

# Multi-Sector Needs Assessment: Dagahaley Refugee Camp

Garissa County, Kenya, September 2019

## Summary

As of August 2019, a total of 212,936<sup>1</sup> mostly Somali refugees resided in Dadaab refugee complex (Dagahaley (71,311), Hagadera (74,526) and Ifo (67,099)). With continued conflict, instability and drought causing new displacement in Somalia, in addition to reduced humanitarian funding in Dadaab, there is a need to strengthen information on humanitarian needs and access to assistance and services in the camps. This information will support the planning of immediate refugee responses and inform the development of long term response strategies including government-led Comprehensive Refugee Response Framework (CRRF) annual plans and county level development plans. Since May 2017, REACH has worked in collaboration with the Norwegian Refugee Council (NRC) and in support of camp management and operational partners to provide guidance on developing tools and methodologies for data collection in Dadaab refugee complex.

This factsheet provides an overview of the multi-sector needs assessment in Dagahaley refugee camp. It provides an analysis of refugee humanitarian needs, access to shelter, protection, food security, health, water, sanitation and hygiene (WASH) and livelihoods.

Primary data was collected through household (HH) surveys from 11 to 25 September, 2019. A total of 375 households (HHs) were randomly selected and interviewed. The assessment was sampled to fulfil a confidence level of 95% and a margin of error of 5% at the camp level. This level is guaranteed for all questions that apply to the entire surveyed population of each camp. Findings relating to a subset of the surveyed population may have a wider margin of error and a lower confidence level.

## Demographics

### Distribution of population by age and sex:

55% of the assessed households were male-headed while 45% were female-headed. 86% of HHs reported that at least one member of their HH was born in Kenya. The average HH size is 6.

