

Aleppo governorate, Syria October 2019

Summary

This profile provides an overview of conditions in Menbij East New settlement. Primary data was collected through household surveys between 2 and 3 October, prior to military escalation in northeast Syria starting on 9 October. Households were randomly sampled to a 95% confidence level and 10% margin of error, based on population figures provided by camp management. In some cases, further additional information from camp managers has been used to support findings.

Menbij East New is one of two large camps in the countryside outside Menbij City. At the time of data collection, the camp was managed by local authorities, and administered by local authorities.

Location Map

WASH	Persons per latrine Persons per shower Frequency of solid waste disposal	max. 20 max. 20 min. twice weekly	27 142 Weekly	•	27 125 Daily	▶

Targets based on Sphere and humanitarian minimum standards specific to northeast Syria. Minimum standard reached More than 50% minimum standard reached Less than 50% of minimum standard reached Number of individuals, households, and shelters reported by camp management.

2. FCS measures households' current status of food consumption based on the number of days per week a household is able to eat items from nine standard food groups, weighted for their nutritional value.

%→ MOVEMENT

Top three household origins (out of all camp residents):

	Country	Governorate	Sub-district	
	Syria	Aleppo	Maskana	49%
V	Syria	Aleppo	Dayr Hafir	34%
	Syria	Aleppo	Al-Khafsa	7%

Movements in the 30 days prior to data collection:

Households planning to leave the camp:

Within 1 week Within 1 month 0% Within 6 months 0% After 6+ months 0% Not planning to leave 100%

On average, households in the camp had been displaced twice before arriving to this camp and 77% of households in the camp had been displaced longer than one year.

100% of households were planning to stay in the camp.

It was unknown whether households received any information on returning to their area of origin from the camp management / administration.

PROTECTION

Protection issues

76% of households in the camp reported being aware of safety and security issues in the camp, during the two weeks prior to data collection.

The most commonly reported issues were:

- Disputes between residents (73%)
- Theft (37%)
- Confiscation of documents (13%)

2% of households reported at least one member suffering from psychosocial distress.3 13% of households with children aged 3-17 reported that at least one child had exhibited changes in behaviour4 in the two weeks prior to data collection.

Freedom of movement

36% of households who needed to leave the camp temporarily for medical emergencies in the two weeks prior to data collection reported that they had been able to do so.

Households reporting that they were able to leave for nonemergency purposes in the two weeks prior to data collection:

44% Yes 56%

Most commonly reported barriers:

- Site departure conditions needs approval (90%)
- Insufficient transport (31%)

Gender-based violence

Households reporting the presence of gender-based protection issues within the camp (in the two weeks prior to data collection):

Yes 58%

Most commonly reported issues:

- Early marriage (women below 16 years old) (86%)
- Restrictions on women and girls accessing services (20%)

Child protection

Households reporting the presence of child protection issues within the camp (in the two weeks prior to data collection):

Yes

Most commonly reported issues:

- Child labour (94%)
- Early marriage (below 16 years old) (88%)

Documentation

51% of households reported that all married individuals in the household were in possession of their marriage certificate. The main reason married individuals were not in possession of their marriage certificate was that certificate services were unavailable.

19% of children under five years old reportedly have birth registration documentation.

Vulnerable groups

Proportion of total assessed population in vulnerable groups:5

People with psychosocial needs 0.4% Children at risk⁶ 1.3% 40% Single parents/caregivers 2.0% Elderly at risk⁶ Persons with disabilities 1.8% Pregnant/lactating women⁶ 27.4% Chronically ill persons In female-headed households 15.9%

^{3.} As reported by households themselves. Assessed symptoms included: persistent headaches, sleeplessness, and more aggressive behaviour than normal towards children or other household members

^{4.} As reported by households themselves. Changes in sleeping patterns, interactions with peers, attentiveness, or interest in other daily activities.

5. Self-reported by households and not verified through medical records. Children at risk are persons under 18 who are parents, separated from their immediate family, or not attending school, and persons under 16 who are married or working. Elderly people at risk are persons over the age of 65 who cannot take care of themselves or who are solely responsible for children under 18 or others who cannot take care of themselves 6. Percentage is the proportion of the population subset who are reported as vulnerable.

EDUCATION

At the time of data collection, there were 2 educational facilities in the camp.

