

Background

The Water Price Monitoring assessment aims to establish a data collection, monitoring and reporting system on water market prices in order to allow humanitarian and development actors to better analyse humanitarian needs in areas particularly affected by drought.

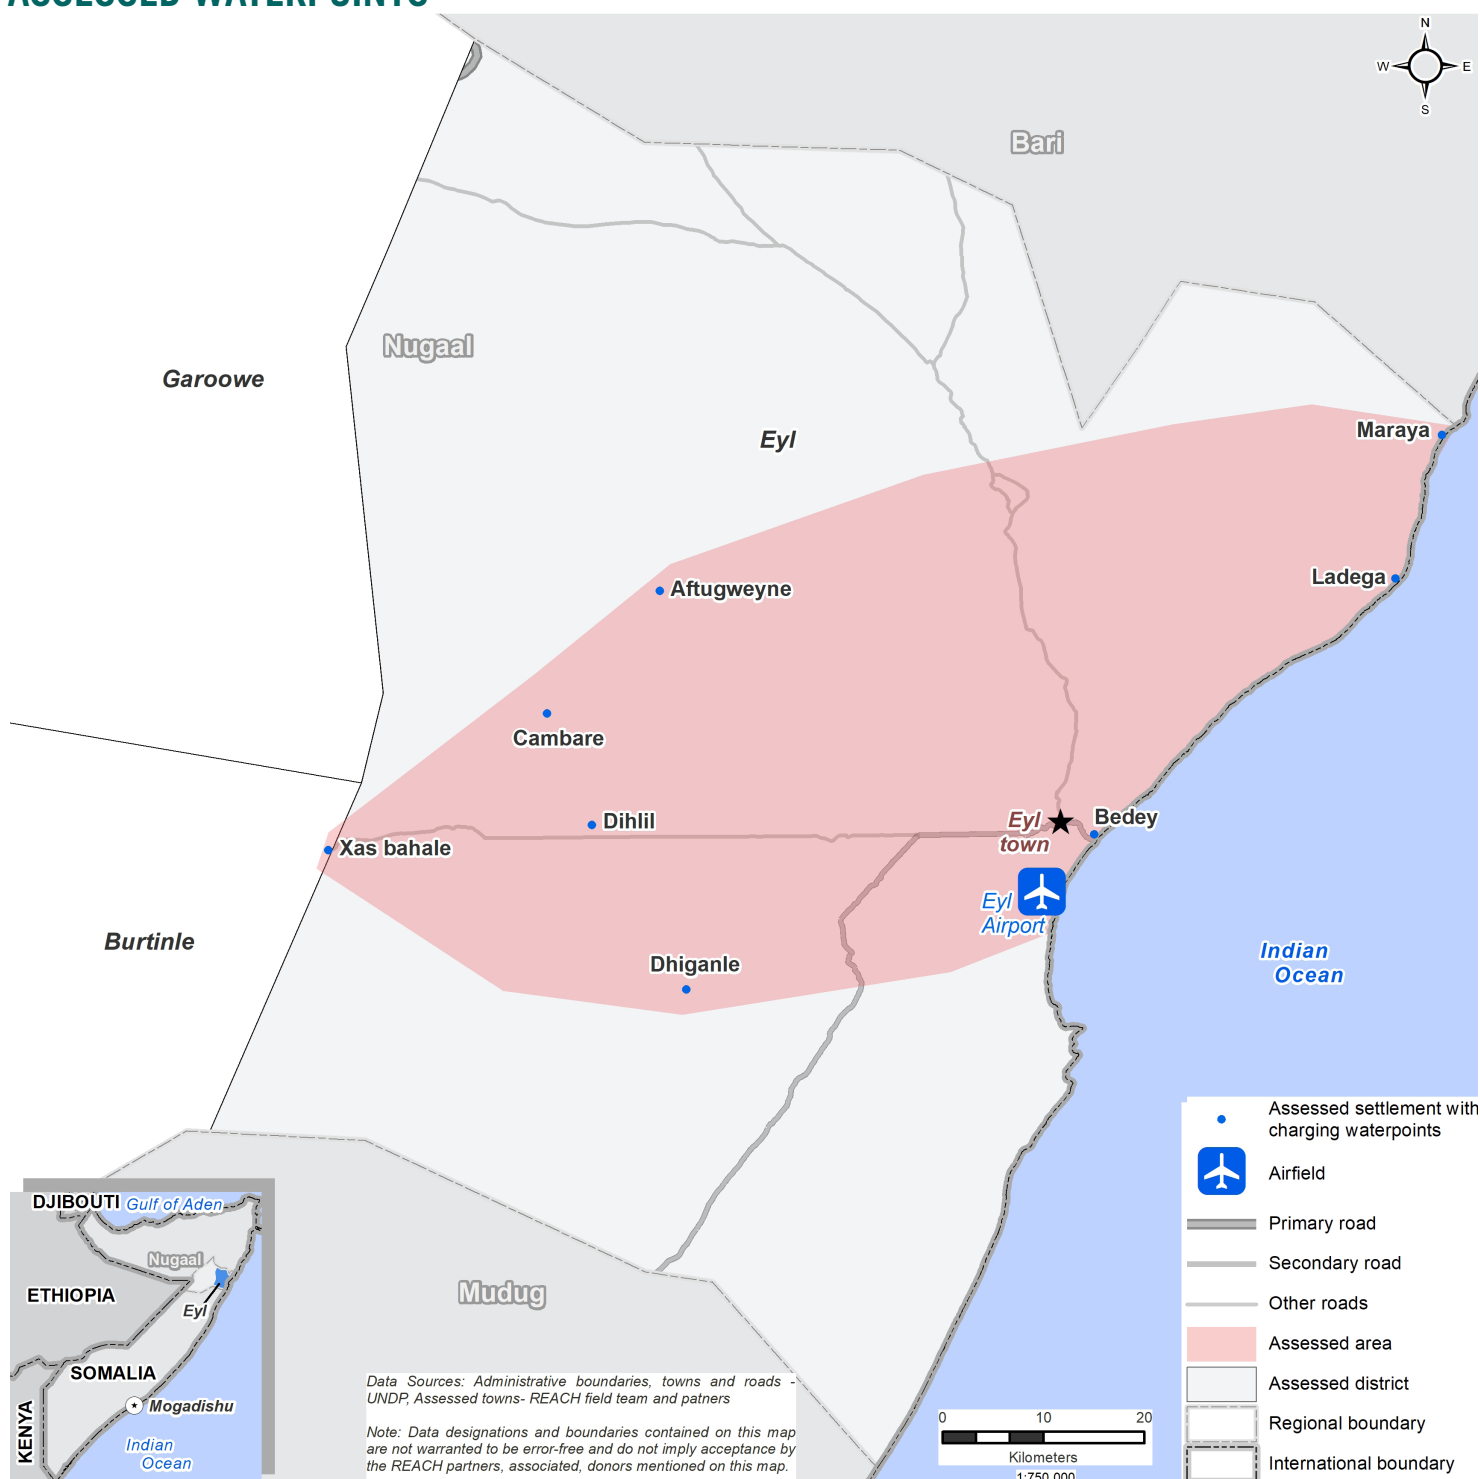

October data collection in Nugaal was conducted through a quantitative survey between 28 - 30 October, focusing only on those waterpoints in the region that are charging for water. The assessment has followed the official district boundaries of the region.

All prices are shown in US Cents for 90L of water. This is the daily amount used by a household of six members, consuming the minimum Sphere standard of 15L water per person per day. Price changes are subject to exchange rate.

Key Findings

- This factsheet presents information collected from 19 waterpoints in Eyl district, Nugaal region.
- Prices of water in Eyl decreased by an average of 41% between September and October
- The majority of the waterpoints (84%) showed a decrease in price from September to October, while 16% showed no change.
- A total of 42% of the assessed waterpoints in Nugaal are not treated at the distribution point. The majority (58%) are chlorinated.

ASSESSED WATERPOINTS

ASSESSED WATERPOINTS

of Assessed Waterpoints in September: **19**

of Assessed Waterpoints in October: **19**
