

South Sudan - Unity State

Assessment of Hard to Reach Areas in South Sudan

South Sudan Displacement Crisis

May 2016

Overview

Conflict in Unity State first broke out in late December 2013, only days after fighting began in Juba. Since then, the State has been one of the worst affected by the conflict, and currently hosts the highest reported numbers of internally displaced persons in the country. Many areas in Unity are largely inaccessible to humanitarian actors due to insecurity and logistical constraints. As a result only limited information is available on the humanitarian situation outside major displacement sites.

In order to fill such information gaps and facilitate humanitarian planning, REACH has remotely collected data on hard-to-reach areas in Unity State since December 2015. Through AoO, REACH collects data from a network of Key Informants (KIs) who have sector specific knowledge of an area, from regularly travelling to and from the area, direct or indirect contact with people in the area, or recent displacement from the area. Although current

AoO coverage is still limited and its findings not statistically significant, they provide a good indication of the needs and current humanitarian situation in assessed areas of Unity State.

Findings presented in this document are drawn from primary data collected from KIs in May 2016, covering 69 communities across 7 of Unity's 9 counties. Data was collected from 587 KIs currently in Bentiu and Juba Protection of Civilians (PoC) sites and who reported on communities about which they have received up-to-date information in the month prior to data collection. The study focuses on the situation in villages or local communities from which many individuals have already fled, but where some families still remain. Health, shelter, food security, wash, education and protection sectors are covered. No information has been collected for any PoC. Note that when reporting on level of access to services this refers to the proportion of KIs responding 'yes' with regards to an access in May 2016.

assessed areas

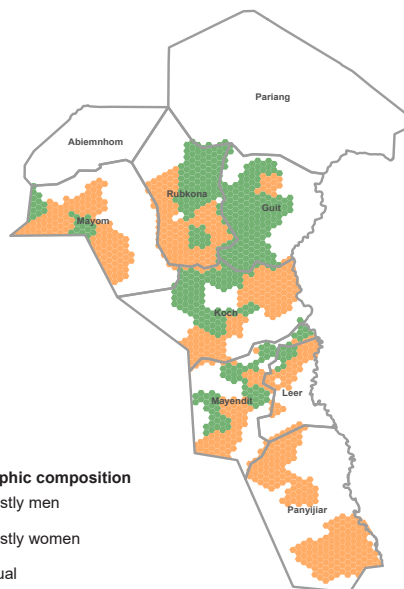

Demographics

Primary demographic composition of remaining local community (LC) population

Primary demographic composition of internally displaced persons (IDPs) population

