

UNMISS Juba PoC 1 - IDP Intentions Assessment

Juba County, Central Equatoria State, South Sudan

South Sudan Displacement Crisis

September 2015

Methodology

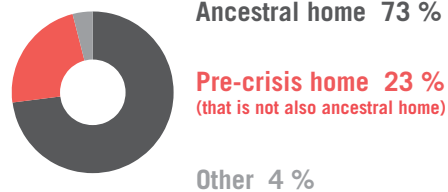

These findings are based on primary data collected by REACH, between 27th August and 7th September 2015.

REACH staff interviewed IDPs in PoC 1 Juba to understand where they have come from, where they would go if they were able to leave, and what push and pull factors inform their decisions.

A random sample of 506 households were interviewed, providing a representative sample of the roughly 2,700 dwelling units (7,500 inhabitants) with a confidence of 95% and a margin of error of 5% at site level.

Preferred return location

Preferred return location in case of an eventual departure from current displacement site

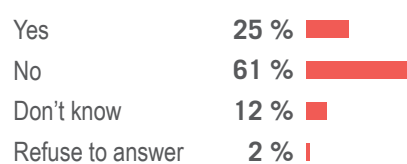

Perceived access to services in preferred return location

	Food	Water	Health care	Education	Psycho-social
Impossible	15%	5%	3%	12%	19%
Very Difficult	55%	48%	57%	53%	49%
Difficult	13%	10%	11%	11%	11%
Easy	9%	12%	10%	16%	6%
Very Easy	8%	25%	19%	8%	15%

