

## Background and methodology

The aim of the Emergency Needs Tracking (ENT) System is to track the key priority needs of internally displaced persons (IDPs) in northwest Syria, as well as identifying communities with households in direct need of humanitarian assistance. The ENT assesses communities that have experienced any of the following in the three days prior to data collection: more than 40 IDP arrivals, natural hazards (including storms, fires, and flooding), conflict escalation, or any other event which impacts humanitarian needs. This information should serve to better inform immediate humanitarian operations, as well as provide a wider contextual understanding of the ongoing situation. As the humanitarian situation remains complex, it is critical to fill information gaps across sectors to ensure a well-coordinated humanitarian response.

Data was collected between 21 December and 30 December (excluding Friday and Saturday). Information was collected via a Key Informant (KI) methodology with one KI interview conducted per community. Findings should be considered indicative only. 216 communities, including 16 camps, were assessed overall across northern Aleppo and Idlib governorates. **The full dashboard can be accessed [here](#) and the full catalogue of datasets can be accessed [here](#).**

## Protection

Percentage of assessed communities in which KIs reported the presence of newly-arrived IDPs with the following vulnerability types:<sup>1</sup>

	%
Women headed households	39%
Elderly headed households	25%
Orphans	8%
Women travelling alone	2%
Child headed households/children travelling alone	2%
Disabled headed households	1%

## Food security

Most commonly reported food sources for newly-arrived IDPs in assessed communities:<sup>3</sup>

1	Stores/markets in this community	88%
2	Stores/markets in other communities	64%
3	Relying on food stored previously	42%

**98%** of newly-arrived IDP households (2,006) were reportedly eating one meal or more per day

## Shelter

Number and percentage of newly-arrived IDP households by shelter type:<sup>2</sup>

	#	%
Solid/finished buildings	982	48%
Functioning tents	638	31%
Unfinished/ damaged buildings	373	18%
Designated collective centres	39	2%
Residing without any form of shelter	0	0%
Makeshift shelter	0	0%

## NFI Non-Food Items (NFIs)

Number and percentage of newly-arrived IDP households without the following NFIs:<sup>2</sup>

	#	%
Households without fuel for heating	1,478	72%
Households without fuel for cooking	640	31%
Households without cooking utensils	315	15%
Households without bedding	299	15%
Households without mattresses	278	14%

## Livelihoods

Most commonly reported currency used for purchasing basic/essential commodities:<sup>3</sup>

1	Turkish Lira	71%
2	Syrian Pound	24%
3	United States Dollar	6%

## Health

**99%**

of newly-arrived IDP households (2,020) reportedly could access essential healthcare

<sup>1</sup> KIs could choose from multiple answer options so answers may exceed 100%

<sup>2</sup> Refers to percentage of total newly-arrived IDP households

<sup>3</sup> Refers to percentage of assessed communities

## IDP Priority Needs

Top ranked priority needs for newly-arrived IDPs  
(by % of 216 assessed communities where KIs selected a first, second, and third priority need for IDPs):<sup>3</sup>

Type	First priority need (# of assessed communities reporting)	First priority need (% of assessed communities reporting)	Second priority need (# of assessed communities reporting)	Second priority need (% of assessed communities reporting)	Third priority need (# of assessed communities reporting)	Third priority need (% of assessed communities reporting)
Winterisation kits	31	14%	61	28%	76	35%
Multi-purpose cash grants	110	51%	18	8%	19	9%
Cash for rent	3	1%	7	3%	2	1%
Tools for repair	1	0%	2	1%	0	0%
New/additional shelters	28	13%	18	8%	4	2%
Food rations (in-kind)	35	16%	58	27%	58	27%
Cash for work	4	2%	7	3%	7	3%
Employment support	0	0%	3	1%	4	2%
NFI kits	2	1%	33	15%	30	14%
Water provision/rehabilitation	0	0%	2	1%	3	1%
Hygiene kits	1	0%	2	1%	9	4%
First aid/emergency care	0	0%	2	1%	2	1%

## Water, Sanitation and Hygiene (WASH)

Most commonly reported drinking water sources for newly-arrived IDP households in assessed communities:<sup>1,3</sup>

- 1 Informal water trucking conducted by private citizens 46%
- 2 Combination of water network and private water trucking 34%
- 3 Formal water trucking conducted by authorities or an NGO 25%

**2%** of newly-arrived IDP households (51) reportedly did not have access to a sufficient quantity of drinking water, while 3% (66) reportedly did not have access to a sufficient quantity of water for other purposes such as cooking, bathing, and washing

**13%** of newly-arrived IDP households (269) reportedly did not have access to functioning hand-washing facilities with water and soap

**5%** of newly-arrived IDP households (108) reportedly did not have access to a functioning toilet

**56%** In 121 communities, KIs reported that soap and hygiene items are too expensive for some newly-arrived IDPs

## Humanitarian Assistance

**57%**

In 123 communities, KIs reported that the preferred modality of assistance for newly-arrived IDPs was cash/ voucher assistance

**93%**

In 201 communities, KIs reported that no barriers were present for humanitarian actors when accessing the community

### About REACH

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).