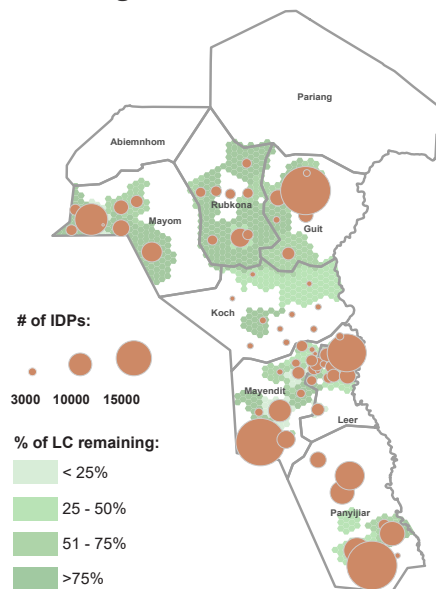

Demographic composition

South Sudan - Unity State

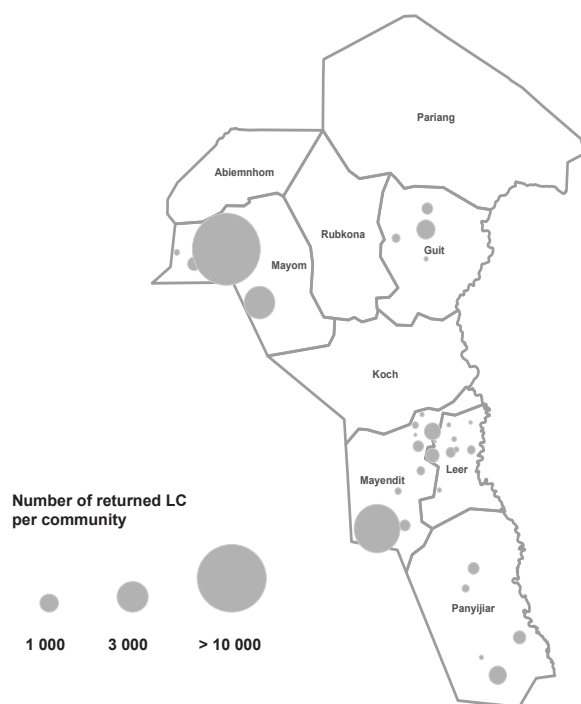

Assessment of Hard to Reach Areas in South Sudan

South Sudan Displacement Crisis

May 2016

Population

Communities reporting returned local community members

Living situation and short-term displacement

Reported living locations of IDPs

With relatives	67%
With the local community	15%
In a spontaneous settlement	8%
In a PoC	6%
In the bush	4%

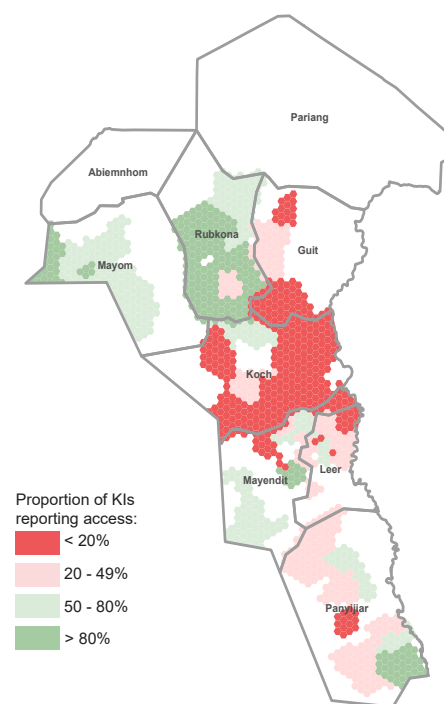

Reported living locations for local community¹

Own home	69%
In the bush, near home	19%
Another home within the village	7%
In the bush, far from home	4%
In another settlement	1%

Health

Reported level of access to healthcare

Reported reasons why health services are not available²

1 No staff	75%
2 Insecurity	58%
3 No medicine	40%
4 Destroyed by conflict	28%

Health concerns

Top reported health concerns

1 Malaria	100%
2 Malnutrition	97%
3 Diarrhea	78%

Top reported needed items in healthcare centers

1 Medicine (not specified)	90%
2 Oral rehydration salts	10%
3 N/A	

¹ The current location of LCs was asked for in order to assess persons who were displaced within their local community

² Key informants could choose more than one answer

South Sudan Displacement Crisis

May 2016

Shelter/NFI

Reported proportion of local community sleeping outside

NFIs

Reported proportion of people with mosquito nets

Reported shelter types¹

	LC	IDP	Returned LC ²
Rakooba/Tukul	100%	100%	99%
Tent	8%	9%	5%
Improvised	8%	17%	7%
Abandoned	3%	11%	9%
Community	54%	28%	43%
None	0%	15%	7%

Of those with mosquito nets the average number of people sharing one mosquito net

WASH

Reported level of access to safe drinking water

Reported primary sources of those with access to safe drinking water

For those with access to safe drinking water, reported distance to water point

For those with access to safe drinking water, reported waiting time at the water point

Water availability and sanitation

72% of covered communities reported safe drinking water is currently available

Top reported reasons why safe water is unavailable¹

Reported primary sanitation facilities

¹ Key informants could choose more than one answer; responses refer to percentage of communities having a reported shelter type, not the percentage of the population living in them
² Local community displaced and returned home

South Sudan Displacement Crisis

May 2016

Food Security

Reported level of access to food

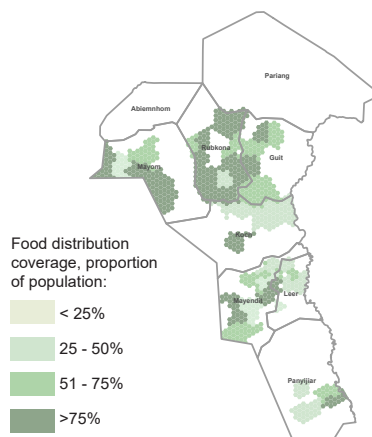

Top reported reasons why food is unavailable¹

- 1 Unsafe to cultivate 97%
- 2 Crops destroyed 97%
- 3 Short growing season 82%

Average number of days that selected coping strategies are used per week¹

- Less expensive food 2.77
- Reduce meals per day 2.03
- Limit meal size 2.02
- Borrow food 1.71
- Gather wild food 1.68

