

# Damascus Governorate, March 2018

## Humanitarian Situation Overview in Syria (HSOS)

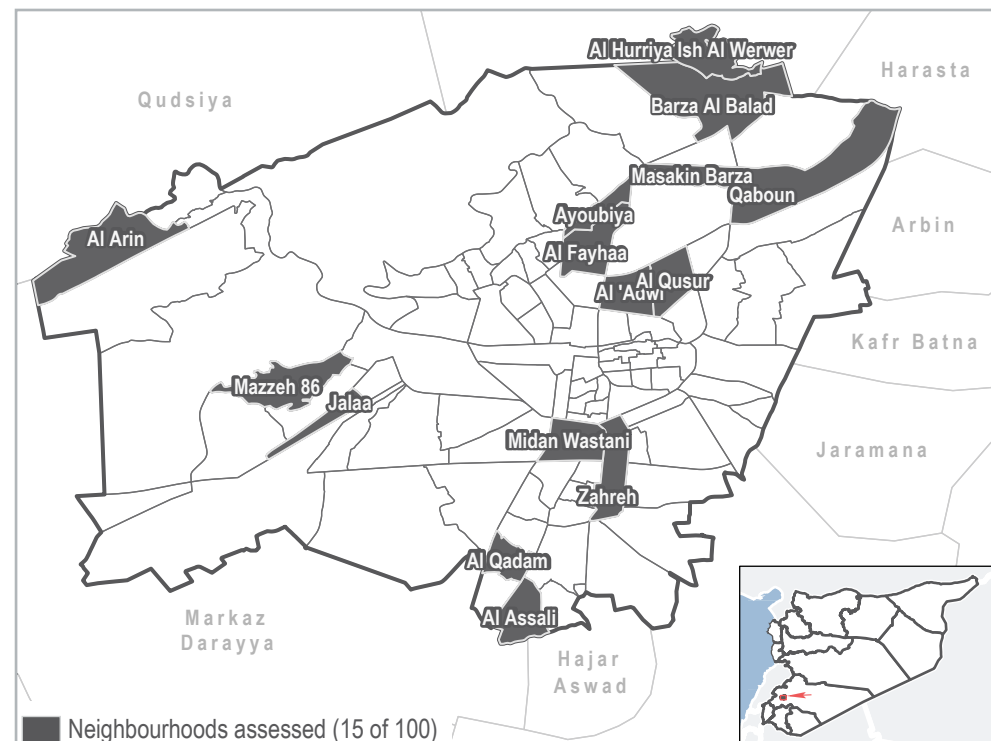

### OVERALL FINDINGS<sup>1</sup>

Syria's capital, Damascus city, is located in the southwest of the country, close to the border with Lebanon. Stability throughout the governorate has been impacted by ongoing conflict in Rural Damascus and the presence of opposing forces in near proximity to each other. On March 13th, an evacuation of opposition groups in Al Qadam neighbourhood was conducted, while simultaneously there has been ongoing pressure to expel the group known as Islamic State of Iraq and the Levant (ISIL) out of southern Damascus city. Despite this, besides of Qaboun, which has remained largely empty since conflict subsided in May 2017, all of the assessed neighbourhoods reported over **51%** of pre-conflict population remained in March.

Approximately **45 IDPs** returned to Al Hurriya Ish Al Werwer in March, citing a perceived cessation of hostilities in the neighbourhood of origin as their reason for return<sup>2</sup>. Additionally, an estimated **75,450 IDPs** were reportedly residing in the assessed neighbourhoods. Key Informants (KIs) reported that the most common reason for IDPs to remain in these neighbourhoods was access to employment, income and shelter. In all of the assessed neighbourhoods, pre-conflict populations and IDPs reported most commonly living in independent apartments or houses. While pre-conflict and returnee populations most commonly owned the property that they lived in, the majority of IDPs in assessed neighbourhoods were reportedly renting property. With the exception of Al Arin neighbourhood, which has comparably lower rent prices, average rent prices throughout the assessed neighbourhoods was approximately **22,663 SYP**, over triple the Syrian average of **6,730 SYP**.

All of the assessed neighbourhoods reported having enough fuel, as well as a sufficient amount of water to cover household needs. Of the assessed neighbourhoods, **12** reported that residents experienced no difficulties in accessing healthcare. In the remaining **3** neighbourhoods, the most commonly reported barriers were old age and disabilities, injuries, or illness preventing travel. Only **three** of the assessed neighbourhoods, Mazzeh 86, Al Hurriya, and Al Arin, reported difficulties in accessing sufficient amounts of food. This was most commonly due to some food items being too expensive as well as a lack of resources to buy available food. **Ten** of the assessed neighbourhoods reported that prices were controlled in the local markets during March. However, **14** of the assessed neighbourhoods reported that the majority of household incomes in their neighbourhood were insufficient in March. KIs reported that residents coped with the lack of income or resources by skipping meals, reducing the size of meals, or borrowing money from family and friends. Furthermore, the majority of assessed neighbourhoods reported that unstable, daily employment, as well as business/trade, were the most commonly reported income sources. In terms of education, KIs reported that most children were able to access education throughout the assessed neighbourhoods<sup>3</sup>. However, one neighborhood, Mazzeh 86, reported that education was one of the top priority needs and that services were not available in this neighborhood during March. KIs further reported that children in Mazzeh 86 were instead accessing education in nearby neighbourhoods.

