**Shelters location from water point**

●	Within 200 m. zone
●	Outside 200 m. zone

Note: This map shows the water distribution system in Awerial IDP Sites and the shelters identified by Worldview-2 satellite, 13,492 as of 3 July.

The distance to water has been calculated using the data from partners showing the water points, then using a ring system around all water points to show the SPHERE distance standards and the shelters that fall within each standard.

According to the UNOSAT shelter locations, 2 941 shelters are within 100 meters of a water point, 5 717 within 101-200 meters, 3 567 within 201-300 meters, 2 040 within 301-500 and 428 within 501-700 meters.
