About REACH Initiative

REACH facilitates the development of information tools and products that enhance the capacity of aid actors to make evidence-based decisions in emergency, recovery and development contexts. All REACH activities are conducted through inter-agency aid coordination mechanisms.

For more information, you can write to our in-country office: yemen@reach-initiative.org. You can view all our reports, maps and factsheets on our resource centre: reachresourcecentre.info, visit our website at reach-initiative.org, and follow us [@REACH_info](https://twitter.com/REACH_info).

Introduction

The IDP Hosting Site Baseline Assessment aims to support targeting and response planning by humanitarian stakeholders, including authorities, UN agencies, local and international non-governmental organisations (NGOs). It provides a baseline of key multi-sectoral indicators across IDP hosting sites in 22 governorates, based on data collected through interviews with key informants in each site. The baseline assessment will help to inform the site management support which will be offered to the local authorities and humanitarian actors in charge of IDP hosting sites, as well as the support which will be offered to IDPs to establish self-governance, community participation and communication processes within IDP hosting sites.

The IDP Hosting Site Baseline Assessment is organised and supported by the Shelter / NFI / CCCM Cluster coordination team and cluster partners engaged in the activity. The data collection for the baseline assessment has been carried out by the International Organisation for Migration (IOM) in 18 governorates and the office of the United Nations High Commissioner for Refugees (UNHCR) in 4 governorates.

Once the baseline of current sites is finalised, its updates will be carried out every six months to cover newly established sites. Monitoring of the sites identified through the baseline and its updates will be carried out continuously. The information generated over time through monitoring data collection will provide an indication of structural and sectoral changes in the conditions of the sites.

REACH supports the Shelter / NFI / CCCM Cluster in data analysis and output production. A core set of products created as a result of the data collection exercises includes:

1. Summary report - Overview of key indicators and comparative analysis of sites to identify those in most urgent need;
2. Site Profiles - Produced for each site with relevant sectoral information;
3. Site Maps - Maps showing site location and characteristics.

This report presents findings from ten governorates - Abyan, Aden, Al Dhale'e, Al Maharah, Hadramaut, Ibb, Lahj, Shabwah, Socotra, Taizz - based on data collected between June and August 2017 by IOM during the second stage of the baseline assessment.

Methodology

The assessment has been conducted across 22 governorates, in IDP hosting sites of five or more IDP households, where assistance and protection services can be delivered collectively. To identify sites, TFPM Area Assessments¹ and a Cluster site list have been used. Sites on the list have been visited by enumerators and included in the assessment if they hosted five or more IDP households. The assessment covers both rural and urban settings and aims to assess every IDP hosting site in Yemen. However, new sites are being identified, while some settlements do not exist anymore. Therefore, findings refer to identified sites, with new sites being added into or removed from later data collection rounds.

Data has been collected through interviews with one to five key informants in each site. Key informants included site managers, members of site committee, sheikhs, mosque imams, community leaders or in the absence of any formal leaders – randomly chosen IDP households, who answered on behalf of all households in the site. Consequently, findings reflect the informed perspectives of these key informants and should be considered only indicative. However, the estimates provided by the informants offer a reliable indication of the situation within the settlements.

¹ The Task Force for Population Movement (TFPM), co-led by IOM and UNHCR is a Technical Working Group of the Yemen Protection Cluster. The TFPM implements an information management tool that gathers data on the status and location of displaced persons across Yemen. <http://www.globaldtm.info/category/middle-east-and-north-africa/yemen/>

Definitions

For the purpose of data collection, the Yemen Shelter / NFI / CCCM Cluster identifies each concentration of displaced population according to the following categories:

- **Location** – a populated place in the smallest geographical division: a neighbourhood in urban area and a village in rural area.
- **Site** – a location inhabited by five or more households regardless of its accommodation and shelter type. In cases of multiple housing units hosting five or more households each, having the same shelter type and sharing one basic service unit, a single data collection form shall be applied. Basic service units include latrines, water points or cooking facilities.
- **Individual settlement** – a population concentration hosting less than five households within one location (see above). Individual settlements are not included in this exercise.

