## Humanitarian Situation Overview in Syria (HSOS):

Urban quarterly household assessment in Hasakeh city and Raqqa city in Northeast Syria (NES)

SYR1701f

Syria

December 2021

Version 1

**REACH** Informing  
more effective  
humanitarian action

## 1. Executive Summary

Country of intervention	Syria				
Type of Emergency	<input type="checkbox"/>	Natural disaster	<input checked="" type="checkbox"/>	Conflict	
Type of Crisis	<input type="checkbox"/>	Sudden onset	<input type="checkbox"/>	Slow onset	<input checked="" type="checkbox"/> Protracted
Mandating Agency	REACH				
Project Code	16ATA - BHA				
Overall Research Timeframe	Training/pilot		01-07/12/2021		
	Training		05-09/01/2022		
	Data collection		10-23/01/2022		
	Data cleaning and analysis (with HQ dataset and analysis output validation)		23-27/01/2022		
	Output creation (with HQ validation)		30/01/2022-28/02/2022		
	Output publication		28/02/2022-02-03-2022		
	Preliminary/final presentation		03/03/2022-16-03-2022		
Number of assessments	<input checked="" type="checkbox"/>	Multi assessment (more than one cycle) This assessment will be carried out quarterly (round 1: January 2022, round 2: April 2022, round 3: July 2022, and round 4: October 2022).			
Humanitarian milestones	<b>Milestone</b>		<b>Deadline</b>		
	<input checked="" type="checkbox"/>	Donor plan/strategy	Ongoing		
	<input checked="" type="checkbox"/>	Inter-WG plan/strategy	Ongoing		
	<input checked="" type="checkbox"/>	WG plan/strategy	Ongoing		
	<input checked="" type="checkbox"/>	NGO platform plan/strategy	Ongoing		
Audience Type & Dissemination	<b>Audience type</b>		<b>Dissemination</b>		
	<input checked="" type="checkbox"/> Strategic <input checked="" type="checkbox"/> Programmatic <input checked="" type="checkbox"/> Operational <input type="checkbox"/> [Other, Specify]		<input checked="" type="checkbox"/> General Product Mailing (e.g. mail to NGO consortium; HCT participants; Donors) <input checked="" type="checkbox"/> WG Mailing <input checked="" type="checkbox"/> Presentation of findings (e.g. at HCT meeting; Cluster meeting) <input checked="" type="checkbox"/> Website Dissemination (Relief Web & REACH Resource Centre) <input type="checkbox"/> [Other, Specify]		

