Settlement and Protection Profiling

Camp 12 Ukhiya, Cox's Bazar, Bangladesh

July 2019 and November 2019 comparison

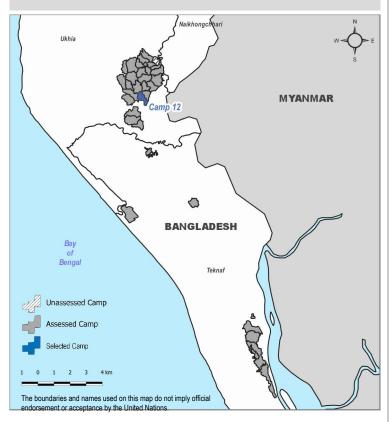

Round 6
November 2019

Background and methodology

Since August 2017, an estimated 744,400 Rohingya refugees have fled from Myanmar into Cox's Bazar, Bangladesh, increasing the total number to around 914,998.¹ The majority are reliant on humanitarian assistance, services, and resources including shelter, food, clean water, and sanitation. Information on Rohingya households, particularly in relation to protection and access to services, is in need of regular updating due to the variation in service provision across settlements, challenges presented by the monsoon and cyclone seasons, and the evolving social and contextual dynamics within each settlement. Therefore, REACH in partnership with UNHCR conducted periodic Settlement and Protection Profiling in order to support evidence-based monitoring and analysis of cross-cutting protection issues in Rohingya refugee settlements.

The sixth round of SPP was conducted in 33 out of 34 refugee camps and settlements in Cox's Bazar District from 28 October - 28 November, 2019. Surveys were conducted with households selected through simple random sampling of shelter footprints. Translators Without Borders supported with translating the form into Rohingya. Results of this assessment are generalisable to the population of each camp with a 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 12, where 101 households were surveyed.

Where relevent, findings are compared to those of SPP Round 5 which took place from 25 June - 5 August, 2019. November 2019 data is presented in dark blue, and July 2019 data is presented in light blue.

■■ Key Camp Information

Camp Management RRRC

Site Management Support IOM / Action Aid Bangladesh

Population (individuals)123,745Population (families)15,278Camp Area0.63 km²

^{2.} UNHCR, Bangladesh: UNHCR Camp Settlement and Protection Profiling - Round 4, December 2018. https://data2.unhcr.org/en/documents/details/71873

^{3.} For definitions of key terms relating to special needs and disability, refer to UNHCR "Guidance on the Use of Standardized Specific Needs Codes" https://bit.ly/2GnJE0h.

^{4.} For this round of data collection, disability was measured at the household level using the Washington Group Short Set of questions on disability. According to this methodology, 'disability' is determined as anyone in the household having at least 'a lot of difficulty' following six domains: walking, seeing, hearing, cognition, self-care, and communication.

^{5.} Respondents could give up to three answers.

July 2019

23%

Settlement and Protection Profiling Camp 12

Three most frequently reported perceived risks faced by individuals in the camp^{6,7}:

Novem	ber 2019	Men		July 2019

160/	of households reporte	ed re	eceiving a breast-milk	220/

Water, Sanitation, and Hygiene

Three most frequently reported perceived issues with latrines for men and women^{8,11}:

substitute since arriving in Bangladesh

	Men 🛉	\document Women	
	" Novem	nber 2019	
52 %	Too many people	Too many people	50%
31%	Latrine is full	No gender seperation	42 %
31%	Unsafe route to latrine	3 Unsafe route to latrine	34%
	Jul	y 2019	
56 %	Too many people	Too many people	59%
54%	Latrine is full	2 Latrine is full	52 %
37%	Latrine is not clean	3 No gender seperation	34%
Novembe	er 2019	Jı	uly 2019
63%	· ·	using public latrines as the / for defecation	50%
38%		that there was not enough rs to safely access latrines	24%

^{7.} These results are based on the respondent's subjective perception of risks in the camp, and not the actual number of security incidents.

^{9.} This question was asked to a subset of 36 households that reported a community watch group in their area.

^{10.} This question was asked to a subset of 55 households that contained children under 5.

^{11.} Findings on specific issues are reported as a percentage of households who reported any issues accessing latrines.

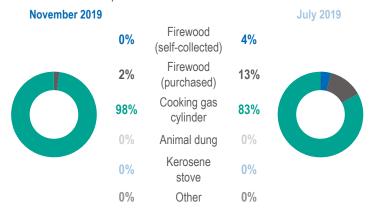

Nevember 2010

Settlement and Protection Profiling Camp 12

July 2040

Shelter and Non-Food Items (NFIs)

% of households reported their main source of fuel:

Novembe	er 2019 J	uly 2019
99%	of households reported cooking inside their shelter	99%
57%	of households reported having a lock either inside or outside of their shelter	66%

81% of households reported having a lock both inside and outside of their shelter 76%

Three most frequently reported items needed to address household shelter and NFI needs¹³:

November	r 2019			July 2019
65%	Blanket	0	Shelter materials	53%
52 %	Mat	2	Solar light	49%
47%	Solar light	3	Cooking items	45%

Health

Novemb	er 2019	July 2019
40%	of household members were reported to have an illness serious enough to require medical treatment in the 30 days prior to data collection ¹⁴	29%
58%	households reported being visited by a community health worker in the two weeks prior to data collection	26%

Three most frequently reported challenges in accessing NGO clinics in the camps¹⁵:

01111100 1	ii aio oaiiipo i			
Novemb	er 2019			July 2019
58%	Crowded	0	Crowded	63%
43%	Supplies unavailable	2	Supplies unavailable	27%
26%	Treatment unavailable	3	None	26%

- 13. Respondents could give up to three answers.
- 14. Respondents were asked to report information for each individual in their household. The denominator for this indicator is all individuals.
- 15. Respondents could give multiple responses.
- 16. In July, this question was asked to households with children under the age of 18. In November 2019, it was asked to all households reporting the presence of members aged between 3 and 18 years old.

Education

November 2	2019	July 2019
96%	of households reported being satisfied or very satisfied with the education available in the camps ¹⁶	99%

Three most frequently reported education priorities for children^{14,16}

56%	Supplies	0	Supplies	75 %
44%	Money for education	2	Better teachers	40%
28%	Improved curriculum	B	Money for education	26%
