

INTRODUCTION

The Afghanistan Joint Market Monitoring Initiative (JMMI) was launched by the **Afghanistan Cash and Voucher Working Group (CVWG)** and **partners**, in collaboration with REACH Initiative (REACH), and funded by the European Civil Protection and Humanitarian Aid Operations (ECHO). The objective is to provide regular updates on prices of key items and market functionality to inform Cash and Voucher Assistance (CVA). Data from the fourth round of the JMMI was collected between 10 and 20 August, in 30 provinces of Afghanistan.

- 17 participating agencies
- 30 assessed provinces
- 328 assessed marketplaces
- 1,013 key informants interviews (KIIs)
- 24 commodities assessed

MEDIAN MEB COST IN AFGHANISTAN

MINIMUM EXPENDITURE BASKET (MEB) CALCULATIONS

AFGHANISTAN MEB CONTENTS*

Basic Food Basket

| | | | |
|------------------------|-------|----------|-------|
| Wheat flour (imported) | 60 kg | Pulses** | 14 kg |
| Local rice | 29 kg | Salt | 1 kg |
| Vegetable oil | 6 L | Sugar | 6 kg |

Non-Food Item (NFI) basket

| | | | |
|---------------------------|-------|---|-------|
| Antiseptic soap (95-110g) | 18 pc | Soft cotton cloth (2m ² piece) | 2 pc |
| Toothpaste | 2 pc | Sanitary pad | 2 box |
| Toothbrush (adult) | 3 pc | Women's underwear ³ | 2 pc |
| Toothbrush (child)*** | 4 pc | | |

Healthcare component (fixed at 667 AFN)

Shelter component (fixed at 5,850 AFN)

Unmet needs (10% of sum of above)

The Minimum Expenditure Basket (MEB) represents the minimum culturally adjusted group of items required to support a six-person Afghan household for one month. The cost of the MEB can be used as a proxy for the financial burdens facing households in different locations. The MEB's content was defined by the CVWG in consultation with relevant sector leads.

* The MEB cost in this factsheet were calculated using the relevant food and non-food item prices monitored. For items which prices were not collected, calculations included the existing price used by the CVWG as a baseline. For the healthcare and shelter components, the listed fixed amount was used in the calculation. The AFN to USD conversion uses a fixed exchange rate of 78.5 AFN to 1 USD.

** Pulses in this factsheet are calculated as the average price of all three types of pulses monitored: lentils, beans, and split-peas.

*** The standard fixed CVWG price for toothbrush (child) and women's underwear was used in the calculation of the MEB, as these items are not monitored as part of the JMMI.

REPORTED CHANGE IN PRICE OF FOOD ITEMS IN 30 DAYS PRIOR TO DATA COLLECTION, AND REPORTED REASONS FOR DECREASE IN PRICE⁷

% of KIs reporting change in price for food items in the 30 days prior to data collection:

29% Decreased

41% Stayed the same

27% Increased

3% Don't know

Out of those KIs reporting a decrease in food prices, the most frequently cited reasons were:

- 1 61% Seasonality
- 2 52% Increased number of shops
- 3 19% Demand increased⁸

REPORTED CHANGE IN PRICE OF NFIs IN THE IN 30 DAYS PRIOR TO DATA COLLECTION, AND REPORTED REASONS FOR DECREASE IN PRICE⁷

% of KIs reporting change in price for NFIs in the 30 days prior to data collection:

13% Decreased

61% Stayed the same

22% Increased

4% Don't know

Out of those KIs reporting a decrease in NFIs prices, the most frequently cited reasons were:

- 1 44% Increased number of shops
- 2 37% Demand increased⁸
- 3 19% Seasonality

LOCATION OF MAIN SUPPLIERS FOR FOOD ITEMS AND NFIS⁹

Proportion of KIs by reported location of their main supplier of food items:

| | |
|-----|-----------------------|
| 4% | Imported |
| 41% | Different province |
| 32% | Province capital city |
| 12% | Same province |
| 10% | Same district |
| 1% | Other |

Proportion of KIs by reported location of their main supplier of NFIs:

| | |
|-----|-----------------------|
| 7% | Imported |
| 42% | Different province |
| 31% | Province capital city |
| 9% | Same province |
| 10% | Same district |
| 1% | Other |