<b>Detailed dissemination plan required</b>	<input checked="" type="checkbox"/> Yes	<input type="checkbox"/> No
<b>General Objective</b>	<i>Provide multi-sectoral information on the humanitarian situation and priority needs of the host community and IDPs in urban areas in northeast Syria (NES) on a quarterly basis to inform response planning and prioritisation, and enhance key actors' understanding of the humanitarian context in cities.</i>	
<b>Specific Objective(s)</b>	<ul style="list-style-type: none"> <li>• Provide comprehensive information and analysis on the humanitarian situation in Hasakeh city and Raqqa city.</li> <li>• Identify and assess humanitarian sector-specific needs and priority needs at the city level</li> <li>• Understand the difference in needs/conditions between internally displaced persons (IDPs) and pre-conflict/resident populations at the household level in the assessed areas</li> <li>• Review the humanitarian situation beyond emergency conditions, integrating durable solutions and resilience.</li> </ul>	
<b>Research Questions</b>  Here there is the general scope of the research cycle and the specific focus of the first round of the assessment (expressed in the DAP).	1. What are the humanitarian needs of the crisis-affected populations in cities, regarding: <ul style="list-style-type: none"> <li>• Pre-existing vulnerabilities, crisis impact, living standards, coping mechanisms, and well-being?</li> <li>• Sectors including health, education, food security, livelihoods, nutrition, protection, shelter/NFI and WASH?</li> </ul> 2. What are the differences in needs and vulnerability across IDPs and residents of the host community in cities? <ul style="list-style-type: none"> <li>• How do the needs and access to services of IDP and resident households compare across sectors?</li> <li>• How does the economic situation of IDP and resident households compare?</li> <li>• How does the protection situation of IDPs and resident households compare?</li> <li>• What is the scale of the perceived tensions between IDPs and residents?</li> </ul> 3. What are the needs of IDPs and resident households in cities according to the Durable Solutions Platform (DSP) Syria Analytical Framework with regards to: <ul style="list-style-type: none"> <li>• Physical safety</li> <li>• Psycho-social safety</li> <li>• Material safety</li> <li>• Legal safety</li> </ul>	
<b>Geographic Coverage</b>	<i>Hasakeh and Raqqa city in Northeast Syria</i>	
<b>Secondary data sources</b>	<i>Humanitarian Needs Assessment Programme (HNAP) population data is used to create the sampling strata. Additionally, reports from other humanitarian and information management (IM) actors and news agencies such as <a href="#">HNAP reports and datasets</a>, <a href="#">HAT weekly updates</a>, <a href="#">COAR weekly updates</a>, <a href="#">INSO reports</a>, <a href="#">HSOS KI Factsheets and datasets</a>, the <a href="#">HSOS Dashboard</a>, and the <a href="#">HSOS Water and Electricity Trends Dashboard</a> - will be used to triangulate the data and provide relevant contextual information.</i>	
<b>Population(s)</b>	<input type="checkbox"/> IDPs in camp <input checked="" type="checkbox"/> IDPs in host communities <input type="checkbox"/> Refugees in camp <input type="checkbox"/> Refugees in host communities <input checked="" type="checkbox"/> Host communities (resident-pre/conflict population including returnees)	<input checked="" type="checkbox"/> IDPs in informal sites <input type="checkbox"/> IDPs [Other, Specify] <input type="checkbox"/> Refugees in informal sites <input type="checkbox"/> Refugees [Other, Specify] Returnees

<b>Stratification</b> <i>Select type(s) and enter number of strata</i>	<input type="checkbox"/>	<b>Geographical #:</b> Population size per strata is known? <input type="checkbox"/> Yes <input type="checkbox"/> No	X	<b>Group #:</b> 2- data disaggregated by host and IDP populations  Population size per strata is known?  X Yes <input type="checkbox"/> No	<input type="checkbox"/>	<b>[Other Specify] #:</b> __  Population size per strata is known?  <input type="checkbox"/> Yes <input type="checkbox"/> No
<b>Data collection tool(s)</b>	X	Structured (Quantitative)		<input type="checkbox"/>	Semi-structured (Qualitative)

## 2. Rationale

### 2.1 Background

After more than ten years of conflict in Syria, the crisis continues to have major impacts on the lives of civilians across the country. Although significant episodes of destruction have taken place in urban areas, many Syrians, including a large proportion of IDPs, are living in towns and cities. Because high levels of infrastructure damage limit the capacity of local and humanitarian actors to deliver key services, and because the composition of the population in need is highly dynamic, the humanitarian situation in urban areas is particularly complex.

As a result, there is a need for more in-depth and representative data on the humanitarian needs of populations living in urban areas, particularly in Northeast Syria. Among these areas, Raqqa and Hasakeh are some of the largest cities in the region, with populations of approximately 220,000 and 188,000 residents, respectively. Additionally, these cities are some of the most accessible to humanitarian organisations. Therefore, REACH has selected Hasakeh and Raqqa for a series of in-depth, multisectoral household-level assessments that are aimed at addressing humanitarian needs in these cities in particular, and in urban areas in Northeast Syria more broadly.