### Coverage

#### Top 3 reported priority needs

1. Protection
2. Healthcare
3. Food security

#### Demographics\*

**1,925,387** people in need

**1,028,157** **897,230**

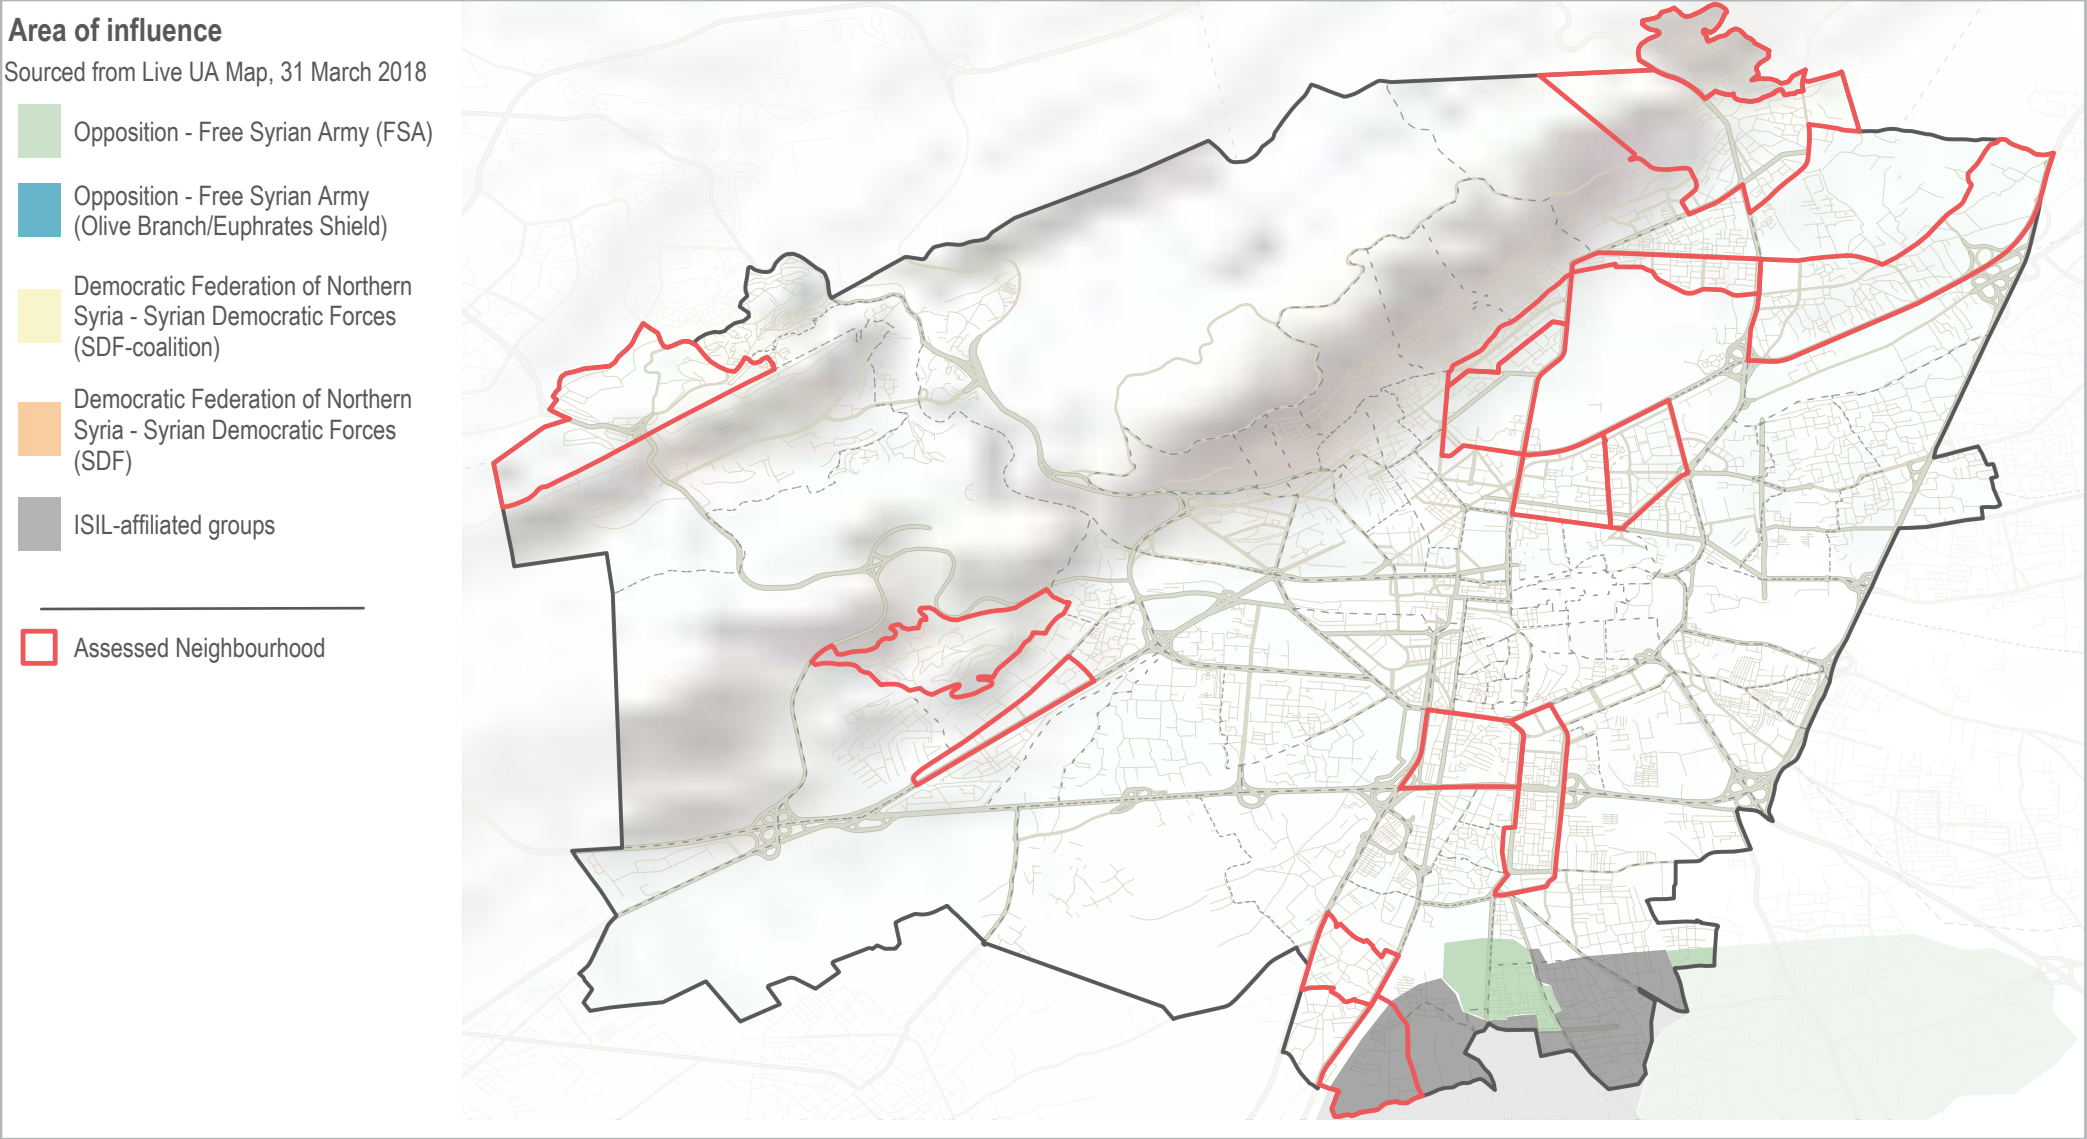

\* Figures based on HNO 2018 population data for the entire governorate.

### KEY EVENTS

Qaboun and Barza Al Balad classified as besieged by the UN.	Evacuations from the besieged districts of Burza and Qaboun towards Idlib begin <sup>4</sup> .	First inter-agency aid convoy enters Qaboun since it was classified as besieged in April <sup>5</sup> .	Violent clashes in Yarmuk despite ceasefire agreement between rival Armed Opposition Groups (AOGs) <sup>6</sup> .	Babila checkpoint reopens, allowing commercial goods to enter Babila, Yalda, Beit Sahem and Yarmuk <sup>7</sup> .	Evacuation of opposition groups out of Al Qadam neighbourhood <sup>8</sup> .
April 2017	May 2017	15 October 2017	Late October 2017	23 November 2017	13 March 2018