CHANGE IN NUMBER OF SUPPLIERS FOR FOOD ITEMS AND NFIS⁹

Proportion of KIs reporting a change in the number of food suppliers in the past 30 days:

Proportion of KIs reporting a change in the number of NFI suppliers in the past 30 days:

BARRIERS TO MARKET ACCESS FOR CONSUMERS

Proportion of KIs that reported **consumers faced at least one of the mentioned barriers¹⁰** to accessing the market in the past 30 days:

Of those KIs reporting at least one barrier to accessing the market, the most frequently cited were:

- 1 36% Fear of exposure to COVID-19, and public health restrictions
- 2 29% Financial barriers
- 3 15% Insecurity travelling to the market

Proportion of KIs that reported **consumers faced security constraints** to accessing the market in the 30 days prior to data collection:

Proportion of KIs reporting the **ability of women, in general, to safely access the market:**

In the **North-East and South**, lower proportions of KIs reported barriers to accessing the market in the past 30 days, faced by consumers. Respectively, the proportions were **34%** and **61%**, compared to the national 70%.

CURRENT AVAILABILITY OF ITEMS FROM SUPPLIERS¹¹

| Item | Available (% KIs) | Limited (% KIs) | None (% KIs) |
|---|----------------------|--------------------|-----------------|
| Food Items | | | |
| Wheat flour (local) | 95% | 4% | 1% |
| Wheat flour (imported) | 97% | 2% | 1% |
| Local rice | 97% | 2% | 1% |

| Bleach | 20% | 66% | 13% |
| Other NFIs | | | |
| Safe (drinking) water | 52% | 40% | 6% |
| Firewood | 10% | 60% | 25% |
| Kindling | 10% | 58% | 29% |
| Cooking fuel | 17% | 70% | 11% |

***KIs that reported selling assessed commodities were also asked about the change in demand for the item in the 30 days prior to data collection. These data are aggregated at national level.*

DIFFICULTIES TO MEET DEMAND AND TO TRANSPORT OR PROCURE SUPPLIES

7% of KIs reported facing difficulties obtaining enough commodities to meet demand in the 30 days prior to data collection. The three most frequently cited reasons by these KIs were:

- 1 65%** Financial constraints and inability to purchase supplies
- 2 43%** Supplier unable to provide enough
- 3 34%** Reduced movement due to fear of exposure to COVID-19

Most frequently reported food items difficult to restock and obtain in the 30 days prior to data collection:

- 1 78%** Vegetable oil
- 2 69%** Wheat flour (imported)
- 3 46%** Sugar

33% of KIs reported difficulties in road-based transportation of goods. The three most frequently cited difficulties were:

- 1 21%** Roadblocks
- 2 22%** Conflict
- 3 9%** Seasonality

Most frequently reported NFIs difficult to restock and obtain in the 30 days prior to data collection:

- 1 18%** Antiseptic soap
- 2 15%** Washing detergent
- 3 12%** Toothbrush and Toothpaste

TRADERS & MARKET FUNCTIONALITY

TRADER PRESENCE IN THE MARKET

Proportion of KIs reporting the proportion of traders usually present in the marketplace to be open:

Proportion of KIs reporting the number of traders open to have changed in the 30 days prior to data collection:

Three most frequently cited reasons for a reported decrease in number of traders:¹³

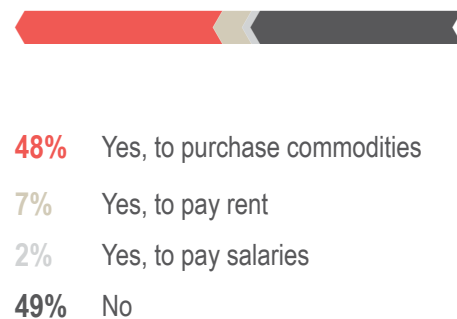

- 1 68% Due to COVID-19
- 2 31% Financial constraints
- 3 22% Lack of commodities

TRADERS' COPING MECHANISMS AND RELIANCE ON CREDIT

Proportion of KIs reporting on the use of main coping mechanisms to address reduced or limited income:

Proportion of KIs reporting having borrowed money or purchased on credit to support their business in the 30 days prior to data collection:^{14, 15}

CONSUMERS, PAYMENT, & CREDIT

Proportion of KIs reporting the number of customers per day to have changed in the 30 days prior to data collection:

Proportion of KIs reporting the number of customers purchasing on credit to have changed in the 30 days prior to data collection:

Proportion of KIs reporting types of payments they accepted from consumers in the 30 days prior to data collection:¹⁴

- 1 81% Cash
- 2 49% Credit
- 3 4% Barter
- 4 2% Mobile money transfer

PRESENCE OF FINANCIAL SERVICES

Proportion of KIs reporting there to be any functional money transfer services in or near their market area:

The three most frequently cited available money transfer services were:¹⁴

- 1 87% Hawala
- 2 57% Banks
- 3 16% Formal transfer services

Main reported sources from which KIs borrowed money or purchased on credit to support their business in the 30 days prior to data collection:

- 1 66% Supplier (buy on credit)
- 2 25% Family and friends
- 3 5% Informal services

MEDIAN ITEM PRICES PER UNIT PER PROVINCE (in AFN)

| Province | Wheat flour local (1 kg) | Wheat flour imported (1 kg) | Local rice (1 kg) | Vegetable oil (1 l) | Lentils (1 kg) | Beans (1 kg) | Split Peas (1 kg) | Salt (1 kg) | Sugar (1 kg) | Tomatoes (1 kg) | Potatoes (1 kg) | Onions (1 kg) | Eggs | Soft cotton cloth ⁵ (2m ² piece) | Tooth-brush (adult) (1) | Tooth-paste (1) | Sanitary pad (box of 10) | Washing detergent (1 l) | Soap (1 bar, 150 gm) | Bleach (1 l) | Safe (drinking) water (20 l) | Firewood (1 kg) | Kindling (1 kg) | Cooking fuel (1 kg) |

METHODOLOGY

Working through the CVWG and its partners, and funded by the European Civil Protection and Humanitarian Aid Operations (ECHO), REACH facilitated the implementation of a partner-driven Joint Market Monitoring Initiative (JMMI) in Afghanistan. It is intended to be conducted on a monthly basis to provide longitudinal market and price data.

The JMMI is led by the CVWG and coordinated through a JMMI Task Force (JMMI-TF) established for this purpose. REACH operates as the technical lead, by providing input on the research and tool design, providing training to partners, compiling and cleaning all data collected, and conducting analysis. The World Food Programme (WFP) provided support in the tool review and development.

The JMMI assessment employed a quantitative key informant interview (KII) approach. The methodology includes surveys with purposively sampled traders (both retail and wholesale), acting as key informants (KIs) for their respective markets. Participants are selected

through partner KI networks in their respective market areas.

Each KI was asked to report on general market functionality indicators, as well as prices for all relevant items which they trade. Depending on access and availability, partners conduct 4 KIIs per item with retail traders, and 2 KIIs per item for wholesale traders (for food and NFIs). KIIs were asked for information encompassing the 30 days prior to data collection. Findings represent KIIs' understanding of the situation in their markets and therefore are **indicative only**.

The third round of data collection took place between 10th and 20th August 2020, and a total of 1,013 KIIs were conducted. This round covered 328 markets, which were sampled by partners nationwide based on their access and existing areas of intervention. This includes markets in 30 out of 34 provinces in Afghanistan.

About the Afghanistan Cash and Voucher Working Group and REACH Initiative

The Afghanistan Cash and Voucher Working Group (CVWG) is an inter-cluster technical working group set up to ensure cash and voucher assistance (CVA) in Afghanistan is coordinated, follows a common rationale, is context specific and is undertaken in a manner that does not inflict harm or exacerbate vulnerabilities of the affected population. The working group was initially established in 2012 under the Food Security and Agriculture Cluster (FSAC), but since 2014 it has become an inter-cluster working group which is overseen by the Inter-Cluster Coordination Team (ICCT). The working group is currently co-chaired by the Danish Refugee Council (DRC) and the World Food Programme (WFP). For more information, please visit <https://www.humanitarianresponse.info/en/operations/afghanistan/cash-voucher>.

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT). For more information please visit our website: www.reach-initiative.org. You can contact us directly at: geneva@reach-initiative.org and follow us on Twitter [@REACH_info](https://twitter.com/REACH_info).

