# Rapid Displacement Overview: Displacement from Syria

Al Walid, Sahila and Kalhi Villages, Dohuk Governorate, Iraq

Update: as of 11 November 2019

## **Background and Methodology**

Due to the worsening security situation inside Syria, REACH Initiative (REACH) is conducting rapid assessments to monitor the influx and needs of Syrian refugees recently displaced to the Kurdistan Region of Iraq (KR-I). In order to inform and provide an evidence-base for humanitarian planning, the REACH Iraq team launched data collection close to the Syrian border, to capture the demographics, needs and displacement history of those crossing from Syria into the areas surrounding Al Walid, Sahila and Kalhi villages in the KR-I. To gather this information, REACH conducted Key Informant (KI) interviews, with one nominated KI per travel group responding on behalf of the travel group.

This ninth output reflects data collected in Sahila on 9, 10 and 11 November 2019. In total, 49 KIs were interviewed on behalf of their travel groups (352 displaced individuals). As data is collected through KIs, results should be considered indicative and are not therefore statistically representative.

## **Displacement Figures**

Total number of registered refugees arriving to assessed area since 8 October: **15,007.**¹ By date of arrival:¹

#### Situation Overview

Since the outbreak of conflict on 9 October 2019, residents of Northeast Syria (NES) are experiencing a new humanitarian crisis, resulting in massive displacement from the region, both internally and, to a lesser extent, towards the KR-I. As of 31 October, the UN estimated that nearly 108,514 people<sup>2</sup> remain displaced, while UNHCR reported 15,007 refugees<sup>1</sup> crossing into the KR-I between 9 October and 11 November. Days after a ceasefire agreement was reached on 17 October,<sup>3</sup> a sharp decrease in daily refugee arrivals was observed. New refugee arrivals have been screened between the villages of Al Walid, Sahila and Kalhi in the KR-I, and have then been moved to Bardarash and Gawilan camps for registration. The number of refugees entering the KR-I has been decreasing since 25 October.

The number of arrivals has decreased further, with an average of 131 new arrivals per day. In this week's update, most KIs reported Ain al-Arab (33%) as most recent place of residence in Syria, which is an increase compared to the last update (14%). Furthermore, travelling by foot remained the primary mode of transportation, and was reported by 84% of KIs, with 53% of KIs reporting groups travelling for over seven days. For almost all travel groups, lack of water and food were reported as most commonly encountered difficulties on the journey, and the proportion of KIs reporting their travel groups encountered these difficulties has been increasing over the last two updates. The proportion of travel group members identified as vulnerable remained high, with 13% of children being unaccompanied or seperated, and 22% of women reportedly pregnant or lactating. Travel groups reporting airstrikes as a push factor to leave their place of residence in Syria decreased from 70% in the last update to 43%, while the proportion of KIs reporting the arrival of armed groups as most commonly reported push factor increased from 30% to 57%.

# Rapid Displacement Overview: Displacement from Syria

## **†** Demographics

## **Demographics of the Displaced Groups**

7 Average size of travel groups as indicated by Kls.

Demographic breakdown by age and gender as reported by KIs:

#### **Vulnerable Groups**

Proportion of travel group members identified as vulnerable as indicated by KIs:

13% of children were unaccompanied or separated.

0% of travel group members were physically disabled.

22% of women were pregnant or lactating.

#### **Population Left Behind**

90%

of KIs reported that within their travel group at least one member had left at least one family member behind in their previous residence.

## **Displacement**

The near totality of KIs (95%) reported that travel groups had to pay someone to cross from Syria, as was reported in previous updates. Travel groups reportedly paid on average 171 USD per person (1,233 USD per group), which is similar to former updates. Almost all KIs reported no water (96%) and no food (94%) as difficulties experienced on the journey, this is a slight increase again compared to the last update. About half of the travel groups have reportedly traveled for more than seven days (53%).

#### **Previous Location in Syria**

Most commonly reported districts of most recent residence in Syria:

#### **Displacement Routes**

Most commonly reported difficulties experienced on the journey, according to

#### **Push Factors**

Most commonly reported reasons for displacement from Syria:

Reported reasons for choice of displacement route, according to KIs:

#### **Duration of Displacement Stages**

**16%** of KIs reported less than 6 hours between the decision to leave their most recent location of residence and departing.

**4%** of KIs reported a waiting time of more than eight hours at crossing point from Syria to KR-I.

**14%** of KIs reported having spent more than eight hours at screening point in the villages of Al-Walid, Sahila and Kalhi in KR-I.

Most commonly reported primary modes of transport travel groups used to crossing point from most recent residence location, according to KIs:

Time since leaving previous residence:

## **Secondary Displacement**

44% of KIs reported that the majority of their travel group members were living in displacement in their previous residence.

# Rapid Displacement Overview: Displacement from Syria

## **Needs and Assistance**

#### **Humanitarian Needs**

Most commonly reported items brought by the majority of travel group members, according to KIs<sup>4</sup>:

Identification papers 100%

Cash 98%

Clothes 71%

Jewelery and other valuables 16%

Four most commonly reported priority needs, according to KIs4:

33%

of group members did not carry any form of identification papers, as indicated by KIs<sup>5</sup>.

## **☆** Movement Intentions

### **Movement Intentions**

After refugees transitioned through screening points, they were transported to Bardarash and Gawilan camps for registration. When asked about movement intentions of travel groups in the two days following data collection, all KIs reported not having any other choice than staying in camps. However, only 43% of KIs reported that travel groups intend to stay in camps in the two weeks following data collection. The percentages of travel groups intending to stay in camp have been fluctuating over the past weeks.

Most commonly reported movement intentions of travel groups in the <u>two</u> weeks following date of interview, according to KIs<sup>6</sup>:

Do not intend to move further 43%

Join family and friends in KR-I<sup>7</sup> 29%

Do not know 24%

0%

of KIs indicated that at least one member of their group intends to return back to Syria in the two weeks following date of interview.

Most commonly reported movement intentions of travel groups in the two days following date of interview, according to KIs:

Camp 100%

Main reasons reported by KIs for intentions in the two days following date of

<sup>4</sup>Kls could select multiple needs or reasons. Therefore, results may exceed 100%.

While all KIs reported that the majority of their travel group members were able to bring identification papers with them, 34% of group members did reportedly not carry any form of identification papers with them.

6 Movement intentions of travel groups in the next two weeks were only asked to respondents who had indicated that they intended to move to a camp or options other than joining family and friends in KR-I or Dohuk in the next two days.

This response option covers locations in the KR-I other than those in Dohuk governorate (i.e. locations within Erbil or Sulaymaniyah governorates)