## **2.2 Intended impact**

The assessments will provide humanitarian organisations with more in-depth information on humanitarian needs and conditions in Hasakeh and Raqqa city than is currently available, e.g. through Key Informant-based methodologies such as REACH's monthly HSOS project. The project will include household-level interviews, with households to be sampled at random and stratified by host community member and IDP status. The resulting data will be statistically representative for each group at the city level, which will provide detailed insights into differences in conditions between households with different displacement statuses. The ultimate aim is for humanitarian actors to use the project's findings to enhance their data driven decision making within the cities of interest, as well as to inform advocacy on the humanitarian conditions within urban areas and the differences in needs between host communities and IDPs.

## **3. Methodology**

### **3.1 Methodology overview**

Data is collected at the household level in Hasakeh city and Raqqa city. Households are selected at random, using a GIS-based methodology. The sample is stratified by two groups: IDPs and host community members (see the Population of Interest section below), allowing for disaggregation of findings for both groups. Households will be interviewed face-to-face by REACH enumerators working in gender-mixed couples. Data collection is to be coordinated from Jordan (Amman). The interview route consists of multisectoral questions that have been selected in coordination with humanitarian clusters/working groups/etc. The assessment's research questions might be adapted depending on the findings from the first round of data collection.

### **3.2 Population of interest**

The Urban quarterly household assessment covers the most populated urban centres in Northeast Syria, namely Hasakeh city and Raqqa city. In order to understand and compare the conditions of both pre-conflict/resident populations and internally displaced persons (IDPs), the assessment covers a representative sample of each population group. Households are the unit of measurement of the assessment. Due to the chosen sampling technique and according to the data collection guidelines, the sample excludes households living in non-residential areas (as classified on OpenStreetMap) and households whose members are all below 18. Households residing in areas under the control of the Government of Syria (GoS) or in their proximity, and households residing in inaccessible or high risk residential areas are also excluded from the sample.

### **3.3 Secondary data review**

Information available on humanitarian conditions in Hasakeh and Raqqa cities includes [HNAP reports and datasets](#), [HAT weekly updates](#), [COAR weekly updates](#), [Relief Web](#) reports, [INSO reports](#), [HSOS KI Factsheets and datasets](#), [the HSOS Dashboard](#), and [the HSOS Water and Electricity Trends Dashboard \(NES\)](#). Information obtained from secondary data sources will be incorporated into the report to provide additional context and explain relevant

findings. Humanitarian Needs Assessment Programme (HNAP) population data is used to create the sampling strata, and OpenStreetMap will be used to identify residential areas. It is worth noting that OpenStreetMap is an open source with classification done by members of the public, which constitutes a limitation of the assessment design.

### **3.4 Primary Data Collection**

Face-to-face data collection is carried out by REACH's enumerators at the beginning of every quarter, provided that the conditions for safe face-to-face data collection are met, and following COVID-19 mitigation measures (as outlined in REACH's "[Guidelines: SOPs for Data Collection during COVID-19](#)"). Enumerators work in gender-mixed couples and assess randomly selected households by approaching them in their places of residence. Each round of data collection lasts ten working days; each couple of enumerators is expected to interview three households per day, on average.

A representative sample of the resident and the IDP population is covered in each city. According to the population estimates collected by Humanitarian Needs Assessment Programme (HNAP) in the second half of October 2021, 19,287 resident households and 17,197 IDP households were residing in Hasakeh city (excluding areas that are not accessible by REACH enumerators as mentioned in paragraph 3.2). 96 households of each population group (i.e. resident or IDP population) need to be assessed in order to obtain representative data with 95% level of confidence and 10 +/- % margin of error. A buffer of 10% is added to the sample in order to account for deletions in the cleaning phase. Stratified simple random household selection is performed through random spatial sampling using geographic information systems (GIS). In particular, the 106 sample units of each population group are allocated across all accessible neighbourhoods according to the size of their resident/IDP population. Once the enumerators have reached the randomly generated geopoint, household selection will follow convenience sampling techniques. For this reason, the sample is biased toward cooperative, readily available households and households where at least one adult member is at home during the time of data collection. Should the selected household not fit the research criteria, enumerators disengage and find another household in the same location.