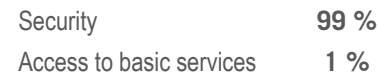

Compensation

% of IDPs requesting immediate compensation for family losses before leaving PoC

Causes of Displacement

Primary reported reasons for leaving pre-crisis homes

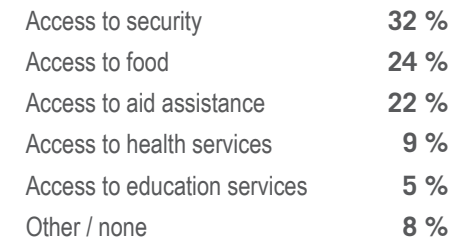

Influential groups

Reported most influential actors in an eventual return decision

*Respondents could select multiple options

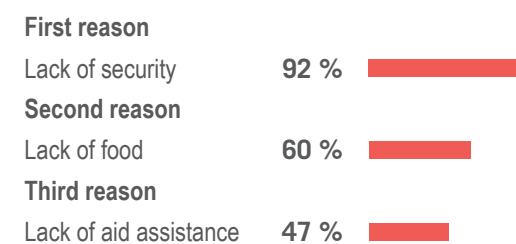

Primary top five reasons for selecting current displacement site

*Respondents could select multiple options

Reported reasons for not returning

Top three reasons for not returning to preferred location

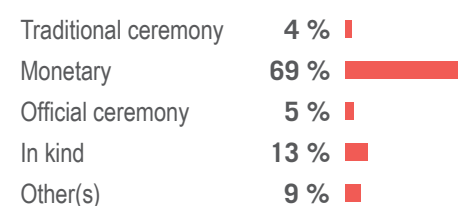

Land ownership

83% IDPs reported owning land and/or a home in their preferred return location

34% IDPs reported owning documentation to prove their land ownership

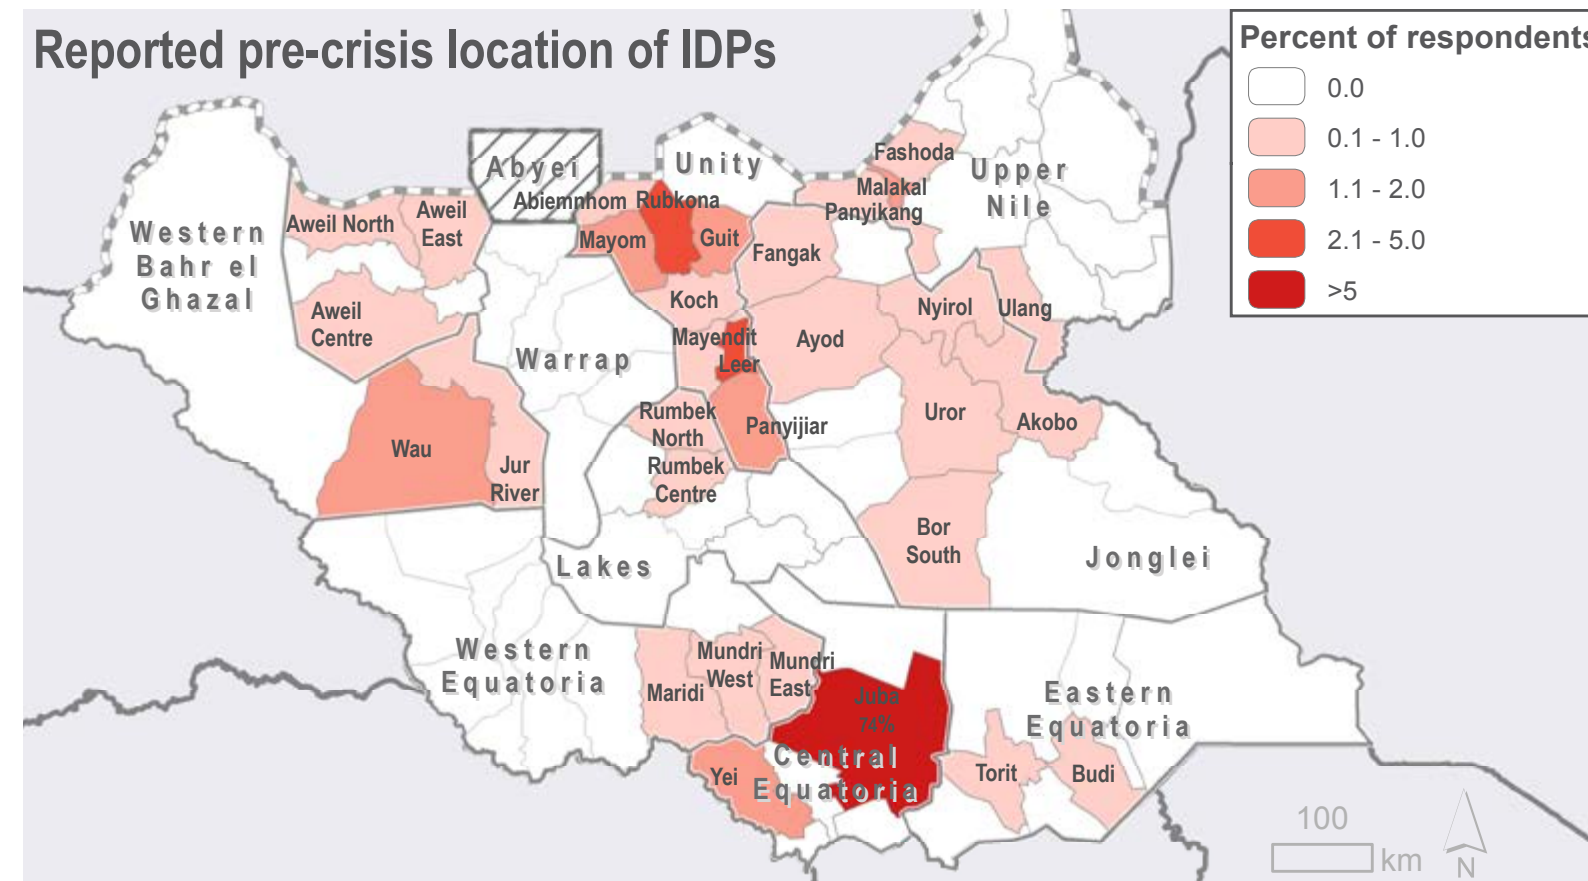

Preferred type of compensation for property or family losses as reported by IDPs

IDP predisplacement locations and areas of desired return

31.54 E, 4.82 N

Reported pre-crisis location of IDPs

Reported preferred return locations
