# Multi-Sector Needs Assessment (MSNA)

Ejdabia November 2018

### **LIBYA**

#### CONTEXT AND METHODOLOGY

As the Libyan crisis enters its eighth year, episodic clashes between a multiplicity of armed actors continue to affect several regions, with an estimated 1.62 million displaced and non-displaced people affected in 2017<sup>1</sup>. From 1 January - 31 October 2018, UNSMIL documented at least 175 civilian deaths and 335 injuries<sup>2</sup>. The crisis in Libya is the result of conflict, political instability and a vacuum of effective governance, resulting in a further breakdown of functioning systems with considerable security, rule of law, social and economic consequences3. The most pressing humanitarian needs identified in the 2018 Humanitarian Needs Overview (HNO) are protection, health and cash & livelihoods4, though as the humanitarian situation evolves, the strategies adopted by households to meet their needs remain underexplored.

In light of continued knowledge gaps, with facilitation from REACH, the Inter-Sector Coordination Group conducted a multisector data collection exercise between 23 July and 6 September 2018 to provide updated information on the needs of affected populations in Libya and to inform the 2019 HNO process. Findings are generalisable at mantika<sup>5</sup> level for each assessed population group with a confidence level of 95% and a margin of error of 10% (unless stated otherwise). Please see annex for more details.

#### **ASSESSMENT COVERAGE**

		All Mantikas	Ejdabia
	Non-displaced HHs	2,449	122
	IDP HHs	1,691	97
	Returnees HHs	1,212	56
	Total HHs	5,352	275

#### **SECTORAL AND MULTISECTORAL NEEDS**

#### HHs with an unmet need in:

1 sector	30.6%
2 sectors	12.1%
3 sectors	1.9%
4 sectors	0.2%
5 sectors	0.0%
6 sectors	0.0%

#### HHs with an unmet need, per sector:

Food security	0.7%
Health	15.7%
Shelter and NFIs	1.7%
Protection	19.6%
WASH	14.7%
Education	7.6%

Azzawya Aljfara Zwara	Tripoli	Al Jabal Al Akhdar Almari Der Benghazi	
Wadi Ashshati  Whati Ghat	Aljufra Sebha	Ejdabia	Tobruk
% of households with unmet need in 3 or more sectors	Murzug	Alkufra	
21 - 30 % 10 - 20 % 10 - 20 % 3 - 5 % 0 - 2 % Focus // Unassessed mantikas		CHAD	SUDAN

### **THIS DEMOGRAPHICS**

#### Proportion of assessed households by baladiya:

74.8%	Ejdabia
11.6%	Albrayga
6.9%	Jalu
6.8%	Other

#### % of HHs hosting displaced persons, per population group:

Non-displaced	<b>∱</b> → IDPs	Returnees
0.0%	3.1%	0.0%

of HHs were hosting displaced persons. Out of those, the average number of hosted persons per HH was 1.7 persons<sup>6</sup>.

**4.9%** of head of households (HoHs) were above 65 years old.

#### Age distribution of HH members per population group:

	Non-displaced	<b>∱</b> → IDPs	
0-5	15.1%	10.6%	13.6%
6-14	22.6%	18.1%	29.7%
15-17	8.5%	8.4%	11.8%
18-64	48.4%	53.6%	44.9%
65+	5.4%	9.3%	0.0%

#### % of HHs reporting the following vulnerable members:

22.4%	Chronically ill persons
0.0%	Unaccompanied children

### **∱**√∱ DISPLACEMENT

#### % of HHs by number of times displaced:

71.1%	Displaced once
25.0%	Displaced twice
2 00/	Displaced three

3.9% Displaced three times or more

#### Top 3 mantikas of origin of IDPs:

31.2%	Ejdabia
27.3%	Benghaz
16.9%	Sirt
24.6%	Other

### Push factors: Top 3 reasons why household left area of origin, per population group<sup>7</sup>:

<b>∱</b> → IDPs		
Dwelling being destroyed		43.3%
Insecurity or conflict in the area of origin		28.9%
Threats of violence against HH		19.6%
<b>∱</b> Returnees		
Evicted from dwelling		57.1%
Insecurity or conflict in the area of origin		37.5%
Dwelling being destroyed	T	1.8%

#### Main reasons for IDP HHs not to return to their area of origin:

### Pull Factors: Top reason why HHs chose to move to/come back to this area specifically per population group<sup>7</sup>:

	<b>∱</b> → IDPs	
Presence of friends or family		48.5%
Presence of HH's community		42.3%
Safer environment		36.1%
	<b>№</b> Returnees	
Presence of HH's community		75.0%
Presence of friends or family		60.7%
End of conflict		41.1%

#### Top 3 reported problems faced upon return to area of origin:

2	Parts of house or property destroyed
---	--------------------------------------

3 Lack of security in area

### FOOD SECURITY

## Households with an unmet need in the food security sector:

\_\_\_\_\_ 0.7%

% of HHs having the following food security (using WFP CARI methodology), per population group<sup>8</sup>:

Food secure
Marginally food insecure
Moderately food insecure
Severely food insecure

Non-displaced	<b>∱</b> → IDPs	
65.1%	43.8%	62.0%
22.3%	51.6%	34.0%
12.7%	4.7%	4.0%
0.0%	0.0%	0.0%

Ways of accessing food, per population group:

	Non-displaced	<b>∱</b> → IDPs	
Market (cash)	96.1%	88.7%	100.0%
Market (cheque)	90.2%	88.7%	98.2%
Market (debt)	63.3%	59.8%	89.3%
Own production	26.1%	4.1%	3.6%
Borrowing from relatives	0.3%	3.1%	0.0%
Aid assistance	0.0%	0.0%	0.0%
Gifts from relatives	1.0%	8.2%	0.0%
Zakat <sup>9</sup>	0.0%	10.3%	0.0%
Work or barter for food	0.6%	7.2%	0.0%

### Average Reduced Coping Strategy Index (rCSI) per population group8:

	Non-displaced	<b>├</b> → IDPs	Returnees
Average rCSI	4.9	2.7	6.9
Low use of coping strategies (0-3)	61.9%	67.9%	51.8%
Medium use of coping strategies (4-9)	17.2%	25.6%	17.9%
High use of coping strategies (10+)	20.8%	6.4%	30.4%

Average number of times per week HHs were engaged in each of the following food-related coping strategies:

2.0	Rely on less preferred,
2.0	less expensive food

0.6 Reduce the size of portions or meals

0.2

0.4 Borrow food or rely on help from relatives

Reduce the quantity consumed by adults so children could eat

0.7 Reduce the number of meals eaten per day

% of HHs engaged in the following types of coping strategies in the 7 days prior to data collection<sup>10</sup>:

55.9% 10.5% 32.5% 1.0% None Stress strategies Crisis strategies Emergency strategies

of HHs reported being engaged in any form of agricultural production (crop farming, gardening, raising livestock or fishing) at the time of data collection.

### **\* HEALTH**

## Households with an unmet need in the health sector:

**-**\_\_\_\_\_ 1

19.6% of HHs reported needing healthcare in the 15 days prior to data collection.

**91.9%** of these HHs reported having been to a health facility to access the needed healthcare<sup>6</sup>.

#### Top 3 barriers to accessing healthcare, per population group<sup>67</sup>:

∄ Non-	-displaced	Ż.	→ IDPs	<b>∳</b> > F	Returnees
58.3%	Lack of medical supplies	45.5%	Lack of medical supplies	66.7%	Distance too long to health center
52.9%	No or lack of money to pay for care	45.5%	No or lack of money to pay for care	66.7%	Lack of medical supplies
28.6%	Distance too long to health center	27.3%	Distance too long to health center	-	-

**5.2%** of HHs reported travelling for more than one hour to access the nearest health service provider.

**57.4%** of children were reported as having a vaccination card.

### % of HHs reporting chronic disease<sup>11</sup>, mental disorder or physical disability, per population group:

	Non-displaced	<b>∕</b> → IDPs	Returnees
Chronic disease	21.5%	27.8%	8.9%
Mental disorder	0.0%	0.0%	0.0%
Physical disability	7.7%	4.1%	0.0%

#### Main chronic diseases reported by HHs<sup>6</sup> 11:

Diabetes	78.9%
Blood pressure	76.9%
Joint pain (arthritis)	16.7%

95.6% of HHs with at least one child under 2 years old reported having access to professionnal healthcare during delivery.<sup>6</sup>

### CASH AND MARKETS

Median reported total estimated HH income in the 30 days prior to data collection<sup>12</sup>:

Non-displaced	<b>↑</b> → IDPs	Returnees
800 LYD	850 LYD	700 LYD

Average share of total income received from the following sources in the 30 days prior to data collection<sup>12</sup>:

Own business income	4.7%
Salaried work	1.0%
Government salary	80.8%
Remittances	0.0%
Casual labour	0.4%
Government social benefits	13.0%
Support from family and friends	0.0%
Humanitarian assistance	0.0%
Zakat <sup>9</sup> or charitable donations	0.0%

**90.2%** of adults being employed were reported as being employed in the government or the public sector.

### Top 3 reported challenges to accessing money in the 30 days prior to data collection, per population group<sup>7</sup>:

∯ Noi	n-displaced		<b>│</b> → IDPs	χ̈́э	Returnees
92.5%	Unable to withdraw enough money from bank account	86.7%	Unable to withdraw enough money from bank account	92.3%	Salary or wages not paid regularly
44.8%	Salary or wages not paid regularly	61.7%	Salary or wages not paid regularly	76.9%	Unable to withdraw enough money from bank account
43.1%	Salary or wages too low	36.7%	Salary or wages too low	61.5%	Salary or wages too low

#### Main reported modalities for HH expenditure, per population group<sup>7</sup>:

<b>∄</b> Non	-displaced	2	<b>└</b> → IDPs	ζ̈́o	Returnees
76.4%	Cheques	64.9%	Cheques	75.0%	Cheques
14.3%	Hard cash (LYD)	30.9%	Hard cash (LYD)	21.4%	Hard cash (LYD)
7.4%	Bank transfers	2.1%	Bank transfers	3.6%	Bank transfers

68.2% of HHs were unable to withdraw money from banks or ATMs in the 30 days prior to data collection.

Of HHs having been able to withdraw money, reported withdrawals in the 30 days prior to data collection, per population group:

	Non-displaced	<b>∱</b> → IDPs	Returnees
< 300 LYD	0.0%	7.1%	0.0%
300 - 599 LYD	78.4%	60.7%	89.5%
600 - 999 LYD	19.0%	25.0%	10.5%
> 1000 LYD	2.6%	7.1%	0.0%

#### Top 3 reported barriers to accessing marketplaces:

- No barriers faced when accessing marketplace
- Marketplace never open at a time when visit is possible
- Marketplace too far from residency/no means of transport

### **SHELTER AND NFIs**

## Households with an unmet need in the shelter sector:

\_\_\_\_ 1.7%

% of HHs reported living in each shelter type:

93.1% 3.2% 2.4%

House Apartment Camp % of HHs reported living in each shelter occupancy arrangement, per population group:

Ournership	Non-displaced	7.→ IDPs 33.0%	Returnees 100.0%
Ownership	09.4%	33.0%	100.0%
Rental (with written contract)	1.2%	9.3%	0.0%
Rental (with verbal agreement)	1.6%	49.5%	0.0%
Being hosted for free	5.5%	7.2%	0.0%
Squatting (without consent of owner)	0.0%	0.0%	0.0%
Housing provided by public authority	0.4%	0.0%	0.0%

#### % of housing with reported damage<sup>13</sup>, per population group:

	Non-displaced	<b>∱</b> → IDPs	Returnees
No damage	89.9%	96.9%	98.2%
Light damage	10.1%	3.1%	1.8%
Medium damage	0.0%	0.0%	0.0%
Heavy damage	0.0%	0.0%	0.0%
Destroyed	0.0%	0.0%	0.0%

HHs threatened with eviction in the 6 months prior to data collection, per population group:

<b><sup>↑</sup> Non-displaced</b>	<b>़ी→</b> IDPs	🔑 Returnees
0.2%	2.1%	0.0%

1.0% of HHs reported having been evicted in the 6 months prior to data collection.

Reported average number of hours of power cuts in the 7 days prior to data collection:

0-2h		9.7%
3-5h		86.5%
6-8h	1	3.9%
9-11h		0.0%
12-14h		0.0%
> 14h		0.0%

% of HHs reporting having access to vehicle fuel:

% of HHs reporting having access to cooking fuel:

**4.7%** of HHs reported irregular or no access to heating fuel when required.

### **PROTECTION**

## Households with an unmet need in the protection sector:

**-** 19.6%

**8.1%** of HHs reported presence of explosive hazards in their currrent area of residence.

**9.9%** of HHs reported having family member harmed as a result of UXO.

of HHs reported having been made aware of the risk of explosive hazards through awareness campaigns in their area.