Reported food distribution coverage

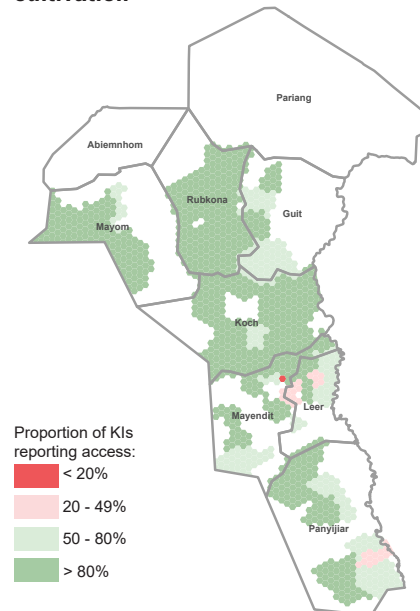

Current access to market

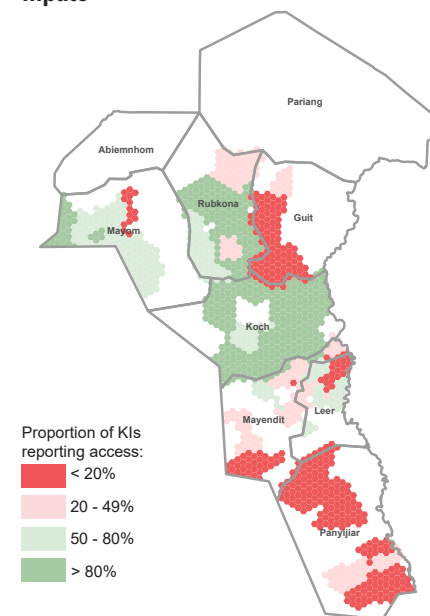

Livelihoods

Reported level of access to land for cultivation

Reported level of access to agricultural inputs

Reported current location of the assets of fishermen, drivers, and labourers²

Stolen / Looted	72%
Hidden	16%
Looked after by immediate family	5%
Don't know	5%
Looked after by community	1%
Other	1%

Reported current location of the communities' cattle¹

Stolen / Looted	73%
Looked after by immediate family	16%
Moved to another location	9%
Looked after by community	2%
Killed	0%
Don't know	0%

¹ Key informants could choose more than one answer

² Assets included things such as cars, cooking tools, boats, building tools etc. 445 KIs reporting on this indicator for May 2016

May 2016

Education

Reported level of access to education services

Overall reported level of available education in assessed communities¹

In the 17 communities where education is reportedly available, it is provided by the following¹

Top reported reasons why education services are not available^{1,2}

¹ Key informants could choose more than one answer

² South Sudan Education Cluster, Secondary Data Review Report, May 2016

³ According to independent assessments, no schools in Unity State are managed by the government. Respondents are believed to be conflating government with the local community.

Protection

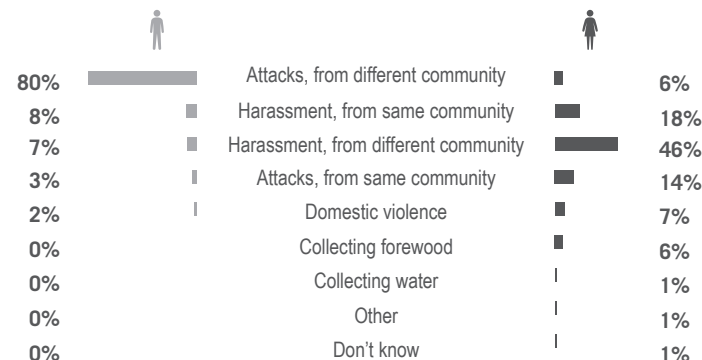

Community

Reported relationship between local communities and IDPs

Protection concerns

Primary reported protection concerns for men and women

About REACH

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms. For more information, you can write to our in-country office: south.sudan@reach-initiative.org or to our global office: geneva@reach-initiative.org.

Visit www.reach-initiative.org and follow us @REACH_info.
