

Abyan, Yemen

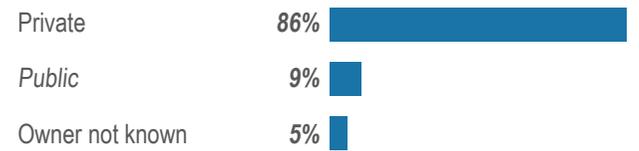

Context and Methodology

As part of regular implementation, the CCCM cluster coordination team and partners, with support from REACH, identified in a coordinated manner the profiles of IDP hosting sites they work in. This activity is carried out to inform a more targeted and evidence-based humanitarian response. The initial findings presented here provide an overview of conditions, service access, and threats across **22 IDP hosting sites** with a total population of 11625 people in Abyan governorate, as well as basic information on population demographics and community needs. The findings presented here provide details on the condition of IDP hosting sites between November 2019 and November 2020 through the perspective of a community representative in each site. Only sites for which detailed information was available at the time of data collection are represented in this factsheet. Findings should therefore be considered as both indicative and incomplete of each site in the governorate. All information is for humanitarian use only.

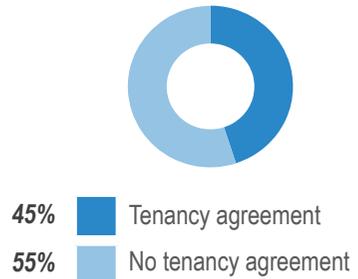

Overview

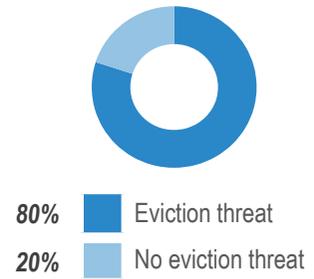

Proportion of sites per land ownership status

Proportion of sites with a tenancy agreement

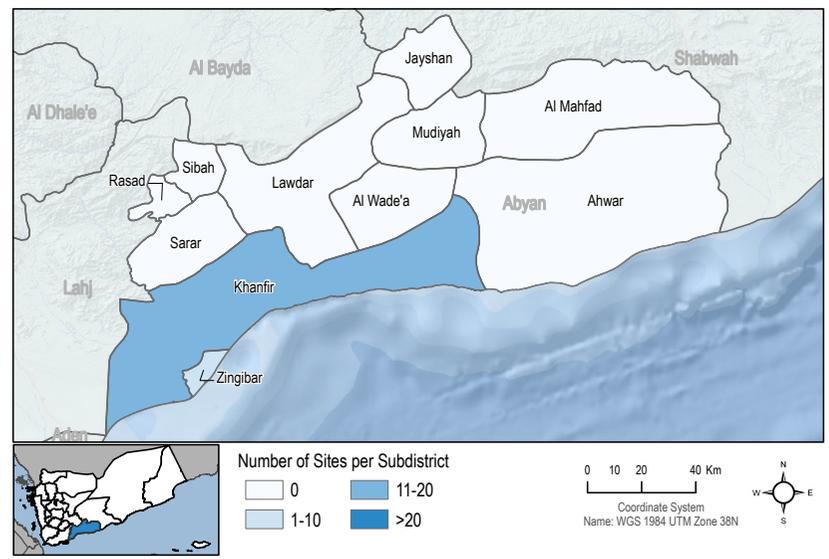

Proportion of sites with a tenancy agreement facing eviction threat

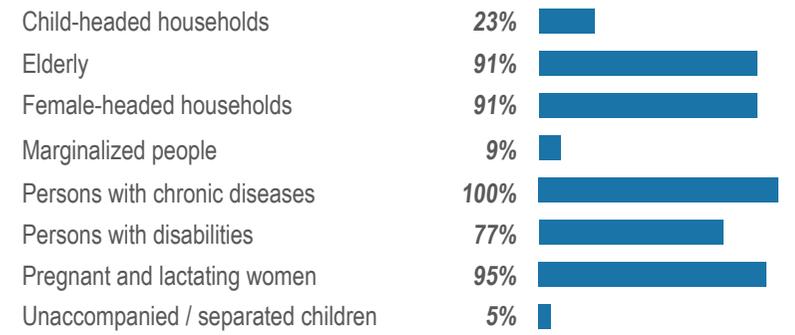

Displacement

Most common district of origin of displaced households: Hays
Most common movement intention of displaced households for the coming three months: Stay in the site
Most common reason for displaced households to leave place of origin: Security concerns (conflict, explosives, lack of security forces)

Demographics

Proportion of sites with presence of vulnerable groups*

Proportion of sites with population groups other than IDPs*

*Respondents could select multiple options for these questions, and therefore overall figures may not add up to 100%.

