

- Legend**
- Unassessed household
  - Block Boundary
  - District Boundary

This map identifies the total 914 households that were not able to be assessed during data collection. All households were visited up to three times. However, enumerators were unable to record these households for the following reasons: the shelter seemed unoccupied, no one was present to participate, no-one 18 years or older was available.

**Unassessed households (district level)**

**Unassessed households (camp level): 6.9%**
