WASH Site Profile - Camp 23 (Shamlapur)

Teknaf, Cox's Bazar, Bangladesh (July 2018) GPS Coordinates: 21.0783, 92.1425

Summary

This profile provides an overview of water, sanitation and hygiene (WASH) infrastructure within Camp 23 (Shamlapur) in Teknaf, Cox's Bazar. Primary data for this round was collected from 29th May to 22^{nd} July 2018.¹ Findings should be considered indicative only. Full camp dataset is available on HDX.

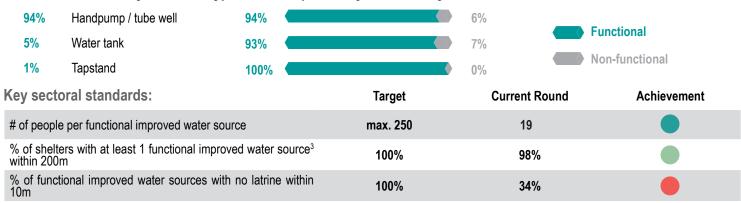

WASH Sector

Cox's Bazar

Site Overview		Key WASH Infrastructure		Location Map
# of individuals:	10,884	# of latrines: (% functional and safe²):	490	Ukha
# of households:	2,642	safe ²): # of improved water sources: ³	(78%)	
# of shelters: # of individuals	2,646	water sources: ³ (% functional):	621 (94%)	
per shelter:	4.1	# of washrooms:	366	

Water Access

Three most commonly identified types of water points, by functionality:

Sanitation

Latrine characteristics:

Functionality and safety **Functionality** 78% Functional (non-full) and safe² 94% Functional (non-full) 6% 22% Non-functional and / or unsafe Non-functional Safety Lighting 1% With lights 82% Safe² 99% Without lights 18% Unsafe Key sectoral standards: Target **Current Round** Achievement # of people per functional (non-full) and safe latrine² max. 20 29 # of people per functional (non-full) latrine max. 20 24 27 # of people per safe latrine² max. 20 % of shelters with at least one functional and safe latrine² block 100% 70% within 50m

Targets based on long term WASH Sector Standards / Indicators for the Rohingya response, Sphere Minimum Standards as well as Department of Public Health and Environment (DPHE) Minimum Standards.
Minimum standard/indicator reached,
75%-99% minimum standard/indicator reached,
50-74% minimum standard/ indicator reached, Less than 50% of minimum standard/indicator reached.

1. REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further

details to be logged for WASH infrastructure.

Safe refers to fully covered latrines (i.e. a latrine with four walls, a roof and a lockable door).
 This includes handpumps / tube wells, tapstands and water tanks.
