

South Sudan - Unity State

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

June 2017

Overview

Conflict in Unity State broke out in late December 2013, only days after the current conflict began in Juba. Since then, the state has been one of the worst affected by the conflict, and currently hosts the highest reported numbers of internally displaced persons (IDPs) in the country. Many areas in Unity are largely inaccessible to humanitarian actors due to insecurity and logistical constraints. As a result, only limited information is available on the humanitarian situation outside major displacement sites.

In order to fill such information gaps and facilitate humanitarian planning, in late 2015, REACH piloted its Area of Origin (AoO) methodology, which takes a territory-based approach that may cover several bomas, to collect

data in hard-to-reach areas of Unity State. The pilot began in Bentiu PoC site in December 2015, and was expanded to Nyal in June 2016 in order to interview new arrivals as they were displaced from recent fighting.

In December 2016, REACH refined the methodology moving from the AoO to the Area of Knowledge (AoK) methodology, an approach collecting information at the settlement level. The most recent OCHA Common Operational Dataset (COD) released in February 2016 has been used as the reference for settlement names and locations.

Through AoK, REACH collects data from a network of Key Informants (KIs) who have sector-specific knowledge and

gain the information from regularly traveling to and from the settlement, direct or indirect contact with people in the settlement, or recent displacement.

Data collected is aggregated to the settlement level and all percentiles presented in this factsheet, unless otherwise specified, represent percent of settlements within Unity with that specific response. The displacement section on page 2 refers to the proportion of assessed KIs arrived within the previous month (newly arrived IDPs).

Although current AoK coverage is still limited and its findings not statistically significant, it provides an indicative understanding of the needs and current humanitarian situation in assessed areas of Unity State.

Assessment coverage

214 Key Informants interviewed

139 Settlements assessed

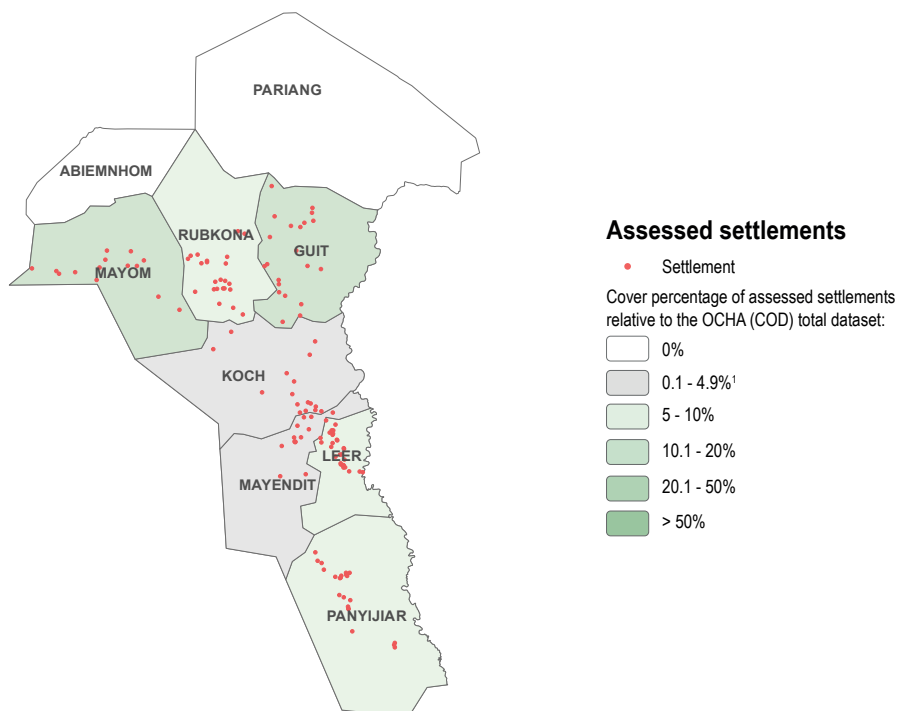

Contact with Area of Knowledge

88% KIs reported to be newly arrived IDPs.

