

## Background and methodology

The aim of the Emergency Needs Tracking (ENT) System is to track the key priority needs of internally displaced persons (IDPs) in northwest Syria, as well as identifying communities with households in direct need of humanitarian assistance. The ENT assesses communities that have experienced any of the following in the three days prior to data collection: more than 40 IDP arrivals, natural hazards (including storms, fires, and flooding), conflict escalation, or any other event which impacts humanitarian needs. This information should serve to better inform immediate humanitarian operations, as well as provide a wider contextual understanding of the ongoing situation. As the humanitarian situation remains complex, it is critical to fill information gaps across sectors to ensure a well-coordinated humanitarian response.

Data was collected on a daily basis between 7 June and 13 July (excluding Saturday and Sunday). Information was collected via a Key Informant (KI) methodology with one KI interview conducted per community. Findings should be considered indicative only. 95 communities including 4 camps were assessed overall across northern Aleppo and Idlib governorates. **The full dashboard can be accessed [here](#) and the full catalogue of datasets can be accessed [here](#).**

## Protection

Percentage of assessed communities in which KIs reported the presence of newly-arrived IDPs with the following vulnerability types:<sup>1</sup>

	%
Elderly headed households	62%
Women headed households	44%
Orphans	8%
Women travelling alone	6%
Elderly travelling alone	4%

## Food security

Most commonly reported food sources for newly-arrived IDPs in assessed communities:<sup>1</sup>

- 1 Stores/markets in this community 98%
- 2 Assistance from local councils/NGOs 51%
- 3 Stores/markets in other communities 45%

**100%** of newly-arrived IDP households were reportedly eating one meal or more per day.

## Shelter

Number and percentage of newly-arrived IDP households by shelter type:<sup>2</sup>

	#	%
Solid/finished buildings	948	47%
Functioning tents	619	31%
Unfinished/ damaged buildings	333	17%
Designated collective centres	100	5%

## NFI Non-Food Items (NFIs)

Number and percentage of newly-arrived IDP households without the following NFIs:<sup>2</sup>

	#	%
Households without heating fuel	1401	70%
Households without cooking utensils	397	20%
Households without bedding	322	16%
Households without mattresses	309	15%

## Health

**100%** of newly-arrived IDP households reportedly could access healthcare facilities.

## Water, Sanitation and Hygiene (WASH)

Most commonly reported drinking water sources for newly-arrived IDPs in assessed communities:<sup>2</sup>

- 1 Informal water trucking conducted by private citizens 36%
- 2 Combination of water network and private water trucking 35%
- 3 Formal water trucking conducted by authorities or an NGO 18%

**12%**

of newly-arrived IDP households (237) reportedly did not have access to a sufficient quantity of drinking water

**58%**

In 55 communities, KIs reported that soap and other hygiene items are too expensive for some newly-arrived IDPs.