Displacement sites are divided into two categories:

- **Collective Centre** – a displacement site in a pre-existing physical structure, either public/communal (e.g. public buildings, schools) or private buildings (e.g. factories, private houses) inhabited by five or more IDP households;
- **Spontaneous Settlement** - groups of tented or other types of housing units inhabited by five or more IDP households established by the IDPs themselves or by non-experienced actors on land they have no legal claim to. The IDPs intend to stay in this settlement for an extended period of time.

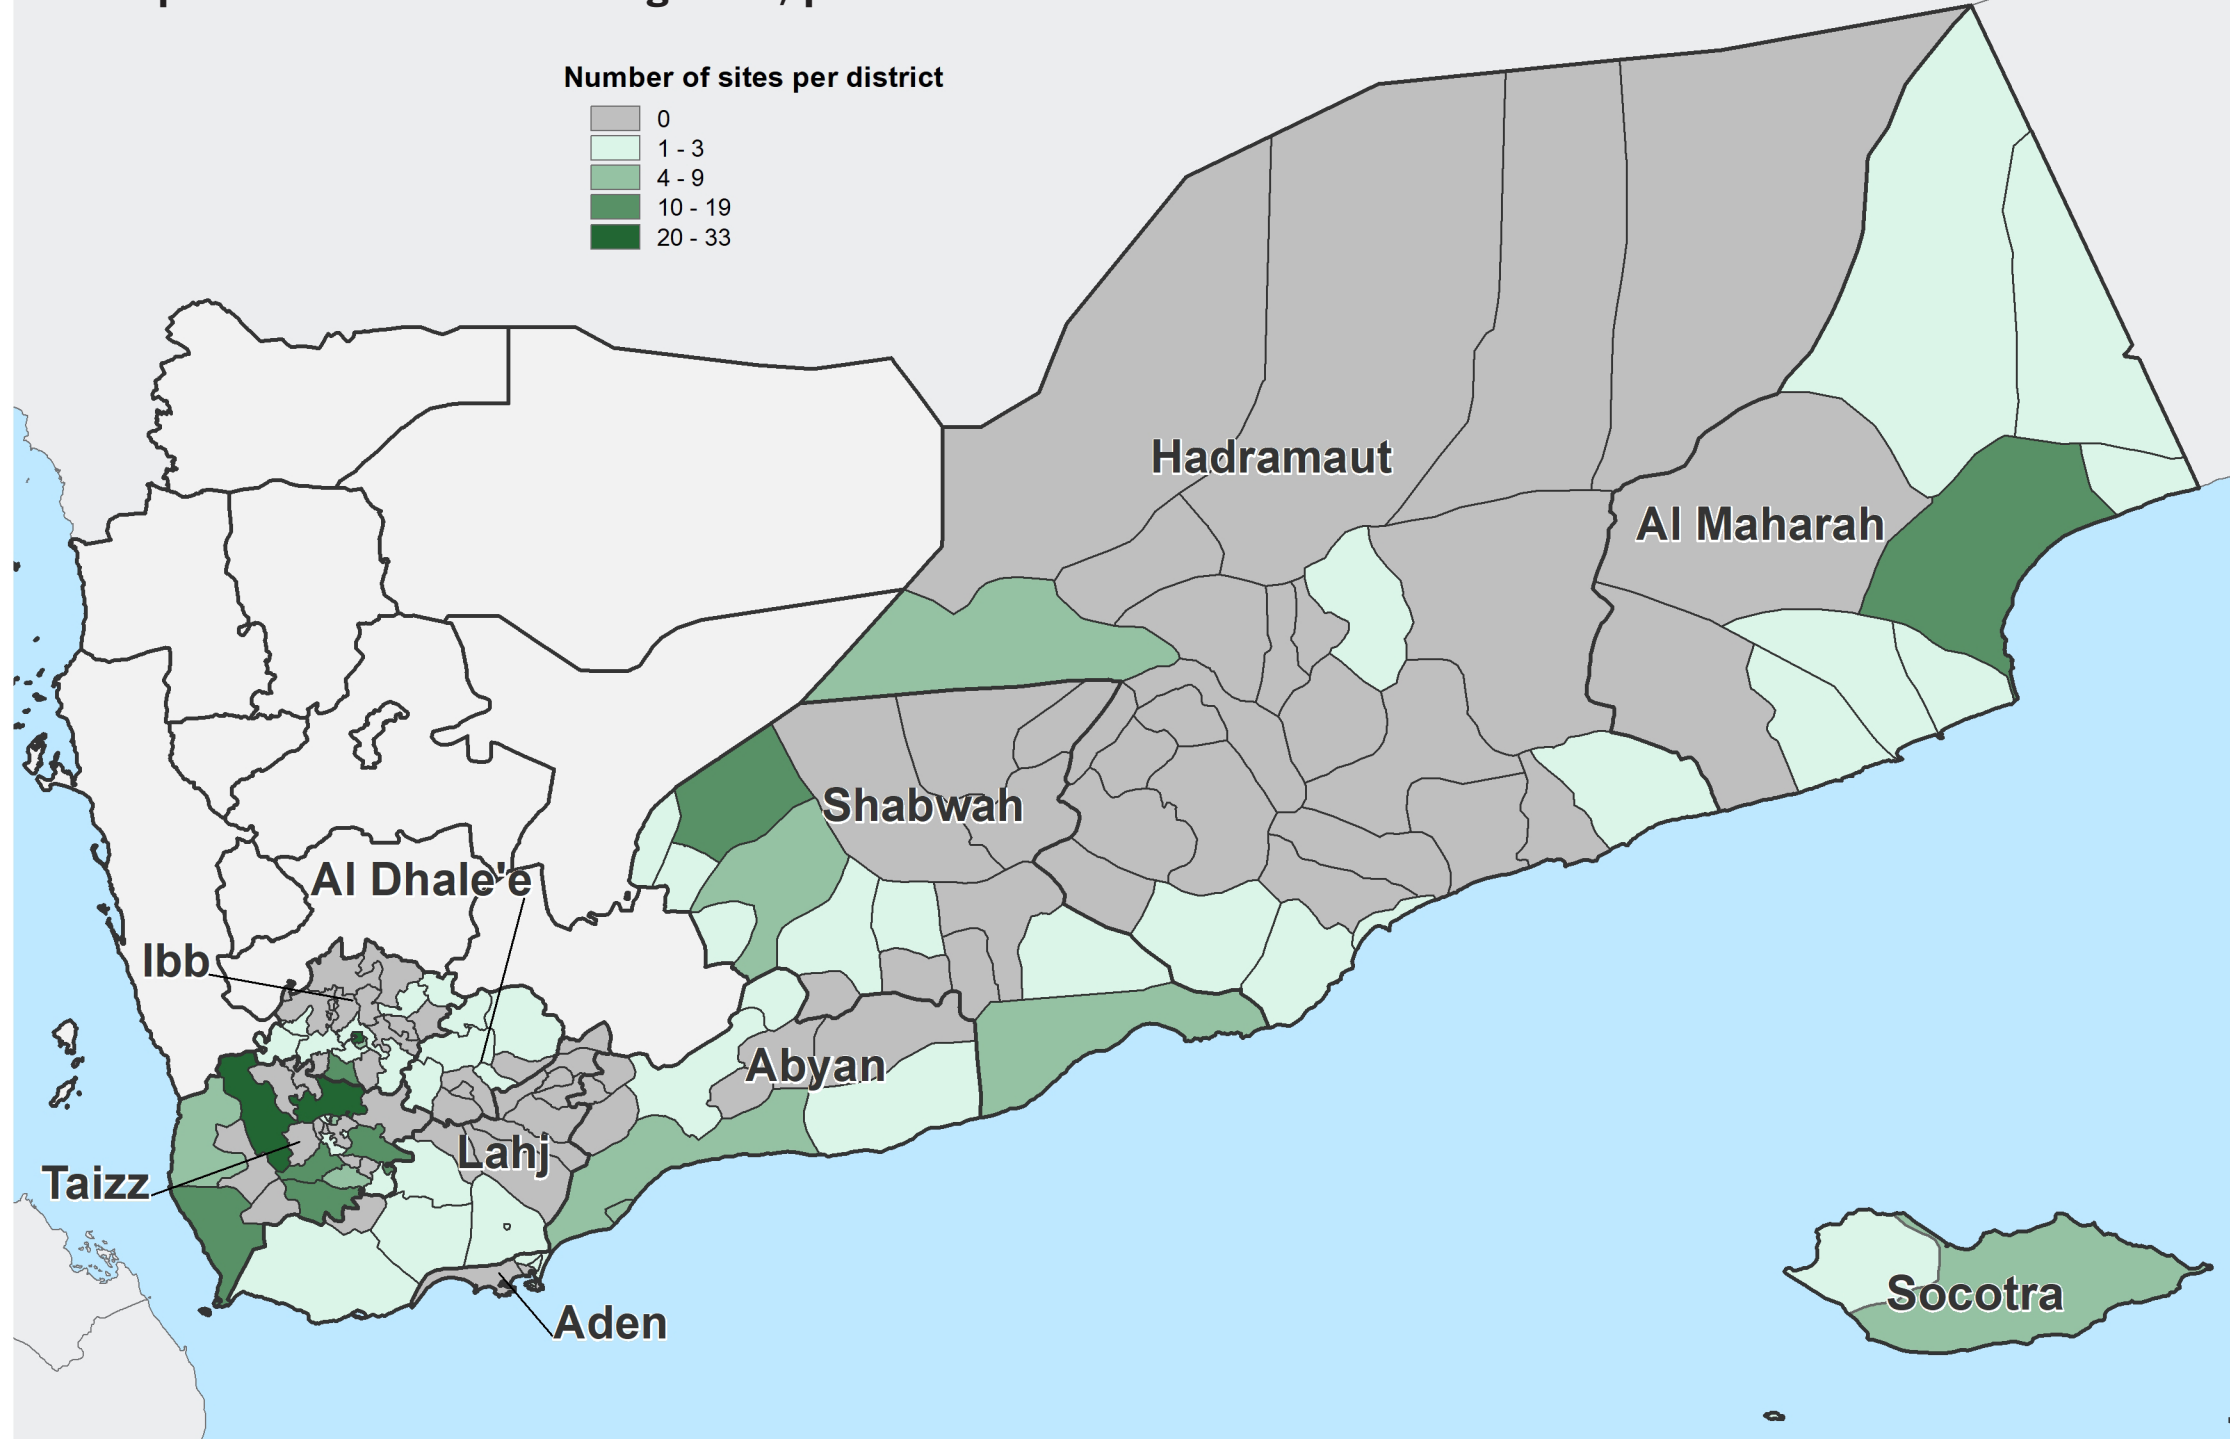

The following type and status of shelter structures present in displacement sites has been agreed:

- **Makeshift shelter** - typically built from waste and temporary materials (tarpaulins, cardboard, blankets, metal sheeting, tarps, etc.);
- **Emergency shelter** - a portable shelter with a cover and a structure;
- **Finished building** - a building which is completed (with walls and roof) and composite of all building components (windows, doors, plumbing, etc.);
- **Unfinished building** - a building which has more than its frame, but is still missing elements (i.e. doors, windows, lighting, plumbing, walls, etc.);
- **Skeleton** - a building which has a solid frame (concrete, steel, etc.) but no other elements;
- **Open air** - no structure present.

