

Background

The Water Price Monitoring assessment aims to establish a data collection, monitoring and reporting system on water market prices in order to allow humanitarian and development actors to better analyse humanitarian needs in areas particularly affected by drought.

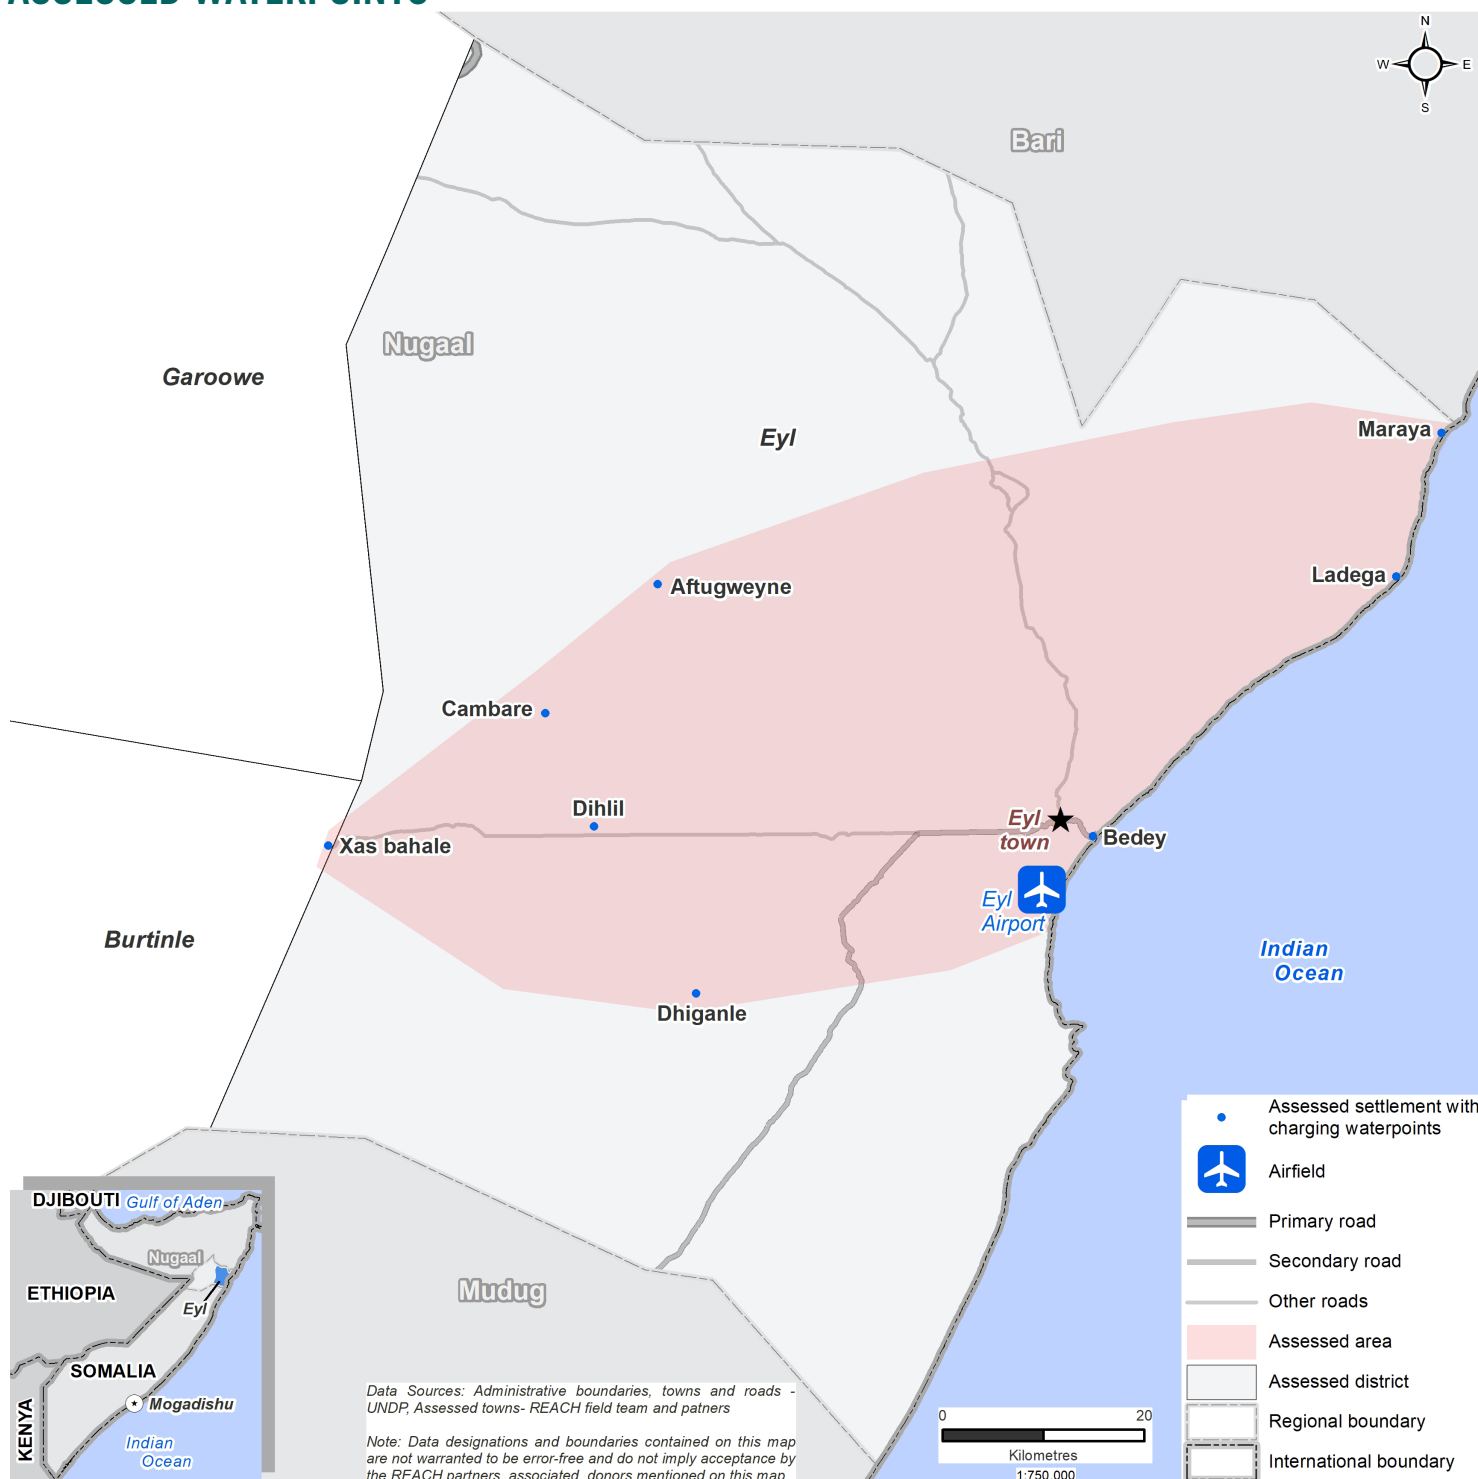

November data collection in Nugaal was conducted through a quantitative survey between 26 - 29 November, focusing only on those waterpoints in the region that are charging for water. The assessment has followed the official district boundaries of the region.

All prices are shown in US Cents for 90L of water. This is the daily amount used by a household of six members, consuming the minimum Sphere standard of 15L water per person per day. Price changes are subject to exchange rate.

Key Findings

- This factsheet presents information collected from 18 waterpoints in Eyl district, Nugaal region.
- Prices of water in Eyl decreased by an average of 9% between October and November.
- The majority of the waterpoints (72%) showed no change in price from October to November, while 28% showed a decrease in price mainly due to increase in water supply following ongoing rains.
- Forty-four percent (44%) of the assessed waterpoints in Nugaal were not treated at the distribution point. The majority (56%) were chlorinated.

ASSESSED WATERPOINTS

ASSESSED WATERPOINTS

of Assessed Waterpoints in October: **19**

of Assessed Waterpoints in November: **18**

Types of Assessed Waterpoints

and % of assessed waterpoints:

District	#	%
Burkad	9	50%
Kiosk	6	33%
Borehole	2	11%
Tank Tap	1	6%

Most Reported Problems

% of waterpoints reportedly having the following problems:
(Respondents could select multiple options)

District	#	%
No Problem	18	100%

Waterpoint Administrator

% of waterpoints with the following administrator:

District	#	%
Community	9	50%
Private	9	50%

Waterpoint filling

% of waterpoints that are used as water storage and refilled through the following:

District	#	%
