Somalia Joint Multi Cluster Needs Assessment (JMCNA) 2019

SOM1906

Somalia

June 2019

Version 1

**REACH** Informing  
more effective  
humanitarian action

## 1. Executive Summary

<b>Country of intervention</b>	Somalia		
<b>Type of Emergency</b>	<input checked="" type="checkbox"/>	Natural disaster	<input checked="" type="checkbox"/> Conflict
<b>Type of Crisis</b>	<input type="checkbox"/>	Sudden onset	<input type="checkbox"/> Slow onset <input checked="" type="checkbox"/> Protracted
<b>Mandating Body/ Agency</b>	Office for the Coordination of Humanitarian Affairs (OCHA) and the Inter-Cluster Coordination Group (ICCG)		
<b>Project Code</b>	27DLW iAHX and 27DSV		
<b>Overall Research Timeframe</b>	01/04/2019 to 01/10/2019		
<b>Research Timeframe</b>	1. Start collect data: 30/06/2019		5. Preliminary presentation: 23/08/2019
	2. Data collected: 27/07/2019		6. Outputs sent for validation: Preliminary outputs: 18/08/2019 Final: 25/08/2019
	3. Data analysed: Preliminary: 14/08/2019 Final: 21/08/2019		7. Outputs published: Preliminary: 30/08/2019 Final: 02/09/2019
	4. Data sent for validation: Preliminary: 04/08/2019 Final: 08/08/2019		8. Final presentation: 02/09/2019
<b>Number of assessments</b>	<input checked="" type="checkbox"/>	Single assessment (one cycle)	
	<input type="checkbox"/>	Multi assessment (more than one cycle)	
<b>Humanitarian milestones</b>	<b>Milestone</b>		<b>Deadline</b>
	<input checked="" type="checkbox"/>	HNO Sectoral Analysis Support	17/09/2019 Presentation of draft and final results
	<input checked="" type="checkbox"/>	HNO Joint Analysis Workshop(s)	25/08/2019 Presentation of draft and final results

Detailed dissemination plan included in Annex 1	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
General Objective	To inform the Humanitarian Needs Overview (HNO) and Humanitarian Response Plan (HRP) in the context of ongoing drought and displacement crisis in Somalia by providing updated nation-wide, district-level, multi-sectoral analysis of current and forecasted severity of needs among the crisis-affected population.	
Specific Objective(s)	<ul style="list-style-type: none"> <li>• To provide a detailed overview of the current humanitarian needs and gaps of crisis-affected population in Somalia to inform the Humanitarian Needs Overview and Humanitarian Response Plan for 2020</li> <li>• To assess the severity of needs of the population, including living standard gaps and negative coping mechanisms used, in a cluster-specific,<sup>1</sup> and inter-sectoral approach</li> <li>• To identify variations in need amongst population groups and geographical areas in order to inform prioritisation and strategic planning and responses</li> </ul>	
Research Questions	<ul style="list-style-type: none"> <li>• What are the main household needs and priorities (sectoral and multi-sectoral) in Somalia?             <ul style="list-style-type: none"> <li>○ What proportion of households have moderate and severe needs within and across sectors? Where are they located?</li> <li>○ What do their survival, emergency, and livelihood problems consist of?</li> <li>○ What is the level of household access to basic services? Are any groups excluded from accessing basic services?</li> <li>○ Which population groups are the most vulnerable? Which are the main factors exacerbating or mitigating their needs?</li> <li>○ What protection concerns currently affect population groups in Somalia? How do they intersect with other needs?</li> </ul> </li> <li>• How do the answers to the aforementioned questions vary according to district and region, urban or rural areas,<sup>2</sup> and displaced and non-displaced population groups?</li> <li>• How are needs expected to evolve in the future based on ongoing or planned responses and likely events (for example, displacement trends and intentions, climatic factors, reported loss of assets and outputs, and winterisation)?</li> </ul>	
Geographic Coverage	Nationwide coverage of accessible areas (approximately 69 districts, out of a total of 90 <sup>3</sup> )	
Secondary data sources	Refer to Annex 2 for the list of Secondary Data Sources.	

<sup>1</sup> Currently, clusters participating in cluster-specific analysis workshops include Education, WASH, and Shelter & NFI

<sup>2</sup> Comparisons across urban and rural areas may be carried out if the distribution of urban and rural settlements in the final sample permits

<sup>3</sup> Districts are selected based on accessibility and security risks; therefore, certain districts have been excluded from the analysis and results will not be generalized to these districts or population groups residing in these districts.

<b>Population(s)</b>	<input checked="" type="checkbox"/>	IDPs in camp	<input checked="" type="checkbox"/>	IDPs in informal sites
	<input checked="" type="checkbox"/>	IDPs in host communities	<input type="checkbox"/>	IDPs [Other, Specify]

## 2. Rationale

### 2.1. Rationale

Somalia has been experiencing a multi-layered, complex, and protracted crisis over the past three decades. Insecurity and armed conflict continues to exacerbate the effects of periodic natural disasters and climate-driven shocks, such as droughts and flooding. Although coastal areas of Somaliland and Puntland experienced heavy flooding in the first half of 2018,<sup>4</sup> the *deyr* rains in late 2018 were relatively insufficient for the largely agro-pastoral population to meet their needs.<sup>5</sup> Further compounding the situation, the *Gu* rains have been considerably delayed and insufficient, thereby plunging the country further into drought conditions.<sup>6</sup> The *Jubba* and *Shebelle* rivers which are important to sustaining livelihoods and economic activity are currently, and forecasted to remain, considerably below average levels.<sup>7</sup> Conditions of drought have impacted livestock herd numbers as well as cereal production, thereby leading to an increase in prices and resulting in reduced household access to income and food.<sup>8</sup> The compound and complex nature of the crisis continues to influence displacement patterns and constrain the availability of resources, while the presence of armed groups severely impedes the level of access and support provided by humanitarian actors.

There is thus a pressing need for an integrated and harmonised humanitarian response plan to continue supporting drought- and displacement-focused interventions, and an imperative for continued nationally-representative needs assessments. To this end, REACH is supporting the third Joint Multi-Cluster Needs Assessment (JMCNA) in Somalia. The assessment will build on the previous cycle of needs assessments, as well as existing assessments conducted by other humanitarian actors, such as the seasonal studies carried out by the Food Security and Nutrition Analysis Unit (FSNAU). However, while such assessments focus on specific needs, hot-spots, or are conducted at the livelihood zone level, the JMCNA seeks to address information gaps by ensuring that the severity of needs relevant to each cluster are assessed in a way that enables comparison across the country, across population group types, and geographical areas. Thus, the JMCNA aims to facilitate a harmonised response plan at the operationally relevant district level; it relies on the concerted and coordinated efforts of all partners to encourage joint planning, implementation of the assessment and data collection, and the analysis and interpretation of results. The ultimate goal of the assessment is to inform partners at the strategic level and as such is timed to be completed in advance of the Humanitarian Needs Overview and Humanitarian Response Plan process, scheduled to begin in September 2019.

## 3. Methodology

### 3.1. Methodology overview

The assessment will consist of a secondary data review (SDR) and a structured, representative household survey. The SDR will bring together existing NGO and UN reports and assessments, academic articles, security updates and cluster flash updates, and provide the contextual background upon which the results of the JMCNA will be framed. Secondary data is also used to draw the sample frames for the displaced and non-displaced population strata. Finally, the SDR will be used to develop hypotheses for the relevant research questions which will be subsequently tested using primary data collected by means of a nationally-representative household survey. The household is used as the unit of measurement as it is the most relevant for examining the severity of needs and vulnerabilities, improves the coverage of the assessment, and optimises the trade-offs between the quality of information collected and the required sample sizes. It is administered by trained enumerators in each district who select households through a systematic random sampling approach.

The key indicators and survey tool used will be designed in close collaboration and consultation with all clusters, as well as representatives from the Assessment Working Group (AWG), Office for the Coordination of Humanitarian Affairs (OCHA) and the Inter-Cluster Coordination Group (ICCG). The results emanating from the SDR and household survey will be interpreted jointly through cluster-specific as well as inter-cluster workshops.

Certain areas of Somalia remain inaccessible to enumerators and field staff due to security concerns and risks. Partnering with local Non-Governmental Organisations (NGO) already and currently active in the area, remains one method to overcome this limitation. Using data collected from REACH's Hard to Reach Assessments operational in Baidoa and Mogadishu from January to July 2019 will serve as a second measure to mitigate the lack of access to certain areas and the paucity of data. While data from the Hard to Reach Assessments is collected according to a different methodology,<sup>9</sup> and may not fully capture information for all indicators used for the JMCNA, they will nonetheless provide information that will help paint a broader picture of population needs in areas for which data was not previously available through the JMCNA.

### 3.2 Population of interest

As the JMCNA aims to provide a statistically representative coverage of the entire country, a large number of districts will be assessed and will include both urban and rural areas in order to enable a comparison of results across population groups and districts. However, comparisons across urban and rural areas may be skewed towards urban populations due to the logistical feasibility of accessing very remote areas. The populations of interest include both displaced persons and non-displaced (hosting and non-hosting) communities, and are thus differentiated according to their displacement status. Therefore, the JMCNA will focus on displaced persons in formal and informal sites, as well as non-displaced households in both urban and rural areas, in order to draw comparisons across groups and across geographical areas. Given that the JMCNA's objective is to inform strategic planning and subsequent humanitarian response the household is selected as the unit of measurement and stratified samples are representative at the district level. District-level results are subsequently aggregated at the regional, state, and national levels in order to explore broader trends and dynamics.

### 3.3 Secondary data review

Refer to Annex 2 for a list of sources used for the secondary data review.

### 3.4 Primary Data Collection

Primary data will be collected by means of a household-level survey designed with the participation of the humanitarian clusters in Somalia. Cluster leads are asked to outline information gaps and the type of data required to inform their strategic plans. Key indicators are developed by REACH with the substantive input of participating partners, and subsequently validated by the clusters. REACH will draft the household survey tool through an iterative consultation process with cluster partners and OCHA and is aligned, as much as possible, with the Joint Inter-Sectoral Analysis Framework (JIAF) which will serve as a common and structured method for assessing the severity of needs across different clusters.

---

<sup>9</sup> The Hard to Reach Area Assessment relies on a purposive sampling method and makes use of key informant interviews for quantitative data estimates as well as focus group discussions. The data is collected at the settlement level.

The assessment will use stratified cluster sampling at the district level using settlements as the clusters and households as the unit of measurement. For some districts, 2-stage stratified random sampling will be used instead of stratified cluster sampling for large urban centres, if it proves to be more efficient and logistically feasible for data collection. The sample will be stratified by population group, disaggregated by non-displaced communities,<sup>10</sup> and IDP settlements;<sup>11</sup> the sample will be further stratified by district to ensure coverage and comparison across the entire country (with the exception of inaccessible areas). In the case of cluster sampling, the minimum cluster size will be set to 6 households. The sample size will be adjusted for the design effect and will enable generalisation of the results to each of the two population strata in each district, with a 90% confidence level and a 10% margin of error.

Although samples will be randomly generated from the two settlement lists for each district, the prevalence of insecurity in many rural areas in South Central Somalia will likely prevent some settlements from being accessible during data collection. In order to mitigate the potential reduction in sample size that unpredictable security risks entail, a buffer of 15% will be added to all samples drawn. Furthermore, the sample will be adjusted to only include accessible settlements in some districts in South Central Somalia and Puntland, which may result in potential bias in the data collected and which may exclude certain groups of people from the population of interest. Finally, for logistical reasons some districts with larger urban populations, such as Garowe, will use stratified simple random sampling, rather than clustered sampling, in order to avoid drawing sample sizes which are unrealistically high. For a summary of the sample frame refer to Annex 3.

The assessment will target approximately 69 districts, out of a total of 90, in order to ensure representative coverage. Data collection will take place after Eid, beginning in the third week of June, and running until the last week of July 2019. Where available, REACH will work closely with partner organisations to coordinate data collection on the ground, and will hire external enumerators in areas where partners are not present or not available. Where possible, enumerators with prior experience with REACH assessments will be used. All enumerators will be administered a written test to ensure that they possess the required competencies to administer the household survey. 8 REACH field officers will hold a series of training workshops in key districts in order to train team leaders and enumerators from districts being assessed. In case REACH field officers cannot conduct a training workshop in a particular district, team leaders will be invited to workshops in selected districts and will subsequently conduct enumerator training in their respective districts. REACH field officers will act as focal points for data collection coordination and data cleaning.

Data collection will commence after team leaders and enumerators have been trained. Households will be randomly selected according to the sampling framework, with the questionnaire being administered either to the head of household or anyone else above the age of 15 able to speak on behalf of the household. Households will be selected for interview using the following systematic random selection approach:

- Enumerators and team leaders are given the GPS location of non-displaced communities or the name of a displaced community settlement. They meet either at the GPS location or at the centre of the targeted settlement.
- Each enumerator will use a random number generator application with the minimum number fixed as 0 and the maximum number fixed as 360 to generate a first random number which will be used as a compass heading.
- Each enumerator will generate a second random number ranging from a minimum of 0 and a maximum of 1000 which will indicate the distance in metres that they have to walk.
- Each enumerator will walk in the compass heading indicated by the first random number for a distance indicated by the second random number to find their starting point.
- Once at the starting point, each enumerator generates a third random number ranging from a minimum of 0 and a maximum of 360 which will be used as a compass heading.
- The enumerator will then walk away from their starting point in the exact direction indicated by compass until they reach the edge of the settlement.
- On their way to the periphery of the settlement, the enumerator counts the number of households passed on both sides of their path
- Once the enumerator reaches the edge they then determine the number of households to be skipped along their route based on:
  - # of HHs on the route divided by the target # of HHs to be interviewed per enumerator

<sup>10</sup> WorldPop. Population Data Somalia. August 2017. <https://www.worldpop.org/doi/10.5258/SOTON/WP00534>; Cross-referenced with OCHA Somalia Settlement List

<sup>11</sup> CCCM Cluster Somalia, REACH. 2019. Detailed Site Assessment: IDP Site Master List.

- The first household selected for the survey will be selected by a random number generated with the minimum number fixed as 1 and the maximum number fixed as the total number of houses counted along the route taken by the enumerator

### 3.5. Data Processing & Analysis

At the end of each day, the team leaders will ensure that the data is uploaded from the smartphones used by the enumerators to the Kobo Collect server. The REACH database officer will download all datasets and send them to the REACH GIS specialist and officers for spatial verification. Once the data have been spatially verified, the database officer will remove sensitive information, and disaggregate the data sets by district. They will then send the data by district to the REACH field officer in charge of that district only. The field officers will check and clean the data and note any changes made in the change-log before sending the cleaned data to the REACH assessment officers. The assessment officers will check all data again and take note of any recommendations and/or any points for follow-up and will provide them to the field officers who will transmit the information to the team leaders and enumerators during their daily briefings. In cases where using smartphones for data collection is inadvisable due to security constraints, enumerators will complete paper copies of the survey questionnaire. REACH field officers will then manually enter the data and submit it to the assessment officers on a daily basis. In addition to the daily data checks, the final dataset for each district will undergo a thorough cleaning, with any outstanding issues reported to field staff for feedback.

In order to standardize this process two tools will be used:

- Standard Operating Procedure (SOP) for data cleaning: a step by step guide for key data cleaning issues, including checking the time stamp of each survey, issues with skip logic and outliers. The SOP will be developed based on the JMCNA household survey tool. Refer to Annex 4 for the data cleaning SOP.
- R script for data cleaning: to help automate some of the biggest data cleaning issues.

Data analysis will be done using the Joint Inter-Agency Analytical Framework (JIAF) model, adapted to the Somali context, with the severity thresholds determined in collaboration with the cluster partners. Following the analysis, findings will be assembled into a presentation for a Joint Analysis Workshop (JAW) with operational partner organisations. At the JAW, REACH will present the quantitative and qualitative findings and the results of hypothesis tests, with partners providing their interpretations of findings, based on their sectoral and contextual knowledge. At the end of the presentation, REACH and partners will have a wrap-up discussion in which conclusions regarding the overall research objectives are agreed upon, along with the recommendations for partners arising from these conclusions. The conclusions from the JAW will also be used to inform partners and stake-holders at the national and international level.

## 4. Roles and responsibilities

Table 3: Description of roles and responsibilities

<b>Task Description</b>	<b>Responsible</b>	<b>Accountable</b>	<b>Consulted</b>	<b>Informed</b>
Research design	Assessment Officer	Country Point Focal	Cluster Coordinators, OCHA, HQ	Cluster Coordinators, ICCG
Supervising data collection	Assessment Officers (x3)	Senior Assessment Officer	Senior Field Manager	HQ, AWG, ICCG
Data processing (checking, cleaning)	Field Staff (x8)	Senior Manager, Assessment Officers (x3)	HQ, GIS Staff	HQ, GIS Manager
Data analysis	Assessment Officers (x3)	Senior Assessment Officer	HQ, GIS Manager, CFP	AWG, Clusters
Output production	Assessment Officer	Senior Assessment Officer	HQ, GIS Manager, Country Point Focal	AWG, Clusters
Dissemination	Assessment Officer	Country Point Focal	Clusters, AWG	ICG, HCT
Monitoring & Evaluation	Assessment Officer	Senior Assessment Officer	HQ	Regional Coordinator, HQ
Lessons learned	Senior Assessment Officer	Country Point Focal	All staff involved in the assessment	Clusters, ICCG

**Responsible:** the person(s) who executes the task

**Accountable:** the person who validates the completion of the task and is accountable of the final output or milestone

**Consulted:** the person(s) who must be consulted when the task is implemented

**Informed:** the person(s) who need to be informed when the task is completed

## 5. Data Analysis Plan

Refer to Annex 5 for the Data Analysis Plan.