## Governorate areas of influence:

# Damascus Governorate, March 2018

## DISPLACEMENT

**0** Estimated number of IDP arrivals in assessed neighbourhoods in March.

**40 - 50** Estimated number of spontaneous returns in assessed neighbourhoods in March<sup>2 or 3</sup>.

### Neighbourhoods with the largest estimated number of IDP arrivals:

No IDP arrivals reported

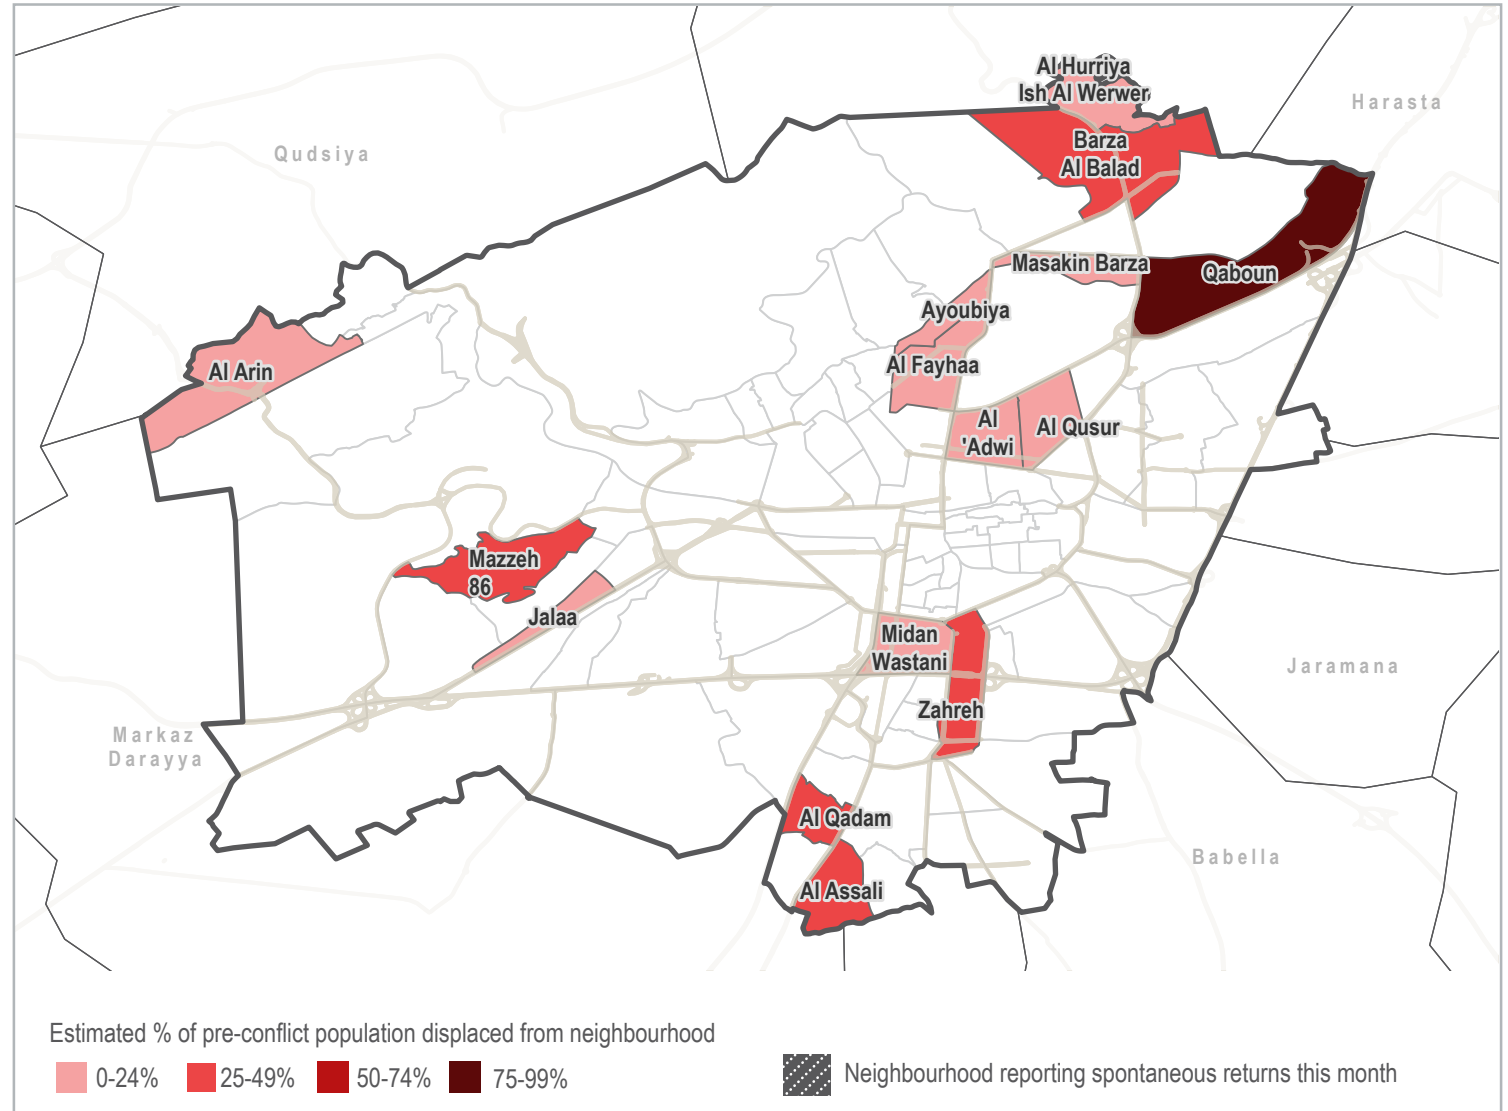

### Top 3 sub-districts of origin of most IDPs arrivals<sup>3,4</sup>:

No reported IDP arrivals

### 15 neighbourhoods reported no PCP departures<sup>3,4</sup>.

No reported PCP departures

Estimated percent of pre-conflict population (PCP) displaced from neighbourhood:

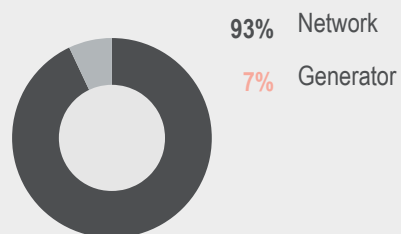

<sup>3</sup> Multiple choices allowed.

<sup>4</sup> By percent of neighbourhoods reporting.

# Damascus Governorate, March 2018

## SHELTER AND NFI

Primary source of electricity reported:<sup>4</sup>

15 neighbourhoods reported no lack of fuel<sup>3,4</sup>.