Access to Services

Proportion of sites by adequacy of services, per service type:

	Adequate	Inadequate	Non-existent
RRM distributions	5%	18%	77%
Shelter / maintenance services	0%	36%	64%
NFI distributions	0%	45%	55%
Food distributions	55%	41%	5%
Cash distributions (multi-purpose)	9%	64%	27%
WASH services	5%	59%	36%
Healthcare services	9%	23%	68%
Education services	5%	32%	64%
Livelihood services	0%	0%	100%
Protection services	0%	64%	36%
Nutrition services	32%	18%	50%
Waste disposal services	9%	0%	91%

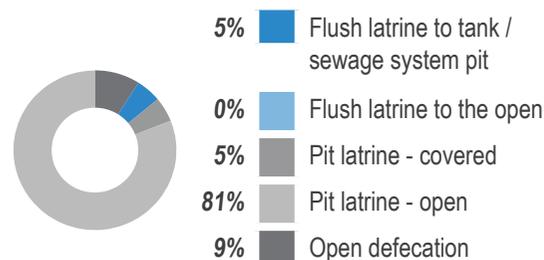

Priority Needs

Proportion of sites per priority needs:

	First	Second	Third
Cash assistance	36%	18%	18%
Education	0%	0%	5%
Food	32%	5%	0%
Water	0%	9%	0%
Legal services	0%	9%	0%
Livelihood assistance	0%	5%	14%
Medical assistance	0%	18%	18%
Non-food items	9%	18%	14%
Protection services	0%	0%	0%
Sanitation services	0%	0%	0%
Shelter / maintenance	23%	18%	32%
Nutrition services	0%	0%	0%