A multi-sectoral questionnaire has been designed for this assessment in order to fill information gaps as highlighted by Working Group/Cluster Coordinators. When possible, questions were formulated in the same way as in other existing REACH Syria questionnaires. Multi-sectoral questionnaires implemented in Syria by other agencies have also been consulted during the design phase of the tool.

During data collection, the Field Officer will liaise with the enumerators in order to validate their position, ensuring that it follows the random spatial sampling. At the end of each working day, enumerators communicate their progress to the Field Officer. The Field Officer compares enumerators' progress with the submissions on KoBo, and double-checks any discrepancy. At the same time, the Assessment team will monitor the metadata coming from the submissions on KoBo, including the length of the interview, the time between different interviews conducted by the same couple of enumerators, and the number of changes in answers applied during the interview). The Assessment team communicates any concern regarding data quality to the Field Officer, who addresses the potential issue with the enumerators.

### **3.5 Data Processing & Analysis**

Each couple of enumerators will carry in the field a paper form of the questionnaire, in Arabic, and a work phone to record answers through KoBo. Enumerators are expected to submit the interviews on KoBo on the same day in which the interview was carried out. Data quality checks are implemented on a daily basis by the assessment team and are aimed at spotting and flagging enumerators' behaviours that are of concern for data quality. Data cleaning takes place at the end of each round of data collection. During data cleaning, duplicate uids are spotted and deleted, "Other" replies are translated from Arabic to English and interviews that do not meet the minimum standards of data quality (including minimum length to complete the questionnaire, adequate number of different answer options between different surveys,

and absence or adequate number of logical checks being triggered) are deleted. The cleaning process will follow the [“IMPACT Minimum Standards Checklist for Data Cleaning and Processing for Structured \(Quantitative\) Data”](#).

Data analysis is performed after data cleaning through an R script. During data analysis, findings are aggregated by population group (i.e. residents and IDPs). The representative finding for the resident and the IDP populations are then weighted in order to describe the total Syrian population of the city. An excel output and an html output will be produced.

## 4. Key ethical considerations and related risks

The proposed research design meets / does not meet the following criteria:

<i>The proposed research design...</i>	<i>Yes/ No</i>	<i>Details if no (including mitigation)</i>
... Has been coordinated with relevant stakeholders to <b>avoid unnecessary duplication</b> of data collection efforts?	Yes	
... <b>Respects respondents, their rights and dignity</b> ( <i>specifically by: seeking informed consent, designing length of survey/ discussion while being considerate of participants' time, ensuring accurate reporting of information provided</i> )?	Yes	
... Does not <b>expose data collectors to any risks as a direct result</b> of participation in data collection?	Yes	
... Does not <b>expose respondents / their communities to any risks as a direct result</b> of participation in data collection?	Yes	
... Does not involve <b>collecting information on specific topics which may be stressful and/ or re-traumatising</b> for research participants (both respondents and data collectors)?	Yes	
... Does not involve <b>data collection with minors</b> i.e. anyone less than 18 years old?	Yes	
... Does not involve <b>data collection with other vulnerable groups</b> e.g. persons with disabilities, victims/ survivors of protection incidents, etc.?	No	Households are selected randomly and could be part of a vulnerable group. Enumerators have been trained in dealing with protection incidents to mitigate the risk.
... Follows IMPACT SOPs for management of <b>personally identifiable information</b> ?	Yes	

## 5. Roles and responsibilities

Table 3: Description of roles and responsibilities

<i>Task Description</i>	<i>Responsible</i>	<i>Accountable</i>	<i>Consulted</i>	<i>Informed</i>
<i>Research design</i>	HSOS focal point, HSM SAO, HSOS AO	HSOS focal point	HSM Research Manager (RM),	Country Representative, Clusters