Age groups: 3-5, 6-11, 12-14 Service providers: Camp management

Curricula on offer: Government of Syria/UNICEF

Certification available: Under discussion

Availability of WASH facilities in educational facilities

Gender-segregated latrines: In no schools Handwashing facilities: In some schools Safe drinking water: In all schools

Attendance

*	42 %	Girls	Age	Boys	37%	Ť
0%	26%		3-5		10%	0%
0%	80%		6-11		70%	0%
0%	44%		12-14		29%	0%
0%	6%		15-17		0%	0%

Inside camp Outside camp

The proportion of children aged 6-11 who attended school increased from 58% in May 2019 to 74% at the time of data collection.

Barriers to education: of the 41% of households with children aged 3-17 who reported that none of them went to school, 100% reported that they faced barriers to education. The most commonly reported barriers were:

- Child does not want to attend (46%)
- No education for children of a certain age (31%)
- Classes are overcrowded (8%)

WATER, SANITATION AND HYGIENE (WASH)

Water

Public tap/standpipe was the primary source of water in the camp at the time of data collection. However, no data was available on the drinking water supplier or whether water was treated prior to distribution.

8% of households reported they spent at least two consecutive days without access to drinking water in the two weeks prior to data collection.

100% of households reported using a public tap/standpipe to access drinking water.

Drinking water issues in the two weeks prior to data collection, by % of households reporting:

Water tasted/smelled/looked bad

No issues 72% People got sick after drinking 17% Not sure

5% of households reported that they treated their drinking water.

Households using negative strategies to cope with a lack of water in the two weeks prior to data collection:

Most commonly reported strategies:

- Modify hygiene practices (bathe less, etc.) (100%)
- Rely on drinking water stored previously (43%)

38% of individuals reported having suffered from diarrhoea in the two weeks prior to data collection, with 15% suffering from respiratory illnesses and 22% from skin diseases.7

Waste disposal

Primary waste disposal system: Garbage collection

Disposal location: Official landfill

Sewage system: septic tank, emptied monthly

100% of households reported that solid waste was collected more than once per week.

Sanitation

Number of latrines in camp: 105 (May 2019: 76)

Communal⁹ Household9 100% 0%

Households using latrines:

0% of households reported practicing open defecation as main practice.

1% of households reported that some members could not access latrines, with girls (0-17) being most frequent (1% of households).

Communal latrine characteristics, by % of households reporting:10

Segregated by gender Lockable from inside 21% 74% Functioning lighting 43% 27% Privacy wall None Some

Communal latrine cleanliness, by % of households reporting:10

Very clean 11% Mostly clean 30% Somewhat unclean Very unclean

Number of showers in camp: 20 (May 2019: 22)

Communal⁹ Household9

Households without access to showers predominantly reported bathing inside their shelters (97%).

Households that were able to access all assessed hygiene items:8

Yes 80% No

Households using showers⁷

most commonly inaccessible items included washing powder and disposable diapers. Hygiene items were most commonly inaccessible because households could not afford to buy them.

0%

7. In the two weeks prior to data collection, self-verified by household and not verified through medical records.

8. The assessed hygiene items included: soap, sanitary pads, disposable diapers, washing powder, jerry cans/buckets, toothbrushes (for adults and children), toothpaste (for adults and children), shampoo (for adults and babies), cleaning liquid (for house), detergent for dishes, plastic garbage bags, washing lines, nail clippers, combs, and towels.

9. Communal latrines and showers are shared by more than one household. Household latrines and showers are used only by one household. This may be an informal designation that is not officially enforced.

10 Excluding households who selected not sure

ਝ HEALTH

Number of healthcare facilities: 0 Service providers: NA Types of facilities: NA

Households with members in the following categories:5

Person with serious injury Person with chronic illness

2% 40%

2%

Pregnant or lactating woman Access to treatment for one or more household members in the 30

days prior to data collection:

Of the households who required treatment in the 30 days prior to data collection, 86% reported that they had faced barriers accessing medical care. The most commonly reported barriers were cost of care/medicine being too high (83%) and high transport costs (63%).

Households reporting that a member had given birth since living in the camp:

Yes 30% No 70% Where women delivered:

- At a health facility (92%)
- At home with non-professional assistance (4%)

FOOD SECURITY

Consumption

Percentage of households at each food consumption score level:2

Acceptable Borderline Poor

The percentage of households with an acceptable food consumption score has increased from 80% in May 2019 to 58% in September 2019.

97% of households reported using food-related coping strategies in the week before data collection.