## 6. Data Management Plan

Detailed Data Management Plan available upon request.

## 7. Monitoring & Evaluation Plan

IMPACT Objective	External M&E Indicator	Internal M&E Indicator	Focal point	Tool	Will indicator be tracked?

**Note:** The sample frame is subject to change due to the fluid nature of the context, notably, the changing accessibility of certain areas due to security concerns, and the migration of households from settlements. In such instances, the sample is re-drawn for the district according to the following procedure. The target number of surveys per district is noted before drawing a new sample each time. The sites already assessed are removed from the table. Sites are then randomly selected so as to ensure that the total target number of surveys is respected.

## ANNEX 4: DATA CLEANING SOP

### Work-flow; Roles and responsibilities

1. Data acquisition and preparation:
  - a. Enumerators to upload survey data to kobo.
  - b. Senior Database Officer to download raw data.
  - c. Senior Database Officer to remove all data columns except for UUID, P-Code, GPS coordinates, Precision, District, Time of acquisition.
2. GIS Spatial Verification:
  - a. Senior Database Officer to send data columns requested to GIS (UUID, P-code, GPS coordinates, Precision, District, Time of acquisition). Each time new data is downloaded, the Senior Database Officer will send all the data including data from previous days.
  - b. The GIS Specialist will conduct first spatial verification. GIS team to filter new data of each day, each time when doing spatial verification.
  - c. Output from GIS verification to be sent back to Senior Database Officer.
  - d. Output contains four types of checks marked as either “inconsistent” or “clear” for District, Settlement, P-Code, and Outliers. Outlier verification to be done visually by GIS and later on by Field Officers. Final output column “SV” will read “Not Clear” if any of the four types of checks is inconsistent; “Clear” otherwise. See below.
  - Clear (the spatial verification was successful for that specific type of error)
  - Inconsistent district (inconsistency b/w GPS location and selected district)
  - Inconsistent settlement (inconsistency b/w GPS location and selected settlement)
  - Low GPS precision
  - Outlier (outlier in the GPS location compared to other locations with same PCODE)
  - Settlement not targeted (reported settlement or GPS location within a settlement not included in the sampling frame)
  - And a final column 'SV' for the final spatial verification output, which can be 'clear' or 'not clear'.”

admin2Pcod	P_CODE	SV_comment_1	SV_comment_2	SV_comment_3	SV_comment_4	SV
SO1201	NC-3810-L13-002	Inconsistent district	Inconsistent settle...	Low GPS precision	<Null>	Not clear

SO1801	NB-3901-P04-001	Inconsistent district	Clear	Low GPS precision	<Null>	Not clear
SO1804	NB-3901-M23-001	Inconsistent district	Clear	Low GPS precision	<Null>	Not clear

3. Preparation for FO data checks and cleaning:
  - a. Senior Database Officer to attach GIS verified output columns to full data set.
  - b. Senior Database Officer to remove personal identifiable information (names, tel. numbers, GPS coordinates).
  - c. Senior Database Officer to disaggregate data set by district and send only the disaggregated and anonymized data to FO by district.
4. FO data checks and cleaning:
  - a. FO to filter data each time new data arrives. Their data set will continuously increase as new data arrives. FO to save copies of data before populating the macro-enabled excel cleaning tool.
  - b. FO to use excel cleaning tool for all data checks and cleaning.

- c. FO will first conduct spatial verification by going through the SV column. In all cases where SV is marked "Not clear" FO to use the webmap application to spatially verify data. FO can either 'delete' entry if very suspicious and justify deletion in the comments, or change SV to Clear after verification and inserting justification in the comments.
  - d. FO to continue data checks using macro-enabled excel tool.
  - e. Main checks to be undertaken: (UUID + SV; Location + time taken check; Translation/'other' response checks; Outliers (for variables indicated by AOs and as per FO's own knowledge too); Contradictions (for variables indicated by AOs and as per FO's own knowledge too)).
  - f. Once FO data cleaning is completed, they must send the cleaned data and change-log back to Senior Database Officer. Senior Database Officer will share the cleaned data with AOs.
5. AO data checks and cleaning:
- a. AOs will conduct a second check on the data sent back by FOs and shared by Senior Database Officer
  - b. Main checks to be undertaken: ('Other' responses; Outliers; Contradictions; Random spot checks and comparison of data collected morning/afternoon; Verification of all change-log entries and deletions)
  - c. Once AO data cleaning is completed, they must send the cleaned data back to Senior Database Officer with comments and two follow up possibilities. First, send back to FO for second verification; or, second, validate as cleaned and acceptable data
6. Post-cleaning procedure
- a. If data is to be checked for a second time by FO, the same procedure above is to be followed, and Senior Database Officer to share data to and from FO and AOs. Final validation by AOs.
  - a. Senior Database Officer to merge final data sets after each data set undergoes 1<sup>st</sup> spatial verification (GIS), 2<sup>nd</sup> spatial verification (GIS), 1<sup>st</sup> data check and cleaning (FO), 2<sup>nd</sup> data check and cleaning (AO), potential 3<sup>rd</sup> check (FO&AO).
  - b. At the end of each day, FO, AO need to update the Tracker tool on their progress.

### General notes

1. Save copies! Always make a copy of the master file before making any changes.
2. On the first day FO will receive the macro-enabled excel tool with the data for their district already filled in. This is to ensure that each FO will use the same format for the data types and cleaning method.
3. From the second day when new data arrives, FO should filter the data and copy the new data into a separate file. They should then populate the macro-enabled tool with data from this file.
4. Types of data checks to be done: See above for list of types of checks and below for detailed information.
5. All changes should be noted and justified in the comments section. They should not be communicated to AOs or any other staff by phone but only in written form.
6. For any call-backs, AO/FO to send UUID to Senior Database Officer who will share the requested personal information to the FO responsible only

### Daily Data Download

Data will be downloaded on a daily basis from the kobo server. So each field officer will receive the raw data of his/her area of coverage.

1. On the first day field officers will receive the raw data set file and the macro-enabled data cleaning sheet filled with the data to conduct the checks and cleaning.
2. Next day the field officers will only receive raw data with the newly uploaded surveys included, so they need to filter the new surveys and then populate the macro-enabled excel cleaning tool.

## Data Preparation

NOTE: The daily dataset received will contain a running log of all data until the point of download. Which means the data field officers receive today contains entries from yesterday as well.

The screenshot shows an Excel spreadsheet with a data table. The columns are labeled ABO through ACE, with sub-columns for various attributes like 'refrigerator', 'transport', 'end\_note', 'declined\_consent', 'version', 'id', 'uid', 'submission\_time', 'SV\_1', 'SV\_2', 'SV\_3', 'SV\_4', 'SV', 'ACC', 'ACD', and 'ACE'. The rows contain data for various items, with a 'New Data' tab highlighted at the bottom left.

We cannot use the date filter every time. The standardized approach that will facilitate filtering the newly added survey data is as follows:

1. Download the Newly\_Data\_Tool excel sheet
2. Open the raw data set you receive on that day
3. Copy that data into the Newly Data Tab of the Newly\_Data\_Tool
4. Copy the uuid from your cleaning tool and paste it into the uuid sheet of the Newly\_Data\_Sheet
5. Paste this formula into the last column of your New Data tab (in this case it should be ACD2)  
=MATCH(ABV2,uuid!A2:A464,0)
6. Filter the result number into #N/A which means the new data that has not match your cleaning log data.
7. Copy that filtered data into your cleaning tool.

## Keyboard Shortcuts

The macro-enabled sheet is an excel template that makes cleaning kobo data faster and easier. It contains a number of shortcuts that help you find, flag, correct and delete errors in the data.

To allow smooth functionality of the macro sheet please close other office applications during data cleaning.

SHORTCUTS		
Name	Shortcut	Function
Populating	Ctrl + Shift + P	Sets up the Raw Data and Data Checking sheets so they link to the data in the Raw Data sheet. If you get more forms that you want to add later, then you can just add them at the end of the Raw Data sheet and run the Populating function again, to add these new rows to the Data Checking and Clean Data sheets.
Correcting	Ctrl + Shift + C	Changes the value of a cell and adds an entry to the cleaning log. To be used if you already know what the value of the cell should be and you do not need to first flag it and get feedback.
Deleting	Ctrl + Shift + D	Deletes the selected row in all sheets, including the Raw Data sheet. Also adds a Cleaning Log entry and copies the deleted row to Deletions.
Flagging	Ctrl + Shift + F	Flags a cell for feedback and adds a feedback entry to the cleaning log.
Toogling	Ctrl + Shift + T	Toogles back and forth between the Cleaning Log and the Data Checking sheet. If on the Cleaning Log and have selected a cell in an entry, takes you to the row and column in the Data Checking script that the entry is about. If on the Data Checking sheet, takes you back to the cleaning log.
Undoing	Ctrl + Shift + Z	Allows you to undo a change. Select the row on the cleaning log, use the shortcut to run the script and then the value will be brought back to the original one.
Expanding	Ctrl + Shift + E	Expands and collapses the current column
Adding column	Ctrl + Shift + I	Adds a new column in a position right before the cell you currently have selected.

## Procedure for data cleaning for FO and AO

- Familiarize yourself with the data collection tool i.e. know how the tool logics – relevance and constraints, work.
- Have the last version of the tool opened next to you in order to understand what each question stands for.
- Follow the column structure as it is – It is not advisable to skip any column to check later.
- Be ready to perform sort and filter a million times! Pivots could aid the process or would be an alternative.
- **Note: When you filter data and want to edit it; be sure to filter responses one at a time. You cannot filter and change all at once.**
- Look at things based on the specific context of work i.e. urban vs rural, IDP vs HC, riverine vs non-riverine and household size, etc.
- Inspect if one enumerator is reporting the same answers repeatedly
- Conduct the data checks on daily basis, and share the feedback with enumerators and AO/GIS.
- Check all OTHER values in the dataset – please do translations when needed.
- Inform enumerators not to report in OTHER when the answers can be found in the questionnaire.

## Checks for FO and AO

#	Cell(s)	Question	ACTION
1	A, B, C	Enumerator Name and Agency	Correct the spelling in enumerator name and enumerator agency as needed.
2	ADE ADF ADG ADH ADI ADJ	<p><b>Spatial Verification (SV)</b></p> <p>SV_1: can be 'Clear' (the spatial verification was successful for that specific type of error) or 'Inconsistent district' (inconsistency b/w gps location and selected district)</p> <p>SV_2: can be 'Clear' (the spatial verification was successful for that specific type of error) or 'Inconsistent settlement' (inconsistency b/w gps location and selected settlement)</p> <p>SV_3: can be 'Clear' (the spatial verification was successful for that specific type of error) or 'Low GPS precision' (the precision of the GPS was too low)</p> <p>SV_4: can be 'Clear' (the spatial verification was successful for that specific type of error) or 'Settlement not targeted' (reported settlement not included in the sampling frame)</p> <p>SV_5: final spatial verification output, which can be 'Clear' or 'Not clear'. Final column SV reports "Clear" only if there is no spatial verification error occurring. If there is even one error, it will return "Not clear".</p>	<p>When spatially verifying the surveys uploaded, the actual coordinates captured in the tool will be compared to the targeted sample frame and see if falls into category of the SV Comments. To better understand the comments and provide feedbacks/corrections, please see the updated WebMap. <a href="#">Click here.</a></p> <p>Use the account credentials shared with you during the training!</p>
3	F G H	<p><b>Time check</b></p> <p>Check_StartTime; Check_EndTime; Check_Time</p>	<p>The survey should take a minimum of 45 minutes to complete. Any survey completed in less than 45 minutes will be followed up with the team leader and enumerator.</p> <p>If the time check shows negative sign - that means the enumerator phone dates were adjusted either during or after the data collection - so the best option is to ignore the negative sign and check if it less than the 45 minutes threshold for survey completion.</p>
4	U	<p><b>Check all translations</b></p> <p>Translate OTHER Settlement</p> <p>Cross check your data with the sample frame.</p>	<p>All targeted areas in the sample frame are available in the choices sheet. So in case if you need to add new location.</p> <p>Select the settlement type IDP/HC. Then select the Region/District. Then select other option and provide the new settlement name here.</p>
5	CM FK, FN IC IK OD OT	<p><b>Check all translations and OTHER responses</b></p> <p>Continue across the excel sheet and ensure all entries are correctly translated.</p>	<p>Ensure that all entries in OTHER sections are responses which are not found in the survey response options. Otherwise reclassify them and log the change.</p>

	RM UV VM		
6	V W	<b>Check Respondent Gender and Age</b> resp_gender; resp_age	Please check and filter the proportion of males/females interviewed in order to determine if only one gender was interviewed from the whole area. If, for example, 1 male is interviewed out of 90 surveys, confirm with enumerators about it. Check the age of interviewed respondents in your dataset. By filtering this column, check frequency of age i.e. how frequently is age12_17 reported? At the same time check resp_gender.
7	X Y	<b>Check whether a guardian was present when required</b> guardian_present	Check and ask enumerators why were respondents between age15_17 interviewed without the presence of a guardian. Flag issue if repeated by the same enumerator or repeated in a particular location.
8	P Q R S T	<b>Check location information</b> region; district; idp_settlement; settlement; settlement_other	Quickly go through these columns especially when you are dealing with multiple locations at once. Ensure idp_settlement is filled if data has been collected at an IDP site. Also check if settlement_other has values and enquire the team why settlement was selected OTHER. Ensure that spellings of names are consistent throughout.
9	R S T	<b>Check IDP location information</b> idp_settlement; settlement; settlement_other	Filter this column to identify the surveys collected in an IDP settlement. Double check this with the data collection plan of that specific day i.e. It is unlikely to see this question selected YES if today plan doesn't include IDP sites. If you see so, take a note of this and raise with enumerators. Similarly, check whether the collection from IDP sites or from HC in the city/settlement/village.
10	AM – BF BE BG – BP	<b>Check household demographics section</b> male_age groups; female_age groups total_hh (cell BE)	Check if the demographic fields are reporting high numbers e.g. 3 members of males_41_59 are in the same HH. Flag it! For total_hh: Check potential outliers – high and low figures. Low figures are 0 and 1; High figures are any numbers above 10. Check the number of children against the total number of members. Flag any entries with more children than expected (for e.g. 10 children and 13 total household members). Ask enumerators for clarification.
11		<b>Ensure that household demographic data has not been changed.</b>	If any household demographic data has been changed (especially for ages under 18) please report it to the AO.
12	BR – BY CA CB	<b>Check number of vulnerable household members</b> persons_with_disabilities; PLW; chronic	Filter all the following fields one by one to check any potential outliers – could be high figures in this case. A high is any figure above 3. Double check the number of PWD, PLW, and chronically-ill members against the number of total household members.
13	BR BT – BX BZ	<b>Check that enumerators have correctly entered disability information</b> persons_with_disabilities; XYZ_difficulties; disabilities_group	Check that if any household members have reported difficulties and in which category. Check whether any of those members fall in the category between 5 and 59 years of age. Check against the total number of household members.

14	CD – CM	<b>Check number of persons who lost employment and reasons for losing employment</b> lost_employment; lost_employment_reasons	Check that total number of reasons for lost employment correspond with the total number of persons who lost employment. Ensure that responses in OTHER are translated.
15	CO CP CQ	<b>Check logic between income, current debt, and ability to repay debt</b> average_income; average_debt; fore_hhdebt	Check if DON'T KNOW is reported for average debt. If it is the case, check that whether they reply YES or NO for whether they can repay debt in the next year. Ideally, they should also report DON'T KNOW for the latter. Flag otherwise. Ensure enumerators clarify the response to this question when interviewing respondents. Finally, check that the debt-levels make sense when compared with income levels; flag any entry which seems illogical.
16	CR S	<b>Check that there are not too many HC responses in IDP sites</b> yes_no_host; idp_settlement	Check if the enumerators are reporting YES and said YES to the idp_settlement variable, because it is very unlikely to interview too many host communities living inside an IDP settlement. So flag such issues and debrief enumerators.
17	CU CX CY DA DB	<b>Check population profile</b> yes_no_returnee; returnee_country; refugee; country_origin	Check if the HH is a returnee (Somali returning from another country). Confirm if the HH is a refugee (non-Somali). If yes, please confirm the country of origin. Check if reported 'Somalia' or somewhere in Somalia i.e. "Baidoa" or "Puntland" or "Galkacyo" for country_origin. If you see such responses. Raise immediately and flag. Ensure all entries in OTHER are translated.
18	CX CY DB DC DD DE	<b>Check time-taken for cross-border movements</b> returnee_country; country_origin; left_aoo; arrived_current	Check both date left area of origin and date arrived current location – if you find that some of the responses seem illogical, take a note and brief the enumerators. There is a built-in check to ensure first, that the date of departure and arrival is not the same. A second check to ensure that the household could not have travelled from another country to Somalia within the span of 1 day. If you see such entries, flag immediately and brief enumerators.
19	DI DJ DL DM	<b>Check displacement reasons</b> disp_why1; disp_why2; dest_loc_why1; dest_loc_why2	Check if both reasons are relevant to the context of the assessment or seem logical. If no, ask the team to explain.
20	FB FC FD FF FG FH	<b>Check contradictions between time taken and transport to school and access to school</b> time_school; transport_school; access_school; school_barrier	If respondents indicate a specific time to go to school, mode of transport, but NO access to school, check that the barrier reported to access is logical (for example, insecurity on the way or at school is reasonable, but no school present is less reasonable). Flag such entries and raise with enumerators and AOs.

