

Somalia - Galkacyo - IDP Settlement

Surface Area of Settlement Per Person (March 2014)

For humanitarian relief purpose only
Production date : 27 May 2014

Surface Area Per Person Per Settlement (m²/person)

Standard Sphere Project (2004), UNHCR (2007)

Minimum recommended surface area of camp per person = 45 m², including infrastructure.

Assessed Settlements and Shelter Locations

REACH-Assessed IDP Settlements

Shelter points (UNOSAT ANALYSIS)

The population per settlement was estimated by multiplying the average number of persons per shelter by the number of shelters counted by UNOSAT satellite image analysis. The analysis of satellite imagery represents the estimated population as of 14 February 2014. The average number of people per shelter was calculated for the Galkacyo area with a 95% confidence level using data collected during a REACH assessment at the end of April 2014. The average household size calculated by this assessment was 8.0 persons per shelter.
