Assessment of Hard-to-Reach Areas in South Sudan

Overview

The continuation of conflict since December 2013 has created a complex humanitarian crisis in the country; restricting humanitarian access and hindering the flow of information required by aid partners to deliver humanitarian assistance to populations in need. To address information gaps faced by the humanitarian response in South Sudan, REACH employs its Area of Knowledge (AoK) methodology to collect relevant information in hard-to-reach areas to inform humanitarian planning and interventions outside formal settlement sites.

Using the AoK methodology, REACH remotely monitors needs and access to services in the

Greater Upper Nile, Greater Equatoria and Greater Bahr el Ghazal regions. AoK data is collected monthly, through multi-sector interviews with the following typology of key informants (Kls):

- KIs who are newly arrived internally displaced persons (IDPs) who have left a hard-to-reach settlement in the last month
- KIs who have been in contact with someone living in a hard-to-reach settlement, or have been visiting one in the last month (traders, migrants, family members, etc.)
- KIs who are remaining in hard-to-reach settlements, contacted through phone

Selected KIs are purposively sampled and have knowledge from within the last month about a specific settlement in South Sudan, with data collected at the settlement level. About half of settlements assessed have more than one KI reporting on the settlement. In these cases, data is aggregated² at the settlement level according to a weighting mechanism, which can be found in the Terms of Reference (ToRs).

All percentages presented in this factsheet, unless otherwise specified, represent the proportion of settlements assessed with that specific response.

The findings presented in this factsheet are indicative of the broad protection trends in assessed

settlements in January 2022, and are not statistically generalisable.

Assessment Coverage

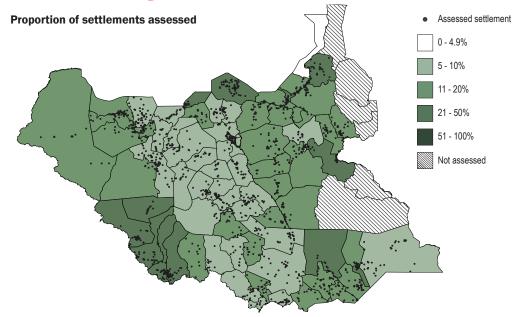

2754 Key informants interviewed

2181 Settlements assessed

72 Counties assessed

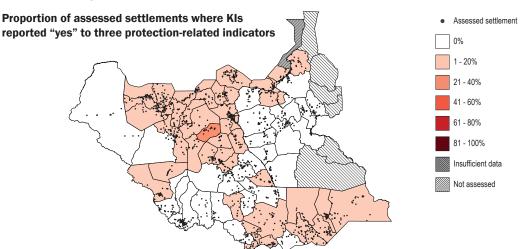

71 Counties with 5% or more coverage¹

Assessment coverage

¹ Data is only represented for counties in which at least 5% of settlements have been assessed. The most recent OCHA Common Operational Dataset (COD) released in March 2019 has been used as the reference for settlement names and locations.

Conflict composite indicator

This conflict composite indicator aims at measuring both perceptions of certain risks associated with conflict, as well as the occurrence and impact of reported conflict in the month prior to data collection. The composite was created by averaging the 'yes' responses of settlements reporting on the following indicators, with all indicators considered to have the same weight:

- Killing or forced recruitment cited as a main protection concern
- Incidence of conflict resulting in civilian death
- Incidence of shelter damage due to conflict

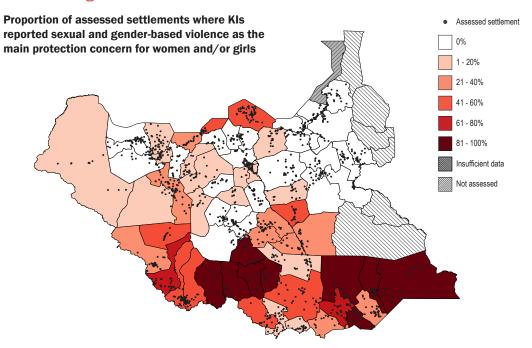

² During cleaning and aggregation counties which do not reach a consus or report "don't know' are recoded as NA thus lowering subset sizes. Additionally, unless otherwise specified all questions have a recall period of 30 days prior to data collection

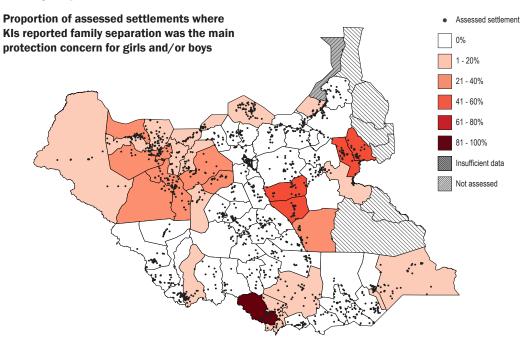

Assessment of Hard-to-Reach Areas in South Sudan

January 2022

Sexual and gender based violence

Family separation

Main Protection Concerns

Top five counties with the highest proportion of assessed settlements where KIs reported the main protection concern for women (18 years and older) is conflict-related

Yei	69%
Mundri East	47%
Leer	33%
Mayendit	28%
Kajo-keji	24%

Top five counties with the highest proportion of assessed settlements where KIs reported the main protection concern for men (18 years and older) is conflict-related