21	GX – HX HY	<b>Check history of mental problems with practice of chaining</b> mental_problems_faced; using_chains	Check if a respondent answers YES to chaining but NO to any mental problems faced. Flag any such entries.
22	JD JE	<b>Check appropriate sources of water</b> primary_source_drinking_water; primary_water_for_cooking	Check the reported water source against available water sources in the area
23	JF JG JN – JV	<b>Check correspondence between water sufficiency and storage variables</b> enough_drinking_water; enough_cooking_water; how_water_stored; refill_jerrycan	Check if households report having enough water, and confirm with the how_water_stored variable and refill_jerrycan variable
24	KB KL KM	<b>Check correspondence between defaecation practices and environmental sanitation</b> household_access_latrine; dispose_children_faeces; environmental_sanitation_problems	Check if NONE is reported for environmental_sanitation_problem against the responses for dispose_children_faeces and household_access_latrine. If a respondent does not have access to latrine, or disposes of faeces in open but also has no environmental sanitation problems; flag entry and ask enumerators for clarification.
25	KT LD	<b>Check correspondence between handwashing practices and access to soap</b> when_wash_hands; access_to_soap	Flag any entry where respondents never wash hands but have access to soap. Brief enumerators and ask for clarification.
26	MD ME	<b>Check number of shelters occupied by household</b> shelter_occupy	Check how many shelters a household occupies along with total household size. Flag any entries with more than 3 shelters or where the number of shelters and size of household seems illogical. Confirm if answer to shelter_occupy is 0 – (i.e. open air conditions). Ask enumerators how did they manage to identify that household!
27	MF MG MH DD	<b>Check and compare age of shelter with duration of occupation</b> age_of_shelter; occupying_longer_3_months; arrived_current	Check the answer reported for age of shelter and compare it against age of household members, and date of arrival in the area. Flag any entries that seem to indicate more than a few years of occupation. Occupation of a shelter for longer than the oldest member of the household, or longer than the date of arrival in the area is illogical and should be flagged immediately. Check that if a shelter is only marked as 1 month old then the answer to occupation for more than 3 months cannot be yes! Flag such issues and seek clarification from the enumerators.
28	NN NO NP OE OF	<b>Check appropriateness of responses</b> free_movement; unsafe_male; unsafe_area_male unsafe_female; unsafe_area_female	Check which answers are irrelevant to the context of the assessment or considered unreasonable

29	Z AA QB QC QD QE QF	<b>Check correspondence between land ownership and head of household; and between land ownership and responses to documentation</b> breadwinner; household_expenditure; own_land; doc_land_tenure; destroyed_doc; obtain_title; obtain_new_contract	<p>If this question is answered YES, check the breadwinner and household_expenditure variables because it is not very practical for a certain age and gender to own a land (i.e. a female child at the age of 14 years owning a land by herself doesn't sound very reasonable, so seek further clarification).</p> <p>Double check any entry where answers between own_land; doc_land_tenure; destroyed_doc; obtain_title; obtain_new_contract are illogical. Flag any entry where the household does NOT own land but has documentation for land tenure; or where the household does NOT KNOW whether they own land but has documentation, etc.</p>
30	UH UI UJ	<b>Check correspondence between availability of food and practice of skipping meals</b> skip_meal; stock_last	<p>Flag any entry where households have skipped meals but have stocks to last more than 7 days. Ask for clarification.</p>
31	UW VO VQ VL	<b>Check correspondence between source of income and ownership of livestock/cultivable land</b> income_source; own_livestock; land_cultivation	<p>If a respondent answers that they get their income from livestock or land, check to see whether they answer YES for livestock ownership or land cultivation, respectively.</p>
32	ACA – ACW	<b>Check ownership of items in repository check-list</b> Check all variables listed from ACA - ACW	<p>First, If a respondent answers NO to all items flag entry. Second, filter responses from ACW moving backwards. If a respondent answers owning relatively luxurious items (e.g. refrigerator, moto, car) but not basic items (mats, blankets), flag entry. Third, check basic items against list of NFI to double check.</p>
33	CO CP EZ IE JL UO BE	<b>Check all income and expenditure variables together</b> average_income; average_debt; cash_bracket_education; cash_bracket_treatment; how_much_pay_water; spent_food; total_HH	<p>Variables concerning cash, income and debt should be checked together. Check potential outliers and inconsistencies. Should not generally be a problem as respondents have to choose a bracket. Open all cash bracket responses and check the brackets chosen against total hh_average_income and average_debt column. If bracket chosen for any service is higher than total income, or average_debt flag entry.</p> <p>Check if the reported household expenditure of the current period in that area is acceptable and matches your knowledge of the context.</p> <p>Finally, check that all amounts correspond to the total_hh size and flag any entries that seem illogical.</p>
34	FD FX FZ GK IX KB	<b>Check all access variables together</b> access_school; child_health_access; pregnancy_health_access; adult_health_access; access_nearest_nutrition_center;	<p>Access variables for all clusters should be checked together. Check which answers seem illogical for the context or that may be unreasonable.</p> <p>Check whether respondents pay for service, how much time it takes and mode of transport used against whether they can access service, and finally examine barriers to access. Flag any issues or outliers.</p>

	LD	household_access_latrine; access_to_soap	
35	FG – FJ FL FM GM – GP GT – GW IM IN IZ – JC LH – LK LM – LP LR – LU LV LW LX LY LZ NJ NK SA – SC SD UR – UU	<b>Check all barrier variables and all main support variables</b> school_barrier; cash_education; cash_education_other; health_barrier; vaccination_barrier; cash_health; cash_vaccination; nutrition_barrier; water_access_barrier; latrine_access_barrier; hygiene_barrier; difficulty_obtaining_soap; difficulty_obtaining_menstruation; main_support_required; main_support_latrines; main_support_handwashing; shelter_support; nfis_support; protection_barrier; protection_support; food_barrier	All barriers for all clusters should be checked together. Check which answers are irrelevant or illogical for the context or that may be unreasonable. Flag any issues or outliers. Check barriers along with main support required. Normally, we would expect the main support required to correspond to the main barriers listed.
36	FB IG IX JJ KK LE SS	<b>Check all time taken variables together</b> time_school; time_health; nearest_nutrition_center; time_to_reach_water_source; time_to_reach_latrine; nearest_handwashing_facility; time_market	All time taken to access variables should be checked together. If a respondent answers that certain markets or services are very close by while others are very far (extreme values reported for the same respondent) flag entry.
37	-	<b>Check all Male/Female disaggregated variables</b>	Any variable disaggregated for male female: Check if both columns are reporting irrelevant answers or considered unreasonable.
38	-	<b>All entries into fields marked 'OTHER'</b>	Check that data entered into OTHER columns are translated, logical, and consistent with the context. If data entered into OTHER column matches any of the potential survey responses re-classify that entry and log the change. Raise any issues immediately with the team and AO.

39	-	<b>Compare first 7 entries collected in the morning with the last 7 entries collected in the afternoon</b>	Check and compare the quality of the data in the first 15 and last 15 entries. If the last 15 entries are consistently worse than the first 15 speak to enumerators to ensure that they do not compromise data quality because of enumerator or respondent fatigue. Check time taken for completing these surveys.
40	-	<b>Randomly select 10 entries to check throughout the day</b>	Do random spot checks on 10 data entries in addition to the 14 above. Try and select at least a couple of entries taken during the hottest time of the day to ensure that no data quality is being compromised because of heat or fatigue. Check time taken for completing these surveys.

## ANNEX 5: DATA ANALYSIS PLAN

Question...	Response...	Constructed using...	Variables to control for...	Type of test/output...
What are the main household needs and priorities (sectoral and multi-sectoral) in Somalia?	Main living standard gaps in each cluster and by % of Households	Living standard gaps indicators Capacity gaps indicators (barriers to access) Impact indicators	Pre-existing vulnerabilities indicators Coping mechanisms	Sectoral: General reporting of main needs by cluster Multi-sectoral: correlations between needs across clusters
What proportion of people have moderate and severe needs within and across sectors?	% of Households categorised in level 2 (moderate) and 3-4 (severe) of the JIAF severity scale for each cluster and in the final MSNI	Living standard gaps indicators Capacity gaps (barriers to access) Negative Coping Mechanisms	Pre-existing vulnerabilities indicators Impact indicators	Sectoral: General reporting of sectoral severity score Multi-sectoral: General reporting of MSNI
What do their survival, emergency, and livelihood problems consist of?	Disaggregate severity of MSNI level 2,3,4 and explore main gaps, main barriers, negative coping mechanisms	Exploration of MSNI and components All as above Cross-check with Item Repository Theory Check-list	Impact indicators Area + population group disaggregation	General reporting of survival, emergency, and livelihood problems
What is the level of household access to basic services? Are any groups excluded from accessing basic services?	% of Households categorised by barriers and level of access and by negative coping mechanisms used	Capacity gap indicators (barriers to access) Negative Coping Mechanisms	Living standard gaps indicators Area + population group disaggregation	General reporting of level of access Group differences (population and area)
Which population groups are the most vulnerable? Which are the main factors exacerbating or mitigating the level of vulnerability?	% of Households with pre-existing vulnerabilities	Exploration of impact indicators, most reported capacity gaps, living standard gaps, negative coping mechanisms	Impact indicators Area + population disaggregation	General reporting of main factors Group differences (population and area)
What protection concerns currently affect population groups in Somalia? How do they intersect with other needs?	Exploration of main protection concerns and correlations	Protection cluster indicators – correlated with other indicators	Pre-existing vulnerabilities indicators Impact indicators Area + population disaggregation	General reporting of protection concerns Correlation between protection needs with other cluster needs Group differences (population and area)

How do the answers to the aforementioned questions vary according to district and region, urban or rural areas, and displaced and non-displaced population groups?	Comparison of outputs by population group (hosting HC, non-hosting HC, IDP, refugee, returnee) and by area (region, district, urban, peri-urban, rural)	Previous outputs disaggregated by population group and area	Impact indicators	Group differences (population and area)
How are needs expected to evolve in the future based on ongoing or planned responses and likely events (for example, displacement trends and intentions, climatic factors, reported loss of assets and outputs, and winterisation)?	Exploration of forecasted needs indicators Main support required indicators AAP indicators	Forecasted need indicators Main support required indicators REACH AAP indicators and GTS AAP indicators (for comparison)	Impact indicators Area + population disaggregation	General reporting of evolution of needs Group differences (population and area)

Main indicator	Sub-Indicator / Variable	Survey Question	Survey Response Options	Collection level	Collection method
<b>General indicators</b>					
Disaggregation	Region	Which region is the assessment being conducted in?	Select ONE: from list of regions	Region	Enumerator
	District	Which district is the assessment being conducted in?	Select ONE: from list of districts	District	Enumerator
	Village/Settlement	What is the name of the village/settlement (Not the IDP site name)? If other, please specify.	Select ONE: from list of settlements; Enter text	Village / Settlement	Enumerator
	IDP settlements	Is this an IDP settlement?	Select ONE: Yes/No	Settlement	Enumerator
	IDP settlements	What is the name of the IDP site/settlement?	Enter text	Settlement	Enumerator
	Gender of respondent	What is the gender of the respondent?	Select ONE: Male/Female	Household	Households interview
	Age of respondent	1. What is the age of the respondent? (For respondents between the age of 15 and 17 please ensure an adult/guardian is present); 2. Is there an adult or guardian present?	1. Select ONE: 15-17, 18-40, 41-59, 60+; 2. Select ONE: Yes/No	Household	Households interview
	Household demographics	1. How many people live in your household? 2. Males&Females: 0-6 months, 7 months-4 years, 5-12 years, 13-15 years, 16-17 years, 18-40 years, 41-59 years, 60+; 3. Did you include yourself in the household count?	1. Enter integer; 2. Enter integer; 3. Select ONE: Yes/NO	Household	Households interview

Impact of shock	% Households reporting at least one members separated or missing in the past 3 months due to conflict, floods, or drought	1. Were there any household members separated from the household in the past 3 months/90 days? 2. What is the gender and age of the separated	1. Select ONE: Yes/No/Don't know; 2. Select MULTIPLE: Female below 18, Female above 18, Male below 18, Male above 18; 3. Select MULTIPLE: Staying with relatives, Flood, Drought, Conflict, Missing (no reason),	Household	Households interview

		member? <b>3.</b> Why was the person separated from the household?	Abducted, Voluntarily joined armed groups, Forcibly joined armed groups, Detained (no reason), Left house to study, Left house to work, Early marriage, Don't know		
	% Households reporting at least one member losing employment in the past 3 months due to conflict, floods, or drought	<b>1.</b> How many members of the household lost their employment in the past 3 months/90 days? <b>2.</b> Was the loss of employment due to flood, drought, or conflict?	<b>1.</b> Select ONE: Yes/No; <b>2.</b> Select MULTIPLE: Flood, Conflict, Drought, Other; If other specify (enter text), Don't know	Household	Households interview
	% Households reporting loss of assets or outputs from assets (livestock, agriculture) in the past 3 months due to conflict, floods, or drought	<b>1.</b> Have you suffered a loss in herd size in the past 3 months/90 days? <b>2.</b> Have you suffered a loss in access to cultivable land in the past 3 months/90 days?	<b>1.2.</b> Select ONE: Yes – all, Yes more than 75%, Yes more than 50%, Yes more than 25%, No Losses, Don't know	Household	Households interview
	% Households reporting loss or damage to shelters to the extent that they are uninhabitable due to conflict, floods, or drought in the past 3 months	<b>1.</b> Has your shelter (walls, roof, doors) been damaged (moderate or heavy) and not been repaired in the past 3 months/90 days? <b>2.</b> What was the main reason for shelter damage?	<b>1.</b> Select ONE: Yes/No; <b>2.</b> Select ONE: Flooding, Conflict, Poor material, Poor construction	Household	Households interview
	% Households reporting being displaced in the past 3 months due to conflict, floods, or drought	<b>1.</b> When did you leave your area of origin? <b>2.</b> When did you arrive at the current location? <b>3.</b> Which are the two main reasons for why you left your previous location? <b>3.a.</b> First reason; <b>3.b.</b> Second reason; <b>4.</b> Which are the two main reasons for why you chose to come to this location? <b>4.a.</b> First reason; <b>4.b.</b> Second reason	<b>1. &amp; 2.</b> Enter Date; <b>3.a./3.b.</b> Select ONE: Actual conflict in community, Conflict in surrounding area, but not in my community, Fear of conflict in community, Arrival of armed groups, Withdrawal of armed groups/ security forces, Personal threats, Flooding, Lack of livelihood opportunities/job, Lack of health services, Lack of education services, Drought, Lack of water (not drought related), Lack of food (not drought related), Livestock disease outbreak/livestock death, Pressure from authorities, Pressure from host communities, None, I don't know or don't want to answer; <b>4.a./4.b.</b> Select ONE: No conflict, Availability of work/ income opportunities, Presence of health services, Presence of education services, Presence of food distribution/food aid, Availability of local food (market/cultivation), Presence of shelter,	Household	Households interview

			Presence of water, Presence of cash distribution, Presence of physical protection actors, Withdrawal of armed groups/ security forces, To join family/community, None, I don't know or don't want to answer		
Barriers to humanitarian aid	% Households reporting having been contacted by NGOs or State services for humanitarian assistance in the past 3 months pursuant to conflict, floods, or drought	What were the main concerns you had in accessing humanitarian aid in the past 3 months/90 days?	Select MULTIPLE: Not enough information, Cannot physically access points of humanitarian aid distribution, Insecurity on the way to humanitarian aid distribution, Insecurity at points of humanitarian aid distribution, Camp manager has excluded the respondents from aid	Household	Households interview
	% Households that have not been able to reach points of humanitarian assistance distribution (by walking or available transport) means in the past 3 months pursuant to conflict, floods, or drought	What were the main concerns you had in accessing humanitarian aid in the past 3 months/90 days?	Select MULTIPLE: Not enough information, Cannot physically access points of humanitarian aid distribution, Insecurity on the way to humanitarian aid distribution, Insecurity at points of humanitarian aid distribution, Camp manager has excluded the respondents from aid	Household	Households interview
	% Households reporting facing security concerns while travelling to, or at, points of humanitarian assistance distribution in the past 3 months pursuant to conflict, floods, or drought	What were the main concerns you had in accessing humanitarian aid in the past 3 months/90 days?	Select MULTIPLE: Not enough information, Cannot physically access points of humanitarian aid distribution, Insecurity on the way to humanitarian aid distribution, Insecurity at points of humanitarian aid distribution, Camp manager has excluded the respondents from aid	Household	Households interview
<b>Education indicators</b>					
Education levels	% Households reporting having at least one member who has completed primary, secondary, or tertiary education	How many people in your household have achieved the following education levels (including adults)? <b>1.</b> Primary level degree (primary school and secondary school), <b>2.</b> Secondary level degree (high school), <b>3.</b> Vocational degree (training on specific craft or job, for e.g. IT, electrician, carpenter, mechanic, cooking, sewing, etc.), <b>4.</b> Tertiary	Select ONE: Nobody (including adults), Only one person (including adults), At least two persons (including adults), Don't know	Household	Households interview

		degree (university degree, for e.g. bachelor, master, or PhD)			
Enrolment in education	% Households with school-aged children enrolled in primary or secondary education in the past 3 months	Please specify the age and gender of the children that are currently enrolled in school since the past 3 months/90 days <b>1.</b> How many boys aged 5-12 are enrolled in school? <b>2.</b> How many girls aged 5-12 are enrolled in school? <b>3.</b> How many boys aged 13-17 are enrolled school? <b>4.</b> How many girls aged 13-17 are enrolled in school?	Enter integer	Household	Households interview
	% Households with school-aged children who dropped out of school in the past 12 months	Have any children dropped-out of school in the last 12months/1 year?	Select ONE: All, Some, None, Don't know	Household	Households interview
	Main reasons reported for children dropping out of school	What was the main reason for children dropping out of school?	Select MULTIPLE: Drought, Conflict, Work or need to support household, Household obligations or chores, Early marriage, Prohibitive costs, If other specify (enter text)	Household	Households interview
Attendance to school	% Households with school-aged children reporting children attending school at least 3 days/week in the past 3 months	How many children in the household currently attend school for more than 3 days per week since the past 3 months/90 days? <b>1.</b> How many boys aged 5-12 attend education? <b>2.</b> How many girls aged 5-12 attend education? <b>3.</b> How many boys aged 13-17 attend education? <b>4.</b> How many girls aged 13-17 attend education?	Enter integer	Household	Households interview
	% Households with school-aged children reporting children attending school at least 3 days/week in the past 12 months	They are child(ren) that do not attend school regularly. Were these children attending school for more than 3 days in the last 12months/1 year?	Select ONE: Yes/No/Don't know	Household	Households interview