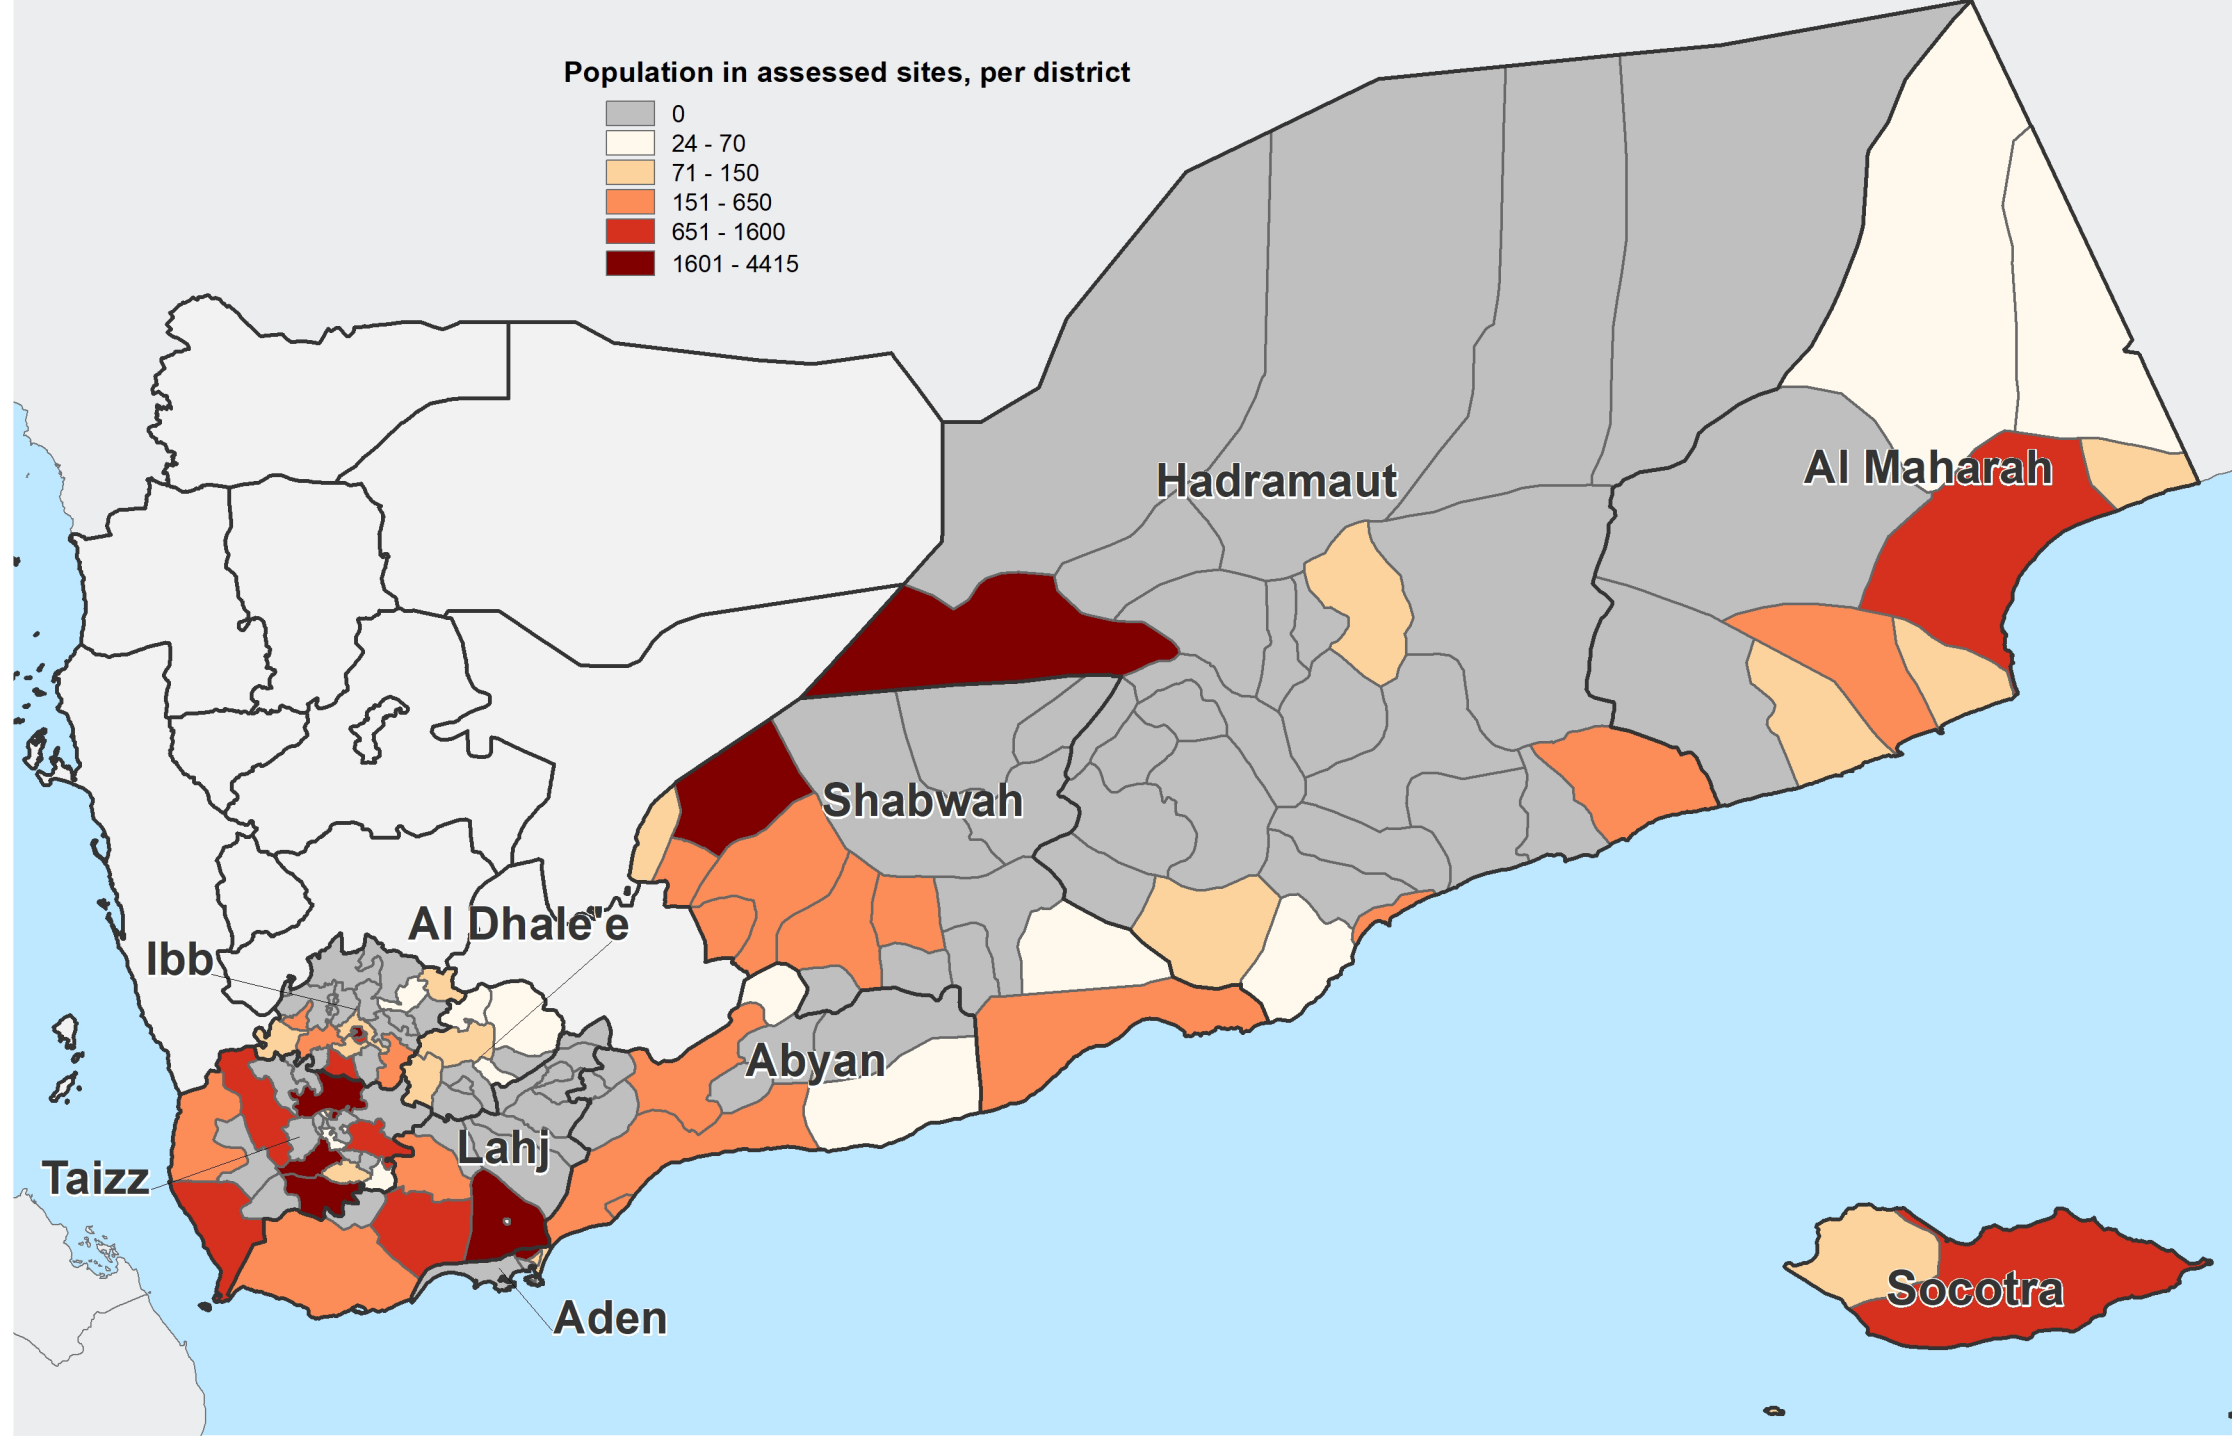

Other definitions:

- **Unhygienic facilities** – Facilities that are not sanitary and do not respect minimum standards of cleanliness or that may cause disease.
- **Functioning facilities** – Facilities that continue to fulfil the purpose for which they were constructed or provided.
- **Private (site, services or facilities)** – Site belonging to, controlled by or for the use of one particular person, group of people or commercial