Infrastructure/Resources

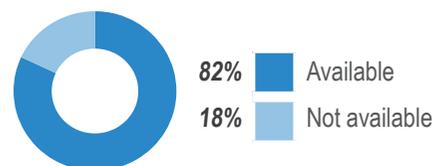

Proportion of sites per primary latrine type

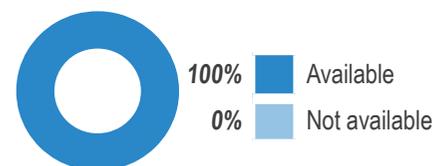

Proportion of sites with electricity / solar power available in site

Proportion of sites with markets in site / close proximity

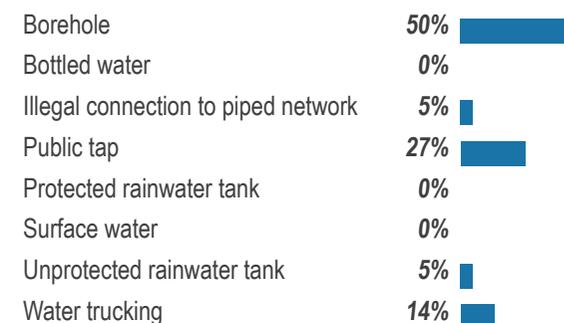

Proportion of sites with cooking fuel in site / close proximity

Proportion of sites per primary shelter type

Proportion of sites per primary water source

Site Threats

Most common threats to sites*

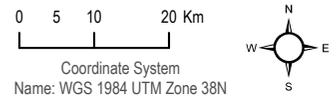

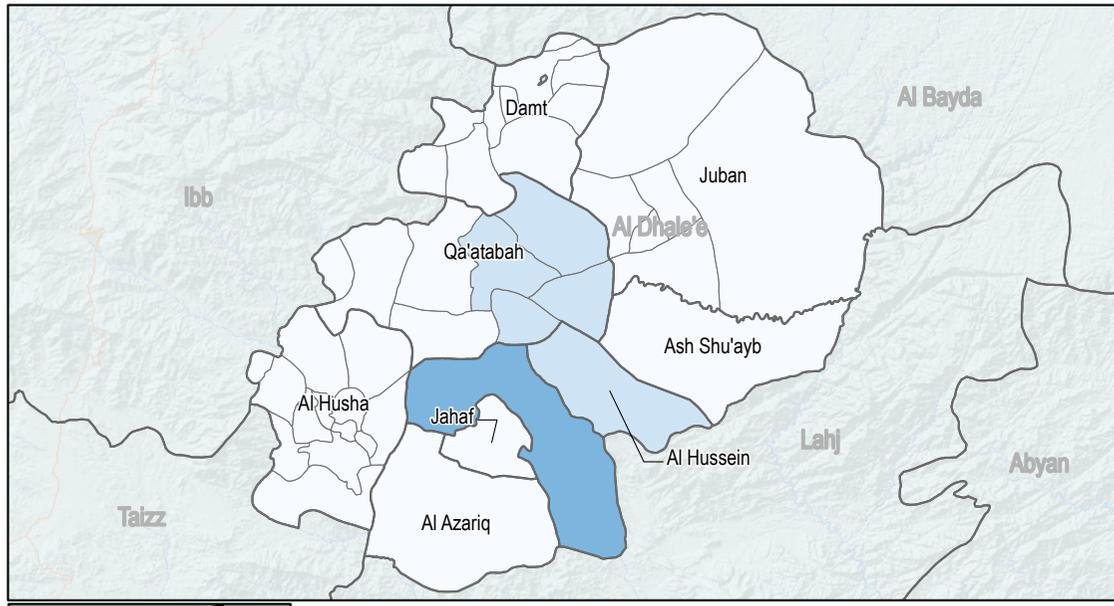

*Respondents could select multiple options for these questions, and therefore overall figures may not add up to 100%.

Ad Dali', Yemen

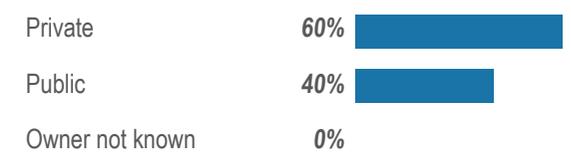

Context and Methodology

As part of their regular programming, the CCCM Cluster and partners, with the support of REACH, implemented the Site Reporting Tool to build a profile of the IDP hosting sites in which the CCCM Cluster and their partners work. This activity is carried out to inform a more targeted, evidence-based humanitarian response. The initial findings presented here provide an overview of conditions, service access, and threats across **30 IDP hosting sites** with a total population of 7250 people in the Ad Dali' Governorate, as well as providing basic information on population demographics and community needs. The findings presented here provide details on the condition of IDP hosting sites between November 2019 and November 2020 through key informant interviews with community representatives in each site. Only sites for which detailed information was available at the time of data collection are represented in this factsheet. Findings should therefore be considered as both indicative and incomplete. All information is for humanitarian use only.