Yei	58%
Lainya	26%
Tonj North	25%
Mayendit	25%
Kapoeta South	22%

Top five counties with the highest proportion of assessed settlements where KIs reported the main protection concern for girls (younger than 18 years) is conflict-related

Yei	54%
Leer	30%
Mayendit	28%
Awerial	13%
Yirol East	10%

Top five counties with the highest proportion of assessed settlements where KIs reported the main protection concern for boys (younger than 18 years) is conflict-related

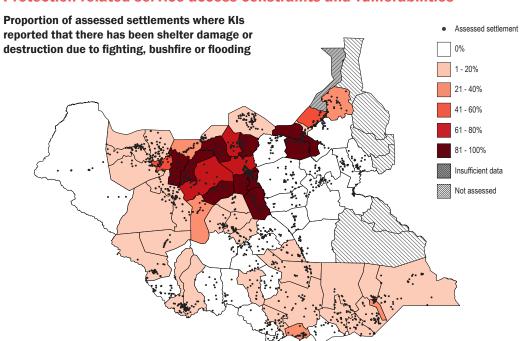

Yei	65%
Kapoeta South	33%
Leer	27%
Bor South	27%
Luakpiny/Nasir	26%

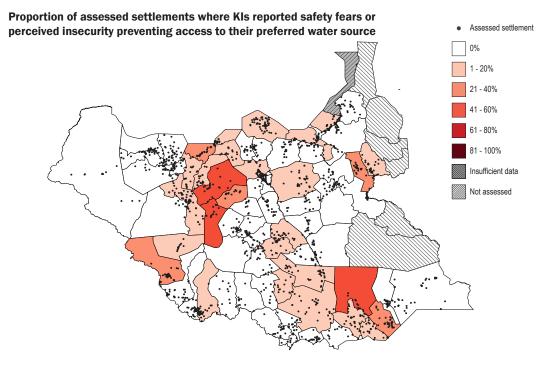

Assessment of Hard-to-Reach Areas in South Sudan

Protection-related service access constraints and vulnerabilities

Insecurity: market services

Top five counties with the highest proportion of assessed settlements where KIs reported conflict as a barrier to accessing the nearest functional market

Budi	51%
Tonj North	32%
Twic	24%
Lafon	21%
Jur River	13%

Insecurity: education services*

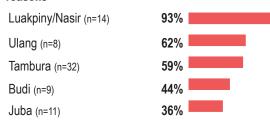

Top five counties with the highest proportion of assessed settlements where KIs reported the area being insecure as the main reason for inaccessibility of education services in the settlements

Lainya (n=10)	70%
Tonj North (n=10)	30%
Rumbek North (n=10)	30%
Budi (n=19)	16%
Torit (n=10)	10%

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reported no access to a walkable education service. Data for this indicator was collected in December 2021

Insecurity: livelihoods*

Top five counties with the highest proportion of assessed settlements where KIs reported that people are unable to access livelihood activities primarily due to conflict or insecurity related reasons

*Findings relate to the subsets of (n) amount of settlements in each county where KIs reported that people's ability to engage livelihood activities had decreased in the month prior to data collection.

Insecurity: shelter

Top five counties with the highest proportion of assessed settlements where KIs reported that there has been shelter damage or destruction due to fighting, bushfire or flooding

Tonj East	100%
Mayendit	97%
Gogrial East	91%
Panyikang	89%
Guit	88%

Housing, land and property issues

Top five counties with the highest proportion of assessed settlements where KIs reported housing, land and property rights issues in the 30 days prior to data collection

Mundri West	67%
lbba	64%
Mundri East	60%
Maridi	56%
Yei	42%

Landmines and unexploded ordnance

One county with assessed settlements where KIs reported presence of landmines and/or unexploded ordinance in the last 3 months prior to data collection

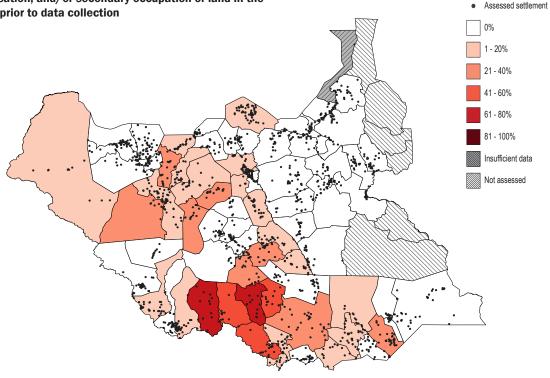

Dispute mechanisms

Top five most commonly reported actors most people go to when faced with disputes, crimes, or other problems by proportion of assessed settlements

Community leader	64%
Local court	51%
Police	32%
Local government	24%
Religious leader	14%

Land grabbing/secondary occupation

Proportion of assessed settlements where KIs reported land grabbing, land being taken without sufficient compensation, and/or secondary occupation of land in the 30 days prior to data collection

Definitions³

Land grabbing is generally understood to mean a process of large-scale acquisition of agricultural land by any person or entity (public or private, foreign or domestic) via any means ('legal' or 'illegal') without consulting the local population beforehand or obtaining its consent.

Secondary occupation occurs when any person settles or occupies a land or house without a customary or legal title or without the express consent of the owner or person legally in charge of the property.

³ Definitions are from the Housing, Land and Property Technical Working Group, South Sudan
