In March 2017, REACH undertook a damage assessment of all septic tanks in Za'atari. Part of the assessment involved identifying the location of all septic tanks.

On each tank, there is a single number painted on it that allows it to be referenced on a map. By knowing the district and block the tank is currently in, a unique address can be created (eg. D01-B01-T01). To save space on the map, only the block and number are included in the label. Tanks with no observed coding are not labeled on this map.

Tank locations have been recorded with a GPS accuracy of 5m.