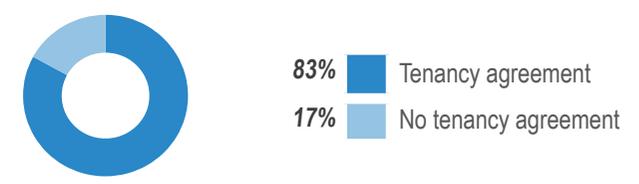

Overview

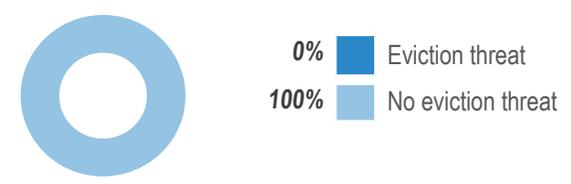

Proportion of sites per land ownership status

Proportion of sites with a tenancy agreement

Proportion of sites with a tenancy agreement facing eviction threat

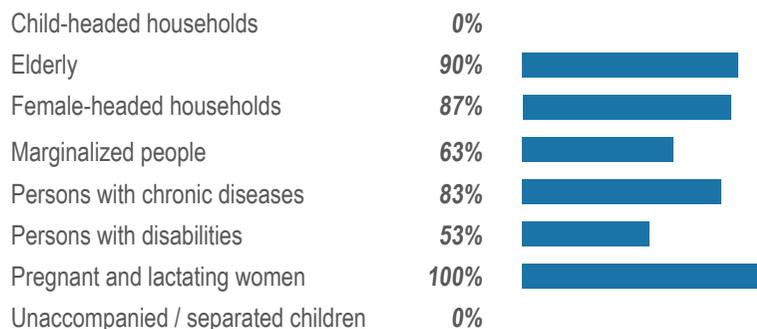

Displacement

Most common district of origin of displaced households: Qa'tabah
Most common movement intention of displaced households for the coming three months: Stay in the site
Most common reason for displaced households to leave place of origin: Security concerns (conflict, explosives, lack of security forces)

Demographics

Proportion of sites with presence of vulnerable groups*

Proportion of sites with population groups other than IDPs

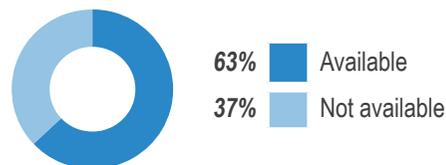

*Respondents could select multiple options for these questions, and therefore overall figures may not add up to 100%.

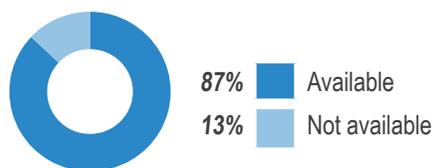

Infrastructure/Resources

Context and Methodology

As part of their regular programming, the CCCM Cluster and partners, with the support of REACH, implemented the Site Reporting Tool to build a profile of the IDP hosting sites in which the CCCM Cluster and their partners work. This activity is carried out to inform a more targeted, evidence-based humanitarian response. The initial findings presented here provide an overview of conditions, service access, and threats across **217 IDP hosting sites** with a total population of 330068 people in the Hajjah Governorate, as well as providing basic information on population demographics and community needs. The findings presented here provide details on the condition of IDP hosting sites between November 2019 and November 2020 through key informant interviews with community representatives in each site. Only sites for which detailed information was available at the time of data collection are represented in this factsheet. Findings should therefore be considered as both indicative and incomplete. All information is for humanitarian use only.

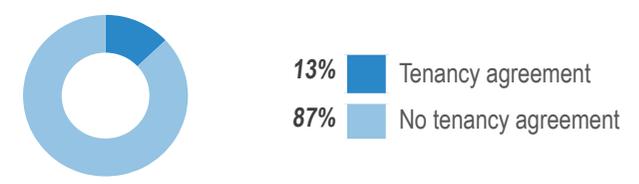

Overview

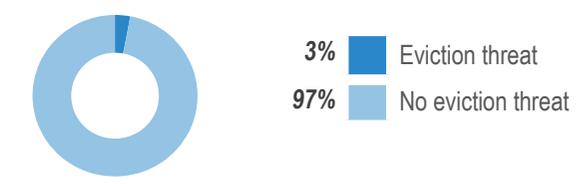

Proportion of sites per land ownership status

Proportion of sites with a tenancy agreement

Proportion of sites with a tenancy agreement facing eviction threat

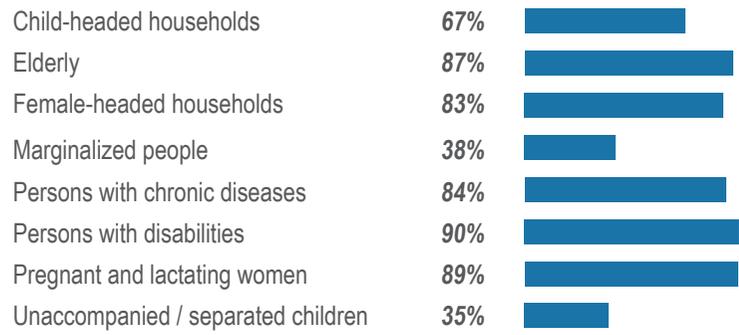

Displacement

Most common district of origin of displaced households: Harad
Most common movement intention of displaced households for the coming three months: Stay in the site
Most common reason for displaced households to leave place of origin: Security concerns (conflict, explosives, lack of security forces)

