Findings were drawn from an analytical framework proposed by REACH at the global level for the implementation of all
Multi-Sector Needs Assessments, and incorporates elements from the global draft Joint Inter-sectoral Analysis Framework (JIAF).
The end result of this analytical framework, the Multi-Sector Needs Index (MSNI) draws on several components such as the impact
of the crisis on households; the living standard gaps (LSG, sectoral analysis); and the capacity gaps (negative coping strategies).
The MSNI categorizes households in minimal (1), stress (2), severe (3) or extreme (4) severity of needs.