			Senior Data Specialist, IMPACT HQ Research Design and Data Unit (RDDU), Clusters	
Supervising data collection	Field coordinators	HSOS focal point	HSM Research Manager (RM)	Country Representative
Data processing (checking, cleaning)	HSOS focal point, field coordinators, HSOS AO, HSM technical AO	HSOS focal point	Research Manager (RM), Senior Data Specialist, IMPACT HQ RDDU	Country Representative
Data analysis	Senior Data Specialist, HSOS Technical lead, HSOS focal point	HSOS focal point	Research Manager (RM), Senior Data Specialist, IMPACT HQ RDDU	Country Representative
Output production	HSOS focal point, HSOS Technical lead, HSOS AO, GIS Specialist	HSOS focal point	Research Manager (RM), Senior Data Specialist, IMPACT HQ Reporting Unit	Donors and partners
Dissemination	HSOS focal point	HSOS focal point	HSM Research Manager, IMPACT HQ Research Department	Donors and partners
Monitoring & Evaluation	HSOS focal point	HSOS focal point	Research Manager (RM), Country Representative	IMPACT HQ Research Department
Lessons learned	HSOS focal point, HSM SAO, HSOS AO	HSOS focal point	Research Manager (RM), Country Representative	IMPACT HQ Research Department

**Responsible:** the person(s) who executes the task

**Accountable:** the person who validates the completion of the task and is accountable of the final output or milestone

**Consulted:** the person(s) who must be consulted when the task is implemented

**Informed:** the person(s) who need to be informed when the task is completed

***NB: Only one person can be Accountable; the only scenario when the same person is listed twice for a task is when the same person is both Responsible and Accountable.***

## 5. Data Analysis Plan

Research questions	IN #	Data collection method	Indicator group sector /	Indicator Variable /	Questionnaire Question	Instructions	Questionnaire Responses	Data collection level	Sampling	Disaggregation variable(s)	(For probability sampling) Are disaggregation variables in line with stratification plan? Y/N	Maps planned?
N/A	0.1	HH Interview	Key characteristics	City	Please select the city you are working in:	(Select one)	Al-Hasakeh, Ar-Raqqa	N/A	Stratified simple random sampling (by neighbourhood)	N/A	N/A	
	0.2	HH Interview	Key characteristics	Neighbourhood	Please select the neighbourhood in which you are conducting this survey:	(Select one)	[list of neighbourhoods]	N/A	Stratified simple random sampling (by neighbourhood)	N/A	N/A	
	0.3	HH Interview	Key characteristics	Enumerator ID	Please select your enumerator code:	(Select one)	[list of team numbers]	N/A	Stratified simple random sampling (by neighbourhood)	N/A	N/A	
	0.4	HH Interview	Consent	Respondent consent	<p>Hello, my name is _____ and my colleague's name is _____.</p> <p>We work for the humanitarian organisation ACTED. We are working on a survey to better understand the conditions and needs of locals and internally displaced people in this city. For this reason, we are interviewing many households in different parts of the city.</p>	(Select one)	Yes, No	N/A	Stratified simple random sampling (by neighbourhood)	N/A	N/A	

				<p>We randomly selected your household and we would like to ask you some questions about your living conditions and needs. Some questions are related to you and your household demographics, such as how many people reside in your household, ages, and whether or not you work. Some questions are about your household's livelihoods and financial situation, such as how much money you and your household spend per month and what you eat. Some questions are about your community, such as your household's relationship with the community. Some questions are about available services, such as markets and healthcare services. We will collect this information from you and many other households in the city. This information will help humanitarian organisations to understand the current situation in this city and how to better aid locals and internally displaced people. We will not share with anyone any information regarding your household, such as your names, location, situation or problems.</p> <p>Participating to our survey does not mean you will receive assistance from us in the future. There is no monetary incentive to do so. It is an entirely voluntary interview, and you are free to refuse to answer any specific questions. However, we hope you will participate because your knowledge is critical to understanding the city's situation and challenges.</p> <p>Do you have any questions?</p>						
--	--	--	--	---	--	--	--	--	--	--