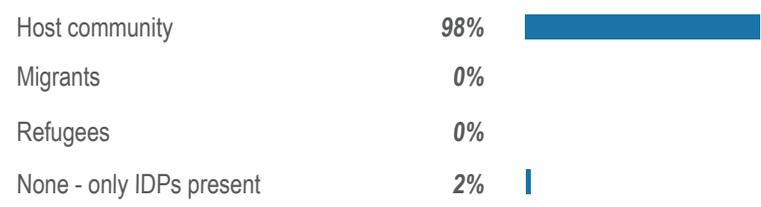

Demographics

Proportion of sites with presence of vulnerable groups*

Proportion of sites with population groups other than IDPs

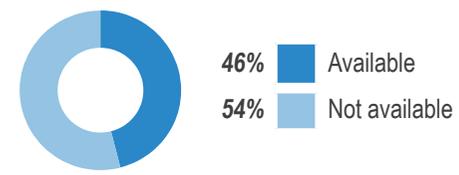

*Respondents could select multiple options for these questions, and therefore overall figures may not add up to 100%.

Shabwah, Yemen

Context and Methodology

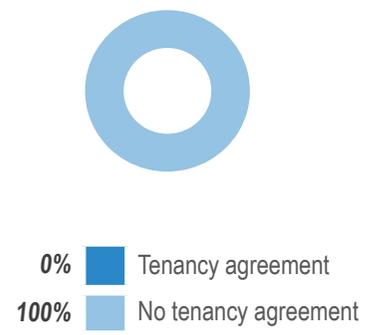

As part of regular implementation, the CCCM cluster coordination team and partners, with support from REACH, identified in a coordinated manner the profiles of IDP hosting sites they work in. This activity is carried out to inform a more targeted and evidence-based humanitarian response. The initial findings presented here provide an overview of conditions, service access, and threats across **6 IDP hosting sites** with a total population of 1295 people in Shabwah governorate, as well as basic information on population demographics and community needs. The findings presented here provide details on the condition of IDP hosting sites between November 2019 and November 2020 through the perspective of a community representative in each site. Only sites for which detailed information was available at the time of data collection are represented in this factsheet. Findings should therefore be considered as both indicative and incomplete of each site in the governorate. All information is for humanitarian use only.

Overview

Proportion of sites per land ownership status

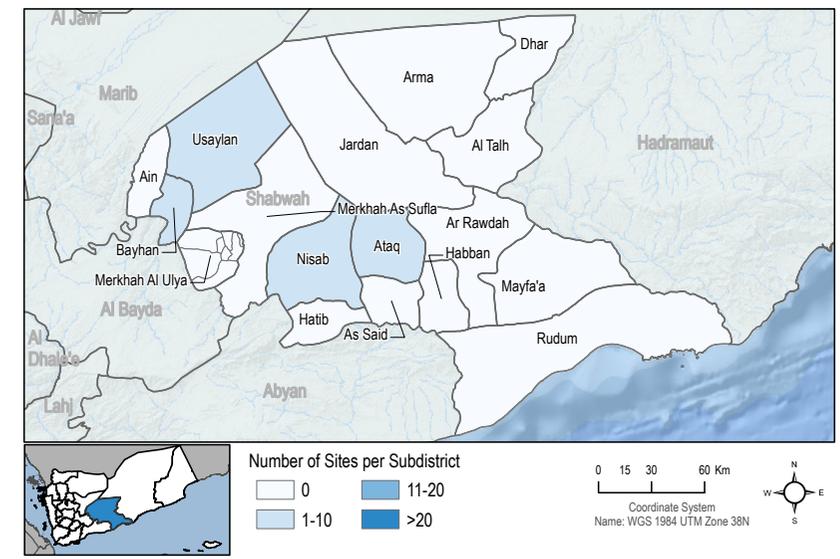

Proportion of sites with a tenancy agreement