Top three reported food-related coping strategies:11

Eating fewer meals Borrowing food 50% Eating cheaper, poorer quality food 10%

Most commonly reported main sources of food:12

Markets in the camp Markets outside the camp 86% Food distributions 61%

Distributions

Type of food assistance received¹⁴, by % of households reporting:

Bread 1% Food basket(s) 0% Cash/vouchers for food 99%

0% of the 7% households who had not received a food basket, cash, or vouchers in the 30 days prior to data collection, had received at least one of these distributions in the preceding three months.

Top three food items households would like to receive more of:15

Sugar Ghee/vegetable oil Rice 55%

Market access

81% of households reported that they were able to access markets inside the camp to buy food. However, 100% of these households reportedly did not have enough funds to buy all the items they needed.

B LIVELIHOODS

Livelihood Sources

80% of households reported having at least one financial livelihood source in the month prior to data collection.

45,407 SYP (70 USD)13 Average monthly household income: Households with members earning an income: 99%

Top three reported primary income sources in the 30 days prior to data collection:15

Employment inside the camp Cash for work 6% Borrowed from family or friends 1%

Coping strategies

Top three reported livelihoods-related coping strategies:15

Borrowed money 73% Spent savings 16% Reduced spending on non-food 15% expenditures (e.g. health)

72% of households reported that they had bought goods on credit in the 30 days prior to data collection; on average these households owed **26,016 SYP** (40 USD)¹³

- 11. Households were asked to report the number of days they employed each coping strategy, graph only shows the overall frequency with which a coping strategy was reported.
- Households could select as many options as applied.

 The effective exchange rate for Northeast Stria was reported to be 650 Syrian Pounds to the dollar in September 2019 (REACH Initiative, Market Monitoring Exercise Snapshot 21 October 2019).
- 15. Households could select up to three options

★ SHELTER AND NON-FOOD ITEMS (NFIs)

Shelter

93% of inhabited shelters were family-sized tents.

Average number of people per shelter: 5.0

Average number of shelters per household: 1.2

Average household size: 5.8 individuals

Tent status¹⁶

Tent is new	73%
Minor wear and tear	19%
Tent is in poor condition	5%
Tent is worn/torn	4%

Sources of light

Top three sources of light inside shelters:12

NFI needs

Top three anticipated NFI needs for the next three months:15

Heating fuel	54 %	
Winter blankets	50 %	
Mattresses/sleeping mats	47%	

Shelter adequacy

93% of households reported that they faced shelter adequacy issues.

Top three most commonly reported shelter adequacy issues:15

Lack of privacy	83%	
Safety (structural damage, etc.)	36%	
No electricity	15%	

Top three most commonly reported shelter item needs:15

Tarpaulins	45 %	
Plastic sheeting	27 %	
New/additional tents	20%	

0% of respondents reported they had access to a kitchen space.

Fire safety

Households reporting the presence of fire fighting systems that could be used to protect them:

es - fire extinguishers	86%
Yes - other	0%
Not sure	1%
No	13%

56% of respondents with access to a fire fighting system reported being familiar with how to use it. Camp management reported that actors in the camp had provided residents with information on fire safety in the three months prior to data collection.

⊗ INFORMATION AND ACCOUNTABILITY

Camp management and committees

12% of households reported that they did not know the camp management, with 30% saying that they were not sure.

Committees reported by households to be present in camp:

Camp management

Youth committee 62%

Women's committee

Maintenance committee

66% WASH committee 72% Distribution committee

Information Needs

Top three reported sources of information about distributions:12

Top three reported information needs:15

How to find job opportunities How to access assistance Sponsorship programmes 26%

Complaints

Only 0% of households who had made a complaint in the three months prior to data collection reported that action was taken as a result:

Of all households in the camp...

88% Knew where to make a complaint

12% Did not know where to complain = 78% Did not have a complaint

22% Had a complaint

85% Did not make a complaint

15% Made a complaint

0% action was taken 100% No action was taken

About REACH Initiative

REACH Initiative facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. The methodologies used by REACH include primary data collection and in-depth analysis, and all activities are conducted through inter-agency aid coordination mechanisms. REACH is a joint initiative of IMPACT Initiatives, ACTED and the United Nations Institute for Training and Research - Operational Satellite Applications Programme (UNITAR-UNOSAT).

16. Enumerators were asked to observe the state of the tent and select one of the options