**21,067 SYP**

Governorate average reported rent price in Syrian Pounds (SYP) across assessed neighbourhoods.<sup>5</sup>

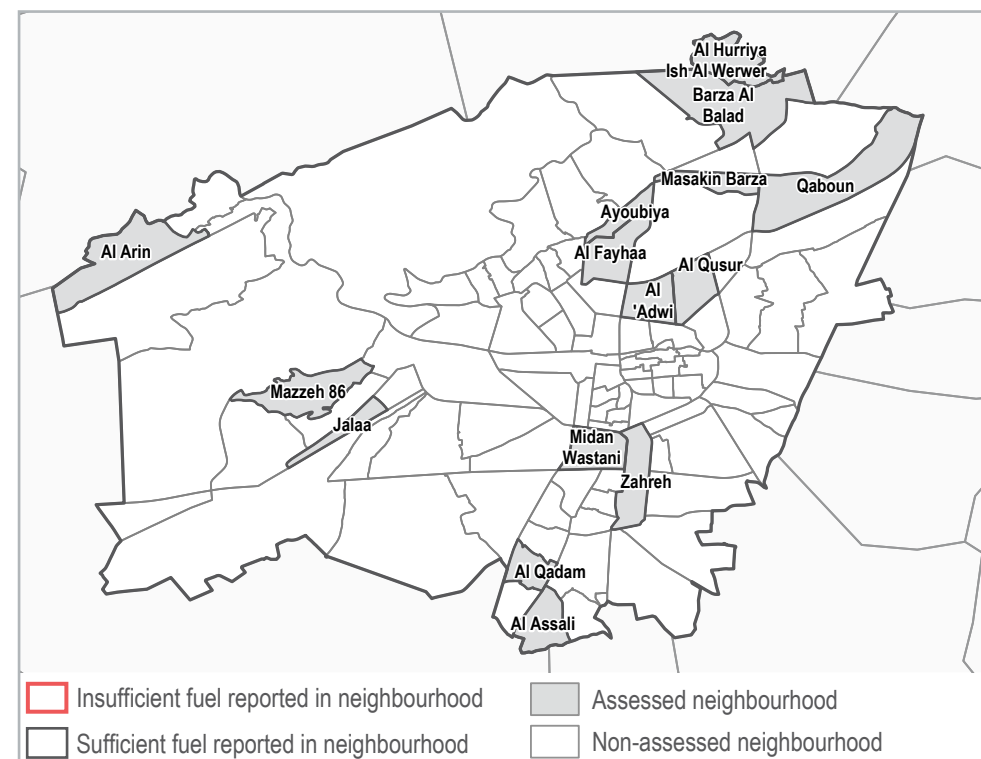

**6,730 SYP**

Syrian average reported rent price in SYP across assessed neighbourhoods.<sup>5</sup>

Most commonly reported shelter type for PCP (in red) and IDP (in grey) households<sup>4</sup>:

Fuel sufficiency:

Reported fuel prices (in SYP)<sup>5</sup>:

Fuel type:	Governorate average price in March:	Governorate average price in February:	Syrian average price in March:
Coal (1 kilogram)	355	Not available	333
Diesel (1 litre)	202	Not available	346
Butane (1 canister)	2,997	Not available	7,521
Firewood (1 tonne)	41,875	Not available	60,850

<sup>3</sup> Multiple choices allowed.

<sup>4</sup> By percent of neighbourhoods reporting.

<sup>5</sup> 1 USD = 434 SYP (UN operational rates of exchange as of 1 February 2018)

## HEALTH

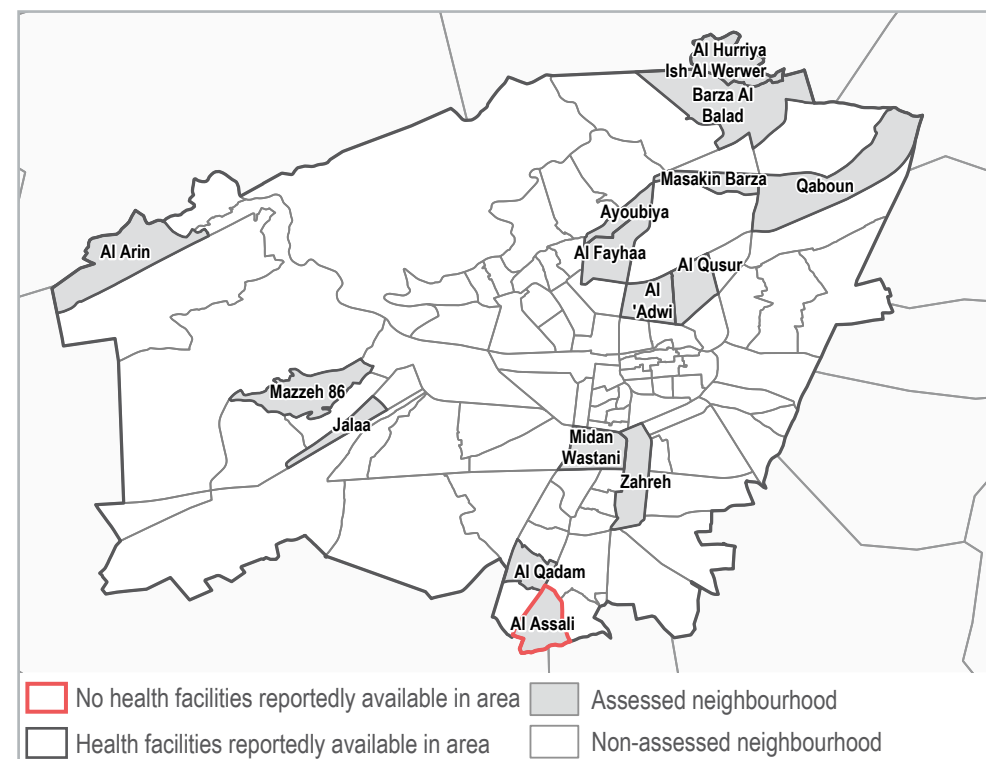

- 0 Neighbourhoods reported that no medical items were available in their neighbourhood.
- 0 Neighbourhoods reported that the majority of women did not have access to formal health facilities to give birth.

