

# WASH Site Profile - Camp 7

Ukhiya, Cox's Bazar, Bangladesh (February 2018)
GPS Coordinates: 92.16529654 21.20312163

#### **Summary**

This profile provides an overview of water, sanitation and hygiene (WASH) infrastructure within Camp 7 in Ukhiya, Cox's Bazar. Primary data for this round was collected between 4-20 February 2018. Findings should be considered indicative only.

#### **Site Overview**

# of individuals: 39138
# of households: 9518
# of shelters: 6648
# of individuals 6
per shelter:

### **Key WASH Infrastructure**

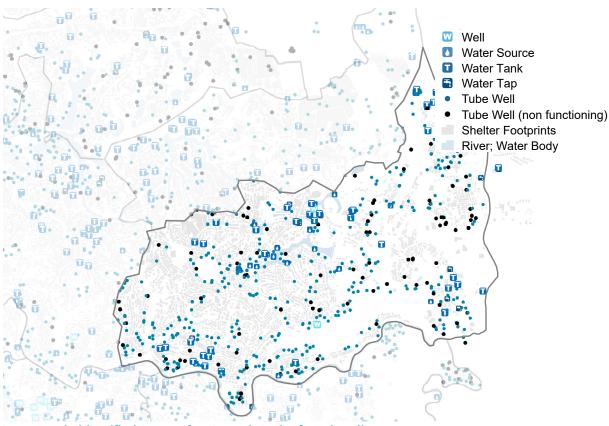

# of latrines 1132 (% functional): (84%)
% of safe latrines²: 92%
# of handpumps (% functional):
# of washrooms: 457

#### **Location Map**

## Access to Water

## Three most commonly identified types of water points, by functionality

86% Handpump/tubewell	80%	20%	
8% Water tank	98%	2%	Functional  Non-functional
1% Unimproved water source	79%	21%	Non fundional

## Key sectoral achievements

	Target	<b>Current Round</b>	Achievement
# of people per functional handpump	max. 500 <sup>3</sup>	98	
% of shelters with at least 1 functional handpump within 200m⁴	100%	100%	

Targets based on WASH Sector Standards/Indicators for the Rohingya response, Sphere Minimum Standards/Indicators as well as Department of Public Health and Environment (DPHE) Minimum Standards/Indicators • Minimum standard/indicator reached, • 75%-99% minimum standard/indicator reached, • 50-74% minimum standard/indicator reached, • Less than 50% of minimum standard/indicator reached

<sup>1</sup> REACH enumerators conducted a full sweep of all sites and camps (as per boundaries defined by ISCG) and used an Open Data Kit (ODK) form to log all key infrastructure observed during this sweep, with further details to be logged for WASH infrastructure. <sup>2</sup> Safe refers to fully covered latrines (i.e. a latrine with four walls, a roof and a door) <sup>3</sup> This target is based on standards for the medium and long term (3 months +), for the immediate phase (0-3 months) it is 1000. <sup>4</sup> The distance is based on standards for the long term (6 months+), for the immediate phase (0-3 months) it is 750 metres and for the medium phase (3-6 months) 500 metres.