Education expenditure	% Households reporting increased costs for education in the past 3 months	1. Do you pay for education? 2. How much on average did the household spend on children's education (school fees, uniforms, books, etc.) in the past 3 months? 3. Has this cost increased or decreased in the past 3 months?	1. Select ONE: Yes/No; 2. Select ONE: Less than 10\$/month, 10-50\$/month, 50-100\$/month, 100+\$/month, Don't know; 3. Select ONE: Increased, Decreased, Stayed the same, Don't know	Household	Households interview
Access to school	% Households reporting presence of an educational facility (primary, secondary, quoranic, vocational, basic literacy and numeracy classes) reachable in less than 3 hours of travel total (by walking or available means of transport)	1. How long does it take the children to go to the nearest educational facility (primary, secondary, vocational, quoranic, basic literacy and numeracy classes, university)? 2. How do you get there?	1. Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; 2. Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart	Household	Households interview
	Physical access	Have you been able to access the educational facility?	Select ONE: Yes/No	Household	Households interview
Barriers to enrolment or attendance	% Households with school-aged children not enrolled or attending reporting 3 main concerns to enrolment or attendance	What are the 3 mains concerns you have for school enrolment or attendance? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: There is no school, School stopped functioning and is now closed (Occupied by armed forces, partially damaged, totally damaged, occupied by displaced persons, lack of students), Unsafe to travel or go to school, fear of recruitment in/on way to school, fear of abduction in/on way to school), fear of violence against children at school (corporal punishment, harassment by teachers and other students, bullying, etc.), Cannot afford to pay for the school fees (e.g. school supplies, tuition, textbook, food, uniforms, etc.), cannot afford to pay for transport, recently or continuous movement to different locations, newly arrived at location and have yet to enrol/register, unable to enrol school due to discrimination, poor performance/dismissed, Inability to register or enrol children in the school (Lack of documentation to enrol child), Children cannot physically go to the school (Disability (of child), traumatization (of child), school is too far away, no transport available to bring to school, no fuel available to bring to school, child ill,	Household	Households interview

			disabled or unhealthy, child is too young), School and classes are overcrowded, Lack of staff to run the school (Lack of teachers, lack of skilled/trained teachers, lack of gender appropriate teachers/staff), School is in poor condition (e.g. lack of furniture, no electricity, water leaks, poor latrines, poor amenities, etc.), WASH facilities are in poor conditions, WASH facilities are not separated by gender, The curriculum and teaching are not adapted for children (curriculum is not appropriate; language is not appropriate), Children are busy working or supporting the household, Parental refusal to send children to school, Lack of interest of children in education, None, If other specify (enter text)		
Support required	% Households with school-aged children not enrolled or not attending reporting main type of support required for enrolment or attendance	If available, what would be the main type of support you would require for school enrollment or attendance?	Select ONE: Do not want support, Cash for school fees, Cash for school supplies (bags, pencils), Cash for text books, Cash for transportation to school, Cash for children's food, Direct provision of school supplies (bags, pencils), Direct provision of text books, Direct provision of school uniforms, Transportation to school, Water and food at school / Food for education, Healthcare at school, Increased access for disabled children, Increased access for minority groups, No response, Don't Know, Other specify (enter text)	Household	Households interview
<b>Nutrition indicators</b>					
Coverage of MUAC screening	% Households with children under 5 years who underwent a MUAC screening in the past 6 months	Have you or anyone in your household received a visit from the following in the past 6 months: <b>1.</b> Mobile nutrition team to assess for malnutrition? <b>2.</b> Mobile team doing MUAC screening for children under age 5?	<b>1.2.</b> Select ONE: Yes/No/Don't know	Household	Households interview

	% Households with pregnant or lactating women who underwent a MUAC screening in the past 6 months	Have you or anyone in your household received a visit from the following in the past 6 months: <b>1.</b> Mobile nutrition team to assess for malnutrition? <b>2.</b> Mobile team doing MUAC screening for pregnant or lactating women?	<b>1.2.</b> Select ONE: Yes/No/Don't know	Household	Households interview
Nutrition use	% Households reporting pregnant or lactating women using treatment for acute malnutrition (Plumpy Sup & CSB+/veg Oil)	Are there any pregnant or lactating women in your household using any of the following supplements: Plumpy Sup/Nut or Corn Soybean Based vegetable oil?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting children using treatment for acute malnutrition (Plumpy Sup/Plumpy Nut)	Are there any children using any of the following supplements: Plumpy Sup, Plumpy Nut?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting having at least one child enrolled in a nutritional centre/therapeutic feeding service in the past 6 months	Are there any children enrolled in a nutritional centre or therapeutic feeding centre since the past 6 months?	Select ONE: Yes/No/Don't know	Household	Households interview
Access to nutrition	% Households reporting presence of nutritional centre/therapeutic feeding centre (or healthcare facility providing nutrition counselling or supplements) reachable in less than 3 hours of travel total (by walking or available means of transport)	<b>1.</b> How long does it take you to reach the nearest nutritional centre or therapeutic feeding centre? <b>2.</b> How do you get there?	<b>1.</b> Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; <b>2.</b> Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart	Household	Households interview
	Physical access	Have you been able to access the nearest nutritional centre or therapeutic feeding centre when needed?	Select ONE: Yes/No	Household	Households interview

	% Households reporting having received a visit from a mobile nutrition team in the past 6 months	Have you or anyone in your household received a visit from the following in the past 6 months: Mobile nutrition team to assess for malnutrition?	Select ONE: Yes/No/Don't know	Household	Households interview
Barriers to nutrition	% Households reporting 3 main concerns to accessing nutritional/therapeutic feeding services	What are the 3 main concerns you have in accessing nutritional services? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: Unaware that services are available, Unaware that supplements are available, Difficulty in enrolling children in programmes, Facilities too far to travel to, Prohibitive costs, Insecurity in travelling to and from centres, Inaccessible to disabled persons, Inaccessible to minority groups/clans, Facilities not staffed or staff not present, Not enough female/male service providers for female/male claimants, None, If other specify (enter text)	Household	Households interview
<b>Health indicators</b>					
Incidence of disease	% Households reporting health issues or illnesses for at least one member in the past 3 months by type of issue/illness	Have any children (less than 5 years old) in the household suffered from the following illnesses or complications in the past 3 months/90 days?	Select MULTIPLE: Malaria, Fever, Acute Watery Diarrhoea (3 or more liquid stools), Respiratory problems, Malnutrition (diagnosed by health or nutrition center), Other, Don't know, None	Household	Households interview
	% Households reporting health issues or illnesses for at least one member by type of issue/illness	Have any other members (i.e. female (not pregnant) above 5 years and male above 5 years) from the household suffered from the following?	Select MULTIPLE: Malaria, Fever, Acute Watery Diarrhoea (3 or more liquid stools), Respiratory problems, Malnutrition (diagnosed by health or nutrition center), Gastrointestinal problems, Other, Don't know, None	Household	Households interview
Maternal health	% Households reporting ante- and/or post-natal complications for at least one member in the past 6 months	Have any pregnant women or any women from the household who gave birth (in the last 6 months) suffered from pre- or post-partum complications (any complications during or immediately after pregnancy)?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households with pregnant or lactating women who gave childbirth at a hospital or healthcare centre in the past 1 year	Where have women in the family given birth in the past year?	Select ONE: Health center / Hospital, At home, Traditional birth attendant house/center, There was no birth last year, Don't Know, If other specify (enter text)	Household	Households interview

Vaccination coverage	% Households reporting all children vaccinated	Have all children in the household have been vaccinated?	Select ONE: All, Some, None, Don't know	Household	Households interview
	% Households reporting having a vaccination card	Do all vaccinated children have a vaccination card?	Select ONE: All, Some, None, Don't know	Household	Households interview
Mental health	% Households reporting symptoms of mental health problems in the past 1 year	Does any one in your household face or has faced one or more of the following problems in the past 12 months/1 year?	Depression: Depressed mood for most of the day, nearly every day, Significant reduction in interest or pleasure in all or vast majority of activities most of the day, nearly every day, Significant weight loss when not dieting or weight gain, or decrease/increase in appetite, nearly every day, Slow thought and responses and slow movement, Feeling fatigued or loss of energy nearly every day, Feelings of guilt or lack of self-value, nearly every day, Reduced ability to think or concentrate, nearly every day, Recurrent thoughts of suicide or death, or attempts at suicide; Schizophrenia: Delusions, Hallucinations, Disorganised speech, or lack of sense in speech, Always disorganised, Catatonic behaviour, Diminished emotional expression; Mental health stressors: Inappropriate affect (for e.g. laughing in the absence of a stimulus, intense fear without reason, etc.), Disturbed sleep patterns (sleeping excessively, or very little, nearly every day), Excessive eating, Dysphoric mood (depression, anxiety, anger, violence), Depersonalisation (detachment or disconnect from self), Derealisation (a feeling that surroundings are not real), Cognitive deficits impacting language, processing, executive function, and/or memory, Hostility and aggression, Lack of social cognition (for e.g. does not talk to anybody), Excessive khat consumption; None of the above; Don't know	Household	Households interview
	% Households reporting symptoms of mental health problems in the past	Has anyone in your family been chained?	Select ONE: Yes/No/Don't know	Household	Households interview

Health expenditure	% Households reporting increased costs for healthcare in the past 3 months	1. Do you pay for health care? 2. How much on average did the household spend on healthcare (consultation, medicine) in the past 3 months/90 days? 3. Has this cost increased or decreased in the past 3 months/90 days?	1. Select ONE: Yes/No; 2. Select ONE: Less than 10\$/month, 10-50\$/month, 50-100\$/month, 100+\$/month, Don't know; 3. Select ONE: Increased, Decreased, Stayed the same, Don't know	Household	Households interview
Access to healthcare	% Households reporting ability of members able to access required treatment in response to sickness, health issue by type of facility visited / healthcare sought	Were you able to access a healthcare facility in response to this issue? (Asked as a follow-up question to the two questions regarding the 'incidence of disease' indicator, and first question on maternal health)	Select ONE: Yes/No	Household	Households interview
	% Households reporting ability of members able to access required treatment in response to sickness, health issue by type of facility visited / healthcare sought	1. How long does it take you to reach the nearest healthcare facility? 2. How do you get there? 3. What is the type of health facility?	1. Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; 2. Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart; 3. Select ONE: Government clinic or hospital, Private clinic or hospital, NGO run clinic or hospital, Traditional mid-wife, Traditional healer, Pharmacy, Shop selling medication, Other specify (enter text)	Household	Households interview

Barriers to healthcare	% Households reporting 3 main concerns to accessing healthcare	What are the 3 main concerns you have in accessing healthcare services? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: There were never any health facilities nearby, We can't afford to use the facility, The facility is too far away, The facility is inaccessible due to insecurity, Not enough staff, Facility has no or low quality medical supplies and/or medicines, Inaccessible to disabled persons, Inaccessible to minority groups/clans, Staff not qualified, Facilities not specialised for type of treatment sought, Not enough female/male healthcare workers for female/male patients, Health facility is not functional due to flooding, Unaware that facilities are available,	Household	Households interview

			Health facility is not functional for another reason, None, Other specify (enter text)		
	% Households reporting 3 main concerns to accessing vaccines	Why have children not been vaccinated? A. First reason; B. Second reason; C. Third reason	<b>A.B.C.</b> Select ONE: There were never any health facilities nearby, We can't afford to use the facility, The facility is too far away, The facility is inaccessible due to insecurity, Not enough staff, Facility has no or low quality medical supplies and/or medicines, Inaccessible to disabled persons, Inaccessible to minority groups/clans, Staff not qualified, Facilities not specialised for type of treatment sought, Not enough female/male healthcare workers for female/male patients, Health facility is not functional due to flooding, Unaware that facilities are available, Health facility is not functional for another reason, None, Other specify (enter text)	Household	Households interview
Support required	% Households with limited or no access to healthcare services reporting main type of support required to access healthcare	If available, what would be the main type of support you would require for healthcare or accessing healthcare facilities?	Select ONE: Cash for medicines, Cash for doctor's fees, Direct provision (Medicines), Transport to facilities, More qualified healthcare workers at facilities, More qualified healthcare workers for home-visits, Increased access for physically disabled persons, Increased services for mentally disabled persons, Increased services for addictions and consumption of khat, Increased services for pregnant or lactating women, Increased access for minority groups/clans, Infrastructure provision (More healthcare facilities, Near healthcare facilities), If other specify (enter text), Do not want support	Household	Households interview
		If available, what would be the main type of support you would require for vaccinating children?	Select ONE: Cash for vaccines, Cash for doctor's fees, Direct provision (Vaccines), Transport to facilities, More qualified healthcare workers at facilities, More qualified healthcare workers for home-visits, Increased access for physically disabled persons, Home visits for vaccinations, Increased access for minority groups/clans,	Household	Households interview

			Infrastructure provision (More healthcare facilities, Near healthcare facilities), If other specify (enter text), Do not want support		
<b>Shelter and Non-Food Items indicators</b>					
Shelter use	% Households living in open-air conditions	How many shelters does the household occupy in this location?	Enter integer (0 if open air)	Household	Households interview
	% Households living in shelters (or open-air conditions) for more than 6 (or 3 if open-air) months	1. How old is your shelter in months? 2. Have you been occupying this shelter for longer than 3 months/90 days?	1. Enter integer (999 if unknown); 2. Select ONE: Yes/No	Household	Households interview
Shelter quality	% Households reporting using sub-standard or temporary construction materials for floor	What is the primary floor material?	Select ONE: Earth, Cement, Plastic sheet, Other	Household	Households interview
	% Households reporting using sub-standard or temporary construction materials for structure	What is the primary structural material?	Select ONE: Wood, Metal, Bricks, Stones, Other	Household	Households interview
	% Households reporting using sub-standard or temporary construction materials for roof	What is the primary roof material?	Select ONE: Earth, Cement, Wood, CGI, Tin (NIDO), Plastic Sheet, Cloth, Vegetation, None	Household	Households interview
	% Households reporting using sub-standard or temporary construction materials for walls	What is the primary wall?	Select ONE: Earth, Cement, Bricks, Wood, CGI, Tin (NIDO), Plastic Sheet, Cloth, Vegetation, None	Household	Households interview
	% Households reporting using sub-standard or temporary construction materials for doors	What is the primary door material?	Select ONE: Wood, CGI, Tin (NIDO), Plastic Sheet, Cloth, Vegetation, None	Household	Households interview
Long-term shelter damage	% Households reporting moderate to heavy damage to structure, roof, walls, or doors of shelter, for a minimum of 3 months and which have not been repaired	Has your shelter (walls, roof, doors) been damaged (moderate or heavy) and not been repaired in the past 3 months/90 days?	Select ONE: Yes/No	Household	Households interview
	% Households reporting 3 main reasons for shelter damage by type of cause of damage	What was the main reason for shelter damage?	Select ONE: Flooding, Conflict, Poor material, Poor construction	Household	Households interview
Shelter security	% Households reporting no internal separation of shelter	Is there internal separation of rooms within the shelter?	Select ONE: Yes/No	Household	Households interview

	% Households reporting no source of internal light in the shelter	Is there a source of light at night?	Select ONE: Yes/No	Household	Households interview
	% Households reporting no internal lock on door of shelter	Can you lock the shelter from the inside?	Select ONE: Yes/No	Household	Households interview
	% Households reporting no external lock on door of shelter	Can you lock the shelter from the outside?	Select ONE: Yes/No	Household	Households interview
	% Households reporting theft from shelter in the past 3 months	Has there been any theft from your shelter in the past 3 months/90 days?	Select ONE: Yes/No	Household	Households interview
Basic NFI items	% Households lacking some or all basic set of NFI items	Does your household have the following quantity of basic items?	Select MULTIPLE: Sleeping mat - 2, Blankets - 3, Plastic sheeting, Jerry cans - 2, Buckets - 1, Wash Basin - 1, Cooking pots - 2, Plates - 6, Cups - 6, Serving spoon - 1, Kitchen knife - 1, Kettle - 1, Solar lamp - 1, None	Household	Households interview
Support required	% Households with damaged or no shelters requesting main form of assistance for shelter construction/rehabilitation by type of assistance	If available, what would be the main type of support you would require for your shelter?	Cash provision (For rent, For construction materials, For internal separation materials, For internal light source, For locks), Direct provision (Shelter construction, Shelter construction materials, Shelter safety materials (internal separation, light source, locks), Service provision (Shelter repairs, Increased security around shelters),	Household	Households interview
	% Households lacking basic NFIs or with NFIs in poor condition requesting main form of assistance by type of assistance	If available, what would be the main type of support you would require for non-food items?	Cash provision (Cash to buy NFI items (list by type)), Direct provision (NFI items (list by type)), Service provision (Transport to markets)	Household	Households interview
<b>Food security and livelihoods indicators</b>					
Access to food	% Households reporting being able to access sufficient food for all members of household	Is your household currently able to access enough food for all household members?	Select ONE: Yes/No	Household	Households interview
	% Households reporting main source of food by type of source	What are the main sources of food for the household?	Select MULTIPLE: Purchased, Cultivated, Own livestock, Fishing, Foraging, Hunting, Barter, Family Friends, NGO Aid, Government Aid, If other specify (enter text)	Household	Households interview
	% Households reporting change in food sources in the past 3 months	How has the food source changed in the past 3 months?	Select ONE: Change To Food Purchase, Change To Borrowed Food, Change To Own Production, Change To Food Aid, Change To	Household	Households interview

