

# Somalia Initial Rapid Needs Assessment

Woqooyi Galbeed, Somaliland, Somalia  
April 2016

## Background and Methodology

In February 2016 following successive low precipitation rainy seasons the Government of Somaliland issued a declaration of drought. The drought is reported to have a high impact on the primarily pastoralist communities and livestock within the affected regions of Somaliland and Puntland. While responses are ongoing, low rainfall predictions for the Gu season could necessitate a revised strategic response. As a result the WASH Cluster triggered a SIRNA to identify key needs and services in order to inform the second stage response.

This factsheet highlights preliminary findings from 18 communities within Woqooyi Galbeed, Somaliland, assessed between 24-Mar-16 and 04-Apr-16, as part of this joint exercise. Information is based on an indicative sample only.

This factsheet is accompanied by a full assessment report, and a total of 9 factsheets - for Somaliland and Puntland states; and Awdal, Bari, Nugaal, Sanaag, Sool, Togdheer and Woqooyi Galbeed regions.

## Location Map

## Overview

# of assessed communities:

18

Primary drinking water sources:\*

- 1) Burkad (82%)
- 2) Unprotected well (11%)
- 3) Water trucking (3%)

## Demographics

## Shelter Type

## Reported Priority Needs

- Priority needs reported by the assessed households were:
- 1 Food (97%)
  - 2 Water (92%)
  - 3 Healthcare (74%)

