Site Overview Key WASH Infrastructure

# of individuals:	22,176	# of latrines:	507
# of households:	4,638	(% functional and safe ²):	(98%)
# of shelters: # of individuals	3,074	# of improved water sources: ³ (% functional):	102 (93%)

of washrooms:

237

Location Map Ukhia 🎒 MYANMAR

Water Access

Three most commonly identified types of water points, by functionality:

per shelter:

10%	Handpump / tube well	30%	70%	
70%	Water tank	100%	0%	Functional
21%	Tapstand	100%	0%	Non-functional

7.2

Key sectoral standards:	Target	Current Round	Achievement
# of people per functional improved water source ³	max. 250	233	
% of shelters with at least 1 functional improved water source³ within 200m	100%	100%	
% of functional improved water source with no latrine within 10m	100%	82%	

Sanitation

Latrine characteristics:

Functionality

Safety

Lighting

Key sectoral standards:	Target	Current Round	Achievement
# of people per functional (non-full) and safe latrine ²	max. 20	45	
# of people per functional (non-full) latrine	max. 20	44	
# of people per safe latrine ²	max. 20	44	
% of shelters with at least one functional and safe latrine ² block within 50m	100%	99%	

Targets based on long term WASH Sector Standards / Indicators for the Rohingya response, Sphere Minimum Standards as well as Department of Public Health and Environment (DPHE) Minimum Standards. Minimum standard/indicator reached, 75-99% of the minimum standard reached, or within 25% of minimum standard reached, 50-74% of the minimum standard reached, or within 26-50% of minimum standard reached, 1 cash than 50% of minimum standard reached, or within greater than 50% of minimum standard reached.

¹ REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used a Kobo form to log all key infrastructure observed during this sweep.

^{2 &#}x27;Safe' refers to fully covered latrines (i.e. a latrine with four walls, a roof and a lockable door).
3. This includes handpumps / tubewells, tapstands and water tanks.