			Gifts, Change To Barter, Change To Wild Foods, Not changed, Don't know		
	% Households reporting travel time of more than 3 hours total to access food markets	1. How long does it take you to reach the nearest market? 2. How do you get there?	1. Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; 2. Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart	Household	Households interview
Food Consumption Score	% Households reporting Food Consumption Score less than 22 in the past 7 days/1 week	On how many days did your household consume the following food groups in the past 7 days? 1. Has your household eaten Cereals (sorghum, rice, maize, millet, bread, spaghetti etc) in the last 7 days? Has your household eaten vitamin A rich vegetables and tubers (yellow pumpkin, orange sweet potatoes, yellow cassava) in the last 7 days? Has your household eaten white roots and tubers (white potatoes, cassava, arrowroot) in the last 7 days? Has your household eaten legumes, nuts and seeds (cowpeas, lentils, peanut, beans) in the last 7 days? Has your household eaten dark green leafy vegetables (pumpkin leaves, cassava leaves, kale) in the last 7 days? Has your household eaten other vegetables (tomatoes, onion, cabbage, bell pepper) in the last 7 days? Has your household eaten vitamin A rich fruits (ripe mango, pawpaw, gob, hobob) in the last 7 days? Has your household eaten other fruit (banana, orange, apple, grapes, wild fruits) in the last 7 days? Has your household eaten meat &	1. Select ONE: Yes/No; 2. Enter integer	Household	Households interview

		poultry in the last 7 days? Has your household eaten fish in the last 7 days? Has your household eaten milk & milk products (cheese or yoghurt) in the last 7 days? Has your household eaten eggs in the last 7 days? Has your household eaten sugar, honey and sweets in the last 7 days? Has your household eaten oils, fats or butter in the last 7 days? Has your household eaten condiments, tea, coffee in the last 7 days? <b>2. How many days?</b> (Question repeated after each food group)			
Change in consumption	% Households reporting change in the past 3 months in food consumption patterns	How has your consumption of food changed in the past 3 months/90 days?	Select MULTIPLE: Amount of food available has reduced, Amount of food available has increased, Quality of food has reduced, Quality of food has increased, Variety of food has reduced, Variety of food has increased, Not changed	Household	Households interview
Skipped meals	% Households reporting members eating at least 2 meals per day in the last 7 days	Has any household member skipped two or more meals per day in the last 7 days?	Select ONE: Yes/No/Don't know	Household	Households interview
Capacity to prepare food	% Households reporting duration of staple food stock expected to last more than 10 days	How many days will your current cereal stocks last?	Select ONE: Less than 1 day, 2-4 days, 5-7 days, 8-10 days, 10+ days, Don't know	Household	Households interview
	% Households reporting capacity to prepare food safely (using fuel, water, cooking utensils)	To prepare food, do you have access to: <b>1.</b> Fuel (Coal / Gas bottle / Wood); <b>2.</b> Water; <b>3.</b> Cooking utensils	<b>1.2.3.</b> Select ONE: Yes/No	Household	Households interview
Food expenditure	% Households reporting increased costs for food in the past 3 months	1. How much on average did the household spend on food in the past 3 months/90 days? <b>3.</b> Has this cost increased or decreased in the past 3 months/90 days?	<b>1.</b> Select ONE: Less than \$10/month, 11-20\$/month, 21-30\$/month, 31-40\$/month, 41-50\$/month, 51-60\$/month, 61-70\$/month, 71-80\$/month, 81-90\$/month, 91-100\$/month,	Household	Households interview

			100+\$/month; <b>2.</b> Select ONE: Increased, Decreased, Stayed the same, Don't know		
Barriers to food	% Households reporting 3 main concerns in accessing sufficient food for all members	What are the 3 main concerns you have in accessing sufficient food for the household? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: Access: (Distance to markets, Insecurity while travelling to markets, Insecurity at markets, Inconvenient distribution times at humanitarian aid centres, Lack of transportation), Prohibitive cost, Availability: (Absence of markets for purchasing food, Absence of markets for selling livestock, agricultural produce), Capacity: (Lack of fuel, water, utensils for cooking), None, If other specify (enter text)	Household	Households interview
Livelihood incomes	% Households reporting main source of income by type of source in the past 1 year	What were your household's main sources of income/household financial support in the past 12 months/1 year?	Select MULTIPLE: cash crop farming, cash fishing, daily labour, livestock production, business, subsistence farming or fishing, contracted job, remittances, humanitarian assistance, sale of humanitarian assistance, rent of land, none, if other specify (enter text)	Household	Households interview
	% Households reporting negative change or loss in main or secondary source of income in the past 3 months	Have you lost access to any of these sources in the past 3 months/90 days?	Select ONE: Yes/No	Household	Households interview
Livelihood assets	% Households reporting owning livestock	Do you own livestock?	Select ONE: Yes/No	Household	Households interview
	% Households reporting loss of livestock or negative changes in herd sizes in the past 3 months	Have you suffered a loss in herd size in the past 3 months/90 days?	Yes – all, Yes more than 75%, Yes more than 50%, Yes more than 25%, No Losses, Don't know	Household	Households interview
	% Households reporting access to cultivable land	Do you own or rent land for cultivation?	Select ONE: Yes/No	Household	Households interview
	% Households reporting loss of cultivable land in the past 3 months	Have you suffered a loss in access to cultivable land in the past 3 months/90 days?	Yes – all, Yes more than 75%, Yes more than 50%, Yes more than 25%, No Losses, Don't know	Household	Households interview
	% Households reporting ability to access formal or informal financial services	Are you able to access financial services, savings or access to loans?	Select ONE: Yes/No/Don't know	Household	Households interview

Water, Sanitation, and Hygiene indicators					
Improved water sources	% Households reporting accessing an improved primary water source for drinking water in the past 30 days	What was your primary source of drinking water in the last 30 days?	Select ONE: Water Kiosk, Vendors or shop, Piped System, Protected Well with hand Pump, Protected Well w/o hand pump, Unprotected Well, Berkad, River, Water tank and Tap, Water Trucking Distribution Point, Borehole with submersible pump, If other specify (enter text)	Household	Households interview
	% Households reporting accessing an improved primary water source for domestic water in the past 30 days (cooking, bathing, not agriculture or livestock)	What was your primary source of water to cook, bathe, and clean (not for livestock or agriculture) in the last 30 days?	Select ONE: Water Kiosk, Vendors or shop, Piped System, Protected Well with hand Pump, Protected Well w/o hand pump, Unprotected Well, Berkad, River, Water tank and Tap, Water Trucking Distribution Point, Borehole with submersible pump, If other specify (enter text)	Household	Households interview
	% Households treating their own drinking water	1. Do you treat your drinking water? 2. How do you treat your water?	1. Select ONE: Yes/No; 2. Select ONE: Boiling, Cloth filter, Other kind of filter (membrane, ceramic, or commercial filter), Chlorine tablets/aquatabs, if other specify (enter text)	Household	Households interview
Access to improved water sources	% Households reporting presence of improved water source reachable in less than 30 minutes of travel total (by walking or available means of transport)	How long by foot does it take to reach your primary water source from your home?	Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h	Household	Households interview
Quantity of water	% Households reporting having sufficient drinking water for all members in the past 30 days	Did you have enough drinking water for all household members in the last 30 days?	Select ONE: Yes/No	Household	Households interview
	% Households reporting having sufficient water for domestic use (cooking, bathing, and cleaning, not agriculture or livestock) in the past 30 days	Did you have enough water for cooking, bathing, and cleaning in the last 30 days?	Select ONE: Yes/No	Household	Households interview
Storage capacity	% Households reporting having no storage tanks or jerry cans, or sharing jerry-cans, or re-filling jerry-cans more than 3 times/day	1. How do you store your water? 2. How often do you re-fill the jerry cans in a day?	1. Select MULTIPLE: Jerry Cans, Water tank, Water gallon, Bucket with lid, Bucket with no lid, Plastic bottle, Other; 2. Select ONE: Once, Twice, Thrice, More than 3 times	Household	Households interview

	% Households reporting using narrow-necked jerry cans, which may be closed or covered, or which are stored on an elevated platform or table	Are your jerry cans narrow-necked, covered, or stored on an elevated platform?	Select MULTIPLE: Close-necked, Covered or closed with a cap, Stored on a table or elevated platform, None	Household	Households interview
Water expenditure	% Households reporting increased costs for water in the past 3 months	1. Do you pay for water? 2. How much on average did the household spend on water in the past 3 months? 3. Has this cost increased or decreased in the past 3 months/90 days?	1. Select ONE: Yes/No; 2. Select ONE: Less than 10\$/month, 11-20\$/month, 21-30\$/month, 31-40\$/month, 41-50\$/month, 50+\$/month, Don't know; 3. Select ONE: Increased, Decreased, Not changed, Don't know	Household	Households interview
Latrine use	% Households reporting using personal latrines	Does your household have access to a latrine?	Select ONE: Yes - personal latrine, Yes - shared latrine, No latrine	Household	Households interview
	% Households reporting members sharing latrines with other households	Does your household have access to a latrine?	Select ONE: Yes - personal latrine, Yes - shared latrine, No latrine	Household	Households interview
	% Households reporting sharing latrines with more than 3 households	Do you share the latrine with more than 2 other households (not including your own)?	Select ONE: Yes/No	Household	Households interview
Hygienic and dignified latrines	% Households reporting use of hygienic sanitation facilities	What type of latrine do you mainly use?	Select ONE: Flush latrine to the open, Flush latrine to a tank/sewer system/pit, Pit latrine covered/with slab, Pit latrine open/without slab, If other specify (enter text)	Household	Households interview
	% Households reporting use of gender-segregated latrines	Are latrines used by your household separated by gender?	Select ONE: Yes/No	Household	Households interview
	% Households reporting latrines accessible for disabled people	Are latrines used by your household accessible for disabled people?	Select ONE: Yes/No	Household	Households interview
	% Households reporting use of latrines with walls and locks on inside of door	Are latrines used by your household lockable from the inside?	Select ONE: Yes/No	Household	Households interview
	% Households reporting availability of water and soap at latrines	Do latrines used by your household have functional facilities for handwashing (water and soap)?	Select ONE: Yes/No	Household	Households interview
	% Households reporting use of latrines with internal source of light	Do latrines used by your household have lighting at night?	Select ONE: Yes/No	Household	Households interview

	% Households reporting latrines are cleaned and maintained	How hygienic were latrines in the last 30 days?	Select ONE: Very hygienic, Hygienic, Unhygienic, Very unhygienic	Household	Households interview
Access latrines to	% Households reporting presence of dignified latrines reachable in less than 30 minutes of travel total	How long by foot does it take to reach the nearest latrine you use from your home?	Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h	Household	Households interview
Environmental sanitation	% Households reporting adequate method of disposing of faeces (or faeces of children)	How do you dispose of faeces, and/or faeces of children?	Select ONE: Household or communal covered pit, Burial if in designated areas far from houses and water sources, In open, Burning - near or far from home	Household	Households interview
	% Households facing environmental sanitation problems within 10m of dwelling	What environmental sanitation problems does the household face? (direct observation within 10m of dwelling)	Select MULTIPLE: Faecal matter, Stagnant water, Solid household waste matter, Decaying organic matter such as dead animals, Rodents, None	Household	Households interview
Hygiene	% Households reporting knowledge of at least 3 out of 5 hand-washing times	At what times do you wash your hands?	Select Multiple: Before eating, Before feeding baby (including breastfeeding), Before preparing food, Serving food, After defecating, After disposing of baby's faeces/washing baby's bottom, After eating, I never wash my hands, Other	Household	Households interview
	% Households reporting having soap at home or having daily access to soap (also, direct observation if possible)	Do you have soap in your household or daily access to soap?	Select ONE: Yes/No	Household	Households interview
	% Households reporting having menstruation materials at home or access to hygienic menstruation materials	Do women in the household have access to and use hygienic menstruation materials?	Select ONE: Yes/No/Don't know	Household	Households interview
Access handwashing facilities to	% Households reporting presence of handwashing facilities reachable in less than 15 minutes of travel total	How long by foot does it take to reach the nearest handwashing facility you use from your home?	Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h	Household	Households interview
Barriers to water	% Households reporting 3 main concerns in procuring water	What are the 3 main concerns you have in accessing drinking water, or water for cooking, cleaning, bathing? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: Availability: (Irregular supply, Not enough water at source), Capacity: (Not enough jerry-cans, containers, storage capacity), Quality: (Poor water quality, Functionality of water source), Access: (Distance to source (>500m, or >7 minutes walking),	Household	Households interview

			Excessive waiting time at source (>30 minutes), Insecurity while travelling to source, Insecurity at water source, Prohibitive cost, None, if other specify (enter text)		
Barriers to sanitation	% Households reporting 3 main concerns in accessing adequate sanitation facilities	What are the 3 main concerns you have in accessing latrines? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: Access: Distance to facility (>50m), Excessive waiting time at facility (>30 minutes), Insecurity while travelling to latrines, Insecurity at latrines, Not accessible for disabled persons, No access for minority groups/clans, Quality: No gender segregation, No walls or internal light, No lock on inside of door, Not cleaned or maintained, Facilities are full, Facilities are crowded, None, if other specify (enter text)	Household	Households interview
Barriers to hygiene	% Households reporting 3 main concerns in procuring soap, and/or hygienic menstruation materials	What are the 3 main concerns you have in accessing handwashing facilities or hygienic menstruation materials? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: Not enough water or no washbasins, No soap, Difficulty in obtaining soap, Difficulty in obtaining menstruation materials, None, if other specify (enter text)	Household	Households interview
		If difficulty in obtaining soap:	Select ONE: Believe to be unnecessary, Cost, No functioning markets, Insecurity travelling to, or at markets, Quality	Household	Households interview
		If difficulty in obtaining menstruation materials	Select ONE: Believe to be unnecessary, Cost, Functioning markets, Insecurity travelling to, or at markets, Not re-usable, No washing possible	Household	Households interview
Support required	% Households facing lack of water (quality/quantity) requesting main form of assistance for sufficient drinking or domestic water by type of assistance	If available, what would be the main type of support you would require for accessing drinking water or water for cooking, bathing, cleaning?	Select ONE: Cash support (To buy water, To buy jerry-cans or tanks), Direct provision (Treatment means (chlorine tabs, filters, fuel for boiling water), Tanks or jerry-cans for increased storage capacity, Service provision (Transport to markets, Transport to water distribution points, Increased access for disabled persons, Increased access for minority groups/clans, Increased security at water distribution points),	Household	Households interview

			Infrastructure provision (Nearer water distribution points, More water distribution points)		
	% Households with limited or no access to adequate and dignified sanitation requesting main form of assistance by type of assistance	If available, what would be the main type of support you would require for accessing latrines?	Direct provision (Water and soap at facilities, Containers for waste-disposal), Infrastructure provision (Nearer facilities, More facilities, More private facilities (lights, locks, etc.), Washbasin at facilities, Service provision (Cleaner facilities, Increased security at facilities, Increased access for disabled persons, Increased access for minority groups/clans)	Household	Households interview
	% Households with limited or no access to hygienic materials requesting main form of assistance by type of assistance	If available, what would be the main type of support you would require for accessing handwashing facilities, hygienic materials?	Select ONE: Cash support only (to buy materials), Direct provision (soap, menstruation materials by type), Service provision (Transport to markets)	Household	Households interview
WASH AAP	% Households reporting being consulted, or able to participate in, the design, location, and delivery of drinking water and water sources	Has your household been consulted, or able to participate in the design, location, delivery of drinking water or water sources?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting being consulted, or able to participate in, the design, location, and delivery of sanitation facilities	Has your household been consulted, or able to participate in the design, location, delivery of sanitation facilities?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting satisfaction that water sources and sanitation facilities are sustainable	Do you believe that water sources are well developed and sustainable?	Select ONE: Yes/No/Don't know	Household	Households interview
<b>Protection indicators</b>					
Vulnerable headed households	% Households where the primary decision-maker and income-earner is currently, or was below 18 years	1. Who is the main income-earner of the household? 2. Who decides on household expenditure?	1. Select ONE for income earner; 2. Select MULTIPLE for expenditure decider; <b>Options:</b> Adult male (aged 60 +), Adult female (aged 60 +), Adult male (aged 18 to 59), Adult female (aged 18 to 59), Male child (aged 14-17), Female	Household	Households interview
	% Households where the primary decision-maker and income-earner is currently, or was above 59 years			Household	Households interview

	% Households where the primary decision-maker and income-earner is currently, or was female		child (aged 14-17), Male child (aged 13 or below), Female child (aged 13 or below)	Household	Households interview
	% Households where at least one member is currently, or was either pregnant or lactating in the past 6 months	Are there any female household members who have given birth in the past 6 months or who are pregnant?	Select ONE: Yes/No	Household	Households interview
Vulnerable members in household	% Households where at least one member was physically or cognitively disabled	1. In your household, are there any members that have physical or cognitive difficulties (for e.g. mobility, hearing, sight, communicating, etc.) which impacts their ability to carry out daily activities such as working, studying, walking, getting dressed, remembering things?; 2. How many household members fall into the following categories? No difficulty carrying out daily activities, Minor difficulties carrying daily activities but does not need assistance or attention, Some difficulties carrying daily activities and needs some assistance and attention (for e.g. 1-2 hours per day), A lot of difficulty carrying daily activities and needs quite a bit of assistance and attention (for e.g. 3-6 hours per day), Cannot carry daily activities independently and needs permanent assistance and attention; 3. Is there at least one person with difficulties between 5 years old and above 59 years old?	1. Select ONE: Yes/No; 2. Enter integer; 3. Select ONE: Yes/No	Household	Households interview