66% KIs reported to have visited the AoK within the last month.

34% KIs reported to be in contact with someone living in the AoK within the last month.

Assessment coverage

Reached settlements

County	Assessed settlements	OCHA (COD) settlements	Cover percentage
Abiemnhom	0	21	0%
Guit	21	161	13%
Koch	16	423	4%
Leer	29	324	9%
Mayendit	13	341	4%
Mayom	14	96	15%
Panyijiar	23	449	5%
Pariang	0	168	0%
Rubkona	23	261	9%
Total	139	2,244	6%

¹ Counties with under 5% of settlement coverage are not disaggregated to the county level, but are included in state-level analysis.

Assessment of Hard-to-Reach Areas in South Sudan

South Sudan Displacement Crisis

June 2017

New arrivals

Push factors

Top three reported reasons newly arrived IDPs left their previous location:²

- 1 Insecurity 60%
- 2 Lack of health services 49%
- 3 Lack of food 46%

Pull factors

Top three reported reasons newly arrived IDPs came to their current location:²

- 1 Security 64%
- 2 Access to food 52%
- 3 Access to health services 48%

Previous location

Top three reported most recent long-term locations for newly arrived IDPs:

- 1 Rubkona County 26%
- 2 Leer County 24%
- 3 Panyijiar County 14%

Displacement

Reported time of first displacement for newly arrived IDPs:

63% June 2017
16% May 2017
2% April 2017
19% March 2017 or before

Displacement

Demographic composition

Reported gender ratio of IDPs in assessed settlements:

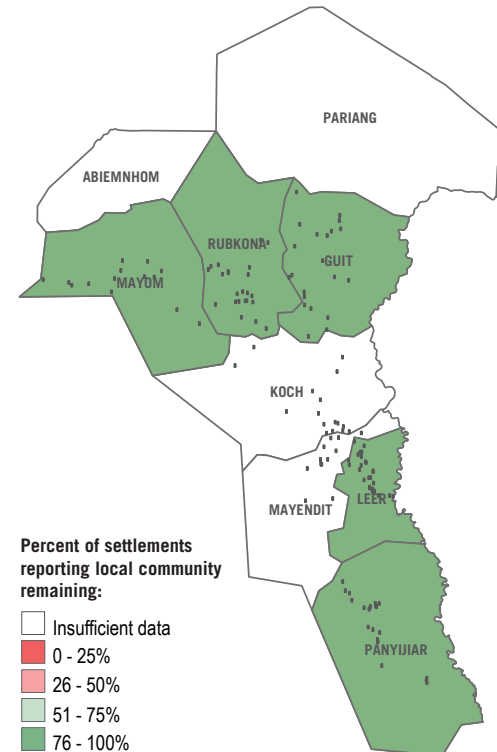

- More women than men 65%
- About equal 27%
- All/almost all women 4%
- More men than women 4%

Reported age ratio of IDPs in assessed settlements:

- About children than adults 48%
- About equal 40%
- More adults than children 7%
- All/almost all adults 5%

² Most frequently cited as first, second and third most important reasons.

Local community

Demographic composition

Reported gender ratio of local community remaining in assessed settlements:

- More women than men 56%
- About equal 27%
- More men than women 7%
- All/almost all men 6%
- All/almost all women 4%

Reported age ratio of local community remaining in assessed settlements:

- About equal 32%
- More adults than children 29%
- More children than adults 26%
- All/almost all adults 11%
- All/almost all elderly 2%

June 2017

Health

Health concerns

Most commonly reported health concerns in the assessed settlements:³

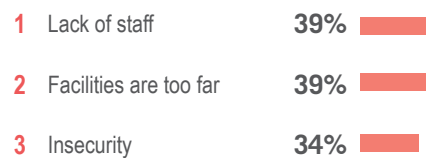

Healthcare distance

Reported distance of the nearest healthcare facilities from the assessed settlements:

Healthcare unavailability

Top three reported reasons why healthcare facilities are not available from the assessed settlements:⁴

Feeding programmes

Reported availability of feeding programmes that provide Plumpy Sup, CSB++ or other nutrition supplements in the assessed settlements:

³ Key informants could choose up to three answers.