Challenges & Limitations

- Due to COVID-19 and related government restrictions data collection continued to be difficult as enumerators had difficulties finding KIIs to interview at the markets.
- Despite having the tool shortened following the pilot round, the length of the questionnaire remained challenging as KIIs were unable to participate for too long whilst working. Therefore, the tool will be further shortened again for the fourth round.
- A total of 30 provinces were covered in the fourth round of the JMMI. Compared to the previous (third) round, coverage in Uruzgan was gained through assessing markets in the provincial capital district (Tirinkot).
- Due to the aforementioned difficulties in data collection, data from the third round of JMMI was disaggregated at the province-level. In the next rounds of JMMI, the aim of the JMMI is to have data at the district-level.
- Due to limited data points and strong regional variation, the median price for the item 'safe water' was not reported in the previous (third round), thus it was not possible to calculate the price change.

JMMI Partners

- **AADA** - Agency for Assistance and Development of Afghanistan
- **AAH** - Action Against Hunger
- **ACTD** - Afghanistan Center for Training and Development
- **ACTED**
- **Caritas Germany (with RCDC and VOPOFA)**
- **RCDC** - Rural Capacities Development Committee
- **VOPOFA** - Village of Peace Organization for Afghans
- **CRDSA** - Centre of Rehabilitation and Development Services for Afghanistan
- **DRC** - Danish Refugee Council
- **IOM** - International Organization for Migration
- **IRC** - International Rescue Committee
- **JACK** - Just for Afghan Capacity and Knowledge
- **JIA** - The Johanniter International
- **OHW** - Organization of Human Welfare
- **Save the Children**
- **WHH** - Welthungerhilfe
- **World Vision**

ENDNOTES

1. The Minimum Expenditure Basket (MEB) represents the minimum culturally adjusted group of items required to support a six-person Afghan household for one month.
2. All AFN to USD conversions in this factsheet use a fixed exchange rate of 78.5 AFN to 1 USD, unless otherwise stated. This is taken from the standard exchange rate used by the Afghanistan CVWG in MEB calculations. The official exchange rate on the first day of data collection of the third round of the JMMI (31 August) was 78.25 AFN to 1 USD (cash sell rate) and 76.94 (cash buy rate) as reported by [the Afghanistan Bank](#).
3. The % of change between the price of the MEB and the Food Basket during data collection, and the price of the MEB and the Food Basket in the third round of the JMMI ([July 2020](#)) are reflected here.
4. Pulses in this table are calculated as the median (normalized) price of all three types of pulses monitored: lentils, beans, and split-peas.
5. N/A: Due to limited data points and strong regional variation, the national median price of some items were used to calculate the MEB, and are not reflected in the province-level disaggregations.
6. The item 'kindling' is a highly seasonal winter item, and therefore, not frequently sold during the period of the JMMI round 3 data collection. Therefore, the price of this item should be considered purely indicative.
7. All KIs were asked in general about changes in prices of food items and NFIs, and those that reported an increase or decrease were asked to report on the main reason for this.
8. The answer option "Demand increased" followed the assumption that availability of commodities would have proportionally increased too. It will be changed from round 5.
9. Any KI that reported selling any food item or NFI was asked to report the location of their main supplier, whether the number of suppliers had changed in the last 30 days, and the main means of transportation of goods.
10. The answer options for the question "What, if any, do you think are the barriers consumers have faced in accessing the market in the past 30 days?" included: insecurity travelling to/from the marketplace, insecurity at the marketplace, distance, restrictions on movement and/or lockdown, fear of going outside due to COVID-19, financial constraints, other.
11. For each item, KIs were asked to report if the item was currently available in the shop (available, limited availability or unavailable).
12. For each item, KIs were asked to report if demand for the item had changed in the past 30 days (increased a lot, increased, slightly increased, stayed the same, slightly decreased, decreased, decreased a lot). The results were then aggregated as increased, decreased, stayed the same. For further information and analysis please contact us or consult the publicly available dataset). The answer options also included "don't know", which may affect the sum of the responses. Where the sum of reported increase, same, and decreased doesn't add up to 100%, the remaining percentage corresponds to "don't know".
13. Of the KIs that reported the number of traders open in the market to have decreased in the past 30 days. Multiple options could be selected and findings may therefore exceed 100%.
14. Multiple options could be selected and findings may therefore exceed 100%.
15. Of the 51% of KIs reporting to borrow in the past 30 days to purchase commodities, 51% reported that up to half or more of their commodities was purchased on credit.
