

# Multi-Sector Needs Assessment II

## Camp 2W Ukhiya, Cox's Bazar, Bangladesh

July 2018 and January 2019 comparison

### Background and Methodology

An estimated 738,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017<sup>1</sup>. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The cyclone and monsoon seasons, stretching from May to October, further threatened the living conditions of the vast majority of refugees who are living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, and to understand change over time, this Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 33 refugee sites using a household survey methodology. It is a follow up assessment to the baseline MSNA conducted in July 2018.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 2W where 96 households were surveyed between 8 and 26 January 2019. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

January 2019 data is presented in red, and July 2018 data is presented in beige.

### Camp population:

Families<sup>1</sup> **5,920** Individuals<sup>1</sup> **25,802**

### Demographics<sup>3</sup>

**33.3**

Average age of respondent

**57%** of respondents were female

**4.9**

Average household size

**51%** of refugees are under 18

### Composition of surveyed households

1. As defined by UNHCR in the population data and key demographical indicators (31 December dataset)

2. The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations

3. January 2019 data only

## Camp 2W

July 2018 and January 2019 comparison

### Protection

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)<sup>4,5,6</sup>

Jan 2019		Boys	Jul 2018
73%	Kidnapping	① Kidnapping	41%
48%	Violence within community	② Natural disaster	38%
39%	Armed group recruitment	③ Detention	16%
Girls			
73%	Kidnapping	① Sexual violence	55%
47%	Sexual violence	② Natural disaster	22%
29%	Child marriage	③ Kidnapping	17%

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection<sup>8</sup>

% of females reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection<sup>9</sup>

Jan 2019		Jul 2018
5%	12-17 years	5%
18%	18+ years	5%

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe<sup>4,10</sup>

Jan 2019		Men	Jul 2018
63%	No area unsafe	① No area unsafe	90%
23%	Latrines	② Latrines	9%
19%	Distribution points	③ Water points	3%
Women			
60%	Latrines	① No area unsafe	55%
29%	No area unsafe	② Latrines	34%
28%	Bathing areas	③ Water points	24%
Boys			
35%	Latrines	① No area unsafe	50%
35%	Market	② Market	30%
33%	Learning spaces	③ Distribution points	20%
Girls			
51%	Latrines	① No area unsafe	44%
32%	Learning spaces	② Latrines	38%
26%	No area unsafe	③ Bathing areas	30%

4. Respondents could select multiple options

5. Three most common safety concerns for boys and girls are shown

6. These results are based on the respondent's subjective perception of risks in the camp, and not the actual number of security incidents

7. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using sharp objects

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

9. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported

10. Three most common areas where men, women, boys and girls do not feel safe are shown

## Camp 2W

July 2018 and January 2019 comparison

### % of households reporting first port of call for assistance in dealing with safety or security issues<sup>11,12</sup>

### % of households reporting different relationships with refugee neighbours in the same block

### % of households reporting different relationships with Bangladeshi host community

Jan 2019

of households reporting *not* enough light at night for household members to safely access latrines in their area of the camp

Jul 2018

### Health

Jan 2019

of households with children under 5 reporting all children under 5 having an immunization card<sup>13</sup>

Jul 2018

of households with children under 5 reporting all children under 5 sleeping under a mosquito net the night prior to data collection<sup>13</sup>

### % of households with children under 5 reporting receiving a breast milk substitute or baby bottles through donation in the 30 days prior to data collection<sup>11</sup>

Jan 2019

19%  
0%

Breast milk substitute  
Baby bottles

Jul 2018

0%  
2%

### % of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection, by source of treatment<sup>11,14</sup>

11. Respondents could select multiple options

12. Three most common ports of call for assistance are shown

13. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

14. Three most common sources of treatment are shown

# Multi-Sector Needs Assessment II

## Camp 2W

July 2018 and January 2019 comparison

% of households reporting challenges in accessing NGO run clinics since arriving in the camp<sup>15,16</sup>