**12** neighbourhoods reported that residents experienced no barriers to accessing healthcare services. The barriers in the remaining **3** neighbourhoods were<sup>3,4</sup>:

Old age	<div style="width: 67%;"></div>	67%
Disability/injuries/illness preventing travel	<div style="width: 67%;"></div>	67%
High cost of transportation to facilities	<div style="width: 33%;"></div>	33%
Security concerns when traveling to facilities	<div style="width: 33%;"></div>	33%
No health facilities available in the area	<div style="width: 33%;"></div>	33%
Healthcare services too expensive	<div style="width: 33%;"></div>	33%

**15** neighbourhoods reported that residents were not using coping strategies to deal with a lack of medical supplies<sup>3,4</sup>.

### Presence of health facilities in assessed neighbourhoods:

### Top 3 most needed healthcare services reported<sup>3,4</sup>:

Psychosocial support	73%
Psychiatric care	20%
Prosthetics and orthotics	20%

### Top 3 most common health problems reported<sup>3,4</sup>:

Acute respiratory infections	93%
Fever	67%
Injuries	27%

<sup>3</sup> Multiple choices allowed.

<sup>4</sup> By percent of neighbourhoods reporting.

# Damascus Governorate, March 2018

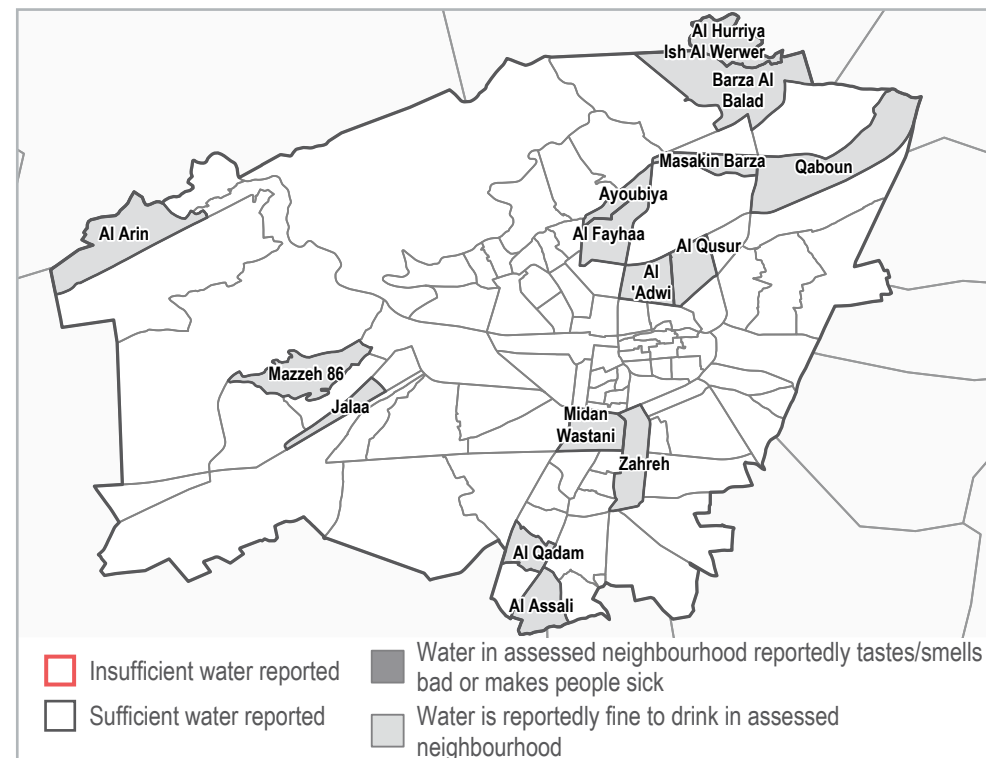

- 0 Neighbourhoods reported that water from their primary source tasted and/or smelled bad.
- 0 Neighbourhoods reported that drinking water from their primary source made people sick.

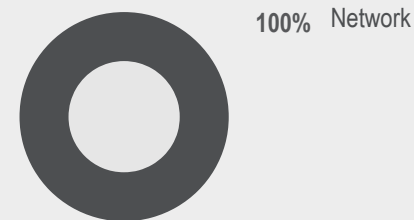

15 neighbourhoods reported that residents had no problems with latrines<sup>3,4</sup>.

15 neighbourhoods reported that they had sufficient amounts of water to meet household needs<sup>3,4</sup>.

## Water sufficiency for household needs:

## Primary drinking water source reported<sup>4</sup>:

## Top 3 reported methods of garbage disposal<sup>3,4</sup>:

Disposed at designated site	80%
Public free collection	20%

<sup>3</sup> Multiple choices allowed.

<sup>4</sup> By percent of neighbourhoods reporting.