company only and not owned by or connected with the government. Services or facilities provided by a particular person, group of people or commercial company.
- **Public (site, services or facilities)** – Site belonging to, controlled by or for the use of the entire population rather than a particular individual/group. Services or facilities provided by the government.

IDP Hosting Site Profile - Ambsaty (أمبسطي)

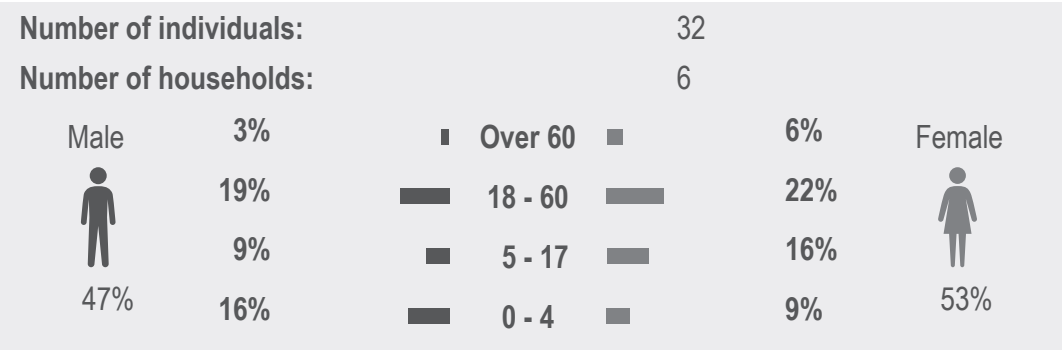

Ambsaty, Ahwar District, Abyan Governorate, Yemen

Baseline Assessment, June 2017

Site ID: YE1209-426

This profile provides an overview of conditions in the IDP Hosting Site Ambsaty, Ahwar district, Abyan governorate in Yemen. Information presented here was collected from key informant(s) from the site during the IDP Hosting Sites Baseline Assessment organised and supported by the Shelter / NFI / CCCM Cluster coordination team and cluster partners engaged in the activity.

