 100%)

Reported issues understanding the information: No

Community protection measures: Wash hands more regularly; Stay at home as much as possible

Local authority protection measures within settlement: Asking people to stay at home

% of population aware of social distancing: Most (around 75%)

% of population engaging in social distancing: Most (around 75%)

Social distancing issues: Living conditions do not allow for social distancing

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
- Population intending to move in 6 months: 100
- Top intended destination: NA

#### CCCM

- Distributions in the month before data collection: Yes (Food)
- Overall priority needs: Employment; Food; Shelter support
- Information needs: How to access assistance; How to find job opportunities
- % of population who have received information on COVID-19 & protection measures: Everyone (around 100%)
- Common means to receive information about COVID-19: NGOs or charities; Friends/family; Internet; Government officials

#### WASH

- Primary drinking water source for IDPs: Tanker truck
- Water access: Everyone/nearly everyone has enough water for their needs
- Water quality: No issues
- % of population with access to handwashing facilities: Nobody (around 0%)
- % of population with enough soap: Everyone (around 100%) (Soap is too expensive)
- Latrines: Communal latrine
- Alternatives to latrines in use: None
- Bathing facilities: Bathing inside shelter
- Garbage disposal method: Garbage collection (NGO)
- Garbage disposal issues: No challenges

#### Healthcare

- No. of health facilities accessible to IDPs: 1
- Sufficient access to medical supplies for chronic illness: Yes

#### Shelter/ NFI

- Adequacy issues with shelter(s): Lack of insulation from cold; Lack of heating
- Shelter needs: Tools; Tarpaulins; Timber
- Household needs per KIs: Heating fuel; Winter heaters; Winter blankets

#### Food/ Livelihoods

- Main food source: From local markets outside the settlement; Food distributions
- Access to food market(s): Yes
- Access to income: Yes (Casual unskilled labour (construction); Low skilled service industry (no formal education required; eg. Driver, cleaner); Public security official (military, police, etc.))
- Reported livelihood coping strategies: Accessing previous income source

#### Education/ Protection

- Access to education: Primary school; Secondary school
- Child labour reported: No
- Early marriage reported: No

#### SITE OVERVIEW

Estimated IDP population: **241**

Population breakdown:

- 30% male and 70% female
- 55% children (under 18)
- 35% adult (18-59)
- 10% elderly (60+)

#### COVID-19

% of population aware of COVID-19: Everyone (around 100%)

% of population that think it is an important issue: Most (around 75%)

Reported issues understanding the information: No

Community protection measures: Avoid touching other people (handshake, etc.); Wash hands more regularly; Use disinfectant/steriliser more (e.g. alcohol, bleach, chlorine); Avoid touching face; Covering nose and mouth when coughing or sneezing; Wear masks when going outside

Local authority protection measures within settlement: Prevention messages; Distribution of hygiene materials (soap, disinfectant, masks, etc.)

% of population aware of social distancing: Most (around 75%)

% of population engaging in social distancing: A few (around 25%)

Social distancing issues: Living conditions do not allow for social distancing

#### Movement

- Primary area of origin: Ras Al Ain, Al-Hasakeh