				<p>The interview lasts more or less one hour. Is it appropriate to interview you at this time?</p> <p>If someone arrives to your home while we are talking, would you like to interrupt the interview or can we continue?</p> <p>My colleague will take note of your answers on the phone while I ask you the questions. We will not record your voice and we will not take any picture.</p> <p>Do you agree to being interviewed?</p> <p>If you don't have any other questions, may I begin now?</p>							
0.5	HH Interview	Consent	Enumerator consent	<p>Do the enumerators wish to continue with this interview?</p> <p>(Return to this question and select "No" if you need to terminate the interview before it is complete).</p>	(Select one)	Yes, No	N/A	Stratified simple random sampling (by neighbourhood)	N/A	N/A	
0.6	HH Interview	Consent	Termination reasons	<p>Please select the reason(s) why you decided to terminate this interview.</p>	(Select all that apply)	<p>Wrong population target (Resident/IDP/Non-Syrian), Respondent is under 18, Respondent does not know enough, Respondent is unable to provide clear answers, Respondent does not have enough time to finish the interview, Enumerators feel uncomfortable or unsafe, Enumerators need to leave for other reason (specify in the notes), Other</p>	N/A	Stratified simple random sampling (by neighbourhood)	N/A	N/A	
0.6.1	HH Interview	Consent	Termination reasons	<p>Please specify which other reason:</p>	(Write text)	_____	N/A	Stratified simple random sampling (by	N/A	N/A	

									neighbourhood)			
<b>What is the demographics composition of the city? Is there a difference between residents and IDPs?</b>	1.1	HH Interview	Demographics	HH composition	1.1 What is the total number of individuals in your household (including yourself)? # Male newborn (under 2) ____ # Female newborn (under 2) ____ # Young boys (2-4) ____ # Young girls (2-4) ____ # School-aged boys (5-17) ____ # School-aged girls (5-17) ____ # Male adults (18-59) ____ # Female adults (18-59) ____ # Male elderly (60+) ____ # Female elderly (60+) ____	(Enter number)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No
<b>What is the demographics composition of the city in terms of displacement characteristics?</b>	2.1	HH Interview	Displacement	HH displacement status (Residents and IDPs)	2.1 Did you live in this community prior to the beginning of the crisis in 2011?	(Select one)	Yes, No	HH	Stratified simple random sampling (by neighbourhood)	NA	NA	No
	2.2	HH Interview	Displacement	HH displacement status (Returnees)	2.2 If yes, has your household previously been displaced from your community of origin for more than a month?	(Select one)	Yes, No	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents)	Yes	No
	2.3	HH Interview	Displacement	Date of last return	2.3 When did your household most recently return to your current location?	(Enter date. Last return date in case of multiple displacements.)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Returnees)	No	No
	2.4	HH Interview	Displacement	Number of displacements for returnees	2.4 How many times have the majority of your household's members been displaced since the beginning of the conflict?	(Enter number)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Returnees)	No	No