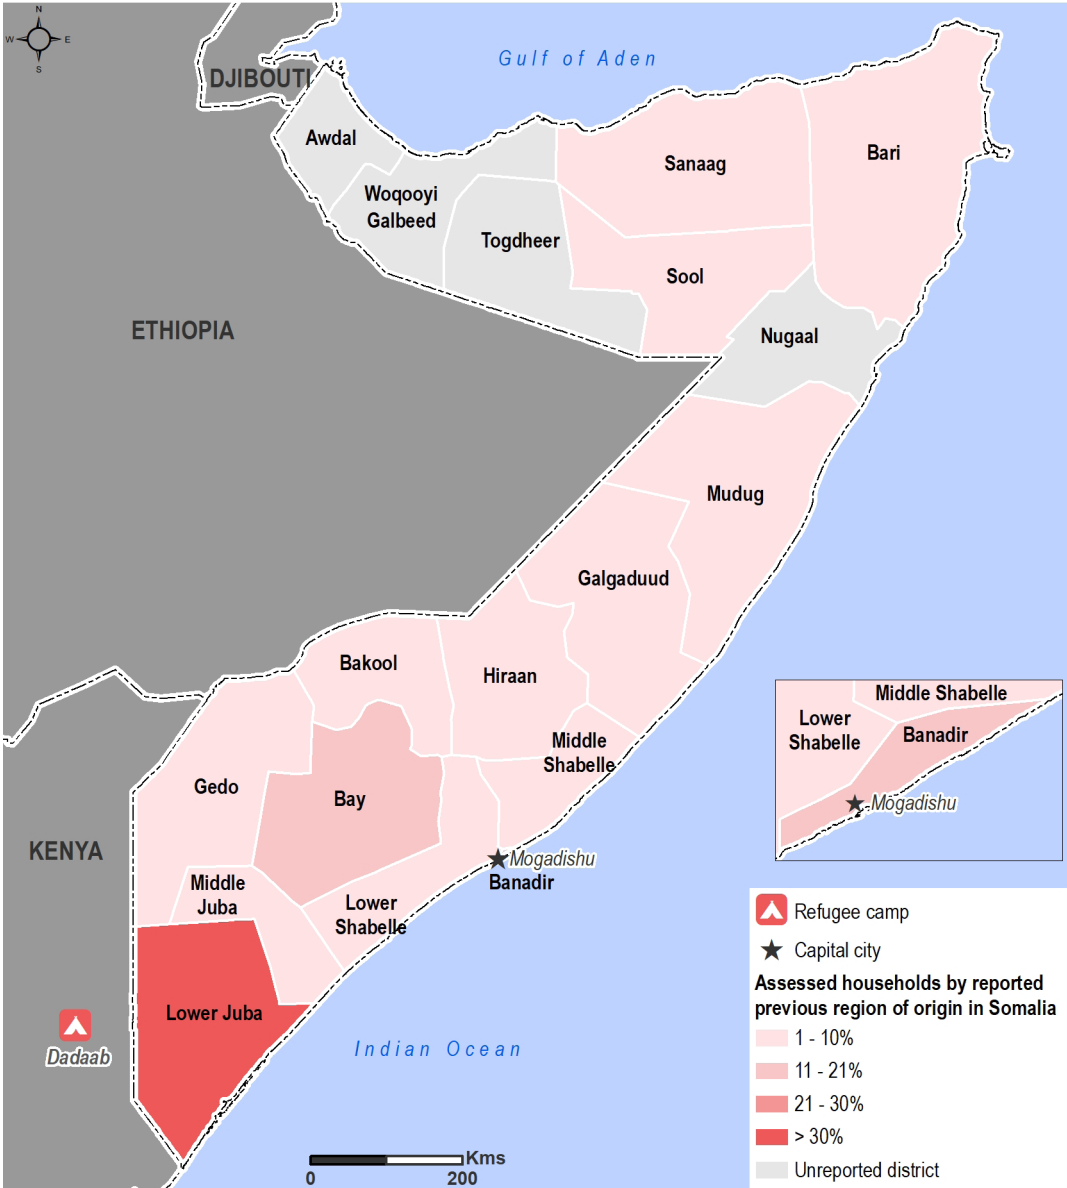

### Country of origin as reported by HHs:

### Reported time lived in Dadaab by HHs:

## Reported regions of origin of refugees residing in Dagahaley

## Protection

### Registration and documentation

#### Household refugee registration status:

All members are registered	96%
Some members are registered	3%
No member is registered	1%

#### Household members that had identity documents (IDs):

All members have IDs	20%
Some members have IDs	79%
No member has an ID	1%

#### Top reported identity documentation possessed by HH members:<sup>2</sup>

Refugee alien ID card	97%
Kenyan birth certificate	15%
Proof of marriage	11%

Of the 97% of HHs that reported having a member who possessed a refugee alien ID card, 40% reported that the refugee alien ID card was expired. 66% of these, reported that their sim cards had been deactivated because their refugee alien ID cards were expired.

87% of HHs reported that they had adequate information regarding the relocation and resettlement exercise that was going on in Dadaab. The 13% HHs who did not have adequate information, reported that they would like to understand the selection criteria of those who were relocated or resettled.

### Persons with specific needs

#### % of HHs with at least one member having the following specific needs:<sup>2</sup>

Pregnant or lactating women	62%
Men with disability	6%
Women with disability	5%

## Security

100% of HHs perceive the security to be very good or good in the 6 months prior to data collection.

All HHs reported that their relationship with the host community was either good or very good in the 6 months prior to data collection

#### % of HHs that turned to the following security providers to get help when experiencing insecurity incidents:<sup>3,2</sup>

Police	83%
RAS <sup>5</sup>	6%
Relative or friends	3%
Refugee leaders	3%

54% of HHs who reported insecurity cases to the police, said that these cases were resolved in less than one week.

3. Insecurity incidents include theft, sexual and gender based violence, domestic violence, etc.

4. For more information on food security indicators (FCS,CSI) please see: <https://bit.ly/2nmlWGy>

5. Refugee Affairs Secretariat RAS

6. WFP thresholds are as follows: Good (rCSI of 0 – 4), Average (rCSI of 5 – 20), Poor (rCSI of > 21)

## Food security

All HHs perceived to have access to sufficient food in the seven days prior to data collection.

97% of HHs reported food voucher assistance as their main source of food. 59% of HHs reported that the amount of food has reduced in the 6 months prior to data collection.

#### HH food consumption scores (FCS):<sup>4</sup>

## Humanitarian assistance

#### Top 3 most commonly reported HH needs:<sup>2</sup>

Food	92%
Water	88%
Shelter	78%

#### % of HHs that received humanitarian assistance in the 3 months prior to data collection:

#### Top reported types of assistance received by HHs who had been provided with humanitarian assistance in the 3 months prior to data collection:<sup>2</sup>

Food voucher	70%
None food items	9%
Shelter materials	5%

Water, Sanitation & Hygiene

Average number of days per week a HH member collects water:

Average time taken by a HH member to walk to their main waterpoint:

95% of HHs take an average of 30 minutes or less at the water collection points to queue and collect water.