# Damascus Governorate, March 2018

## FOOD SECURITY

- 3 Neighbourhoods reported not having received a food distribution in the last 12 months.
- 0 Neighbourhoods reported that residents were unable to purchase food at shops and markets.

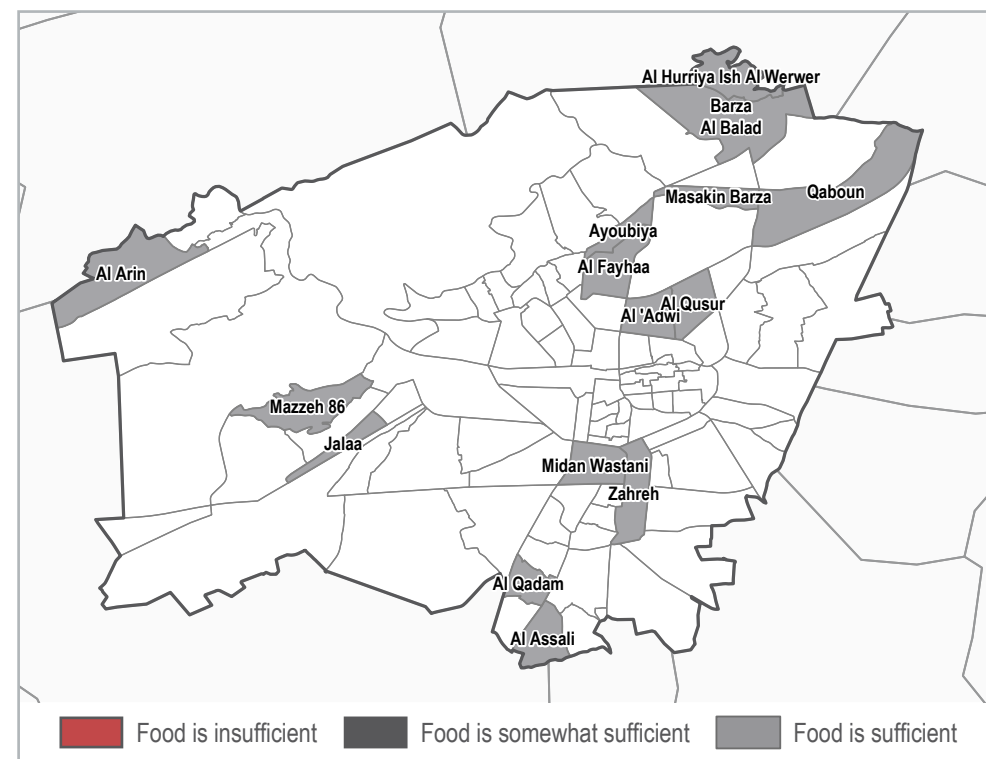

12 neighbourhoods reported that residents experienced no challenges in accessing food. The most common difficulties experienced in the remaining 3 assessed neighbourhoods were<sup>3,4</sup>:

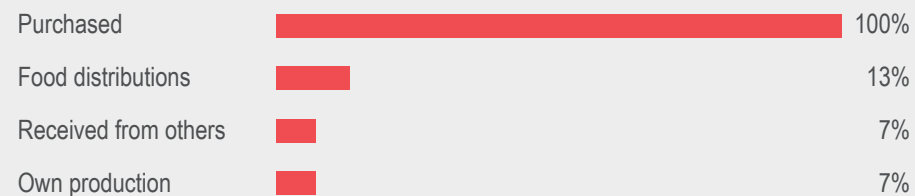

### Core food item prices reported (in SYP)<sup>5</sup>:

Food item:	Governorate average price in March:	Governorate average price in February:	Syrian average price in March:
Bread public bakery (1 loaf)	50	Not available	117
Rice (1 kilogram)	396	Not available	472
Lentils (1 kilogram)	427	Not available	367
Sugar (1 kilogram)	310	Not available	350
Cooking oil (1 litre)	625	Not available	590

### Food sufficiency:

### Most common ways of obtaining food reported<sup>3,4</sup>:

<sup>3</sup> Multiple choices allowed.

<sup>4</sup> By percent of neighbourhoods reporting.

<sup>5</sup> 1 USD = 434 SYP (UN operational rates of exchange as of 1 February 2018)

# Damascus Governorate, March 2018

## LIVELIHOODS

**50,000 - 100,000 SYP** Most commonly reported household income range<sup>5</sup>.

**23568 SYP** Governorate average food basket price<sup>5,6</sup>.

**0** Neighbourhoods reported that residents used extreme food-based coping strategies to deal with insufficient income<sup>7</sup>.

**1** neighbourhood reported that residents had enough income to cover household needs. The most commonly reported coping strategies to deal with a lack of income in the remaining **14** assessed neighbourhoods were<sup>3,4</sup>:

**Most commonly reported main sources of income<sup>3,4</sup>:**

<sup>3</sup> Multiple choices allowed.

<sup>4</sup> By percent of neighbourhoods reporting.