**Humanitarian Situation Overview in Syria (HSOS) Urban Household Assessment, December 2021**

	2.5	HH Interview	Displacement	Place of origin for IDPs (Governorate)	2.5 What governorate in Syria were you living in before your original displacement?	(Select one)	[list of governorates]	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (IDPs)	Yes	No
	2.6	HH Interview	Displacement	Place of origin for IDPs (Sub-district)	2.6 What sub-district in Syria were you living in before your original displacement?	(Select one)	[list of sub-districts]	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (IDPs)	Yes	No
	2.7	HH Interview	Displacement	Date of arrival	2.7 When did your household arrive in its current location?	(Enter date. Current location refers to where you currently reside/live.)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (IDPs)	Yes	No
	2.8	HH Interview	Displacement	Number of displacements for IDPs	2.8 How many times have the majority of your household's members been displaced since the beginning of the conflict?	(Enter number)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (IDPs)	Yes	No
What is the level of access to education for children in schooling age? Is there a difference between residents and IDPs?	3.1.0	HH Interview	Education	Respondent consent (education)	3.1.0 You indicated there are \${children_school} children in schooling age (5-17) in the household. The next questions ask about school attendance. Do you agree to answering these questions?		Yes, No	HH	Stratified simple random sampling (by neighbourhood)	NA	NA	No
	3.1	HH Interview	Education	Children aged 5-17 that regularly attend education	3.1 How many children attended education for at least 3 days per week (in the past 30 days)?	(Enter number)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No
	3.2	HH Interview	Education	Type of education attended	3.2 What type of education?	(Select all that apply)	Attended regular formal school in classrooms, Attended regular formal school through	HH	Stratified simple random	HH displacement status	Yes	No

						distance/remote learning, Attended non-formal learning in classrooms (catch-up, accelerated learning, literacy/numeracy, etc.), Attended non-formal learning through distance/remote learning (catch-up, accelerated learning, literacy/numeracy etc.), Don't know, Prefer not to answer, Other		sampling (by neighbourhood)	(Residents and IDPs)		
3.2.1	HH Interview	Education	Type of education attended	3.2.1 Please specify which other type of education:	(Write text)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No
3.3	HH Interview	Education	Challenges while attending school faced by children aged 5-17	3.3 Which challenges did your school-aged children face while attending school in the past 3 months, if any?	(Select all that apply)	No challenges, Quality of available education is poor/perceived to be poor, Classes are overcrowded, School lacks trained teachers, School lacks learning and teaching materials, School lacks proper class furniture, The physical condition of the school is not safe/not good enough, Don't know, Prefer not to answer, Other	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No
3.3.1	HH Interview	Education	Challenges while attending school faced by children aged 5-17	3.3.1 Please specify which other challenges:	(Write text)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No
3.4	HH Interview	Education	Barriers to attending school faced by children aged 5-17	3.4 For which reason(s) your school-aged children did not regularly attend schooling in the past 30 days?	(Select all that apply)	There is no school for child's age-group, Schools closed/educational services suspended due to COVID-19, Lack of personal documentation required to enrol in schools, Not enough information is available about how to enrol children, Barriers related to transportation (school is far, lack of transportation, high cost of	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No

							transportation, travelling to school is unsafe), Scared of going to school due to attacks on schools/presence of explosive ordnance in, around or on the way to school, Scared of going to school due to COVID-19, Children have to work, Children do not have the proper clothes/shoes to attend, Unable to afford learning material and/or pay for school fees, Social issues (e.g. education not being considered important, children not wanting to go to school, specific groups being marginalised etc.), Challenges specific to girls (e.g. families don't allow their attendance/continued education, fear of harassment on the way to/inside school, lack of privacy in toilets), Health issues (e.g. physical, mental or emotional condition of children, such as stress-related learning difficulties, or school cannot accommodate children's needs), Disability of the child (lack of access/inclusion), Don't know, Prefer not to answer, Other					
	3.4.1	HH Interview	Education	Barriers to attending school faced by children aged 5-17	3.4.1 Please specify which other barriers:	(Write text)	_____	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No
What is the level of access to a safe shelter and durable housing? Is there a difference	4.1	HH Interview	Shelter	Type of shelter	4.1 In what type of shelter/housing does the household currently reside?	(Select one)	Solid/finished house, Solid/finished apartment, Hotel, Unfinished or abandoned residential building, Damaged residential building, Non-residential structure with one family (garage, farm house, shop). Collective centre with	HH	Stratified simple random sampling (by neighbourhood)	HH displacement status (Residents and IDPs)	Yes	No

between residents and IDPs?						more than one family (Religious building, public building, warehouses, poultry farms, private structure, etc.), Concrete block shelter, Container, Tent, Makeshift shelter with scavenged materials, Don't know, Prefer not to answer, Other
