

Rakhine State, Myanmar - Land Cover Analysis, 1988

For Humanitarian Purposes Only
Production date : 21st July 2015

- Land Classification**
- Agricultural / Paddy Area
 - Closed Canopy Forest
 - Denuded Area or Barren Soil
 - Mangrove
 - Open Canopy Forest and Grassland
 - State Capital
 - Main Town
 - International Boundary
 - State Boundary
 - District Boundary
 - Township Boundary
 - Main Road

This map illustrates a land cover classification over Rakhine Province, Myanmar as derived from Landsat-5 multispectral imagery acquired between 13 January and 23 February 1988 at 30m of pixel resolution. The classification is divided into 5 main classes: Forest, Vegetation, Bare Soil, Paddy Field, and Mangrove. The inset table summarizes the total area for each class and the percentage of the each class when compared to the total area of the Rakhine Province (approx. 32,843 sqkm). This analysis is designed to be compared with additional UNOSAT analyses using imagery from 2000 and 2015. This is a preliminary analysis and has not yet been validated in the field.

Rakhine Land Classification Statistics

Land cover classification	Area (ha)	Percentage
Agricultural / Paddy Area	731'847	22
Denuded Area or Barren Soil	22'359	1
Closed Canopy Forest	476'308	15
Mangrove	297'949	9
Open Canopy Forest and Grassland	1'755'911	53
Total	3'284'374	100