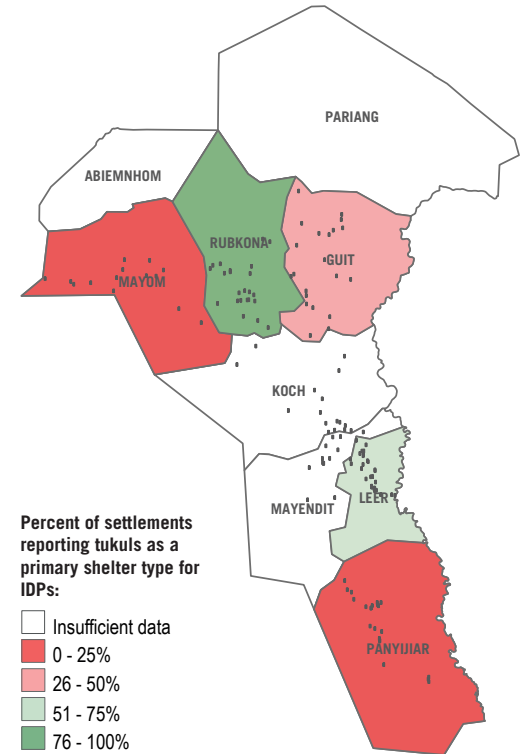

⁴ Key informants could choose up to two answers.

Shelter/NFI

Shelter sharing

Reported number of people sharing a shelter in assessed settlements:

Sheltering IDPs

Reported proportion of the local community sharing shelters with IDPs:

June 2017

Food Security

Market distance

Reported distance of the nearest market from the assessed settlements:

Under 30 minutes	35%
30 minutes to under 1 hour	23%
1 hour to under half a day	33%
Half a day	4%
More than half a day	4%

Food unavailability

Top three reported reasons why people cannot access enough food in the assessed settlements:⁵

1 Crops destroyed by fighting	54%
2 Food distributions stopped	44%
3 Unsafe to plant	38%

Coping strategies

The average number of reported coping strategies used in the assessed settlements:

0.9 coping strategies reported on average

Land availability

Reported availability of land for agriculture in the assessed settlements:

Market availability

Reported availability of a functioning market accessible from the assessed settlements:

WASH

Water distance

Reported distance of the nearest safe water source from the assessed settlements:

Under 30 minutes	71%
30 minutes to under 1 hour	24%
1 hour to under half a day	4%
Half a day	1%

Water availability

Reported availability of a safe water source accessible from the assessed settlements:

Sanitation

Reported use of sanitation facilities over open defecation in assessed settlements:

All	0%
More than half	0%
Around half	2%
Less than half	3%
None	95%

Water sources

Reported primary safe water source available from the assessed settlements:

Borehole	94%
Tapstand	2%
Water yard	2%
Other	2%

⁵ Key informants could choose up to three answers.

June 2017

Education

School attendance

Reported proportion of settlements where 6-17 years old boys and girls attend school respectively:

⁶ Key informants could choose more than one answer.

⁷ Accelerated learning programmes.

Education availability

Reported available education services in the assessed settlements:⁶

Education attendance and availability

Top two reported reasons why children are not attending school in the assessed settlements:

Top two reported reasons why education services are not available in the assessed settlements:

Protection

Women

Reported primary protection concerns for women in the assessed settlements:

Men

Reported primary protection concerns for men in the assessed settlements:

Children

Reported primary protection concerns for children in the assessed settlements:

Community relations

Reported relationships between IDPs, returnees⁸ and local community in the assessed settlements:

Land disputes

Reported presence of disputes over land ownership in the assessed settlements:

⁸ Local community displaced and returned home, reported in 60% of assessed settlements.

About REACH

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms. For more information, you can write to our in-country office: south.sudan@reach-initiative.org or to our global office: geneva@reach-initiative.org.

Visit www.reach-initiative.org and follow us @REACH_info.
