Rapid Response Mechanism (RRM): Central African Republic

01 - 31 October 2019 Monthly dashboard

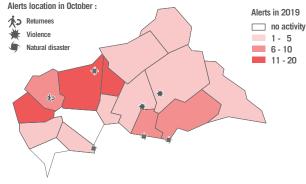

The Rapid Response Mechanism (RRM) is designed to monitor humanitarian action, conduct multisector assessments and to implement several emergency responses, including non-food items (NFI) and HEB1 distributions, water, sanitation and hygiene (WASH) interventions, cash activities and fairs. Currently, RRM is made possible through the generous support of the European Union Civil Protection and Humaniarian Aid Office (ECHO), the Office of U.S. Foreign Disaster Assistance (OFDA), the Swedish International Development Cooperation Agency (SIDA) and the Swiss Agency for Development and Cooperation (SDC). All RRM products are available on the <u>Humanitarian Response</u> portal.

1 High Energy Biscuit (HEB), 2 Post-Distribution Monitoring, 3 The activity in Bema includes NFI and WASH interventions, 4Based on the first intervention (NFI, WASH, HEB or cash transfers), for any alert raised in 2019, 5 Due to the correction of a counting error, the total number of MSA in 2019 only increased by 3, compared to September. MSA-R are not triggered following a RRM alert. MSA-R aim at gathering information on areas not recently affected and/or not recently accessed by humanitarian actors. Due to the correction of a counting error, the total number of WASH distributions in 2019 remained the same in October. The term 'host community' refers to individuals that have not been displaced as the result of a humanitarian-related event. The term 'returnees' refers to people who have come back to their pre-crisis location following a period of internal displacement. "The term 'repatriated' refers to former refugees who have returned from neighbouring countries