	% Households where at least one member was chronically-ill in the past 3 months	Are there any members in the household suffering from chronic disease (any illness which lasts 3 months or longer)?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting at least one member without any legally-recognised formal identification documentation	1. Do all adult household members have some form of identity documentation (for example passport or national ID card) in their possession? 2. If anyone in your household does not have some form of identity documentation, do you think they could obtain it if needed?	1. Select ONE: Yes/No/Don't know; 2. Select ONE: Yes/No/Don't know	Household	Households interview
Freedom of movement	% Households reporting members being able to move freely in and around surrounding areas	Are members of your household able to move freely in the community and surrounding area?	Select ONE: Yes/No	Household	Households interview
	% Households reporting having at least one member feeling unsafe or insecure in certain areas, by type of area, in the past 3 months	1. Are there any areas in your community where boys or men do not feel safe? 2. Where do boys and men not feel safe? 3. Are there any areas in your community where girls or women do not feel safe? 4. Where do girls and women not feel safe?	1. 3. Select ONE: Yes/No/Don't know; 2. 4. Select MULTIPLE: In shelters, When leaving settlement/town, Water points, Latrines, Bathing areas, Markets, Schools, Health centres, Feeding centres, Humanitarian aid distribution points, Choose not to answer, If other specify (enter text)	Household	Households interview
Separation of household members	% Households reporting having at least one child separated from their caregiver in the past 3 months	1. Were there any household members separated from the household in the past 3 months/90 days? 2. What is the gender and age of the separated member? 3. Why was the person separated from the household?	1. Select ONE: Yes/No/Don't know; 2. Select MULTIPLE: Female below 18, Female above 18, Male below 18, Male above 18; 3. Select MULTIPLE: Staying with relatives, Flood, Drought, Conflict, Missing (no reason), Abducted, Voluntarily joined armed groups, Forcibly joined armed groups, Detained (no reason), Left house to study, Left house to work, Early marriage	Household	Households interview

	% Households reporting having at least one adult member separated from the household in the past 3 months	1. Were there any household members separated from the household in the past 3 months/90 days? 2. What is the gender and age of the separated member? 3. Why was the person separated from the household?	1. Select ONE: Yes/No/Don't know; 2. Select MULTIPLE: Female below 18, Female above 18, Male below 18, Male above 18; 3. Select MULTIPLE: Staying with relatives, Flood, Drought, Conflict, Missing (no reason), Abducted, Voluntarily joined armed groups, Forcibly joined armed groups, Detained (no reason), Left house to study, Left house to work, Early marriage, Don't know	Household	Households interview
General security/safety	% Households worried about physical threats in their areas in the past 3 months	1. In the last 3 months/90 days, were you or your household members worried about theft or harassment? 2. In the last 3 months/90 days, were you or your household members worried about light or moderate injuries due to accidents or violence (for e.g. injuries which can interrupt normal activities for a few days; no permanent disabilities)? 3. In the last 3 months/90 days, were you or your household members worried about grave injuries due to accident or violence (for e.g. injuries resulting in permanent disabilities, long term interruption of normal activities)? 4. In the last 3 months/90 days, were you or your household members worried about sexual or gender-based violence? 5. In the last 3 months/90 days, were you or your household members worried about abductions or kidnapping? 6. In the last 3 months/90 days, were you or your household members worried about landmines or unexploded	1.2.3.4.5.6.7. Select ONE: Never, Sometimes, Always	Household	Households interview

		ordinance or dangerous debris? 7. In the last 3 months/90 days, were you or your household members worried about the risk or danger of death?			
Hazardous work	% Households reporting at least one member engaged in illicit, or dangerous work, or working without pay	1. Is anyone in your household currently working in dangerous or illegal conditions of work, or working without being paid? 2. What is the gender and age of the household member engaged in such work?	1. Select ONE: Yes/No/Don't know; 2. Select MULTIPLE: Female below 18, Female above 18, Male below 18, Male above 18;	Household	Households interview
	% Households reporting at least one child engaged in illicit, or dangerous work, or working without pay	1. Is anyone in your household currently working in dangerous or illegal conditions of work, or working without being paid? 2. What is the gender and age of the household member engaged in such work?	1. Select ONE: Yes/No/Don't know; 2. Select MULTIPLE: Female below 18, Female above 18, Male below 18, Male above 18;	Household	Households interview
Housing, Land, Property	% Households reporting owning or renting land with formal documentation	1. Do you own the land you are settled on or the dwelling in which you live? 2. Do you own any documentation indicating land tenure or rental agreement?	1.2. Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting having lost or destroyed HLP rights documentation in the past 3 months	1. Have you lost or have had any ownership or rental documents destroyed in the last 3 months/90 days? 2. If you do not have a written property title of ownership, do you think you could obtain it? 3. If you needed to, could you renew your rental contract or obtain a new one?	1.2.3. Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting having had their land 'grabbed' or seized by others	Have you had any land seized or grabbed from you in your area of	Select ONE: Yes/No/Don't know	Household	Households interview

		origin or your previous location of residence?			
	% Households reporting at least one HLP-related dispute in the last 3 months	Do you have any housing, land, or property-related disputes with other households, land-owners, rent-collectors, or tenants in the past 3 months/90 days?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting having satisfactorily used an HLP dispute resolution mechanism in the past 3 months	1. Have you made use of a dispute resolution mechanism in the past 3 months/90 days? 2. Have you been satisfied with the dispute resolution mechanism that you have made use of?	1.2. Select ONE: Yes/No/Don't know	Household	Households interview
	The following section is going to ask about Sexual and Gender Based Violence, do you feel comfortable in replying to those questions?		Select ONE: Yes/No	Household	Households interview
	% Households reporting women and girls making use of formal recourse in cases of SGBV	Where do women and girls go if they have experienced some form of violence?	Select MULTIPLE: Community leader, Community elders, Health centre, UN or NGO agency, Police, Armed group, No where to report, Would not report it, Don't know/Don't want to answer, If other specify (enter text)	Household	Households interview
SGBV	% Households reporting awareness of SGBV referral pathways/services	Are you aware of any medical, legal, psychosocial services available in case of an attack of sexual or gender based violence?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting having satisfactorily used an SGBV referral mechanism in the past 6 months	1. Has anyone in the household made use of SGBV medical, legal, or psychosocial services in the past 6 months? 2. Have you been satisfied with the SGBV services offered?	1.2. Select ONE: Yes/No/Don't know	Household	Households interview
Rule of law	% Households reporting living in areas where they can make use of a formal, accessible, and effective judicial system	1. Where would you go if a crime has been committed against you or a member of your household? 2. Can you access effective and affordable judicial remedy? 3. Do you trust that your request will be	1. Select MULTIPLE: Community leader, Community elders, Health centre, UN or NGO agency, Police, Armed group, No where to report, Would not report it, Don't know/Don't want to answer, If other specify (enter text); 2.3. Select ONE: Yes/No/Don't know	Household	Households interview

		treated appropriately and without unreasonable delays?			
Child protection	% Households reporting injuries to children in the past 2 weeks	Have any children in the household been injured in the past 2 weeks/14 days?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting availability of child-friendly spaces	Is there a child-friendly space in your community where children can meet and play with or without supervision (for e.g. a park, gym, playground, etc.)?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting availability of child protection services	Are there any medical, legal, or social services for children in your community or area of residence?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households reporting satisfaction with child protection services	Are you satisfied with using such services?	Select ONE: Yes/No/Don't know/Have not used services	Household	Households interview
Exploitation	% Households reporting exploitation by humanitarian actors	1. Has anyone in the household been obliged to pay a fee for registering with a NGO or to access humanitarian aid? 2. Has anyone in the household exchanged favours of any kind for registering with a NGO or to access humanitarian aid?	1.2. Select ONE: Yes/No/Don't know	Household	Households interview
Representation of women	% Households reporting awareness of women in decision-making in committees	Are you aware of any community-based organisations with women who are represented in decision-making committees?	Select ONE: Yes/No/Don't know	Household	Households interview
IDP-HC relations	% Households reporting fair relations between displaced persons and host communities	How would you describe relations between host communities and displaced people?	Select ONE: Very good, Good, Bad, Very Bad	Household	Households interview
Barriers to protection	% Households reporting 3 main concerns in accessing protection services	What are the 3 main concerns you have in accessing protection services? A. First concern; B. Second concern; C. Third concern	<b>A.B.C.</b> Select ONE: Informational: Unaware that services are available, Access: Services too far to travel to, Access: Prohibitive costs, Access: Insecurity travelling to areas, Access: Inaccessible for disabled persons, Access:	Household	Households interview

			Inaccessible for minority groups, Access: Forced to pay bribes or fees, Quality: Facilities not staffed or staff not present, Quality: Services not appropriate for problems, Quality: Not enough female or male staff for female or male claimants, None, If other specify (enter text)		
Support required	% Households with limited or no access to protection services requesting main form of assistance by type of assistance	If available, what would be the main type of support you would require to access protection services?	Select ONE: Service provision: removal of hazardous items, Service provision: transport to facilities, Service provision: more qualified staff, Service provision: more staff, Service provision: child protection services, Service provision: SGBV medical, legal, psychosocial services, Service provision: increased security, Service provision: increased access for disabled persons, Service provision: increased access for minority groups, Service provision: community-based services, Infrastructure provision: more centres, Infrastructure provision: nearer centres	Household	Households interview
<b>Negative coping mechanism indicators</b>					
Multi-Cluster Negative Strategy Coping Index	% Households using negative coping strategies to access water in the past 1 month/30 days	In the past 30 days, what did you do if you did not have enough water?	Select MULTIPLE: Had enough water, Reduce domestic water consumption, Rely on seasonal water sources, Send children to fetch water, Reduce drinking water consumption, Adults reduce consumption so that minors can drink, Drink unsafe water, Borrow or share materials or borrow cash, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance	Household	Households interview

	% Households using negative coping strategies to access sanitation facilities in the past 1 month/30 days	In the past 30 days, what did you do if you could not access sanitation facilities?	Select MULTIPLE: Had access to sanitation, Share facilities with other households, Use facilities which are unhygienic/not cleaned, Only use facilities at night or non-segregated latrines, Open defaecation, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money otherwise used for other purchases, Travel/Move to insecure or dangerous areas, Sexual, economic exploitation to access humanitarian assistance	Household	Households interview
	% Households using negative coping strategies to access hygienic or menstrual materials in the past 1 month/30 days	In the past 30 days, what did you do if you did not have access to soap or hygienic menstrual materials?	Select MULTIPLE: Had access to soap or menstrual hygienic materials, Wash clothes with soap substitutes, Wash hands with soap substitutes, Wash menstrual materials with soap substitutes, Wash hands or menstrual materials less frequently, Do not clean/re-use menstruation materials, Do not wash hands with soap, Use latrines for bathing purposes, Do not use menstruation materials, Do not wash hands at all, Borrow or share materials or borrow cash, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance	Household	Households interview
	% Households using negative coping strategies to access food in the past 1 month/30 days	In the past 30 days, what did you do if you did not have enough food?	Select MULTIPLE: Had enough food, Rely on less preferred and less expensive foods, Borrow food or rely on help from friends or relatives, Limit portion size at mealtime, Restrict consumption by adults in order for children to eat, Reduce number of meals eaten in a day, Borrow or share materials or borrow cash, Sending children with relatives, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money	Household	Households interview

			otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance		
	% Households using negative coping strategies to access shelter in the past 1 month/30 days	In the past 30 days, what did you do if you did not have shelter?	Select MULTIPLE: Had shelter, Being hosted by other households, Move from shelter to shelter, Using empty building, school, Send children to relatives, Move to unplanned settlements, Scavenge for construction materials, Live in open-air conditions, Borrow or share materials or borrow cash, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance	Household	Households interview
	% Households using negative coping strategies to access basic non-food items in the past 1 month/30 days	In the past 30 days, what did you do if you did not have basic non-food items?	Select MULTIPLE: Had NFI, Scavenge for NFI materials, Borrow or share materials or borrow cash, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance	Household	Households interview
	% Households using negative coping strategies to access education in the past 1 month/30 days	In the past 30 days, what did you do if you could not access educational facilities?	Select MULTIPLE: Had access to education, Peer learning, Part-time schooling, Home schooling, Borrow or share materials or borrow cash, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on	Household	Households interview

			humanitarian assistance, Use money otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance		
	% Households using negative coping strategies to access healthcare in the past 1 month/30 days	In the past 30 days, what did you do if you could not access healthcare facilities?	Select MULTIPLE: Had access to healthcare, Self-medicate, Seek treatment or service from unqualified workers, Do not seek treatment or healthcare when sick, Borrow or share materials or borrow cash, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance	Household	Households interview
	% Households using negative coping strategies to access enough resources or basic services in the past 1 month/30 days	In the past 30 days what did you do if you did not have enough resources or access to basic services?	Select MULTIPLE: Had enough resources or access to basic services, Borrow or share materials or borrow cash, Adults work extra shifts/jobs, Spend more time travelling/waiting (secure areas), Rely on humanitarian assistance, Use money otherwise used for other purchases, Sell assets otherwise used for other purposes, Travel/Move to insecure or dangerous areas, Adult members beg, Minors work, Minors beg, Sexual, economic exploitation to access humanitarian assistance	Household	Households interview
<b>Forecasted needs indicators</b>					
Likely affect needs - influence relatively certain	% Households reporting sufficient capacity to cope with winterisation	1. Do you believe that you will have access to your shelter for the winter season? 2. Do you believe that you will have enough blankets and warm clothes for the winter season? 3. Do you believe	1.2.3. Select ONE: Yes/No/Don't know	Household	Households interview

		that you will have enough fuel for cooking for the winter season?			
	% Households reporting perceived evolution of relations between displaced and non-displaced(hosting) communities	1. How would you describe relations between host communities and displaced people? 2. Do you believe that relations between displaced persons and host communities will be fair or good over the next year?	1. Select ONE: Very good, Good, Bad, Very Bad; 2. Select ONE: Yes/No/Don't know	Household	Households interview
Possibly affect needs - influence relatively uncertain	% Households reporting intentions to relocate	1. Do you intend to remain and settle in this location permanently? 2. When will you move to your intended destination? 3. Region? 4. District	1. Select ONE: Yes, will settle here; Will move elsewhere in this city; Will move elsewhere in Somalia; Will return to previous country of refuge; Will move to another country; I don't know if I want to move; 2. Select ONE: In the next week, in the next month, in the next three months, in the next six months, more than six months from now; 3. Select ONE: from list of regions; 4. Select ONE: from list of districts	Household	Households interview
	% Households anticipating diminished livelihood capacities	1. Do you believe that you will have enough baby animals/calves from your livestock to survive to next year? 2. Do you believe that you will have sufficient grain to plant for the next planting season? 3. Do you believe that you will be able to repay household debt over the next year? 4. Do you believe that you will have sufficient financial savings or support from remittances for next year?	1.2.3.4. Select ONE: Yes/No/Don't know	Household	Households interview
<b>Accountability to Affected Population indicators</b>					
Information	% Households reporting having been contacted by humanitarian workers in the past 3 months	Has your household been contacted by humanitarian workers regarding the type of aid	Select ONE: Yes/No/Don't know	Household	Households interview

		you would like to receive in the past 3 months/90 days?			
Grievance mechanisms	% Households reporting awareness of grievance mechanisms	Are you aware of any procedures or mechanisms to make complaints or provide feed-back regarding any humanitarian assistance?	Select ONE: Yes/No/Don't know	Household	Households interview
Negative outcomes	% Households reporting negative effects of humanitarian assistance in their community	Do you feel that humanitarian assistance has led to negative outcomes in your community (for e.g. unequal distribution, disputes, violence or conflict, insecurity etc.)	Select ONE: Yes/No/Don't know	Household	Households interview
Barriers to humanitarian aid	% Households reporting difficulty in accessing humanitarian aid in the past 3 months	What were the main concerns you had in accessing humanitarian aid in the past 3 months/90 days?	Select MULTIPLE: Not enough information, Cannot physically access points of humanitarian aid distribution, Insecurity on the way to humanitarian aid distribution, Insecurity at points of humanitarian aid distribution, Camp manager has excluded the respondents from aid	Household	Households interview
<b>Item Repository Check-list</b>					
Item Repository Check-list	% Households reporting owning basic items reflecting over-all living standards	Does your household own the following items? Sleeping mats; Blankets for adults and/or children; Mosquito nets; Jerry cans or water tanks; Kitchen set (pots, pans, cutlery, kettle); Solar lamp or any internal source of lighting; Clothing articles (shirt, pants, dress, warm clothes, footwear); Toiletries (toothbrush, toothpaste, soap, shampoo); Menstrual materials and/or diapers; Cooking stove; Fuel & generator; Locks on doors; Phone and/or Radio; Cleaning equipment (broom, mop, bucket);	Select ONE: Yes/No for each item	Household	Households interview