Jan 2019				Jul 2018
39%	Crowded	①	No challenge	48%
34%	Supplies unavailable	②	Crowded	28%
23%	Treatment unavailable	③	Supplies unavailable	21%
23%	No challenge	④	Poor staff behaviour	13%
8%	Expensive treatment	⑤	Treatment unavailable	12%

### Food Security

% of households reporting receiving food assistance in the 30 days prior to data collection, by source<sup>15</sup>

% of households reporting travel time on foot to food markets

15. Respondents could select multiple options

16. Five most common health care access challenges are shown

17. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

### Education

% of children reported to be attending NGO-run learning centres in the 7 days prior to data collection<sup>17</sup>

% of children reported to be attending Madrassas in the 7 days prior to data collection<sup>17</sup>

### Shelter & Non-Food Items

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

Jan 2019		Jul 2018
11%	Roof damaged	6%
13%	Roof destroyed	9%
4%	Wall damaged	1%
14%	Wall destroyed	12%

# Multi-Sector Needs Assessment II

## Camp 2W

July 2018 and January 2019 comparison

### % of households reporting using different materials for the frame and walls of the household shelter<sup>18</sup>

### % of households reporting using different materials for the roof of the household shelter<sup>18</sup>

### % of shelters with windows, by number of openings

### % of shelters with ventilation mesh, by number of openings

### % of households reporting ownership of the following non-food items at the time of data collection

### % of households reporting most urgently needed non-food items<sup>19,20</sup>

18. Respondents could select multiple options

19. Respondents could select up to 3 options

20. Seven most common non-food item needs are shown

# Multi-Sector Needs Assessment II

## Camp 2W

July 2018 and January 2019 comparison

### Site Management

### % of households reporting steps they would take to prepare for an approaching cyclone<sup>22,23</sup>

### Communication with Communities

### % of households reporting use of a complaint/feedback mechanism in the 30 days prior to data collection<sup>22,24</sup>

21. CPP is a joint community-based disaster risk reduction initiative of the Government of Bangladesh and the Bangladesh Red Crescent Society. It trains volunteers to deliver cyclone warnings to communities, assist with shelter and rescue, and provide medical attention

22. Respondents could select multiple answers

23. Three most common steps for cyclone preparedness are shown

24. Three most common complaint mechanisms used are shown

25. Three most common barriers to accessing complaint mechanisms are shown

26. Income from employment, remittances, cash assistance and new debts

27. 1 USD = 83.4 BDT (as of 28 January 2019). Source: www.xe.com

### % of households reporting barriers to using complaint/feedback mechanisms<sup>22,25</sup>

### % of households reporting use of information channels in the 7 days prior to data collection<sup>22</sup>

### Livelihoods

### % of individuals reported to be working to earn an income in the 30 days prior to data collection

Jan 2019

2,500

Jul 2018  
Median household income in Bangladeshi Taka (BDT)<sup>26,27</sup> 1,000

# Multi-Sector Needs Assessment II

## Camp 2W

July 2018 and January 2019 comparison

% of households reporting income from different sources in the 30 days prior to data collection<sup>28</sup>

% of households reporting income from different types of employment in the 30 days prior to data collection<sup>28, 29</sup>

28. Respondents could select multiple answers

29. Five most common employment sectors are shown

30. Only households reporting that an individual had worked Construction / Manual labour in the 30 days prior to data collection were asked if this work was 'Cash for Work'. The finding is a proportion of the entire camp population

31. 1 USD = 84.1 BDT (as of 5 March 2019). Source: www.xe.com

32. Data from only January 2019 presented, as WASH indicators were not included in the July 2018 MSNA

33. Top three sources of drinking water are shown

34. Top three locations for defecation shown

## Water Sanitation and Hygiene<sup>32</sup>

% of households reporting main source of drinking water<sup>33</sup>

18 Average litres of potable water collected per person per day for each household

Water collection - % of households reporting:

% of households reporting where households members usually go to defecate<sup>28, 34</sup>

% of households reporting the most common method of solid waste disposal