Demographics

CCCM

Site type:	Collective center
Site first occupied:	4/1/15
Site management type:	None
Site committee established:	No
Main source of information for IDPs:	Radio

Shelter/NFI

Proportion of households living in each shelter type:	
Open air:	0%
Emergency shelter:	0%
Makeshift shelter:	70%
Unfinished building:	0%
Finished building:	30%
Issues present in the buildings (finished/unfinished):	
Broken windows/leaking roof:	Yes
Lack of heating:	No
Lack of lighting:	No
Presence of vector:	Yes
Unhygienic washing facilities:	No
Damp:	No
Not secure:	No
Not enough space/privacy:	Yes
Type of separation in most family units:	Not separated
Main NFI items needed in the site:	
Plastic sheeting/tarpaulin:	Yes
Blanket/mattress:	Yes
Water bucket/jerry can:	No
Kitchen utensils:	No
Soap:	No
Other:	No

Food Security

A majority of the site residents eat 3 meals a day:	No
Food market within 30 min by foot (one way):	Yes
Source(s) of food for residents of the site:	
Purchased by IDPs with personal cash:	Yes
Home grown:	No
Bartered by IDPs for other goods:	No
Donation from the host community:	No
Distribution by authorities:	No
UN or NGO distributions:	No
Private sector charity:	No

WASH

Access to water in the site: Little to no problem	
Primary water source: Piped water into dwelling	
Secondary water source(s):	
Piped water into dwelling:	No
Piped water connected to public tap:	Yes
Illegal connection to piped network:	No
Connection directly from borehole:	No
Dug well / spring protected:	No
Dug well / spring unprotected:	No
Rainwater tank protected:	No
Rainwater tank unprotected:	No
Water trucking:	No
Bottled water:	No
Surface water:	No
Bathing and sanitation facilities:	
Population with access to bathing facilities:	Everyone has access
Total number of showers:	12 (3 person per shower)
Population with access to sanitation facilities:	Everyone has access
Total number of latrines:	12 (3 persons per latrine)

Health

Primary healthcare provider in the site:	
General care:	Private (IDPs are paying)
Pregnant and lactating women:	Government
Doctor/nurse visiting the site: No	
Outbreak of diarrhoea reported: Yes	

Education

Proportion of boys under 15 getting primary education:	Majority
Proportion of girls under 15 getting primary education:	Few
Primary school within 30 min by foot (one way):	Yes

Protection

Tenancy arrangement:	
Site owner:	Owner not known
Type of agreement with the owner:	N/A
Cost of rent:	0
Risk of eviction:	No
Risks associated with the site:	
Electrical concerns:	Poor wiring, Hanging out wiring
Risk of mines, UXOs, ERWs:	No
Presence of vulnerable persons in the site:	
Female heads of household:	1
Elderly heads of household:	1
Unaccompanied or separated children:	0
Pregnant or lactating women/girls:	3
Persons with chronic illness:	1
Persons with physical disability:	0
Persons with mental disability:	1

IDP Hosting Site Profile - Al Hadeej (الحديج)

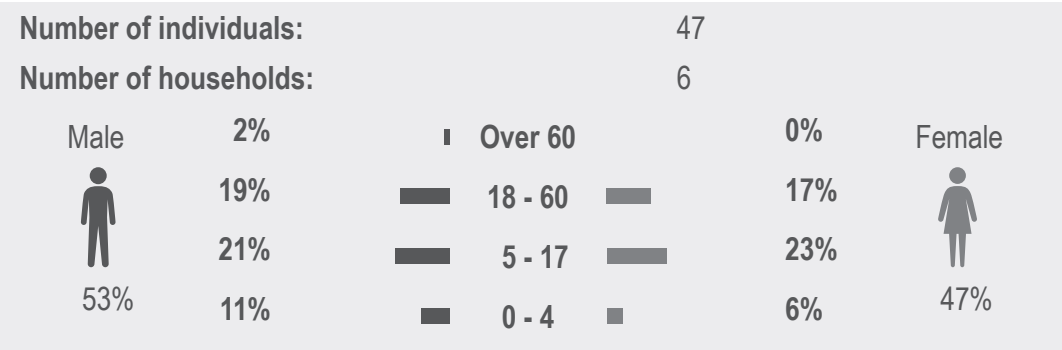

Al-Hadeij, Jayshan District, Abyan Governorate, Yemen

Baseline Assessment, June 2017

Site ID: YE1203-425

This profile provides an overview of conditions in the IDP Hosting Site Al Hadeej, Jayshan district, Abyan governorate in Yemen. Information presented here was collected from key informant(s) from the site during the IDP Hosting Sites Baseline Assessment organised and supported by the Shelter / NFI / CCCM Cluster coordination team and cluster partners engaged in the activity.