Of HHs having received information on hazards from UXO, reported sources of information<sup>67</sup>:

- Presentation or briefing
- Posters, flyers or other printed material
- 3 School

% of HHs having lost ID or other documentation during the conflict, per population group:

<b><sup>↑</sup> Non-displaced</b>	<b>∱</b> → IDPs	Returnees
0.3%	4.1%	8.9%

**100.0%** of HHs having lost ID or other documentation had reapplied for new documentation<sup>6</sup>.

Of HHs having lost documentation, reported challenges due to lack of documentation<sup>67</sup>:

Education access		34.8%
Healthcare access		33.8%
Government assistance		36.6%
NGO assistance		18.8%
Property access	1	0.9%
Movement or travel		44.6%

**0.5%** of HHs reported having a missing family member.

## Households with an unmet need in the WASH sector:

**-** 14.7%

Main reported sources of drinking water, per population group:

<b>Non</b>	n-displaced	2	<b>N→</b> IDPs	<b>A</b> >	Returnees
59.8%	Public network	92.8%	Public network	92.9%	Public network
28.4%	Bottled water	7.2%	Bottled water	3.6%	Water trucking
6.3%	Other	0.0%	Other	1.8%	Protected well

#### Top 3 reported types of water treatment<sup>7</sup>:

Water filters	71.2%
No treatment methods used	15.0%
Disinfection (tablets, iodine,)	9.1%

MSNA I LIBYA Ejdabia

% of HHs unable to obtain enough drinking water during the month prior to data collection, per population group:

 Non-displaced
 ♠ IDPs
 ♠ Returnees

 14.8%
 13.4%
 32.1%

**7.2%** of HHs reported not accessing designated services for waste disposal in the 30 days prior to data collection.

2.2% of HHs reported that hygiene items were too expensive to afford.

**0.0%** of HHs reported that hygiene items were unavailable in the markets.

#### **EX** EDUCATION

## Households with an unmet need in the education sector:

\_\_\_\_\_ 7.6%

95.7% of children out of the total number of school-aged children were enrolled in school.

Percentage of children in HHs not regularly attending school, per population group:

Non-displaced	<b>八→</b> IDPs	Returnees
0.0%	0.0%	0.0%

Main reasons for not regularly attending school or having dropped out of school<sup>67</sup>:

	Non-displaced	<b>∱</b> → IDPs	
1	No quality education or lack of qualified teachers	No quality education or lack of qualified teachers	School facilities damaged or used for other purposes
2	Can't afford school fees	-	No quality education or lack of qualified teachers
3	Can't afford to pay for education materials or uniforms	-	Poor performance or dismissed

### % of HHs with school-aged children attending non-formal educational programmes:

13.2% Remedial classes

3.0% Catch-up classes

**34.8%** of HHs having lost documentation reported it affected their access to education.<sup>6</sup>

### **ASSISTANCE**

**5.8%** of HHs reported receiving humanitarian assistance during the 6 months prior to data collection.

#### Modality of assistance:

Received in the 6 months prior to data collection<sup>67</sup>:

In-kind	50.6%
Mixed (in-kind and cash/voucher)	49.4%

#### Preferred in the future:

Cash (bank transfers, e-transfers) or voucher	35.6%
Do not wish to receive assistance	21.7%
Mixed (in-kind and cash/voucher)	21.0%

### Top 3 types of information HHs would like to receive from aid providers7:

The security situation in current location

How to get more money/financial support

How to get healthcare/medical attention

60.1%

30.4%

- Libya Humanitarian Needs Overview, OCHA, 2018
- UNSMIL, Human Rights Report on Civilian Casualties, 2018
- 3 <a href="https://www.unocha.org/middle-east-and-north-africa-romena/libya">https://www.unocha.org/middle-east-and-north-africa-romena/libya</a>
- 4 <u>Libya Humanitarian Needs Overview, OCHA, 2018</u>
- 5 Libya is divided into four types of administrative areas: 3 regions (admin level 1), 22 mantikas or districts (admin level 2), 100 baladiyas or municipalities (admin level 3), and muhallas, which are similar to neighbourhoods or villages (admin level 4).
- Due to limited sample size for this indicator, results are indicative and not representative
- 7 Multiple responses could be selected 8 Calculated using WEP CARI methodo
  - Calculated using WFP CARI methodology, detailed here.
- 9 Annual tax, mandated by the Libyan state, that Muslims are expected to pay as a religious duty and that is used for charitable and religious purposes
- Stress coping strategies: purchase on credit, reduce NFI expenses, sell non productive asset, spend savings
  - Crisis coping strategies: take an additional job, borrow money, reduce health expenses, sell productive asset Emergency coping strategies: begging (asking for food or money from strangers)
  - and degrading or illegal work

