

# YEMEN- Water Access

Humanitarian accessibility- January 2019 VS Distance traveled by water truck- April 2019

For Humanitarian purposes only  
Production date : 28 May 2019

## Humanitarian accessibility

- Accessible or low access constraints (31 districts)
- Medium access constraints (11 districts)
- High access constraints (1 district)

## Distance traveled by truck (in KM)

- Not assessed
- 2-7
- 7.1-13
- 13.1-20
- 20.1-35

Data sources:  
Access severity scores Jan 2019 - OCHA  
JMMI Water trucking data April 2019 - REACH  
Coordinate System: WGS 1984 Web Mercator Auxiliary Sphere

Note: Data, designations and boundaries contained on this map are not warranted to be error-free and do not imply acceptance by the REACH partners, associated, donors mentioned on this map.

Note: Humanitarian Accessibility data was provided by OCHA through focus group discussions of humanitarian workers ranking the district as "low access constraint" (relatively few obstacles in conducting operations), "medium access constraint" (operations are

occurring but restrictions are present), "high access constraint" (heavy restrictions and obstacles hinder or stop operations from occurring). while median distance traveled data was provided by the REACH JMMI monthly questionnaire.