		Waste-bin; Household tools (hammer, nails, rope, etc.); School supplies & stationery; Children's toys; Furniture (bed, tables, chairs, stools); Storage space; Fan and/or air-conditioning; Refrigerator; Transport (car, motorbike, moped, bicycle)			
<b>Camp Coordination and Camp Management***</b>					
***If survey data is collected within an IDP camp, the information will be used to provide the CCCM cluster with a snapshot of needs in camps. <b>CCCM indicators are not statistically representative but indicative only.</b>					
Camp population profile	% IDP households living in camps	1. Are you a Somali who has moved from another location in Somalia? 2. In which region were you living before coming here? 3. In which district were you living before coming here?	1. Select ONE: Yes/No; 2. Select ONE: from list of regions; 3. Select ONE: from list of districts	Household	Households interview
	% Refugee households living in camps	1. Are you a Somali returning to Somalia from another country? 2. From which country is the household returning? 3. Maternal health in camps	% Households living in camps reporting ante- and/or post-natal complications for at least one member in the past 6 months	Have any pregnant women or any women from the household who gave birth (in the last 6 months) suffered from pre- or post-partum complications (any complications during or immediately after pregnancy)?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households living in camps with pregnant or lactating women who gave childbirth at a hospital or healthcare centre in the past 1 year	Where have women in the family given birth in the past year?	Select ONE: Health center / Hospital, At home, Traditional birth attendant house/center, There was no birth last year, Don't Know, If other specify (enter text)	Household	Households interview
Vaccination coverage in camps	% Households living in camps reporting all children vaccinated	Have all children in the household have been vaccinated?	Select ONE: All, Some, None, Don't know	Household	Households interview
	% Households living in camps reporting having a vaccination card	Do all vaccinated children have a vaccination card?	Select ONE: All, Some, None, Don't know	Household	Households interview

Mental health in camps	% Households living in camps reporting symptoms of mental health problems in the past 1 year	Does anyone in your household face or has faced one or more of the following problems in the past 12 months/1 year?	Depression: Depressed mood for most of the day, nearly every day, Significant reduction in interest or pleasure in all or vast majority of activities most of the day, nearly every day, Significant weight loss when not dieting or weight gain, or decrease/increase in appetite, nearly every day, Slow thought and responses and slow movement, Feeling fatigued or loss of energy nearly every day, Feelings of guilt or lack of self-value, nearly every day, Reduced ability to think or concentrate, nearly every day, Recurrent thoughts of suicide or death, or attempts at suicide; Schizophrenia: Delusions, Hallucinations, Disorganised speech, or lack of sense in speech, Always disorganised, Catatonic behaviour, Diminished emotional expression; Mental health stressors: Inappropriate affect (for e.g. laughing in the absence of a stimulus, intense fear without reason, etc.), Disturbed sleep patterns (sleeping excessively, or very little, nearly every day), Excessive eating, Dysphoric mood (depression, anxiety, anger, violence), Depersonalisation (detachment or disconnect from self), Derealisation (a feeling that surroundings are not real), Cognitive deficits impacting language, processing, executive function, and/or memory, Hostility and aggression, Lack of social cognition (for e.g. does not talk to anybody), Excessive khat consumption; None of the above; Don't know	Household	Households interview
	% Households living in camps reporting symptoms of mental health problems in the past	Has any one in your family been chained?	Select ONE: Yes/No/Don't know	Household	Households interview
Shelter use in camps	% Households living in camps living in open-air conditions	How many shelters does the household occupy in this location?	Enter integer (0 if open air)	Household	Households interview

	% Households living in camps living in shelters (or open-air conditions) for more than 6 (or 3 if open-air) months	1. How old is your shelter in months? 2. Have you been occupying this shelter for longer than 3 months/90 days?	1. Enter integer (999 if unknown); 2. Select ONE: Yes/No	Household	Households interview
Shelter quality in camps	% Households living in camps reporting using sub-standard or temporary construction materials for floor	What is the primary floor material?	Select ONE: Earth, Cement, Plastic sheet, Other	Household	Households interview
	% Households living in camps reporting using sub-standard or temporary construction materials for structure	What is the primary structural material?	Select ONE: Wood, Metal, Bricks, Stones, Other	Household	Households interview
	% Households living in camps reporting using sub-standard or temporary construction materials for roof	What is the primary roof material?	Select ONE: Earth, Cement, Wood, CGI, Tin (NIDO), Plastic Sheet, Cloth, Vegetation, None	Household	Households interview
	% Households living in camps reporting using sub-standard or temporary construction materials for walls	What is the primary wall?	Select ONE: Earth, Cement, Bricks, Wood, CGI, Tin (NIDO), Plastic Sheet, Cloth, Vegetation, None	Household	Households interview
	% Households living in camps reporting using sub-standard or temporary construction materials for doors	What is the primary door material?	Select ONE: Wood, CGI, Tin (NIDO), Plastic Sheet, Cloth, Vegetation, None	Household	Households interview
Shelter damage in camps	% Households living in camps reporting loss or damage to shelters to the extent that they are uninhabitable due to conflict, floods, or drought in the past 3 months	1. Has your shelter (walls, roof, doors) been damaged (moderate or heavy) and not been repaired in the past 3 months/90 days? 2. What was the main reason for shelter damage?	1. Select ONE: Yes/No; 2. Select ONE: Flooding, Conflict, Poor material, Poor construction	Household	Households interview
Long-term shelter damage in camps	% Households living in camps reporting moderate to heavy damage to structure, roof, walls, or doors of shelter, for a minimum of 3 months and which have not been repaired	Has your shelter (walls, roof, doors) been damaged (moderate or heavy) and not been repaired in the past 3 months/90 days?	Select ONE: Yes/No	Household	Households interview

Shelter security in camps	% Households living in camps reporting no internal separation of shelter	Is there internal separation of rooms within the shelter?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting no source of internal light in the shelter	Is there a source of light at night?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting no internal lock on door of shelter	Can you lock the shelter from the inside?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting theft from shelter in the past 3 months	Has there been any theft from your shelter in the past 3 months/90 days?	Select ONE: Yes/No	Household	Households interview
Basic NFI items in camps	% Households living in camps lacking some or all basic set of NFI items	Does your household have the following quantity of basic items?	Select MULTIPLE: Sleeping mat - 2, Blankets - 3, Plastic sheeting, Jerry cans - 2, Buckets - 1, Wash Basin - 1, Cooking pots - 2, Plates - 6, Cups - 6, Serving spoon - 1, Kitchen knife - 1, Kettle - 1, Solar lamp - 1, None	Household	Households interview
Food sufficiency in camps	% Households living in camps reporting being able to access sufficient food for all members of household	Is your household currently able to access enough food for all household members?	Select ONE: Yes/No	Household	Households interview
Food Consumption Score in camps	% Households living in camps reporting Food Consumption Score less than 22 in the past 7 days/1 week	On how many days did your household consume the following food groups in the past 7 days? 1. Has your household eaten Cereals (sorghum, rice, maize, millet, bread, spaghetti etc) in the last 7 days? Has your household eaten vitamin A rich vegetables and tubers (yellow pumpkin, orange sweet potatoes, yellow cassava) in the last 7 days? Has your household eaten white roots and tubers (white potatoes, cassava, arrowroot) in the last 7 days? Has your household eaten legumes, nuts and seeds	1. Select ONE: Yes/No; 2. Enter integer	Household	Households interview

		(cowpeas, lentils, peanut, beans) in the last 7 days? Has your household eaten dark green leafy vegetables (pumpkin leaves, cassava leaves, kale) in the last 7 days? Has your household eaten other vegetables (tomatoes, onion, cabbage, bell pepper) in the last 7 days? Has your household eaten vitamin A rich fruits (ripe mango, pawpaw, gob, hobob) in the last 7 days? Has your household eaten other fruit (banana, orange, apple, grapes, wild fruits) in the last 7 days? Has your household eaten meat & poultry in the last 7 days? Has your household eaten fish in the last 7 days? Has your household eaten milk & milk products (cheese or yoghurt) in the last 7 days? Has your household eaten eggs in the last 7 days? Has your household eaten sugar, honey and sweets in the last 7 days? Has your household eaten oils, fats or butter in the last 7 days? Has your household eaten condiments, tea, coffee in the last 7 days? <b>2. How many days?</b> (Question repeated after each food group)			
Improved water sources in camps	% Households living in camps reporting accessing an improved primary water source for drinking water in the past 30 days	What was your primary source of drinking water in the last 30 days?	Select ONE: Water Kiosk, Vendors or shop, Piped System, Protected Well with hand Pump, Protected Well w/o hand pump, Unprotected Well, Berkad, River, Water tank and Tap, Water Trucking Distribution Point, Borehole with submersible pump, If other specify (enter text)	Household	Households interview

	% Households living in camps reporting accessing an improved primary water source for domestic water in the past 30 days (cooking, bathing, not agriculture or livestock)	What was your primary source of water to cook, bathe, and clean (not for livestock or agriculture) in the last 30 days?	Select ONE: Water Kiosk, Vendors or shop, Piped System, Protected Well with hand Pump, Protected Well w/o hand pump, Unprotected Well, Berkad, River, Water tank and Tap, Water Trucking Distribution Point, Borehole with submersible pump, If other specify (enter text)	Household	Households interview
	% Households living in camps treating their own drinking water	1. Do you treat your drinking water? 2. How do you treat your water?	1. Select ONE: Yes/No; 2. Select ONE: Boiling, Cloth filter, Other kind of filter (membrane, ceramic, or commercial filter), Chlorine tablets/aquatabs, if other specify (enter text)	Household	Households interview
Quantity of water in camps	% Households living in camps reporting having sufficient drinking water for all members in the past 30 days	Did you have enough drinking water for all household members in the last 30 days?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting having sufficient water for domestic use (cooking, bathing, and cleaning, not agriculture or livestock) in the past 30 days	Did you have enough water for cooking, bathing, and cleaning in the last 30 days?	Select ONE: Yes/No	Household	Households interview
Hygienic and dignified latrines in camps	% Households living in camps reporting use of hygienic sanitation facilities	What type of latrine do you mainly use?	Select ONE: Flush latrine to the open, Flush latrine to a tank/sewer system/pit, Pit latrine covered/with slab, Pit latrine open/without slab, If other specify (enter text)	Household	Households interview
	% Households living in camps reporting use of gender-segregated latrines	Are latrines used by your household separated by gender?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting latrines accessible for disabled people	Are latrines used by your household accessible for disabled people?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting use of latrines with walls and locks on inside of door	Are latrines used by your household lockable from the inside?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting availability of water and soap at latrines	Do latrines used by your household have functional facilities for handwashing (water and soap)?	Select ONE: Yes/No	Household	Households interview

	% Households living in camps reporting use of latrines with internal source of light	Do latrines used by your household have lighting at night?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting latrines are cleaned and maintained	How hygienic were latrines in the last 30 days?	Select ONE: Very hygienic, Hygienic, Unhygienic, Very unhygienic	Household	Households interview
Environmental sanitation in camps	% Households living in camps reporting adequate method of disposing of faeces (or faeces of children)	How do you dispose of faeces, and/or faeces of children?	Select ONE: Household or communal covered pit, Burial if in designated areas far from houses and water sources, In open, Burning - near or far from home	Household	Households interview
	% Households living in camps facing environmental sanitation problems within 10m of dwelling	What environmental sanitation problems does the household face? (direct observation within 10m of dwelling)	Select MULTIPLE: Faecal matter, Stagnant water, Solid household waste matter, Decaying organic matter such as dead animals, Rodents, None	Household	Households interview
Hygiene materials in camps	% Households living in camps reporting having soap at home or having daily access to soap (also, direct observation if possible)	Do you have soap in your household or daily access to soap?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting having menstruation materials at home or access to hygienic menstruation materials	Do women in the household have access to and use hygienic menstruation materials?	Select ONE: Yes/No/Don't know	Household	Households interview
Freedom of movement in camps	% Households living in camps reporting members being able to move freely in and around surrounding areas	Are members of your household able to move freely in the community and surrounding area?	Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting having at least one member feeling unsafe or insecure in certain areas, by type of area, in the past 3 months	1. Are there any areas in your community where boys or men do not feel safe? 2. Where do boys and men not feel safe? 3. Are there any areas in your community where girls or women do not feel safe? 4. Where do girls and women not feel safe?	1. 3. Select ONE: Yes/No/Don't know; 2. 4. Select MULTIPLE: In shelters, When leaving settlement/town, Water points, Latrines, Bathing areas, Markets, Schools, Health centres, Feeding centres, Humanitarian aid distribution points, Choose not to answer, If other specify (enter text)	Household	Households interview
Separation of household	% Households living in camps reporting having at least one child	1. Were there any household members separated from the household in the past 3	1. Select ONE: Yes/No/Don't know; 2. Select MULTIPLE: Female below 18, Female above 18, Male below 18, Male above 18; 3. Select	Household	Households interview

members in camps	separated from their caregiver in the past 3 months	months/90 days? <b>2.</b> What is the gender and age of the separated member? <b>3.</b> Why was the person separated from the household?	MULTIPLE: Staying with relatives, Flood, Drought, Conflict, Missing (no reason), Abducted, Voluntarily joined armed groups, Forcibly joined armed groups, Detained (no reason), Left house to study, Left house to work, Early marriage		
	% Households living in camps reporting having at least one adult member separated from the household in the past 3 months	<b>1.</b> Were there any household members separated from the household in the past 3 months/90 days? <b>2.</b> What is the gender and age of the separated member? <b>3.</b> Why was the person separated from the household?	<b>1.</b> Select ONE: Yes/No/Don't know; <b>2.</b> Select MULTIPLE: Female below 18, Female above 18, Male below 18, Male above 18; <b>3.</b> Select MULTIPLE: Staying with relatives, Flood, Drought, Conflict, Missing (no reason), Abducted, Voluntarily joined armed groups, Forcibly joined armed groups, Detained (no reason), Left house to study, Left house to work, Early marriage, Don't know	Household	Households interview
General security/safety in camps	% Households living in camps worried about physical threats in their areas in the past 3 months	<b>1.</b> In the last 3 months/90 days, were you or your household members worried about theft or harassment? <b>2.</b> In the last 3 months/90 days, were you or your household members worried about light or moderate injuries due to accidents or violence (for e.g. injuries which can interrupt normal activities for a few days; no permanent disabilities)? <b>3.</b> In the last 3 months/90 days, were you or your household members worried about grave injuries due to accident or violence (for e.g. injuries resulting in permanent disabilities, long term interruption of normal activities)? <b>4.</b> In the last 3 months/90 days, were you or your household members worried about sexual or gender-based violence? <b>5.</b> In the last 3 months/90 days, were you or your	<b>1.2.3.4.5.6.7.</b> Select ONE: Never, Sometimes, Always	Household	Households interview

		household members worried about abductions or kidnapping? 6. In the last 3 months/90 days, were you or your household members worried about landmines or unexploded ordinance or dangerous debris? 7. In the last 3 months/90 days, were you or your household members worried about the risk or danger of death?			
SGBV in camps	The following section is going to ask about Sexual and Gender Based Violence, do you feel comfortable in replying to those questions?		Select ONE: Yes/No	Household	Households interview
	% Households living in camps reporting women and girls making use of formal recourse in cases of SGBV	Where do women and girls go if they have experienced some form of violence?	Select MULTIPLE: Community leader, Community elders, Health centre, UN or NGO agency, Police, Armed group, No where to report, Would not report it, Don't know/Don't want to answer, If other specify (enter text)	Household	Households interview
	% Households living in camps reporting awareness of SGBV referral pathways/services	Are you aware of any medical, legal, psychosocial services available in case of an attack of sexual or gender based violence?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households living in camps reporting having satisfactorily used an SGBV referral mechanism in the past 6 months	1. Has anyone in the household made use of SGBV medical, legal, or psychosocial services in the past 6 months? 2. Have you been satisfied with the SGBV services offered?	1.2. Select ONE: Yes/No/Don't know	Household	Households interview
Child protection in camps	% Households living in camps reporting injuries to children in the past 2 weeks	Have any children in the household been injured in the past 2 weeks/14 days?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households living in camps reporting availability of child-friendly spaces	Is there a child-friendly space in your community where children can meet and play with or without supervision (for e.g. a park, gym, playground, etc.)?	Select ONE: Yes/No/Don't know	Household	Households interview

	% Households living in camps reporting availability of child protection services	Are there any medical, legal, or social services for children in your community or area of residence?	Select ONE: Yes/No/Don't know	Household	Households interview
	% Households living in camps reporting satisfaction with child protection services	Are you satisfied with using such services?	Select ONE: Yes/No/Don't know/Have not used services	Household	Households interview
Exploitation	% Households living in camps reporting exploitation by humanitarian actors	1. Has anyone in the household been obliged to pay a fee for registering with a NGO or to access humanitarian aid? 2. Has anyone in the household exchanged favours of any kind for registering with a NGO or to access humanitarian aid?	1.2. Select ONE: Yes/No/Don't know	Household	Households interview
Representation of women in camps	% Households living in camps reporting awareness of women in decision-making in committees	Are you aware of any community-based organisations with women who are represented in decision-making committees?	Select ONE: Yes/No/Don't know	Household	Households interview
Access to school in camps	% Households living in camps reporting presence of an educational facility (primary, secondary, quoranic, vocational, basic literacy and numeracy classes) reachable in less than 3 hours of travel total (by walking or available means of transport)	1. How long does it take the children to go to the nearest educational facility (primary, secondary, vocational, quoranic, basic literacy and numeracy classes, university)? 2. How do you get there?	1. Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; 2. Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart	Household	HH interview
	Physical access	Have you been able to access the educational facility?	Select ONE: Yes/No	Household	HH interview
Access to nutrition in camps	% Households living in camps reporting presence of nutritional centre/therapeutic feeding centre (or healthcare facility providing nutrition counselling or supplements) reachable in less than 3 hours of travel total (by walking or available means of transport)	1. How long does it take you to reach the nearest nutritional centre or therapeutic feeding centre? 2. How do you get there?	1. Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; 2. Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart	Household	HH interview