    Classify as chronic disease: blood pressure, heart disease, diabetes, asthma, joint
- 11 Classify as chronic disease: blood pressure, heart disease, diabetes, asthma, joint pain (arthritis), chronic back pain (spinal cord), cataract, stomach ulcers, epilepsy.
- 12 Calculated based on HHs who receive an income
- Damage has been assessed by enumerators according to the following scale (light damage = minor cracks in walls or roof, medium damage = many holes or large cracks in walls or roof but no structural damage, heavy damage = structural damage in the walls or roof, requires technical expertise to repair).

2

MSNA I LIBYA Annex

# CALCULATING UNMET NEEDS AND MULTISECTORAL NEEDS

For each sector, an index of unmet needs was calculated using one or multiple individual needs indicators\* selected by each active sector in Libya. If a household reported having an unmet need for one of the sectoral indicators, then they were considered to have unmet needs in that sector. The percentage of households with unmet needs per mantika and population group was then calculated.

The only exception is the Protection sector where, due to the large number of individual sectoral indicators, a threshold weighting was applied to displaced households (IDPs and returnees). In this instance, households were required to report having an unmet need for two or more indicators in order to be considered as having unmet needs in the sector.

\* Each of these indicators was also used by OCHA to calculate the People In Need (PIN) figure for the Humanitarian Needs Overview.

#### Multisectoral needs:

The multidimensional index of needs for each household was subsequently calculated as a total of the number of sectoral needs that the household faced (maximum of 6). This aggregated number can then be extrapolated to the mantika and national levels for each population group. Analysing the % of households by the number of sectors they have unmet needs in provides an understanding of the geographic variation in which humanitarian needs converge. Population groups and areas with a higher proportion of households with unmet needs in multiple sectors, such as in three or more at the same time, are likely to face acute problems in meeting their basic needs.

Multisectoral analysis presents an opportunity to identify and understand the interrelationships between sector-specific indicators that contribute to overall household needs. Adopting an integrated sector approach can help assess the impact of current and future interventions aimed at mitigating humanitarian needs. The multisectoral analysis presented above investigates the % of households that have needs in two sectors, for example in Protection & Health, presenting findings by each sector.

#### SECTORAL INDICATORS

#### Protection:

% HHs losing civil documentation because of conflict and not reapplying % HHs facing protection-related barriers to receiving humanitarian assistance

% HHs reporting presence of explosive hazards

% HHs with with members injured or killed by an explosive hazard

% of returnee HHs facing protection-related problems upon return

% IDP HHs hosting displaced family members or other displaced persons

% IDP HHs hosting displaced under 18 or unaccompanied children

% IDP HHs evicted or threatened with eviction in the past 6 months

% IDP HHs with members diagnosed with a clinical mental disorder or physical disability

% IDP HHs with children under 18 who have worked in the past month % IDP HHs displaced more than once since 2011

#### WASH:

% HHs reporting insufficient quantity of drinking water in the past month

#### Shelter & NFI:

% IDP and returnee HHs living in unfinished buildings, collective centres, informal settlements or open areas

% HHs living in heavily damaged or destroyed shelters

% HHs needing assistance to cover energy needs

% HHs recently evicted or threatened with eviction

% HHs reporting squatting as occupancy type

#### **Education:**

% HHs with at least one school-aged child not enrolled in school

% HHs with at least one school-aged child not regularly attending school

#### Health:

% HHs with an ill family member who did not go to a health facility % HHs facing challenges accessing health facilities due to damaged/ destroyed health facilities; no available health facilities that can accept new patients; lack of money to pay for care; Lack of medical staff; lack of medical supplies

% HHs reporting more than 1 hour by car to nearest health service provider % HHs with a women who gave birth in last 2 years, consulted by an uncertified midwife; nurse; relatives/friends; or no one

% HHs with a family member diagnosed with a chronic disease, clinical mental disorder or physical disability with no access to medicines/healthcare

#### Food security:

% IDP or returnee HHs reporting moderate or severe food insecurity according to CARI analysis\*

% non-displaced HHs reporting severe food insecurity according to CARI analysis\*

\* The Consolidated Approach to Reporting Food Security Indicators (CARI) takes into account a household's Food Consumption Score (FCS), the livelihoods coping strategies it uses, and the percentage of overall household expenditures that are spent on food.