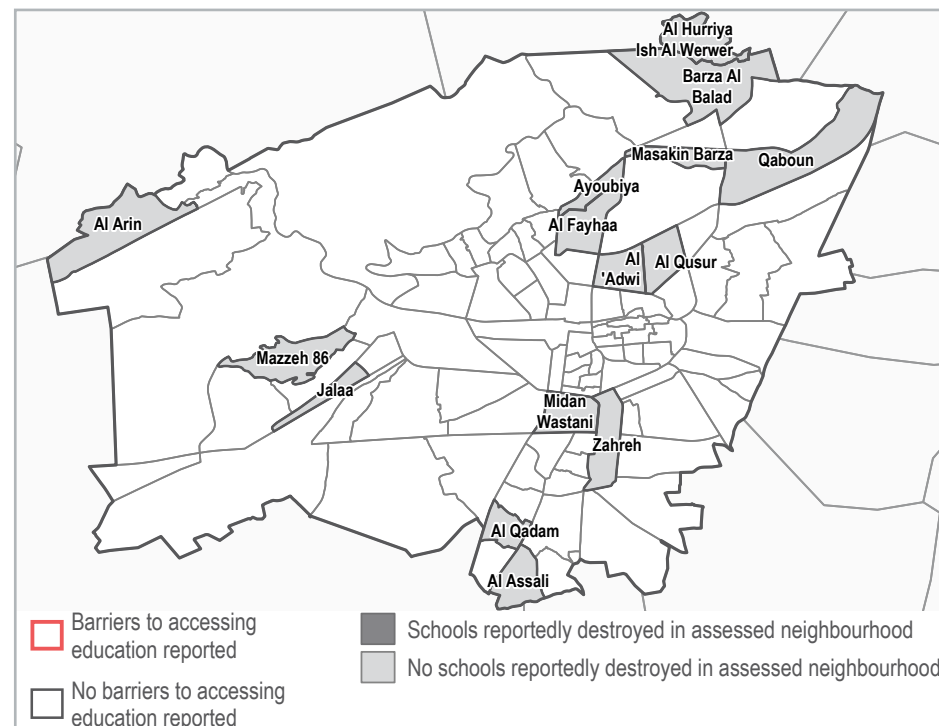

<sup>5</sup> 1 USD = 434 SYP (UN operational rates of exchange as of 1 February 2018)

<sup>6</sup> Calculation of the average price of a food basket is based on the World Food Programme's standard basket of dry goods. The food basket includes 37 kg of bread, 19 kg of rice, 19 kg of lentils, 5 kg of sugar, and 7 kg of vegetable oil, and provides 1,930 kcal a day for a family of five for a month.

<sup>7</sup> Extreme food-based strategies: Eating food waste; eating non-edible plants and spending days without eating.

## EDUCATION

Barriers to accessing education services:

**15** neighbourhoods reported that most children were able to access education<sup>3,4</sup>.

## METHODOLOGY

The HSOS project, formerly known as the AoO (Area of Origin) project, is a monthly assessment that aims to provide comprehensive, multi-sectoral information about the humanitarian situation inside Syria. This factsheet presents information gathered in 15 neighbourhoods in April 2018, referring to the situation in Damascus Governorate in March 2018. It presents key indicators, rather than the entire range of indicators gathered in the HSOS questionnaire. For community-level data on assessed sub-districts in Al Hasakeh, Dar'a, Idleb, Rural Damascus and Quneitra, please refer to the monthly sub-district factsheets, available on the [REACH Resource Centre](#). The complete HSOS dataset is disseminated monthly via the REACH Syria mailing list.

Wherever possible, information was collected through an enumerator network. REACH enumerators are based inside Syria and interview Key Informants (KIs) directly in the community about which they are reporting. Where access and security constraints rendered direct data collection unfeasible, KI interviews were conducted remotely through participants identified in camps and settlements in neighbouring countries by REACH field teams. Participants contact KIs in their community in Syria to collect information about their community. KIs were asked to report at the community level.

KIs generally included local council members, Syrian NGO workers, medical professionals, teachers, shop owners and farmers, among others, and were chosen based on their community-level or sector specific knowledge. In cases where KIs disagreed on a certain piece of information, enumerators triangulated the data with secondary sources or selected the response provided by the KI with the more relevant sector-specific background. For each question asked, confidence levels were assigned based on the KIs area of expertise and knowledge of the sector-specific situation. The confidence levels associated with each question are presented in the final dataset. The full confidence matrix used to assign confidence levels is available upon request.

Findings were triangulated through secondary sources, including news monitoring and humanitarian reports. Where necessary, follow-up was conducted with enumerators and participants. Findings are indicative rather than representative, and should not be generalised across the governorate.

## ENDNOTES

<sup>1</sup> All information and figures reported in HSOS factsheets refer to the situation in assessed neighbourhoods and cannot be generalised to other non-assessed communities of the governorate.

<sup>2</sup> Returns are not necessarily voluntary, safe, or sustainable.

<sup>3</sup> 'Children' includes all persons below the age of 18.

## About REACH

REACH is a joint initiative of two international non-governmental organisations - ACTED and IMPACT Initiatives - and the UN Operational Satellite Applications Programme (UNOSAT). REACH aims to strengthen evidence-based decision making by aid actors through efficient data collection, management and analysis before, during and after an emergency. By doing so, REACH contributes to ensuring that communities affected by emergencies receive the support they need. All REACH activities are conducted in support to, and within the framework of, inter-agency aid coordination mechanisms. For more information, please visit our website: [www.reach-initiative.org](http://www.reach-initiative.org). You can contact us directly at: [geneva@reach-initiative.org](mailto:geneva@reach-initiative.org) and follow us on Twitter: [@REACH\\_info](https://twitter.com/REACH_info).