## Assessed Communities

## Sectoral Overview

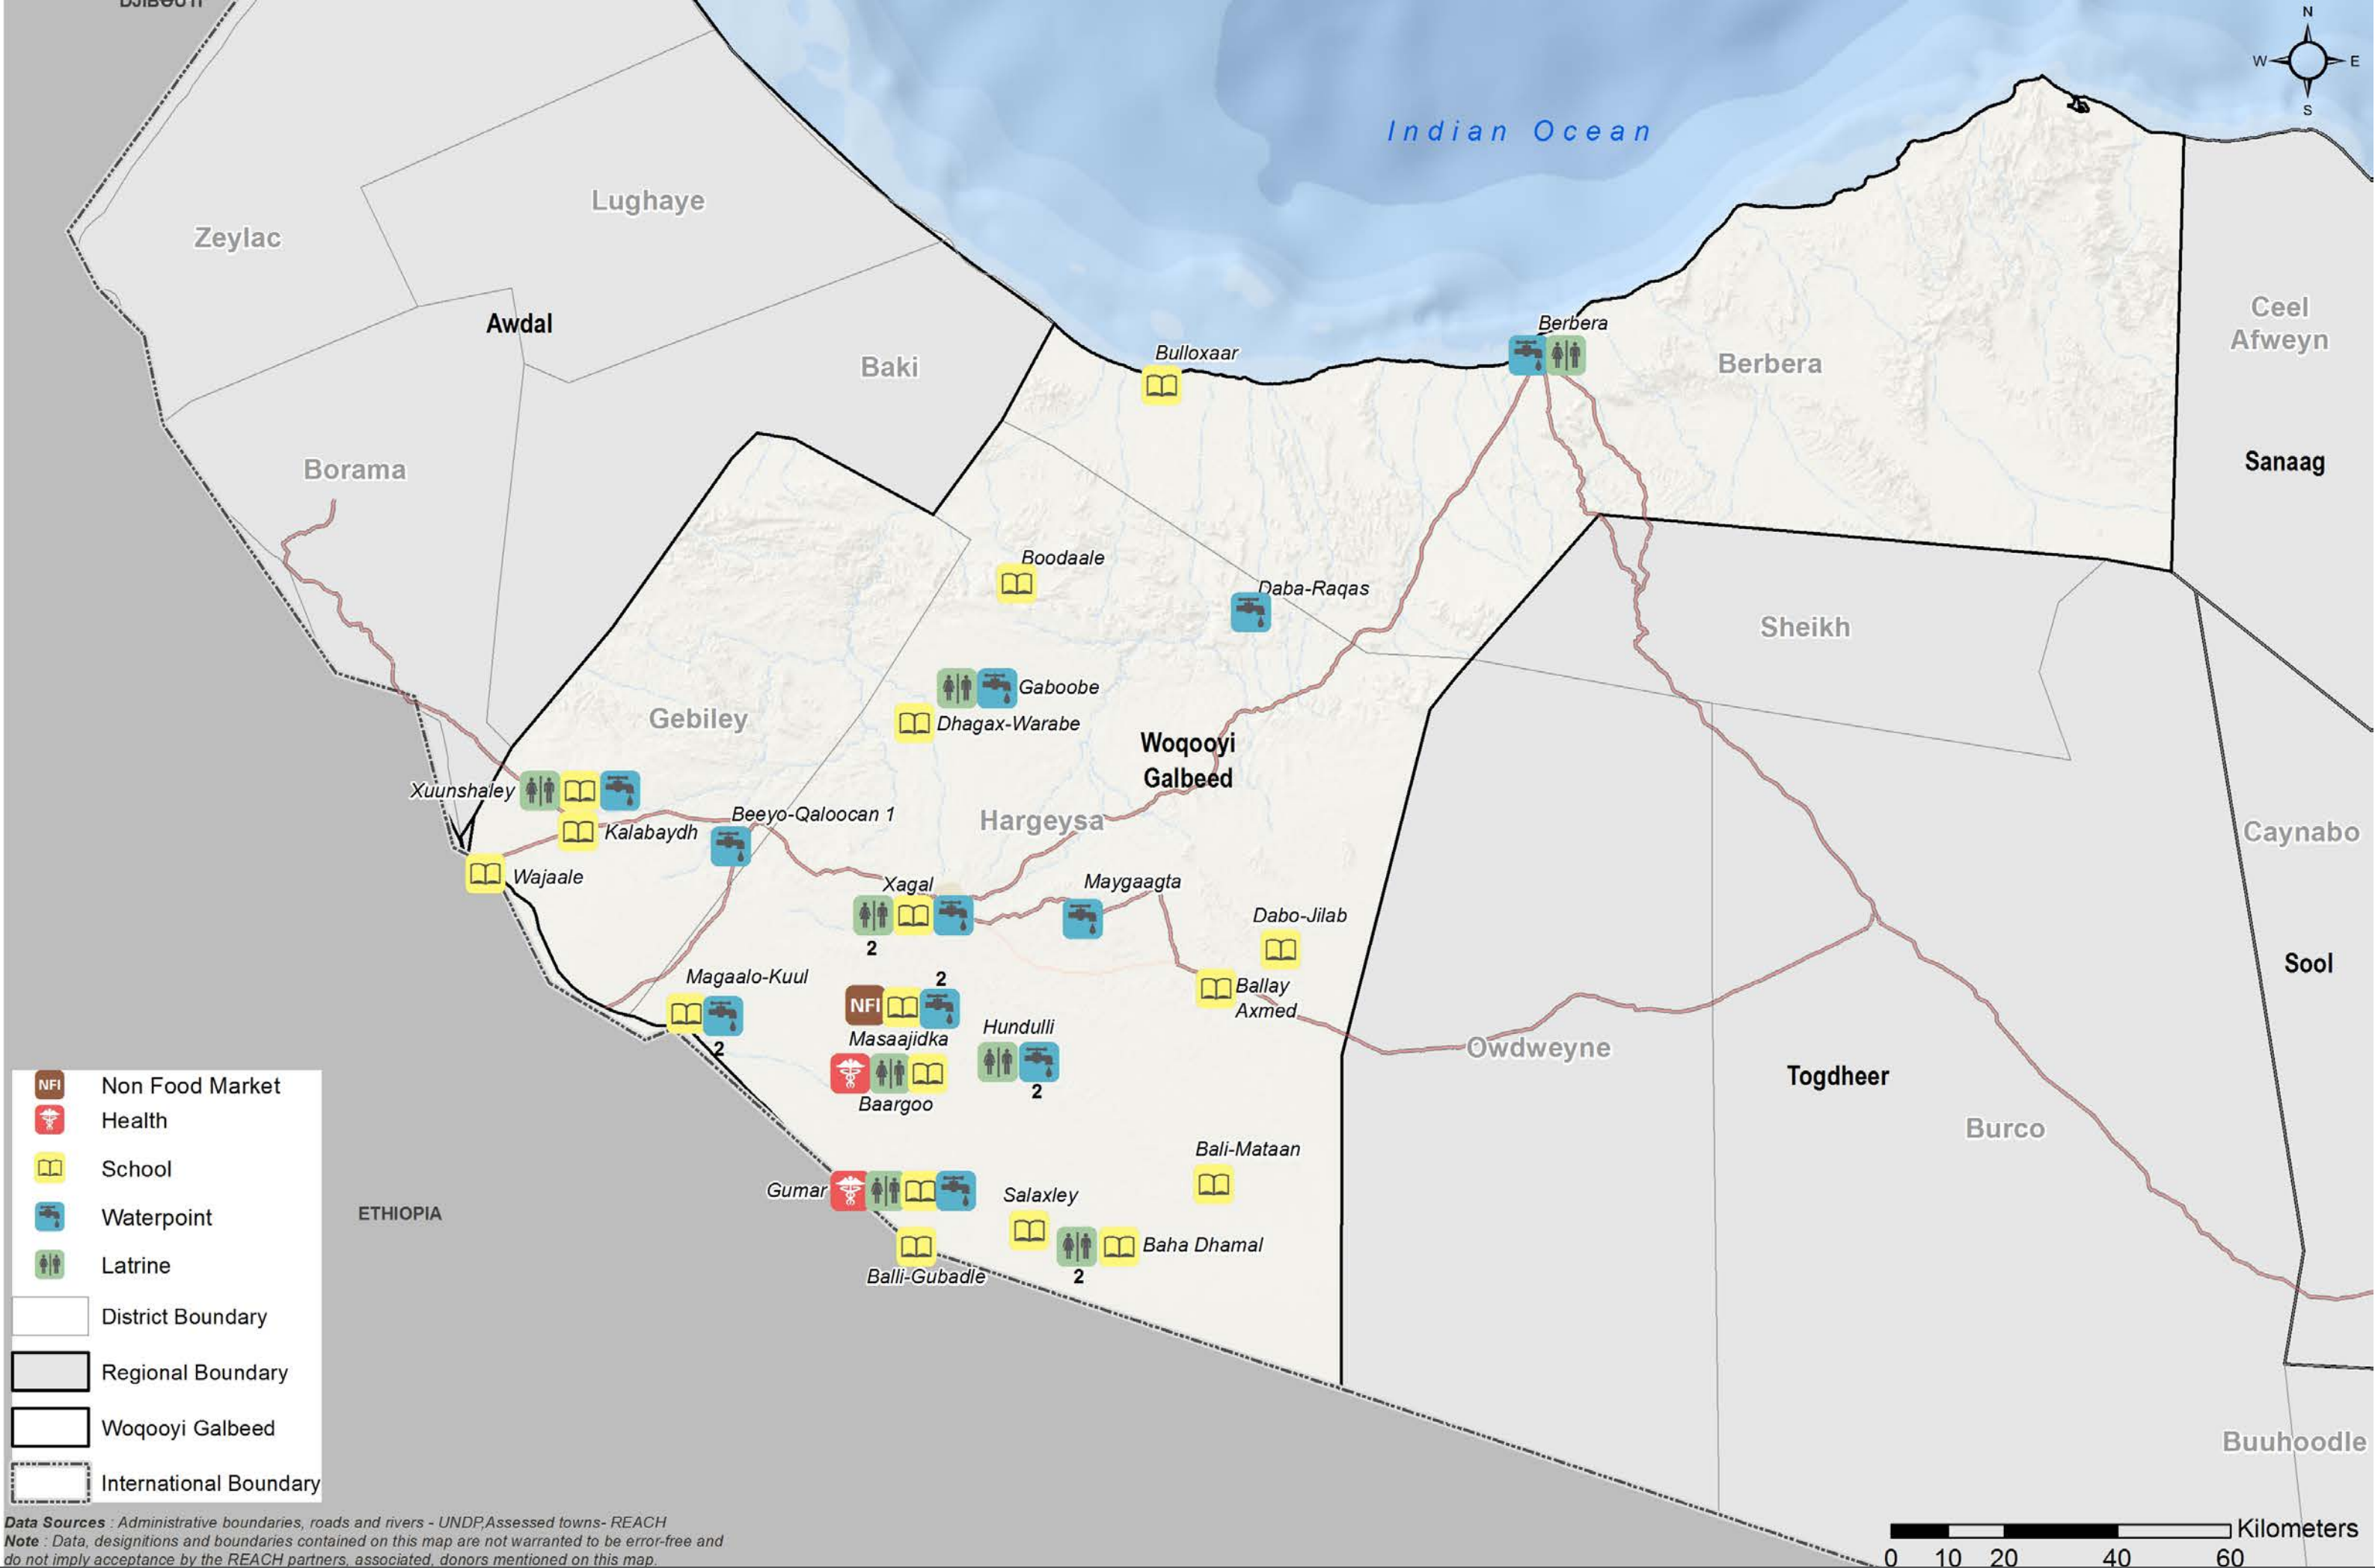

Sector	Indicator	Target	Achieved	
Education	% of children aged 5-12 accessing primary education at time of assessment (girls/boys)	100%	6% / 8%	●
	% of HH with children who have stopped attending school since the drought	0%	4%	●
	Ratio of teachers to students in functioning schools	1:45	1:34	●
Health	% of HH reporting health concerns	0%	38%	●
	% of HH reporting increased difficulty in accessing healthcare since the drought	0%	34%	●
	% of HH reporting increase in healthcare spending since the drought	0%	6%	●
Food Security	% of HH with acceptable food consumption scores	100%	1%	●
	% of HH reported negative food consumption coping strategies as a result of drought	0%	83%	●
	% of HH reporting loss of livestock as a result of drought	0%	77%	●
Nutrition	% of HH reporting a negative change in accessing nutrition services since the drought	0%	0%	●
	% of settlements with nutrition services available within the settlement	100%	0%	●
	% of HH with infants reporting that baby care items have been distributed since the drought*	0%	10%	●
