

# AREA BASED ASSESSMENT

Baashiqra Town, Ninewa Governorate  
May 2018

## LIVELIHOODS

In order to inform recovery and stabilization programming, REACH Initiative launched an Area Based Assessment (ABA) in Baashiqra town. In focusing assessments at the settlement level, the ABA seeks to provide a tailored and actionable profile of the assessed area, with a specific focus on demographics, household-level needs, and access to critical public services. As a component of this assessment, REACH conducted 494 household interviews as a representative sample of the town, resulting in a 97% confidence level and 5% margin of error. The sample was drawn using a grid-based, point sampling technique, where random GPS points were drawn across all residential areas of the town. All data collection was conducted by REACH enumerators between 18-30 January, 2018.

Proportion of households earning an income in the 30 days prior to data collection

Proportion of households reporting barriers to accessing employment

Number of members within the household earning an income in the 30 days prior data collection

Top five reported sources of household income\*

Top five most reported barriers to employment\*

Reported changes in prices of consumer items in the 90 days prior to data collection

\*As reported by households indicating barriers to accessing employment. Top responses reported only, so results do not sum to 100%. Multi-response question.