	Physical access	Have you been able to access the nearest nutritional centre or therapeutic feeding centre when needed?	Select ONE: Yes/No	Household	HH interview
	% Households living in camps reporting having received a visit from a mobile nutrition team in the past 6 months	Have you or anyone in your household received a visit from the following in the past 6 months: Mobile nutrition team to assess for malnutrition?	Select ONE: Yes/No/Don't know	Household	HH interview
Access to health in camps	% Households living in camps reporting ability of members able to access required treatment in response to sickness, health issue by type of facility visited / healthcare sought	Were you able to access a healthcare facility in response to this issue? ( <i>Asked as a follow-up question to the two questions regarding the 'incidence of disease' indicator, and first question on maternal health</i> )	Select ONE: Yes/No	Household	HH interview
	% Households living in camps reporting ability of members able to access required treatment in response to sickness, health issue by type of facility visited / healthcare sought	1. How long does it take you to reach the nearest healthcare facility? 2. How do you get there? 3. What is the type of health facility?	1. Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; 2. Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart; 3. Select ONE: Government clinic or hospital, Private clinic or hospital, NGO run clinic or hospital, Traditional mid-wife, Traditional healer, Pharmacy, Shop selling medication, Other specify (enter text)	Household	HH interview
	% Households living in camps reporting at least one visit by a healthcare worker in the past 6 months	Have you or anyone in your household had access to a mobile health team (doctors, nurses, NGO) in the past 6 months?	Select ONE: Yes/No/Don't know	Household	HH interview
	% Households living in camps reporting travel time of more than 3 hours total to access food markets	1. How long does it take you to reach the nearest market? 2. How do you get there?	1. Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h; 2. Select ONE: Walking, Car, Bus, Moto, Bicycle, Cart	Household	HH interview
Access to improved water sources in camps	% Households reporting presence of improved water source reachable in less than 30 minutes of travel total (by walking or available means of transport)	How long by foot does it take to reach your primary water source from your home?	Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h	Household	HH interview

Access to latrines in camps	% Households living in camps reporting presence of dignified latrines reachable in less than 30 minutes of travel total	How long by foot does it take to reach the nearest latrine you use from your home?	Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h	Household	HH interview
Access to handwashing facilities in camps	% Households reporting presence of handwashing facilities reachable in less than 15 minutes of travel total	How long by foot does it take to reach the nearest handwashing facility you use from your home?	Select ONE: Less than 15 mins, 15-30 mins, 30 mins-1h, 1-3h, 3+h	Household	HH interview
WASH AAP in camps	% Households reporting being consulted, or able to participate in, the design, location, and delivery of drinking water and water sources	Has your household been consulted, or able to participate in the design, location, delivery of drinking water or water sources?	Select ONE: Yes/No/Don't know	Household	HH interview
	% Households reporting being consulted, or able to participate in, the design, location, and delivery of sanitation facilities	Has your household been consulted, or able to participate in the design, location, delivery of sanitation facilities?	Select ONE: Yes/No/Don't know	Household	HH interview
	% Households reporting satisfaction that water sources and sanitation facilities are sustainable	Do you believe that water sources are well developed and sustainable?	Select ONE: Yes/No/Don't know	Household	HH interview
Information AAP in camps	% Households reporting having been contacted by humanitarian workers in the past 3 months	Has your household been contacted by humanitarian workers regarding the type of aid you would like to receive in the past 3 months/90 days?	Select ONE: Yes/No/Don't know	Household	Households interview
Grievance mechanism AAP in camps	% Households reporting awareness of grievance mechanisms	Are you aware of any procedures or mechanisms to make complaints or provide feed-back regarding any humanitarian assistance?	Select ONE: Yes/No/Don't know	Household	Households interview
Negative outcomes AAP in camps	% Households reporting negative effects of humanitarian assistance in their community	Do you feel that humanitarian assistance has led to negative outcomes in your community (for e.g. unequal distribution, disputes, violence or conflict, insecurity etc.)	Select ONE: Yes/No/Don't know	Household	Households interview

Barriers to humanitarian aid AAP in camps	% Households reporting difficulty in accessing humanitarian aid in the past 3 months	What were the main concerns you had in accessing humanitarian aid in the past 3 months/90 days?	Select MULTIPLE: Not enough information, Cannot physically access points of humanitarian aid distribution, Insecurity on the way to humanitarian aid distribution, Insecurity at points of humanitarian aid distribution, Camp manager has excluded the respondents from aid	Household	Households interview

		1	2	3	4	5	6	7	8
Food Security & Livelihoods indicators									
Source	Food source and $\Delta$ in food source	sustainable	any	peer	not sustainable	sustainable	peer	not sustainable	
		AND no change	AND better	AND no change	AND no change	AND worse	AND worse	AND worse	
		<i>Notes on Sustainable, Peer, Unsustainable:</i>		<i>Sustainable = Purchased, Cultivated, Livestock, Fishing</i>		<i>peer = NGO aid, Govt. aid, Family &amp; friends</i>		<i>Not sustainable = Foraging, Hunting, Barter, Other</i>	
<i>Notes on Better, No change, Worse:</i>		<i>Better = Change to Purchased, Own Production</i>		<i>No change = Not changed, Don't know</i>		<i>Worse = Change to Borrowed food, Food aid, Gifts, Barter, Wild foods</i>			
Availability of markets	Time taken to markets	Time to health centre < 15 minutes	15 < time < 30 minutes	30 < time < 60 minutes	1 < time < 3 hours	30 < time < 60 minutes	3+ hours < time	1 < time < 3 hours	3+ hours < time
		By any means of transport	By any means of transport	By any means of transport (except by foot or bicycle)	By any means of transport (except by foot or bicycle)	By foot or bicycle (except by foot or bicycle)	By any means of transport (except by foot or bicycle)	By foot or bicycle	By foot or bicycle
Sufficiency	Sufficient quantity of food for all	Yes						No	

	household members								
	Cereal stocks and skipped meals	(Stocks > 10 days AND No skipped meals)	(Stocks > 10 days AND Skipped meals)	(Stocks = 8-10 days AND No skipped meals)	(Stocks = 8-10 days AND Skipped meals)	(Stocks = 5-7 days AND No skipped meals)	(Stocks = 5-7 days AND Skipped meals)	(Stocks = 2-4 days)	(Stocks < 1 day)
Consumption	Food consumption score	Acceptable: FCS > 52	Acceptable: 52 < FCS > 42	Borderline: 42 < FCS > 35	Borderline: 35 < FCS > 28	Poor: 28 < FCS > 22	Poor: 22 < FCS < 15	Poor: 15 > FCS	
	Δ Consumption patterns	<i>Sum of the select_multiple following:</i>	<i>quantity increased +3 quality increased +2 variety increase + 1</i>	<i>no change +0</i>	<i>quantity decreased -3 quality decreased - 2 variety decreased - 1</i>				
		6	<= 5	<= 3	<= 1	<= -1	<= -3	<= -5	-6
Capacity	Capacity to safely prepare food	(Has water AND Has fuel AND Has utensils)	(Has water AND Has fuel AND Has no utensils)	(Has water AND Has no fuel AND Has utensils)	(Has water AND Has no fuel AND Has no utensils)	(Has no water AND Has fuel AND Has utensils)	(Has no water AND Has fuel AND Has no utensils)	(Has no water AND Has no fuel AND Has utensils)	(Has no water AND Has no fuel AND Has no utensils)
Cost (Not scored for MSNI)	Food expenditure	0-25% of total income		25-50% of total income	50-75% of total income		75-100% of total income		
	Δ Food expenditure	Decreased	Stayed the same		Increased				
Income	Livelihood incomes	Own business OR Contracted job OR Rent of land	Livestock production	Cash crop farming OR Cash fishing OR Daily labour	Subsistence farming OR Subsistence fishing OR Other	Humanitarian assistance OR Remittances	Sale of humanitarian assistance	None	

	Loss of income source	No	Yes			
Assets	Livelihood assets	Own livestock OR Access to cultivable land OR Able to access savings/financial services	No ownership of livestock OR No access to cultivable land OR No Ability to access savings			
	Loss of assets (livestock)	No losses	Loss < 25%	50% > Loss > 25%	75% > Loss > 50%	Loss > 75%
	Loss of assets (cultivable land)	No losses	Loss < 25%	50% > Loss > 25%	75% > Loss > 50%	Loss > 75%
Concerns	3 Main barriers to food access	Not scored for MSNI: Borda Count Approach				
Preferences	Main support required - food	Not scored for MSNI: Indicate 3 most cited responses with corresponding frequencies				

Concept	Indicators	None/ Minimal (1-2)		Stress (3-4)		Severe (5-6)		Extreme (7-8)	
		1	2	3	4	5	6	7	8
Protection indicators									
Freedom of movement	Ability to move freely and feeling of security	Able to move freely in and around surrounding areas	(Able to move freely in and around surrounding areas AND Areas where men and boys do not feel safe)	(Able to move freely in and around surrounding areas AND Areas where women and girls do not feel safe)	Not able to move freely in and around surrounding areas	(Not able to move freely in and around surrounding areas AND Areas where men and boys do not feel safe AND			

						Areas where women and girls do not feel safe)		
Family separation	Separation of adults and children	(No adults separated AND No children separated)	left_study or left_work	At least 1 adult separated	At least 1 child separated	(At least 1 adult separated AND 1 child separated)	-	-
Safety and security	Safety and security concerns	Never worried	Sometimes worried about theft/harassment	Sometimes worried about small/medium injuries	Always worried about theft/harassment OR Always worried about small/medium injuries	Sometimes worried about sexual violence OR Sometimes worried about grave injuries	Sometimes worried about landmines/UXOs OR Sometimes worried about abduction OR Sometimes worried about risk of death	Always worried about sexual violence OR Always worried about grave injuries OR Always worried about abduction OR Always worried about landmines/UXOs OR Always worried about risk of death
Hazardous work	Hazardous or exploitative work	(No adults engaged in hazardous work AND		At least 1 adult engaged in hazardous work	At least 1 child engaged in hazardous work	(At least 1 adult AND	-	-

		No children engaged in hazardous work)					1 child engaged in hazardous work)	-	-
Housing, land, and property	Land ownership and documentation	(Owns land AND Has documentation AND Can obtain/renew it)	(Owns land AND Has documentation AND Cannot obtain/renew it)	(Owns land AND Does not have documentation AND Can obtain/renew it)	(Owns land AND Does not have documentation AND Cannot obtain/renew it)	(Does not own land AND Has documentation AND Can obtain/renew it)	(Does not own land AND Has documentation AND Cannot obtain/renew it)	(Does not own land AND Does not have documentation AND Can obtain/renew it)	(Does not own land AND Does not have documentation AND Cannot obtain/renew it)
	HLP dispute resolution mechanisms, use and satisfaction	No HLP dispute	(Has HLP dispute AND Made use of resolution mechanism AND Satisfied with outcome)	(Has HLP dispute AND Not made use of resolution mechanism)	(Has HLP dispute AND Made use of resolution mechanism AND Not satisfied with outcome)				
	Land seizure	No land seizure			Land seized in previous location or area of origin				
Gender based violence	GBV referral pathways, awareness, use, and satisfaction	<i>For each indicator, if yes add 2, if dnk add 1, if no, add 0; the sum of the 3 indicators ranges from 0 to 6, where 6 is the best score and 0 the worst</i>							
	Recourse to justice	6	5	4	3	2	1	0	
		Police	Community leaders OR	UN or NGO agency OR				Armed group	No where to report OR

		Community elders	Health centre				Would not report	
Rule of law	Access and effectiveness of judicial remedy	<i>For each indicator, if yes add 2, if dnk add 1, if no, add 0; the sum of the 2 indicators ranges from 0 to 4, where 4 is the best score and 0 the worst</i>						
		4	3	2	1	0		
Rule of law	Recourse to justice	Police	Community leaders OR Community elders	UN or NGO agency OR Health centre		Armed group	No where to report OR Would not report	
		No		Yes		Yes AND No access to healthcare		
Child protection	Injuries to children	<i>For each indicator, if yes add 2, if dnk add 1, if no, add 0; the sum of the 3 indicators ranges from 0 to 6, where 6 is the best score and 0 the worst</i>						
	Child friendly spaces and protection services, availability, use, and satisfaction	6	5	4	3	2	1	0
Exploitation	Payment for or trading favours for humanitarian aid	<i>For each indicator, if yes add 2, if dnk add 1, if no, add 0; the sum of the 2 indicators ranges from 0 to 4, where 4 is the best score and 0 the worst</i>						Sexual and economic exploitation
		4	3	2	1	0		
Representation of women	Awareness of community-based organizations with women represented in decision-making	Yes	No					

Host-community IDP relations	Perception of relations between HC and IDP	Very good	Good	Bad	Very bad
Concerns	3 Main barriers to protection services	Not scored for MSNI: Borda Count Approach			
Preferences	Main support required - protection services	Not scored for MSNI: Indicate 3 most cited responses with corresponding frequencies			

Concept	Indicators	None/ Minimal (1-2)		Stress (3-4)		Severe (5-6)		Extreme (7-8)	
		1	2	3	4	5	6	7	8
Negative Coping Strategy indicators									
Negative Coping Strategy Index	Water	Borrow or share materials or borrow cash	Spend more time travelling/waiting (secure areas)	Reduce domestic water consumption	Adults work extra shifts/jobs	Send children to fetch water	Reduce drinking water consumption	Adult members beg	Drink unsafe water
		OR		OR	OR	OR	OR	OR	OR
		None		Rely on seasonal water sources	Use money otherwise used for other purchases	Sell assets otherwise used for other purposes	Adults reduce consumption so that minors can drink	Minors work	Minors beg
				Rely on humanitarian assistance				OR	OR
						Travel/Move to insecure or dangerous areas		Sexual, economic exploitation to access humanitarian assistance	

Sanitation	None	Share facilities with other households	Use facilities which are unhygienic/not cleaned	Use money otherwise used for other purchases	Only use facilities at night or non-segregated latrines	Travel/Move to insecure or dangerous areas	Open defaecation	
		OR	OR				OR	
		Spend more time travelling/waiting (secure areas)	Rely on humanitarian assistance				Sexual, economic exploitation to access humanitarian assistance	
Hygienic materials	Wash clothes with soap substitutes	Wash hands with soap substitutes	Wash hands or menstrual materials less frequently	Adults work extra shifts/jobs	Sell assets otherwise used for other purposes	Use latrines for bathing purposes	Do not use menstruation materials	Do not wash hands at all
	OR	OR	OR	OR		OR	OR	OR
	Borrow or share materials or borrow cash	Wash menstrual materials with soap substitutes	Do not clean/re-use menstruation materials	Use money otherwise used for other purchases		Do not wash hands with soap	Adult members beg	Minors beg
	OR	OR	OR				OR	OR
	None	Spend more time travelling/waiting (secure areas)	Rely on humanitarian assistance			Minors work	Sexual, economic exploitation to access humanitarian assistance	
						OR	OR	
						Travel/Move to insecure or dangerous areas		

		Borrow or share materials or borrow cash	Rely on less preferred and less expensive foods	Rely on humanitarian assistance	Borrow food or rely on help from friends or relatives	Limit portion size at mealtime	Reduce number of meals eaten in a day	Adult members beg	Minors beg
		OR	OR		OR	OR	OR	OR	OR
	Food	None	Spend more time travelling/waiting (secure areas)		Send children to relatives	Sell assets otherwise used for other purposes	Restrict consumption by adults in order for children to eat	Minors work	Sexual, economic exploitation to access humanitarian assistance
					OR			OR	
					Adults work extra shifts/jobs			Travel/Move to insecure or dangerous areas	
					OR				
					Use money otherwise used for other purchases				
		Borrow or share materials or borrow cash	Spend more time travelling/waiting (secure areas)	Being hosted by other households	Move from shelter to shelter	Move to unplanned settlements		Adult members beg	Live in open-air conditions
		OR		OR	OR	OR		OR	OR
	Shelter	None		Scavenge for construction materials	Send children to relatives	Squat: Using empty building, school		Minors work	Minors beg
				OR	OR	OR		OR	OR
				Rely on humanitarian assistance	Adults work extra shifts/jobs	Sell assets otherwise		Travel/Move to insecure or	Sexual, economic exploitation to

						used for other purposes	dangerous areas	access humanitarian assistance
					OR Use money otherwise used for other purchases			
Non-Food Items	Borrow or share materials or borrow cash	Spend more time travelling/waiting (secure areas)	Rely on humanitarian assistance	Adults work extra shifts/jobs	Sell assets otherwise used for other purposes	Scavenge for NFI materials	Adult members beg	Minors beg
	OR			OR			OR	OR
	None			Use money otherwise used for other purchases			Minors work	Sexual, economic exploitation to access humanitarian assistance
							OR Travel/Move to insecure or dangerous areas	
Education	Borrow or share materials or borrow cash	Peer learning	Home schooling	Adults work extra shifts/jobs	Sell assets otherwise used for other purposes		Adult members beg	Minors beg
	OR	OR	OR	OR			OR	OR
	None	Part-time schooling	Rely on humanitarian assistance	Use money otherwise used for other purchases			Minors work	Sexual, economic exploitation to access humanitarian assistance

			OR Spend more time travelling/waiting (secure areas)				OR Travel/Move to insecure or dangerous areas	
Healthcare	Borrow or share materials or borrow cash	Spend more time travelling/waiting (secure areas)	Rely on humanitarian assistance	Self-medicate	Seek treatment or service from unqualified workers	Do not seek treatment or healthcare	Minors beg	
	OR None			OR Adults work extra shifts/jobs	OR Sell assets otherwise used for other purposes	OR Adult members beg	OR Sexual, economic exploitation to access humanitarian assistance	
				OR Use money otherwise used for other purchases		OR Minors work		OR Travel/Move to insecure or dangerous areas

**Note: Cells highlighted in orange indicate sufficient conditions; i.e. if a household falls within that category it is accorded that score irrespective of its score on any other indicators for that section.**