81% of HHs reported that they had encountered a challenge when collecting water

Main challenges encountered by HH members who reported that they had encountered a challenge while collecting water:

% of HHs whose members had access to and used a latrine:

Main accessibility problems reported by HHs where not all members had access to a latrine:<sup>6</sup>

% of HHs that had soap at the moment of data collection:

84% of HHs who had soap reported that they use soap to wash their hands.

% of HHs that reported the following critical hand washing times:<sup>7</sup>

% of HHs whose members received hygiene promotion messages in the following timelines:

61% of HHs who had received hygiene promotion messages reported that they had received the messages from home visit by hygiene promoters.

Health

Average time taken by a HH member to walk to the nearest health facility:

% of HHs that received a visit from a community health worker in the 3 months prior to the data collection:

94% of the HHs reported that at least one member of their HH experienced a health issue in the one month prior to data collection and they all visited a health facility in response to the health issues experienced.

% of households reporting visiting the following health facilities, of those that reported experiencing a health issue in the 30 days prior to data collection:

All HHs who visited an NGO run clinic when they experienced a health issue, reported that they did not pay for health services.

Seven per cent (7%) of HHs reported that they had at least one member of their HH who was malnourished. 4% of them reported that they were not able to access nutrition services mainly because the facilities offering nutrition services are too far.

Movement

2% of the assessed HHs reported that at least one member of their HH had applied for a movement pass in the one month prior to data collection. 63% of these HHs reported that they had applied for a movement pass to visit their family or friends while 25% had applied for the movement pass to seek education services.

6. Unsafe means that the latrine does not have a door or lock

7. Hand washing should happen at 5 critical times i.e. before touching food (eating, preparing food or feeding a child) and after contact with excreta (after using the toilet or cleaning a child's bottom)

Garissa County, Kenya, September 2019

## Livelihoods

### Top reported primary sources of livelihoods by HHs in the 30 days prior to the data collection:<sup>2</sup>

Sale of natural resources	19%		47% of the HHs who had a business reported that their source of capital for starting the business was savings or borrowed money.
Salaried-employment	13%		
Self-employment	5%		

### Top reported livelihood coping strategies by HHs in the 30 days prior to the data collection:<sup>2</sup>

Rely on humanitarian aid	35%	
Support from friends and family	34%	
Spent savings	16%	

### Top reported types of employment by HHs whose primary source of income is salaried-employment:

Work in a business of another person	52%	
Day laborer	42%	
Humanitarian agency staff	19%	

### % of HHs that know what they require in order to get formal employment:<sup>2</sup>

Alien card	40%	
Skills that match the job you apply for	26%	
Formal language(English or Kiswahili)	22%	
Proof of registration	18%	
Apply for jobs	15%	
Work permit	6%	
Movement pass	4%	

### Main reported types of business run by HHs whose primary source of livelihoods is self-employment:

Non-food item shop	26%	
Food retail shop	26%	
Food wholesale shop	16%	
Mechanic shop	16%	

65% of HHs reported that food was their largest expense at the moment of data collection.

### % of households that had borrowed money (from traders, family, etc.):

Yes 87%  
No 13%

Of the 87% HHs that were indebted, 61% reported that they had borrowed money to buy food.

## Education

### Proportion of school-aged<sup>8</sup> children attending school per education level:

		
Pre-primary	47%	35%
Primary	29%	29%
Secondary	3%	4%
Not attending	22%	33%

### Most commonly reported barriers by HHs whose children are not attending school:<sup>2</sup>

Boys		Girls
Too young to go to school	1	Too young to go to school
School is too far	2	School is too far
Want to leave the camp	3	Want to leave the camp

### Top reported reasons why HHs said that their children were too young to go to school:<sup>2</sup>

Distance to be covered is too long	79%	
Fear of violence on the way to school	21%	
Fear of violence at school	5%	

24% of HHs reported that they had at least one member of their HH who did not transition to tertiary education after completing secondary school in the last 5 years. 67% of them reported that these HH members did not transition tertiary education mainly because of lack of school fees.

## Shelter

On average, 1 shelter is shared among 3 HH members.

### Top reported type of shelter in Dagahaley:

Cordia shrub wall (with or without mud)	53%	
Mud brick wall	49%	
Iron sheets (wall and roof)	33%	

### % of households that have proof of allocation for the place they have put up their shelter :

Yes 78%  
No 22%

8. School-aged children are children between 4 years and 17 years
